While experiences vary according to regional habits, local population structure, and type of work, they agree on one point; namely, that much depends on the management's own approach. Where management reluctantly yields to local Negro or governmental pressure, the result generally is trouble. Where management conceives the hiring of Negroes to be part of its own wartime labor policy and sticks to it, results are encouraging. They are exemplary where management and unions join forces against discrimination. In fact the unions' responsibility for the Negro's economic fate equals, if it does not surpass, that of management.

Dues the unions don't want

For labor unions to turn against any group of men who have to work for a living contradicts their original aims but at least not the written constitutions of some of them. Nineteen international unions, ten of them affiliated with the A.F. of L., explicitly exclude Negroes from membership. Officially, the A.F. of L. advises its affiliated organizations not to retain a constitution discriminating against Negroes. So diplomats of those internationals long ago found an ingenious way out: the machinists, for example, exclude Negroes by a ritualistic oath. In America, and in the twentieth century, prospective union men must make a solemn promise that they will introduce into their union only "competent, white" men. To eliminate this hocus-pocus, the A.F. of L. leaders argue, is beyond their jurisdiction since affiliated internationals and locals have jealously preserved their independence. Management usually accepts the situation, even where there is no closed shop, since most of the discriminating unions include highly skilled workers whom the employer cannot afford to lose to a competitor. Closed shop or no, in times of inflated demand for skilled labor no Negro can get into a machine plant if the worker aristocrats don't want him there.

In certain places and industries the congestion of war orders has been so heavy that discriminating unions could not totally obstruct Negro employment without endangering production and their own jobs. In some of these instances a peculiar device is used: the Negro is not accepted as a member, but purchases from the union a working permit—an interesting hybrid of tenant feudalism and industrial democracy.

The C.I.O., officially opposed to racial discrimination, is built on the principle of industrial, vertical organization and intends to embrace "all the workers." Furthermore, centralization is more strongly stressed in the C.I.O. than in the A.F. of L. so that headquarters have direct responsibility for the policy of a local. On both accounts Negroes have good reason to prefer the C.I.O. to the A.F. of L.

The inexhaustible variations of life, however, produce weird results in the struggle between the two organizations. In Birmingham, Alabama, of all places, the A.F. of L. acted as the advocate of the Negro ironworkers, merely because the local C.I.O. did not. Enjoying the bargaining rights in the two Birmingham plants of the Ingalls Iron Works, the C.I.O. had done little to improve the situation of the Negro workers (about a third of the personnel). The job classifications, they complained, were unfair, keeping Negroes in a low-paid wage stratum regardless of the job done The part they played in union affairs was not commensurate with their numerical strength. Last year the Negroes offered to bolt the C.I.O. when and if the A.F. of L. would promise to right their grievances. Assured of a new deal from the A.F. of L., the Negroes shifted their votes and the C.I.O. lost its hold at Ingalls. In negotiating the next contract the A.F. of L. lived up to its promises: the

How to Expand Your Plant without waiting to build!

Use Outdoors for Storage behind an ANCHOR FENCE

An Anchor Fence *around* your plant does double duty: (1) It releases indoor space for production by permitting safe outdoor storage; (2) controls incoming traffic—with minimum expense for guards.

Anchor enclosures *within* the plant give more complete protection by keeping unauthorized persons away from power stations, chemical and fuel supplies and other vital points.

Anchor Fences can be erected in any soil, in any weather, even when the ground is frozen. The exclusive patented driven "Anchors" hold the fence erect and in line, yet can be moved without loss in case of plant expansion.

Send for an Anchor Engineer today. Get the benefit of Anchor's 50 years of industrial fencing experience. Write for Catalog—and name of nearest Anchor Fence Engineer. Anchor Post Fence Co., 6576 Eastern Ave., Baltimore, Md.

The Negro's War

[*Continued from page 157*]

Negroes' jobs have been reclassified and they are now paid for what they do; they serve on the shop grievance and contract committees; they share justly with white men the pay raise gained last year. Such miracles happen when two unions fight for jurisdiction —food for thought on the merits of competition in general, and the closed-shop issue in particular.

Where organized labor indulges in ethnological double talk, industry is prevented from fully utilizing its potentialities. When Chrysler in Detroit tried to overcome the scarcity of skilled labor by upgrading and transferring able Negro workers, the C.I.O. personnel in a division of the Highland Park plant went on a sit-down strike. It took War Department intervention and a firm stand by both management and national union leadership to protect the Negroes and the country's claim on unhampered defense production. When Packard shifted two expert Negro metal finishers from work on automobiles to the polishing department of a new tank plant, 250 C.I.O. members staged a forty-minute sit-down strike, holding up the work of 600 persons. The Negroes were withdrawn; and for the following six months the U.S. Government, the Executive Committee of the United Automobile Workers-C.I.O., and the Packard company were interlocked with the personnel in a wrestling match over two American citizens' right to contribute their skill to the production of tanks. Fortunately, government, company, and union leaders did not back down but finally told the race-conscientious objectors either to work or to get out. Consequently, all usable labor is now harnessed smoothly to production.

The Labor Division of the War Production Board has a special Negro Employment and Training Branch, under Dr. Robert C. Weaver, which is attempting to secure the unions' cooperation. Improvements are slow but undeniable. In some regions C.I.O. and A.F. of L. officials have formed joint-action committees to speed the integration of Negroes into union shops. Usually, C.I.O. headquarters is willing to put serious pressure on locals that are not yet impressed by the President's order. Although William Green of the A.F. of L., testifying before Representative Tolan's House Committee on National Defense Migration, was not particularly outspoken against the discriminatory practices of some of his unions, an increasing number of A.F. of L. organizations have put a damper on their racial feelings. But the unions still have a long way to go.

The high tax on discrimination

What America's Negro community resents as employment discrimination is in part due to the fact that the bulk of Negro labor is still unskilled. Every third gainfully working white American belongs to the skilled and semiskilled groups, but only one out of each eight working Negroes. In FORTUNE's manpower study of last April, training and upgrading of unskilled labor was shown to be a prime prerequisite for full mobilization of America's human resources. For the Negro it is more than that. He will march into a richer life through training schools or not at all.

On his initial steps along this road he has not exactly been encouraged. Here is an over-all picture of conditions in eighteen selected southern and border states and the District of Columbia. Over 22 per cent of the population in this area is Negro; but in the preemployment and refresher-training courses, supervised by the U.S. Office for Education, only 3,215 Negroes were enrolled last January—less than 4 per cent of the trainees. Out of 4,630 training sources only 194 accepted Negroes.

[*Continued on page 160*]

Many Manufacturing Executives

have called on us.

— asking us to help them with their engineering problems—many of them came again and again — because they liked "our company"— over these many years.

Today our efforts are being directed toward the task of converting present equipment to the new requirements, determining the most efficient methods of production, designing new tools, dies, gages, fixtures, making new plant layouts, or selecting appropriate machinery from available sources.

We're up to our ears in this work — and we like it.

PIONEER ENGINEERING AND MANUFACTURING CO.

The Negro's War

[*Continued from page 158*]

All these courses are financed out of the $60 million fund appropriated by Congress in 1940 for the national-defense training program. The bill contains this amendment: "No trainee . . . shall be discriminated against because of sex, race, or color; and where separate schools are required by law for separate population groups, to the extent needed for trainees of each such group, equitable provisions shall be made for facilities and training of like quality."

For the strange execution of this program the training-school managers in the field have some plausible justification. In the South unions often refuse to supply instructors for Negro training schools. Also, it is indeed ironic to train workers who, after graduation, are almost sure to be denied the jobs they were schooled for: a year ago the records of the U.S. Employment Service showed that only one out of fifty Negro graduates of training schools could be placed.

Waste of training facilities is the result. Last February Texas was training 12,472 persons for defense production. These included exactly 206 Negroes. Yet more than 23,000 defense workers could have been trained with full use of the available equipment. If used to capacity, the state's courses for airplane-engine mechanics could have educated 749 specialists; they were producing 218. Classes for turret-lathe workers, capable of turning out 200 experts, were training 32. But many a trainable Negro was not admitted.

A New Orleans shipyard was recently reprimanded by the Maritime Commission for falling behind schedule. The company's defense: not enough local skilled labor; 700 or 800 additional trained workers would have made all the difference. But about 7,000 local Negroes had registered for defense training—unsuccessfully.

A plant is being built for Bell Aircraft near Atlanta, Georgia, which by the end of the year will employ many thousands of workers. In March 6,000 Negroes in the area had expressed their desire for training by registering with their Urban League. At that time forty-five defense courses were open for whites but only one for Negroes, and this was, unfortunately, a class in ship woodworking. When specific training for the Bell factory was first being planned, all these additional courses were confined to white applicants. Not until Washington intervened with the local and state vocational authorities in Georgia was training for the new plant finally promised to Negroes.

The Labor Division of WPB has estimated that 5,000 trained workers will be needed in the next few months in Mobile, Alabama, and ultimately more than 20,000 new workers will be required. As of April 1, available Negroes were not being trained, although the local vocational centers for whites were running short of candidates. To take care of the stream of in-migrant workers 500 defense housing units have already been built and more are needed. But each new house for an imported worker whose job could be done by Mobile labor wastes around $3,000 and 2,330 pounds of critical metals.

There are other regions and an increasing number of them where all labor is used up, and still more must be imported; and there the construction of defense homes becomes a prerequisite for a thrifty investment of the nation's human resources. As for the Negro, it is another turn of the blind wheel.

The merry-go-round of housing

In Denver, Colorado, federal authorities were interested in a housing project for the three worst-housed local groups: Mexicans, Eastern-European immigrant workers, and Negroes. The plan

The Negro's War

[*Continued from page 160*]

miscarried. The Negroes resented the idea of living in close contact with Mexicans. In short, everybody is somebody else's Negro.

Just so, the spearhead of local opposition against Negro housing projects is nearly always one of the poorest, most recently arrived groups. The reasons are partly economic; i.e., fear of displacement by even cheaper labor; anxiety over their small real-estate holdings which may lose in value if close to a Negro settlement, the site of which is usually picked in the poorest section of a town. But the truly impelling motives are unmistakably psychological: the satisfaction of kicking someone who is socially even lower than oneself; the illusion that a potential target for xenophobia can escape being hunted by turning the heat on somebody else; the eagerness to belong—if only in sharing and outdoing, a respectable community's prejudices. In recent months, Negro housing projects have encountered especially vehement opposition in Detroit and in Buffalo; and in both cases primarily from Catholic Polish immigrants who thus had three rational reasons to appreciate tolerance.

The story of the Sojourner Truth project in Detroit has become a *cause célèbre* with repercussions high in the federal bureaucracy. The riot hit not only bystanders in Detroit's streets but also the Director of Defense Housing in FWA, Clark Foreman. This scion of a leading southern family lost his job, under some congressional pressure, because he supported too firmly the Negroes' insistence on their legal rights. But more revealing than the skirmish of Detroit, because more typical, is the stalemate of Buffalo.

Buffalo, having nearly exhausted the local labor pool, is in pressing need of homes for in-migrating defense workers. The Bethlehem Steel mills, which employ a great deal of colored labor, imported Negroes from New York state, Tennessee, Virginia—only to discover that 400 of their men have to live under deplorable slum conditions. Last July, federal authorities who then had $500 million for just such purposes, decided to build a 200-unit housing project for Negro workers. As a matter of policy, defense-housing agencies decline to spend their funds for slum clearance. The money, after all, was earmarked for *additional* emergency housing, not for reform programs; besides, demolition and rehousing of the slum tenants waste labor and delay work. A desperate search for a site began. One selection after another had to be abandoned because of organized public pressure. After nine months of protests, petitions, and investigations, it now looks as if the federal housing authorities must give in. The present plan, strictly contradicting a sound general policy, calls for the demolition of a slum area of 100 existing homes. Therefore, not 200 but 300 homes will have to be built—an excess expenditure of more than $400,000, and 100 tons of strategic metals. Meantime, the imported workers are still living under conditions that Bethlehem Steel considered impossible ten months ago.

However, when straightforward action of authorities has met calm cooperation of a township, experiments with Negro housing have been encouraging. In Chicago, in Stamford, in South Jamaica, Long Island, there are public projects where Negro and white tenants live in closest neighborhood. In industrial Elizabeth, New Jersey, 333 white families peaceably share the Pioneer Homes with seventy-two Negro families and have mixed clubs. The widely popular belief that Negro homes depreciate adjacent property values is not supported by the experience of Atlanta, Georgia. There, the monthly rate of private construction in the vicinity of the John J. Eagan Homes showed a gain of 500 per cent, eight times the gain for the city as a whole. Nor is this an exceptional experience. Baltimore, Boston, Knoxville, Austin, Philadelphia,

[*Continued on page 164*]

The Negro's War

[*Continued from page 162*]

Detroit, Gary have learned that construction impetus and real-estate prosperity in connection with well-managed Negro housing projects is a country-wide phenomenon.

Army in black and white

Socially, the Negro's place is not fully defined by the economic patterns of his life; nobody's is—particularly not in such times as these. What individuals or groups are aware of contributing to the collective endeavor, determines their feelings more deeply than job, income, housing. Accordingly, the biggest single factor in shaping the American Negro's mind about this war and his part in it, is his place in the U.S. armed forces.

In a communication to FORTUNE the War Department said: "The Army is extremely enthusiastic about the morale, the performance, and the reenlistment rates of its existing Negro units, a number of which are outstanding on any basis." Last fall there were about 100,000 Negroes in the U.S. armed forces, but the pace of induction has been considerably stepped up since. The army aims at reaching and preserving for the duration a ratio of 10 per cent. This, however, is an over-all ratio that does not necessarily apply to each of the various service branches, particularly not to the nation's pride and greatest single hope—the Army Air Corps.

There is only one training school for Negro combat pilots, the segregated establishment at Tuskegee, Alabama. Equipment, standards, instructors match anything the army has elsewhere; so do the students, the first of whom got their wings in March. But at the present rate of training and graduation there will be only a few score Negro fighting pilots at the end of 1942. In as much as the U.S. goal for 1943 is 200,000 combat fliers, the Negroes think their race could contribute much more to the air arm. In fact, they know it could. So do the white instructors at Tuskegee.

In 1918, all Negro officers were trained in a single segregated institution at Camp Dodge, Des Moines. Today, Negro officer candidates are interspersed in almost all officer-training schools. The instructional part of the integration works perfectly. White and Negro candidates attend the same classes, get common physical exercise and common field practice. After they have been at school for two weeks, they rate one another for aggressiveness, loyalty, leadership, etc.; and in Fort Benning, Georgia, Negroes rate whites above other Negroes, whites rate Negroes above other whites. As to achievement, one of the officers in charge of this training school thinks that white and black candidates shape up just about the same. Only one instance of a white candidate objecting to colored candidates sleeping in the same barracks was reported. If he did not like it, he was told, he could get out of the school and stay out. In training, housing, feeding, there is scrupulous impartiality. Outside of that, segregation continues in recreational and social affairs, but this applies to facilities and institutions that are not the camp's official business. To the Negro, however, who wears the U.S. officer's uniform and is told by a white enlisted man that he, an officer, is not wanted in the officers' movie house or club, the question of formal responsibility makes but little difference. And if the Negro officers have to journey nine miles for a haircut because there is no barbershop for Negro officers at Fort Benning, the blessings of integration appear somewhat limited.

Outside of the officer-training schools, segregation in the army is total, except of course for white officers who are serving with Negro troops. But the army, its leaders insist, did not create the problem and cannot undertake to change social views of the individual citizens who fill its ranks. Its sole objective is maximum success in training and using the country's men for military action; and, the army leaders point out candidly, that's why they are not going to indulge in experiments such as the establishment of a trial division including, on a voluntary basis, whites and Negroes alike.

The navy insists even more strongly that it cannot take a chance on a social experiment. Since racial integration on naval units implies much more than in any other service, the navy feels that it cannot justly be expected to be so far ahead of the nation's general habits in racial matters as the advocates of full integration wish. Still, these advocates (at the suggestion of Wendell Willkie, they now include the National Committee of the G.O.P.) retort that the navy's argument is not watertight. The much-quoted "tradition of a white navy," they point out, is after all only twenty-odd years old and was preceded by a tradition of generations during which the U.S. accepted Negroes for every kind of naval service.

Last April the navy announced its willingness to enlist Negro applicants in the U.S. Marine Corps and the U.S. Coast Guard, but to accept them as sailors only "for duty in District craft of various kinds, in maritime activities around shore establishments, in Navy Yards, and in the navy's construction crews and companies." This, the Negroes feel, is not necessarily more than a token payment on a pretty extensive debt. For the country, it was reassuring evidence that the leadership of its armed forces is gradually living up to this war's unique, basically political nature.

Cynicism cannot win the war

For this is a war in which ideas weaken, enforce, and sometimes are even substitutes for armies. The Negro's fate in the U.S. affects the fate of white American soldiers in the Philippines, in the Caribbean, in Africa; bears on the solidity of our alliance with 800 million colored people in China and India; influences the feelings of countless neighbors in South America. In this shrunken world of ours, a fracas in Detroit has an echo in Aden, and what a southern Congressman considers to be a small home-town affair can actually interfere with grand strategy.

At home, discrimination is too costly. To keep a minority "in its place" is a tough job. Germany, an old hand at efficient policing, had to profess the principle and to concentrate on it for many years, synchronizing all aspects of national life to that single purpose. Practiced apologetically, halfhearted discrimination is bound to damage the discriminators not less than those who are discriminated against. A perpetual irritation of the social tissues, it combines the discomfort of a troubled conscience with the high tax of inefficiency. In mellow times of peace, our civilization could afford waste and inconsistency, but the raw climate of war forces upon society speedy, clean-cut decisions.

In the consciousness of all peoples in the world, this war is being fought for and against the idea of racial superiority. America's Constitution, like Christianity, is based on the principle that every man is born with the inalienable right to equality of opportunity. Whether or not this assumption is "realistic"—we must either stick to it or change sides. Anything else would be not only immoral, it would be a military mistake. For men do not die for causes they are cynical about; and they cannot conquer on behalf of a principle they discount. That one-tenth of our population may lack enthusiasm is bad enough, but not crucial. What counts in a war like this is whether the nine-tenths feel at peace with themselves.

Opportunities for the Negro Veteran in Atlanta, Georgia

A Guide to Community Resources

By

JOSEPH SHABSES
Research Director
Atlanta University School of Social Work

Published by
SOUTHERN REGIONAL COUNCIL, INC.
Room 432, 63 Auburn Ave., N. E.
ATLANTA 3, GEORGIA

The material on which this pamphlet is based was gathered by Mr. Shabses in preparation for the Atlanta University School of Social Work's Institute on "Social Work with Veterans" (June 25-29, 1945)

The Southern Regional Council publishes this guide for Atlanta Negro veterans, because of its significance for individual guidance and social planning in this and other Southern communities.

The veteran will find this booklet helpful as he moves back to civilian life.

Research Director

Atlanta University School of Social Work

ARE YOU LOOKING FOR A JOB?

If You Want Your Old Job Back

The law protects your right to the job you left to go into service. Apply to your employer for your old job within 90 days of your discharge. If you have any difficulty, see your Selective Service Board Re-employment Committeeman. He can help you.

If You Want a New Job

The United States Employment Service office at 191 Marietta Street, N. W., MAin 9753, will help you find a new job.

If you have any difficulty in getting the kind of job you want, you may receive help at the Butler Street YMCA, JAckson 4030, the Servicemen's Center at 1000 Hunter Street, S. W., AMherst 1641, or at the Atlanta Urban League, 239 Auburn Avenue, N. E., WAlnut 2355.

If You Want a Government Job

Veterans receive special preference in applying for federal and state civil service jobs. For information on available federal jobs call or visit the Civil Service Com-

mission, New Post Office Building, MAin 3517. For state jobs under the merit system call the Merit System Administration at 2 Capitol Square, S. W., MAin 6342.

The lobbies of the New and Old Post Office Buildings often contain announcements of available civil service positions.

If You Need Unemployment Compensation

If you are partially or completely unemployed you may be entitled to Veterans' Readjustment Allowances up to a total of 52 weeks. Visit the United States Employment Service at 191 Marietta Street, N. W., MAin 9753, to determine whether you are eligible for benefits.

The Atlanta Urban League, 239 Auburn Avenue, N. E., WAlnut 2355; the Butler Street YMCA, JAckson 4030; and the Servicemen's Center, 1000 Hunter Street, S. W., AMherst 1641, will be glad to help you obtain the full compensation to which you are entitled.

DO YOU NEED ADVICE AND GUIDANCE?

To Help You Find the Kind of Work for Which You Are Best Fitted

The Georgia School of Technology at 225 North Avenue, N. W., HEmlock 4887, has set up a guidance center where trained people can help you select the field of work you should enter, or decide upon the kind of training you need. To use this service you should visit the Veterans' Administration at 105 Pryor Street, N. E., WAlnut 8522, and ask for a letter of eligibility.

Other agencies which will give you suggestions on job and educational opportunities are:

The Educational Division of the State Veterans' Service Office in the State Office Building opposite the State Capitol, MAin 2390; the Atlanta Urban League, 239 Auburn Avenue, N. E., WAlnut 2355; the Butler Street YMCA, JAckson 4030, and the Servicemen's Center, 1000 Hunter Street, AMherst 1641.

DO YOU WANT TO GO TO SCHOOL?

If you were not dishonorably discharged and served 90 days or more, you may be entitled to education or job training for a year plus your length of service up to a total

of four years anywhere in the United States. The government will pay your tuition and fees and will give you a living allowance in addition. Unless you have a service connected disability, however, you will have to pay the cost of your transportation to the place where you get on-the-job training or education.

The Educational Division of the State Veterans' Service in the State Office Building opposite the State Capitol, MAin 2390, has a list of approved institutions and business establishments.

To Get a General Academic Education

Booker T. Washington High School has day and evening sessions which will give you a general academic course preparing you to enter college. The School is at 45 C Street, S. W., RAymond 5116.

Clark, MAin 4426, Morehouse, MAin 5435, Morris Brown, JAckson 3860, and Spelman, MAin 2381, are colleges affiliated with the Atlanta University System, offering courses leading to bachelor's degrees in the arts and sciences. The colleges offer preparation for many professions. Some of the colleges offer qualifying examinations for admission of veterans who have not completed high school.

To Learn a Trade

Training in auto mechanics, woodwork, and mechanical drawing is offered during the day session of Booker T. Washington High School, 45 C Street, S. W., RAymond 5116. During the evening session training is offered for the position of chef, baker, hotel worker, tailor, and pattern draftsman.

None of the colleges teach trades as such. Clark College, MAin 4426, offers courses in radio repair and construction and in photography as part of the regular arts and science program.

Private schools offer training in barbering and beauty culture. Addresses and other information about these schools can be obtained at the office of the Educational Division of the State Veterans' Service Office in the State Office Building opposite the State Capitol, MAin 2390.

The director of the division will give you the names of business establishments where you can get on-the-job training, while being paid, to learn the skills of an auto mechanic, shoe rebuilder, electrician, tailor, machinist, refrigeration service man, sheet metal worker, tool and die maker, and

others. The government will add to the pay you receive as you undergo approved job training.

To Prepare for a Career in Business

Commercial courses such as stenography, typing, and bookkeeping are offered in both the day and evening sessions of Booker T. Washington High School 45 C Street, S. W., RAymond 5116.

On a college level, courses in economics and business administration are available at Clark College, MAin 4426, Morehouse, MAin 5435, and Morris Brown, JAckson 3860. The extent of training in the field of business varies with each institution. Reid Business College, at 767 Fair Street, S. W., also offers training in this field.

Graduate work in the field of economics and business administration is offered at Atlanta University, MAin 5435.

To Prepare for a Profession

LIBRARIAN

The Atlanta University School of Library Service, WAlnut 9440, prepares persons for positions with public and private libraries.

MINISTER

Through its School of Religion Morehouse College, MAin 5435, offers training for the ministry. Courses in theology are also offered at Clark College, MAin 4426, and Morris Brown, JAckson 3860.

The Gammon Theological Seminary, at 9 McDonough Boulevard, S. E., MAin 4269, offers training for the ministry on a graduate level.

DIETITIAN

Courses in home economics leading to positions as dietitian are offered at several of the colleges affiliated with the Atlanta University System. Call MAin 5435 for further information.

MORTICIAN

The Atlanta College of Mortuary Science, at 3 Chestnut Street, N. W., JAckson 9192, provides training for this position.

SOCIAL WORKER

The Atlanta University School of Social Work offers training on a graduate level in this field. Call WAlnut 7550 for further information.

Teacher

Training for the teaching profession is offered by Clark, MAin 4426, Morehouse, MAin 5435, Morris Brown, JAckson 3860, and Spelman College, MAin 2381, and by the graduate schools of Atlanta University, MAin 5435.

Above are some of the professions for which you can prepare at Atlanta University and the colleges mentioned. These educational institutions will be glad to answer any questions you may have.

If there is no training available in Atlanta for the profession you wish to enter, it may be necessary for you to go to other parts of Georgia, or to other states. The Veterans' Administration at 105 Pryor Street, N. E., WAlnut 8522, and the Educational Division of the State Veterans' Service Office, at the State Office Building opposite the State Capitol, MAin 2390, will give you suggestions on training available elsewhere, costs, and transportation arrangements.

If You Are Handicapped

If your illness or disability is a result of military service, the Veterans' Administration will pay the cost of your training in school or on a job and will pay for your living expenses until you are ready and able to support yourself. If the training you need is not available in Atlanta, the government will pay the cost of transportation to the area in which you can get it. You can apply for this service at the Veterans' Administration, 105 Pryor Street, N. E., WAlnut 8522.

DO YOU NEED A LOAN?

The government will not lend you any money. It will guarantee up to half of any loan you make at not more than 4% interest per year provided the amount guaranteed is not more than $2,000. You may borrow $6,000, for instance, but only $2,000 will be guaranteed by the government.

Arrangements for government backing of loans can be made at the offices of the Veterans' Administration on the 6th floor of the Belle Isle Building, 105 Pryor Street, N. E.

You may obtain further suggestions on loans at the Citizens Trust Company at 212 Auburn Avenue, N. E., WAlnut 6808, or, on home loans, at the Atlanta Mutual Building Loan and Savings Association at 186 Auburn Avenue, N. E., MAin 1377.

DO YOU NEED HOSPITAL, MEDICAL, OR DENTAL CARE?

To Get Hospital Care

If your illness or disability is service connected the Veterans' Hospital 48, at 5998 Peachtree Road, N. E., CHerokee 1161, will give you emergency hospital care or will supply you with free transportation to Tuskegee, Alabama, or to any other appropriate veterans' hospital for long term care.

If your illness is not due to service, you may still get care at the Veterans' Hospital if a bed is available or if you are unable to pay the cost yourself.

To Get Medical or Dental Care

If you need medical or dental service for a condition caused or aggravated in the line of duty the Veterans' Hospital 48 at 5998 Peachtree Road, N. E., CHerokee 1161, will provide it.

If your condition is not service-connected, but you are in need and your illness prevents you from securing a job, you may get medical or dental service at the State Department of Education's Division of Vocational Rehabilitation in the State Office Building opposite the State Capitol, MAin 2390.

HAVE YOU A CLAIM ON THE GOVERNMENT?

For a Disability Pension

If you received an injury or became ill in service, you may be entitled to a pension, depending upon the extent of your disability. The contact representative of the Veterans' Administration, the State Veterans' Service Office, or of the American Red Cross, all located on the 6th floor of 105 Pryor Street, N. E., WAlnut 8522, will help you to gather the facts and prepare your case for consideration by the Veterans' Administration.

For Back Pay or Mustering-Out Pay

If you believe you have not received the correct amount of mustering-out pay, or think you have some back pay coming to you from your stay in the service, call the Army Personal Affairs Division, 71 Walton Street, N. W., WAlnut 8924. If you served in the Navy, Marine Corps, or Coast Guard, write to the Claims Division, General Accounting

Office, Washington 25, D. C. Include your full name and serial or service number.

You can receive help in making out the proper papers from the Atlanta Urban League, 239 Auburn Avenue, N. E., WAlnut 2355; the Butler Street YMCA, JAckson 4030; the Servicemen's Center, 1000 Hunter Street, S. W., AMherst 1641; the State Veterans' Service Office at the State Capitol, WAlnut 2968; or the American Red Cross, 848 Peachtree Street, N. W., ATwood 1601.

For Dependents' Benefits

Dependents of veterans may receive special preference in jobs, pensions, vocational training, and other benefits. You may receive further information at the United States Employment Service, 191 Marietta Street, N. W., MAin 9753; the Social Security Board, 441 W. Peachtree Street, N. E., JAckson 6500; the Veterans' Administration, 105 Pryor Street, N. E., WAlnut 8522; and at the Civil Service Commission at the New Post Office Building, MAin 3515.

For a Review of Your Discharge

Unless you were discharged or dismissed by general courtmartial sentence, you may be able to obtain a more favorable discharge than you received by applying to your branch of the service. The Veterans' Administration at 105 Pryor Street, N. E., WAlnut 8522, or the State Veterans' Service Office in the State Capitol, WAlnut 2968, will help you prepare the necessary evidence for a review.

For Conversion of Your Insurance

You may convert your National Life Insurance and keep it in force after your discharge. Directions on paying premiums, changing your beneficiary, and making arrangements for private insurance may be obtained at the Army Personal Affairs Division, 71 Walton Street, N. W., WAlnut 8924; at the Veterans' Administration, 105 Pryor Street, N. E., WAlnut 8522; or at the State Veterans' Service Office at the State Capitol, WAlnut 2968.

DO YOU NEED A LAWYER?

To Protect You From Lawsuits

The law protects you, up to six months after discharge, from lawsuits, collection of taxes, and other civil liabilities. The Legal Aid Society in the Connally Building, 98 Ala-

bama Street, S. W., MAin 3271, will provide free legal aid to veterans, as well as to others who cannot afford to pay for legal services.

To Straighten Out Your Tax and License Problems

You may be exempt from certain federal and state taxes as a veteran or may be able to make an adjustment in tax payments. Visit the Federal Bureau of Internal Revenue at the Old Post Office Building, MAin 3517. For state tax information and exemption on business licenses, visit the State Revenue Department at the State Office Building, WAlnut 7353.

To Obtain Your Legal Rights and Benefits

If you need the aid of a lawyer to obtain your legal rights or benefits and cannot afford to hire one, the Legal Aid Society will be glad to help you.

DO YOU HAVE A PERSONAL OR FAMILY PROBLEM?

About Your Marriage

If you think you could use some help in working out problems with your marriage partner or children, call the Family Welfare Society, 239 Auburn Avenue, N. E., WAlnut 6685.

The American Red Cross, 848 Peachtree Street, N. W., ATwood 1601, may also be able to help you.

About Financial Difficulties

The Family Welfare Society, 239 Auburn Avenue, N. E., WAlnut 6685, and the American Red Cross, 848 Peachtree Street, N. W., ATwood 1601, will provide temporary financial relief to veterans. If a longer period of relief is necessary they will refer you to the proper agencies.

About Getting a Place to Stay

You and your family will receive special consideration for available housing with the Atlanta Housing Authority. Call WAlnut 1893 for further information.

The Butler Street YMCA, JAckson 4030, has temporary housing facilities for veterans. The Servicemen's Center at 1000 Hunter Street, S. W., will direct you to places where you can obtain temporary housing accommodations.

About Becoming a Civilian Again

There are several agencies in Atlanta where trained people will be glad to talk with you to help you solve the problems you face in making the change from military to civilian life. Among these are:

The Butler Street YMCA, 22 Butler Street, N. E., JAckson 4030;

The Servicemen's Center, 1000 Hunter Street, S. W., AMherst 1641;

The Family Welfare Society, 239 Auburn Avenue, N. E., WAlnut 6685;

The American Red Cross, 848 Peachtree Street, N. E., ATwood 1601;

The State Veterans' Service Office at the State Capitol, WAlnut 2968;

The Veterans' Service Center of Atlanta-Fulton County, 75 Cone Street, N. W., WAlnut 4463.

These agencies will also help you follow through to see that you get the services and benefits to which you are entitled from government and private sources. If they cannot give you the direct service you need, these agencies will know how and where you can get it.

WOULD YOU LIKE TO MAKE NEW FRIENDS AND HAVE FUN?

Part of the success you have in making the change to civilian life will depend upon the friendships you develop and the things you do in your free time.

At the YMCA

The Butler Street YMCA, JAckson 4030, has a well-rounded program of club groups, dances, swimming, and other recreational activities to which you are invited.

At the Servicemen's Center

The Servicemen's Center, 1000 Hunter Street, S. W., AMherst 1641, has developed a Georgia Veterans' League that you might want to join. The Center conducts regular dances, has discussion groups, and provides many recreational facilities available for your use.

DO YOU HAVE ANY OTHER QUESTIONS?

IF SO . . . Visit the Veterans' Service Center of Atlanta-Fulton County, 75 Cone Street, N. W., WAlnut 4463, for the answers to any questions not covered in this booklet or if you are in doubt about any of the services.

BE SURE TO MAKE USE OF EVERY BENEFIT TO WHICH YOU ARE ENTITLED. THE AGENCIES MENTIONED IN THIS BOOKLET WILL DO THEIR BEST TO HELP YOU.

KEEP THIS BOOKLET AS A GUIDE OR PASS IT ON TO ANOTHER VETERAN WHO MAY BE ABLE TO MAKE USE OF IT.

AMERICAN MISSIONARY ASSOCIATION

287 FOURTH AVENUE

NEW YORK 10, NEW YORK

REVISED NOVEMBER 1945

GENERAL BACKGROUND

*ABC'S OF SCAPEGOATING with a Foreword by Gordon W. Allport. Central YMCA College, 19 South LaSalle Street, Chicago, Ill. 25 cents. An exposition of the mechanics and conditions of scapegoating which explains why religious and racial minority groups are persecuted.

ALL BRAVE SAILORS by John Beecher, New York: L. B. Fischer, 1945. The story of the "Booker T. Washington," the first American merchant vessel to sail with a mixed crew, under the command of Captain Hugh Mulzac.

AMERICA by Stephen Vincent Benet, New York: Farrar and Rinehart, 1944. A great poet's interpretation of the spiritual, economic and political forces essential to the history of the United States.

AMERICAN COUNTERPOINT by Alexander Alland, New York: Day, 1943. A book of photographs of Americans showing the diversity of racial and national origin in the American population. Also shows how difficult it is to tell an American's origin by the way one looks.

*ASSIGNMENT U.S.A. by Selden Menefee, New York: Reynal and Hitchcock, 1943. A picture of America at war which interprets a 15,000 mile trip into forty-one states made for Princeton University's Office of Public Opinion Research. An interpretation every American could read with profit.

*BROTHERS UNDER THE SKIN by Carey McWilliams, Boston: Little, Brown, 1943. A democrat analyzes the problems of colored peoples (American-Indian, Negro, Chinese and Japanese) within the United States and its possessions, and relates these problems to the world scene. The last chapter gives an "Outline for Action" well worth consideration. Should be read by every literate American.

CAPITALISM AND SLAVERY by Eric Williams, Chapel Hill: University of North Carolina Press, 1944. A study of the contribution of slavery to the development of British capitalism.

CITY OF CHICAGO—**City Planning in Race Relations**, Proceedings of the Mayor's Conference on Race Relations, February 1944, Mayor's Committee on Race Relations, 134 North LaSalle Street, Chicago 2, Illinois. Free. Conditions among minority groups in Chicago, especially Negroes.

COLOR AND DEMOCRACY: COLONIES AND PEACE by W. E. B. DuBois, New York: Harcourt, Brace, 1945. A challenge to postwar peace plans from the point of view of colored peoples.

* If only minimum reading is possible.

DEEP RIVER by Henrietta Buckmaster, New York: Harcourt, Brace, 1944. A novel about the poor mountain white people in the South and their fight for democracy and justice for white and Negro southerners.

DEMOCRACY BEGINS AT HOME by Jennings Perry, New York: Lippincott, 1944. The story of the seven-year fight to remove the poll tax by the Nashville Tennessean, a liberal daily still on the fighting line for the establishment of political democracy.

DEMOCRATIC SPIRIT edited by Bernard Smith, New York: Knopf, 1941. An anthology of writings about democracy in the United States from Colonial times to the present.

EDUCATION OF TEACHERS FOR IMPROVING MAJORITY-MINORITY RELATIONSHIPS by Ambrose Caliver, Bulletin, 1944, No. 2 U. S. Office of Education, U. S. Government Printing Office, Washington, D. C., 1944, 15 cents. A study of course offerings in colleges and universities for teachers to learn about racial and national minority groups.

***FREEDOM ROAD** by Howard Fast, New York: Duel, Sloan and Pearce, 1944. A novel which interprets the Reconstruction Period of the South as an experiment in democracy which worked.

GET TOGETHER AMERICANS by Rachel Davis DuBois, New York: Harper, 1943. A practical guide for getting Americans of different cultural groups to know and understand each other especially through festivals, music and other art forms.

HOW WRITERS PERPETUATE STEREOTYPES by the Bureau of Applied Social Research of Columbia University. The Writers War Board, 122 East 42nd Street, New York 17, New York, 1945. Free. A popular report of a study of the treatment accorded white Protestant Anglo-Saxons in mass media as against the treatment accorded other elements of the American population.

INTERCULTURAL EDUCATION IN AMERICAN SCHOOLS by Willam E. Vickery and Stewart Cole, New York: Harper, 1943. Educational philosophy and methods useful in developing understanding between pupils of different cultures. Written for teachers and group leaders.

***MAN'S MOST DANGEROUS MYTH—The Fallacy of Race** by M. F. Ashley Montagu, New York: Columbia University Press, 1945. An able and readable presentation of the ideology of "race" which integrates anthropology, genetics, biology and psychology. A must for those who want a sound interpretation of the facts.

MANUAL FOR OFFICIAL COMMITTEES: What Your Official Intergroup Relations Agency Can Do. American Council on Race Relations, 32 West Randolph Street, Chicago 1, Illinois, 1945. No price. Areas in which action can be taken and specific things that can be done.

*A NATION OF NATIONS by Louis Adamic, New York: Harper, 1945. A dynamic revaluation of the American story so that each group in our population is seen as a necessary and integral thread in the pattern of America. Contributes to the basic philosophy of intercultural education.

NATIONAL CIO COMMITTEE TO ABOLISH DISCRIMINATION. Report of the Director, adopted March 13, 1945, National CIO Committee to Abolish Discrimination, 718 Jackson Place N. W., Washington 6, D. C. The work of one of labor's most important committees in building unity.

*OF ONE BLOOD ALL NATIONS. An Interracial Code for Protestant Churches, Detroit Council of Churches, 404 Park Avenue Building, Detroit 26, Michigan. Free. A code adopted by the Detroit Council of Churches, February 17, 1944. Includes recommendations in regard to membership, staff and board of control.

ONE AMERICA—**The History, Contributions, and Present Problems of Our Racial and National Minorities** edited by Francis J. Brown and Joseph Slabey Roucek, New York: Prentice Hall, 1945. This revised edition of "Our Racial and National Minorities" is focused on wartime social change.

*ONE NATION by Wallace Stegner and the Editors of Look, Boston: Houghton Mifflin, 1945. Excellent photographs and text interpreting eight important minority group peoples during wartime.

PREJUDICE!—**Roadblock to Progress**, Army Talk Orientation Fact Sheet No. 70, War Department, Washington 25, D. C., May 5, 1945. Reprinted by International Labor Defense, 112 East 19th Street, New York 3, New York. 5 cents. One of the Army's best educational efforts to combat prejudice and build democracy.

*PRIMER FOR WHITE FOLKS edited by Bucklin Moon, New York: Doubleday Doran, 1945. A penetrating collection of writings about Negroes from Colonial times to the present by Negro and white authors. Contains some choice short stories.

A PRIMER ON RACE by Council on Christian Social Progress of the Northern Baptist Convention. Department of Race Relations Federal Council of Churches of Christ in America, 297 Fourth Avenue, New York 10, New York. 10 cents. A clever well illustrated ten page presentation of facts about race written in simple language.

RACE DISCRIMINATION AND THE LAW by Carey McWilliams, National Federation for Constitutional Liberties, 205 East 42 Street, New York, N. Y., 1945. 10 cents. The legal basis for attack on discrimination. Answers those who claim that legislation against discrimination is impossible.

RACE RELATIONS IN THE DISTRICT OF COLUMBIA, Second Annual Report of Committee on Race Relations, Inc., 743 Investment Building, Washington 5, D. C., 1945. Free. Race Relations in the Nation's capital for representatives of the governments of the world to see.

*RACES OF MANKIND by Ruth Benedict and Gene Weltfish, Public Affairs Committee, 30 Rockefeller Plaza, New York, N. Y. 1943. 10 cents. A dramatic presentation of a scientific study of anthropology in simple language.

*SOME OF MY BEST FRIENDS ARE SOLDIERS by Margaret Halsey, New York: Simon and Shuster, 1944. A humorous picture of race relations at the Stage Door Canteen, told in letters.

THE SOUTH: America's Opportunity Number One. Southern Regional Council, 63 Auburn Ave., N. E., Atlanta 3, Georgia, 1945. 50 cents. A series of important addresses on the South's postwar economy.

THE SPRINGFIELD PLAN, A Photographic Record, by Alexander Alland and James Waterman Wise, New York: Viking, 1945. Excellent photographs and text recording a living plan toward real democracy.

THE STORY OF THE SPRINGFIELD PLAN by Clarence I. Chatto and Alice L. Halligan, New York: Barnes and Nobel, 1945. The official account of Springfield's organized effort to teach its citizens how to live in a democracy. Shows that democracy can be socially learned when it is socially sanctioned.

THEY STILL CARRY ON! Native Fascists: How to Spot Them and Stop Them. Text by U. S. War Department. National Federation for Constitutional Liberties, 205 E. 42nd Street, Room 1613, New York 17, New York, 1945. 10 cents. An illustrated pamphlet of "Army Talk No. 64" which "tells how to spot the native Fascist whether he be professional rabble rouser, senator, cleric, monopolist, grocery clerk, school teacher or your neighbor across the hall."

*TIME BOMB by E. A. Piller, New York: Arco, 1945. A warning to America as to the danger of a fascist explosion. Native fascists and their interlocking organizations exposed and political remedies pointed out.

UNFINISHED BUSINESS. A Fair Employment Practice Handbook by Clarence W. Anderson, Metropolitan Detroit Council on Fair Employment Practice, 906 Transportation Building, Detroit 26, Michigan. Free. Answers to questions most often asked about employment of workers from minority groups.

WHAT AMERICA MEANS TO ME by Pearl Buck, New York: Day, 1942. A collection of speeches and articles by a great champion of human equality which includes the American Negro as well as the peoples of Asia.

WHY RACE RIOTS by Earl Brown, Public Affairs Committeee 30 Rockefeller Plaza, New York, N. Y., 1944. 10 cents. Lessons learned from the 1943 Detroit riots which may be used to prevent riots in any town.

WINDS OF FEAR by Hodding Carter, New York: Farrar and Rinehart, 1944. A novel by a liberal young southerner who sees the fears of white and Negro people living in a small southern town.

WORKING AND FIGHTING TOGETHER, CIO Committee to Abolish Racial Discrimination, 718 Jackson Place, N. W., Washington 6, D. C., 1943. 5 cents. Suggestions of what unions can do about the problems of minorities in their own organization.

PERIODICALS

AMERASIA. 225 Fifth Avenue, New York, N. Y. Monthly: $2.50 a year. Very helpful in understanding the problems of Americans of Oriental ancestry as well as peoples of Asia.

COMMON GROUND. 222 Fourth Avenue, New York, N. Y. Quarterly: $2.00 a year. Official publication of the Common Council for American Unity. Develops an appreciation of what each group has contributed to America.

A MONTHLY SUMMARY OF EVENTS AND TRENDS OF RACE RELATIONS. Department of Social Sciences, Fisk University, Nashville, 8, Tennessee. Free. A summary issued by the Race Relations Divisions of the Julius Rosenwald Fund and the American Missionary Association.

NOW. 1899 W. Jefferson Blvd., Los Angeles 7, California. Semimonthly: $2.50 a year. A popular magazine of all racial groups, emphasizes unity.

THE SOUTHERN PATRIOT. 506 Presbyterian Bldg., Nashville, Tenn. Monthly: $1.00 a year. Official publication of the Southern Conference for Human Welfare, composed of liberal and progressive southern leaders—Negro and white.

AMERICAN INDIANS

THE CHANGING INDIAN edited by Oliver La Farge, Norman, Oklahoma: University of Oklahoma Press, 1942. A symposium on the present-day status and problems of American Indians.

CRAZY WEATHER by Charles L. McNichols, New York: Macmillan, 1944. The complex of Mojave Indian desert life as seen through the eyes of a fourteen-year-old white boy.

DELAWARE'S FORGOTTEN FOLK by Clinton A. Weslager, Philadelphia, Pa.: University of Pennsylvania Press, 1943. A study of the people called Moors and Nanticokes who live on the Delmarva Peninsula.

THE INDIAN IN AMERICAN LIFE by G. E. E. Lindguist and others, New York: Friendship Press, 1944. A thought-provoking attempt by experienced workers among American Indians to present against their cultural background the development of American Indians and the efforts of the Indian, the federal government, and the missionaries to solve Indian problems.

***INDIANS ARE PEOPLE, TOO** by Ruth Muskrat Bronson, New York: Friendship Press, 1944. An Indian leader's interpretation of how American Indians see their past and present problems of "growing up in two worlds," and the interdependence of all Americans.

INDIANS OF THE UNITED STATES by Clark Wissler, Garden City, New York; Doubleday, Doran, 1941. An anthropological study of how Indians live today, and of their past and potential contribution to American culture.

INDIAN WARDSHIP. Home Missions Council of North America, 297 Fourth Avenue, New York 10, N. Y., 1943. 15 cents. A detailed outline of the history of Indian wardship from 1831 to the present, with the implications pointed up.

THE LAST FRONTIER by Howard Fast, New York: Press of the Readers Club, 1942. A fascinating story about the Cheyenne Indians.

THE NORTH AMERICAN INDIAN TODAY edited by Charles T. Lorain and Y. F. McIlwraith, Toronto, Canada: University of Toronto Press, 1943. An important background study of Indians in North America. Contains a report of the University of Toronto—Yale University Seminar Conference held in September, 1939.

***SPEAKING OF INDIANS** by Ella Deloria, New York: Friendship Press, 1944. An Indian anthropologist interprets the cultural problems of her people with warmth and understanding.

THIS IS THE INDIAN by Earle F. Dexter, New York: Friendship Press, 1944. 25 cents. Interesting photographs and stories about Indian work, education and missions.

TRAILS OF FRIENDSHIP WITH INDIAN AMERICANS by Mary Garland Taylor, New York: Friendship Press, New York, 1944. A study guide for junior high school groups.

TWENTIETH CENTURY INDIANS by Frances Cooke Macgregor, New York: G. P. Putnam's Sons, 1941. A pictorial presentation of the life of American Indians.

UNCLE SAM'S STEP CHILDREN by Loring B. Priest, New Brunswick, New Jersey, Rutgers University Press, 1942. A study of the policies of the United States in dealing with Indians, 1865-1887.

WHAT KIND OF DEMOCRACY DO YOU WANT? by Dr. Campbell Wycoff, New York: Friendship Press, 1944. 25 cents. A young people's study guide in which Indians are used as a test case for American democracy.

PERIODICALS

THE AMERICAN INDIAN. American Association on Indian Affairs, 381 Fourth Avenue, New York 16, N. Y. Quarterly: $5.00 a year, includes membership. Official organ of the American Association on Indian Affairs.

INDIAN TRUTH. Indian Rights Association, Inc., 301 South 17th Street, Philadelphia, Pa. Monthly: $2.00 a year includes membership. Official organ of the Indian Rights Association, Inc.

INDIANS AT WORK. Office of Indian Affairs, Chicago 54, Illinois. Bi-monthly. Free. A publication of the U. S. Department of Interior. A News Sheet for Indians and the Indian Service.

AMERICAN MEXICANS

*SLEEPY LAGOON MYSTERY by Guy Endore, Sleepy Lagoon Defense Committee, 129 West Second Street, Los Angeles 12, California. June 1944. 15 cents. The real meaning of the zoot suits riot in Los Angeles.

SPANISH SPEAKING AMERICANS IN THE WAR. Office of the Coordinator of Inter-American Affairs, Washington, D. C. No price. Photographs of Spanish speaking Americans contributing to the war effort in the armed services in factories and on farms.

A CAMERA REPORT ON EL CERRITO, A Typical Spanish-American Community in New Mexico by Irving Rusinow, U. S. Department of Agriculture Misc. Publication No. 479. Washington: U. S. Government Printing Office, 1942. 45 cents. Photographs which show some of the social and economic conditions of Mexican Americans.

FALANGE: The Axis Secret Army in the Americas by Allan Chase, New York: G. P. Putnam's Sons, 1943. The gravity of fascist forces in Latin America and its threat to the United States.

FORGOTTEN PEOPLE. A Study of New Mexicans by George I. Sanchez, Alberquerque, N. M.: The University of New Mexico Press 1940. No price. A study of the social and economic conditions faced by Spanish-speaking Americans in Toas County, New Mexico, presented against an historical background.

*MEXICAN MIGRATORY WORKERS OF SOUTH TEXAS by Selden C. Menefee, Work Projects Administration, Washington: Government Printing Office, 1941. No price. A study of the social and economic conditions of Mexican Americans in Crystal City Texas, "a concentration point of Mexican labor employed not only in spinach but in cotton, onions and sugar beets as well."

AMERICAN NEGROES

ALL AMERICAN by John R. Tunis, New York: Harcourt, Brace, 1942. The story of the Negro in sports.

*AMERICAN NEGROES. A handbook by Edwin R. Embree, New York: Day, 1942. A clear concise introduction to the present-day life of Negroes in the United States. Includes important statistical facts.

AN AMERICAN DILEMMA by Gunnar Myrdal, New York: Harper, 1944. The Swedish scholar who directed the Carnegie Foundation study of the Negro in America, summarizes the studies and draws conclusions which are of great importance.

*THE BLACK AND WHITE OF REJECTIONS FOR MILITARY SERVICE by a Committee for the American Teachers Association, P. O. Box 271, Montgomery, Alabama, 1944. 10 cents. Selective Service figures for rejection on account of education and mental deficiences show that Negro registrants in ten northern and border states ranked higher than white registrants in seven southern states.

BLACK BOY: A record of Childhood and Youth by Richard Wright, New York: Harper 1945. An autobiography of a Negro child whose culture refused him the right to a normal life.

CIO AND THE NEGRO WORKERS TOGETHER FOR VICTORY. Congress of Industrial Organizations, 718 Jackson Place, N. W., Washington 6, D. C., 1942. 2 cents. The program of the CIO to end racial discrimination and to build real labor brotherhood.

COLOR, CLASS AND PERSONALITY by Robert L. Sutherland. Washington: American Council on Education, 1942. A summary of the findings of the American Youth Commission studies of Negro youth and a plan for the future.

DIGEST OF MYRDAL'S "AN AMERICAN DILEMMA" by Samuel S. Wyer. Columbus Council for Democracy, Room 7, 9 East Long Street, Columbus 15, Ohio. No price. Important quotations from the long detailed study.

ESSAYS IN THE HISTORY OF THE AMERICAN NEGRO by Herbert Aptheker, New York: International Publishers, 1945. The story of the militant struggle of Negroes for freedom and democracy during slavery and after.

***THE NEGRO AND THE WAR** by Earl Brown and George Leighton. Public Affairs Committee, 30 Rockfeller Plaza, New York, N. Y., 1942. 10 cents. A forthright account of tensions felt by Negroes because of World War II.

THE NEGRO CARAVAN edited by Sterling A. Brown, Arthur P. Davis and Ulysses Lee, New York: Dryden Press, 1941. Selected writings by American Negroes. An excellent anthology.

NEGRO CHURCHMEN SPEAK TO WHITE CHURCHMEN by a Committee for the Commission on The Church and Minority Peoples, 297 Fourth Avenue, New York 10, New York, November, 1944. 10 cents. A clear call to Christian democrats to live by their basic philosophy.

THE NEGRO IN AMERICA by Maxwell Stewart. Public Affairs Committee, 30 Rockefeller Plaza, New York, N. Y., 1944. 10 cents. A summary of Myrdal's "An American Dilemma." Excellent pictographs.

THE NEGRO PEOPLE AND THE COMMUNISTS by Doxey A. Wilkerson. Workers Library Publishers, Inc., P. O. Box 148, Station D., New York 3, N. Y., 1944. 3 cents. The basis of Communist appeal for the support of Negroes.

"THE NEGRO IN THE NORTH DURING WARTIME," Journal of Educational Sociology, January, 1944. 32 Washington Place, New York, N. Y. Excellent articles about the seldom discussed Negroes in the North.

NEW WORLD A'COMING by Roi Ottley, New York: Houghton, Mifflin, 1943. A reporter's analysis of Harlem "the most complex of Negro communities" which the author thinks reflects much of Negro America.

THE NMU FIGHTS JIM CROW by the National Maritime Union, 345 West 17th Street, New York, N. Y., 1944. Free. Describes one of labor's most thrilling stories of interracial unity achieved during this war.

ON CLIPPED WINGS, the story of Jim Crow by William H. Hastie, National Association for the Advancement of Colored People, 69 Fifth Avenue, New York, N. Y. 1943. 10 cents. The story of the struggle of Negroes in the armed forces to get training in the air corps and the truth about facilities at Tuskegee.

ORGANIZED LABOR AND THE NEGRO by Herbert Northrup, New York: Harper, 1944. A realistic account of the position of Negroes in labor unions.

THE POLICE AND MINORITY GROUPS by J. E. Weckler and Theo. E. Hall, International City Managers' Association, 1313 East 60th Street, Chicago 37, Illinois, 1944. 50 cents. "A program to prevent disorder and to improve relations between different racial, religious, and national groups."

***A RISING WIND** by Walter White, New York: Doubleday, Doran 1945. Race relations in the European theatre of war as seen by the executive secretary of the NAACP.

***THERE ARE THINGS TO DO** by Lillian Smith, Reprinted from South Today. Clayton, Ga. Winter, 1942-43. 5 cents. Specific suggestions for individuals.

***THEY SEEK A CITY** by Arna Bontemps and Jack Conroy, New York: Doubleday, Doran, 1945. The story of the migrations of American Negroes from the South—during slavery, after the Civil War, during World War I, and during World War II—which includes many colorful personalities.

13 AGAINST THE ODDS by Edwin R. Embree, New York: Viking, 1944. Biographical sketches of thirteen outstanding American Negroes: Mary McLeod Bethune, Richard Wright, Charles S. Johnson, Walter White, George Washington Carver, Langston Hughes, Marian Anderson, W. E. B. DuBois, Mordecai W. Johnson, William Grant Still, A. Philip Randolph, Joe Louis, and Paul Robeson.

THIS IS OUR WAR by Afro-American War Correspondents, Baltimore: Afro-American Publishers, 1945. The contributions of Negroes to the prosecution of World War II as seen by Negro newsmen: Ollie Stewart, Vincent Stubbs, Herbert Frisby, Art Carter, Bettye Phillips, and Max Johnson.

***TO STEM THIS TIDE.** A Survey of Racial Tension Areas in the United States, by Charles S. Johnson, Boston: Pilgrim Press, 1943. Factual data about tensions in industry, agriculture, public carriers, housing, politics, "law" and armed forces. The last chapter is devoted to "Post-War Problems in Prospect."

***WHAT THE NEGRO WANTS,** edited by Rayford W. Logan, Chapel Hill: University of North Carolina Press, 1944. Conservative, liberal and radical Negro leaders tell clearly and forcefully what they think the Negro wants.

PERIODICALS

CONGRESS VUE. 307 Lenox Avenue, New York, N. Y.. Monthly, $1.00 a year. Official publication of the National Negro Congress.

THE CRISIS. The National Association for the Advancement of Colored People, 20 W. 40th Street, New York, N. Y. Monthly $1.50

a year. Official organ of the N.A.A.C.P. Is concerned mostly with civil rights.

EBONY, 5619 South State Street, Chicago 21, Illinois. Monthly: $3.00 per year. A photographic magazine about Negroes similar to Life magazine.

JOURNAL OF NEGRO EDUCATION. Howard University, Washington, D. C. Quarterly: $3.00 a year. A review of the education of Negroes by educators.

30 NEGRO OFFICERS WIN REGULAR ARMY COMMISSIONS

WASHINGTON, D. C.--Thirty Negroes were among the 9,209 officers selected for Regular Army commissions under the War Department's second Regular Army Integration Program, it was announced last week. The appointees were among the second increment of the 1947 program and brought to a total of 66 the number of Negroes selected as Regular Army Officers since the first program began in the summer of 1946.

The first group of Negro officers selected in June, 1946 numbered 31. An additional five were selected in January, 1947.

The Negro officers appointed in this latest increment are:

GENERAL EISENHOWER AWARDS DIPLOMAS
TO GRADUATES OF ARMY INFORMATION SCHOOL

CARLISLE BARRACKS, Pennsylvania--One Negro officer and six enlisted men of two graduating classes at the Carlisle Barracks Army Information School were recently presented diplomas by General of the Army Dwight D. Eisenhower upon the successful completion of training which qualified them as Public Information officers, and assistants to Troop Information officers.

Among 159 officer-graduates to receive the diplomas which marked their qualification as Public Information officers was First Lieutenant Arthur Terry, Columbus, Ohio. Presently assigned to the 25th Infantry Regiment at Fort Benning, Georgia, Lieutenant Terry saw service during the Po Valley campaign in Italy.

Six of the enlisted men who pursued a one-month course which prepared them as assistants to Troop Information officers were Negroes. Prepared to assist in the job of making the American soldier "the best informed soldier in the world" were: First Sergeant Ernest Wilson, Jr., New Orleans, Louisiana, stationed at Camp Campbell, Kentucky; Master Sergeant William S. Harris, New York, New York, assigned at Fort Lewis, Washington; Master Sergeant Albert L. Burton, Shreveport, Louisiana, on duty at Fort Riley, Kansas; Staff Sergeant John A. Malone, Norristown, Pennsylvania, of Fort Lewis, Washington; Corporal Howard Jester, Camp Hood, Texas and Corporal Peter Guidry, Beaumont, Texas, serving at Fort Riley, Kansas.

Other prominent military guests to witness the presentation of diplomas were Lieutenant General J. Lawton Collins, Chief of Army Information and Major General Manton S. Eddy, Commanding General of the Second Army.

MAJOR STEVE G. DAVIS IS FIRST NEGRO
OFFICER TO EARN GENERAL STAFF BADGE

WASHINGTON, D. C.--Major Steve G. Davis, Chicago, Illinois, last week became the first Negro officer in the history of the United States Army to earn the coveted War Department General Staff Identification Badge for having served over a year as a detailed member of the General Staff Corps assigned to the War Department General Staff.

Major Davis was assigned to the G-1 (Personnel and Administration) Division of the General Staff in February, 1946, shortly after returning to the United States from Italy and became at that time the first Negro officer to be given a General Staff assignment.

A training officer with the 92nd Division's 600th Field Artillery Battalion during the war, Major Davis served 14 months in the Mediterranean Theater of Operations and was awarded two Battle Stars for his participation in the Po Valley and North Apennines actions.

He was serving with the 184th Field Artillery Battalion of the Chicago National Guard when he was called to active duty in January, 1941. In June, 1942, he successfully completed the advanced course for Field Artillery officers at Fort Sill, Oklahoma. He is a graduate of Lewis Institute and the University of Chicago.

The General Staff Identification Badge, to be worn on the right upper pocket of the service coat, consists of the coat of arms of the United States, of gold or gold colored metal, superimposed on a five-pointed black enameled star, two inches in diameter. In each reentrant angle of the star are three transparent green enameled laurel leaves.

The badge was authorized in August, 1933 for wear only by officers of the United States Army who performed service for not less than one year as a detailed member of the General Staff and who have received from the Chief of Staff a certificate of eligibility to wear the badge.

The purpose of the badge, which may be worn as a permanent part of the authorized wearer's uniform regardless of assignment, is to enhance the prestige and desireability of detail in the War Department General Staff and to serve as an incentive to officers of the Army in performing duties relating to the formulation and coordination of basic principles, concepts and plans for the military program of the War Department.

FOUR NEGRO SOLDIERS AMONG STUDENTS
AT THEATER TRAINING CENTER IN ROME

LEGHORN, Italy--Four Negro enlisted men were included in a group of 23 American soldiers who recently departed Leghorn, Italy, by military train to attend a six-week course of training in the U.S. Army's non-commissioned officers school at the Mediterranean Theater Training Center in Rome.

MORE

All members of the Regular Army, the students were carefully selected from units assigned to the Port of Leghorn, a member command of the Mediterranean Theater headquarters. The course of instruction is designed to equip the selected non-commissioned personnel for further advancement in grade.

Departing with the group were Technician Third Grade Donald Wade, Corona, Long Island, assigned to the 870th Quartermaster Laundry Company; Corporal Joe Fisher, Spiro, Oklahoma, a member of the 3330th Transportation Corps Truck Company; Technician Fifth Grade Freddie L. Wills, Hillsboro, Texas, of the 689th Port Company and Private First Class Bayliss E. Wright, Kansas City, Missouri, assigned to the 90th Military Police Company.

NEGRO WACS SERVING
AT EIGHT DUTY STATIONS

WASHINGTON, D. C.--Nine Negro WAC officers and 366 enlisted women were serving at eight posts of duty throughout the continental United States on May 1, the War Department has announced. The groups ranged in size from a detachment of two enlisted women on duty at the Valley Forge General Hospital, Phoenixville, Pennsylvania, to a squadron of two officers and 206 enlisted women serving at Camp Beale, California.

The second largest detachment of Negro WAC personnel was assigned to Lockbourne Air Base, Columbus, Ohio, Commanded by two officers the Air Force detachment numbered 103 enlisted persons. Two officers and 52 enlisted women comprised another Air Force WAC detachment at Geiger Field, Spokane, Washington. Negro Wacs were first assigned to duty with Air Force units in May, 1944 when a group was stationed at the Sioux City Army Air Base, Sioux City, Iowa.

A survey of Negro WAC assignments on May 1 reveals that, in addition to the above assignments, one officer was stationed at Fitzsimmons General Hospital, Denver, Colorado, and two enlisted women served at the Letterman General Hospital, California on that date.

On duty in the Washington Military District with the War Department were Major Harriet West, ranking Negro Wac on active duty, and Captain Jean Childs, who is assigned to the Army Medical Center, Walter Reed General Hospital.

Wac personnel are performing a diverse number of specialties in their present employment. A typical cross-section of duties in which the Negro Wac is engaged include the following; surgical technicians; photographers; medical technicians; X-ray technicians; postal clerks; movie projectionists; parachute riggers; administrative specialists; clerk-typists and automobile equipment operators.

In June, 1943, 105 officers and 3056 enlisted women represented the peak strength of Negro WAAC, (Women's Army Auxiliary Corps), personnel. Following redesignation of the WAAC as the Women's Army Corps, WACs, Negro strength in the corps reached its highest point of 120 officers and 3,920 enlisted personnel in December, 1944.

MORE

NEGRO UNIT RESPONSIBLE FOR SECURITY
OF HUGE QUARTERMASTER DEPOT IN ITALY

LEGHORN, Italy--Security of the huge 61st Quartermaster Depot, largest storehouse of U. S.Army supplies in the Mediterranean Theater, is the job of some 230 members of the 870th Laundry Company, a Negro Quartermaster unit which gave up its laundry duties recently to guard the more than two and a half miles of warehouses here.

Millions of dollars of Quartermaster supplies are stored in the depot which during the war served the Fifth Army and which is now the Quartermaster headquarters for the Mediterranean Theater.

Situated eight miles outside this city, along the main highway to Pisa to the north, the depot is guarded day and night. A surrendered enemy personnel stockade is included in the guarded area.

Installations at the depot include a bakery, bakers and cooks school and ice cream plant, in addition to a number of Quartermaster dumps. A motion picture theater, Army post exchange and chapel make the depot resemble a large Army post in the U. S.

The duties of the 870th Laundry Company are for the most part, routine, but require alertness and attention to the general and special orders which each man learns before appearing on his post.

Captain Frederick D. Coleman of Little Rock, Arkansas, commands the 870th Laundry Company. Master Sergeant Edward B. Lee of South Orange, New Jersey, acts as the first sergeant of the company.

PUBLIC AFFAIRS PAMPHLET No. 128

OUR NEGRO VETERANS

BY CHARLES G. BOLTÉ AND LOUIS HARRIS

OUR NEGRO VETERANS

By CHARLES G. BOLTÉ
and LOUIS HARRIS

OUT of every major war in our nation's history has come progress for the American Negro. Yet each war has been followed by a reaction which wiped out many of the gains. In each case there has been a clash between those who have raised their standards of living, who have opened new channels of opportunity, and those who want to turn back the clock to prewar conditions.

The American Revolution saw the rise of a brisk, mercantile society and a Jeffersonian outlook in the North. The combination removed all vestiges of slavery from the North. But not long after, the booming cotton market gave rise to the plantation system which firmly implanted slavery in the South for the greater part of another century.

The material in this pamphlet is based on a series of surveys made by the Bureau of the Census, the National Urban League, the Southern Regional Council, and the American Veterans Committee.

Copyright, 1947, by the Public Affairs Committee, Incorporated
—A nonprofit, educational organization—

The Civil War gave the Negro formal emancipation, the right to bear arms for his country, and partial political franchise. But the postwar reaction severely curtailed the new-found political freedom and reduced Negroes to economic serfdom.

The First World War opened Northern industry to Negro workers for the first time. More than a million Negroes migrated to industrial centers. Although the standard of living in the urban North was depressed by all-Negro slum districts, life was better than it had been under peonage and tenancy in the South. The postwar protest inevitably came, subsequent unemployment produced race tensions and serious riots, and Negroes were segregated in the North more strictly than before.

Today, Negro veterans of World War II find themselves in a similar crisis. No longer are Negro troops and war workers of strategic military importance. The need for using every human and material resource to win the war has passed. The bargaining strength of the Negro population as a whole has been reduced. Greater difficulty is encountered in combating such race terror groups as the Columbians and the Ku Klux Klan.

Veteran's Problems Intensified for Negroes

Each difficulty confronting veterans as a whole is intensified for Negro veterans. Veterans generally want jobs that pay more; Negro veterans desperately need jobs of any kind. Veterans need housing; the Negro is always in dire need of housing. One out of three white veterans cannot find adequate educational and training facilities; four out of five Negro veterans are faced with most unsatisfactory educational and training opportunities. The Negro veteran meets greater obstacles than the non-Negro veteran at every turn for one reason: his skin is darker.

What happens to the Negro veteran today and in the next five years is important to the nation. America is at the crossroads in its pattern of race relations. The Negro veteran has seen more of the world than the rest of his people; he is the first to seek a new voice at the polls in hitherto white primaries; he is firmer in demanding better jobs than have been available to Negroes in the past; his potential contribution to the nation is greater in terms of leadership. He is also more likely to suffer violence

for carrying the torch of the Negro postwar protest against discrimination in America.

The Negro veteran is old enough to have killed men in battle and young enough to look forward to a whole lifetime of adult-

HARRY A. HERZOG, FOR THE PUBLIC AFFAIRS COMMITTEE, INC.

hood. He wants very simple things in life: a good job, educational and vocational guidance, better housing, and a little self-respect. He knows that returning veterans were supposed to find these things. He knows they exist in this land of ours. But he does not find them. He is different from other veterans only because whatever he is seeking in life is harder for him to attain, whatever obstacles lie in his path are more difficult to overcome.

WHERE OUR NEGRO VETERANS LIVE

ONE out of every thirteen veterans of World War II is a Negro. Of the 1,154,486 Negro veterans 1,029,946, or 89 per cent, have their homes either in the thirteen Southern states or the big urban centers of the North. Almost two-thirds of them are in the South, with twice as many in the cities and small towns as are on the farms. Of the 26 per cent in the North, almost all are crowded in the confines of the overpopulated Negro districts. A recent study pointed out that if all the population of the country were as concentrated as the Negro population is in Harlem, the entire 140,000,000 men, women, and children in America could live in New York City.

Northward Migration

Negro veterans have been moving from the South to the North and West since V-J Day. Approximately one out of every ten Negro veterans, or some 75,000, has left the South. The main reasons for this migration have been:

1. The lack of jobs that pay over $20 weekly.
2. The lack of a sense of "belonging" to Southern communities.
3. The lack of schools and training facilities.
4. The lack of recreational facilities.
5. The lack of housing.
6. The promise of greater opportunity in the North and West.
7. The promise of new industrial development in the West.
8. The promise of greater "equality" in the North.
9. The desire to see the country.
10. The desire for a change of any kind.

Restless, ambitious, with a newly acquired sense of mobility, young Negro veterans have migrated chiefly to the West. Almost inevitably, however, they have gravitated to cities where they trade the slow-moving undercurrent of Southern frustration for the hemmed-in restriction of the Negro ghetto. Trusting only members of their own race, Negro veterans seek other Negroes

when they migrate. Yet, for all of the overcrowded, slum-filled conditions they find in Northern cities, Negro veterans probably have a greater chance there of attaining security and opportunity than they did in their previous homes.

Most of the Negro veterans will undoubtedly remain in the South. They will stay there because in most cases they were born

there and have family attachments and responsibilities there. Most of them are unable to afford moving to another part of the country. In many cases, they live in such ignorance and poverty that they never even consider the possibility of moving. A considerable number of Negroes believe that the colored people should remain in the South and "see it through." More progressive Negroes hold, however, that their only hope as a race lies in a widespread scattering to all parts of the country where assimilation and acceptance will come more readily. The latter group may be right in evaluating the best interests of their people. But the bulk of the Negro veterans face an uncertain future south of the Mason-Dixon line.

Where Negro Veterans Are Concentrated

Apart from Washington, D. C., where they constitute 25 per cent of the veteran population, Negro veterans are most heavily concentrated in the following states, where the percentage of veterans who are Negro is as shown: Louisiana, 27.6 per cent; Alabama, 24 per cent; Florida, 22.7 per cent; Georgia, 21.4 per cent; Mississippi, 38.5 per cent; and South Carolina, 28.1 per cent. These figures are to be contrasted with the over-all percentage of only 7.7 per cent of Negro personnel in the armed forces. It is in these areas that the greatest number of lynchings of Negro veterans have taken place; it is here that the most Negro veterans are unemployed; that the poorest educational facilities exist; and segregation is most drastically enforced. Here also exists the greatest amount of poverty. There are large numbers of Negroes in North Carolina, New York, and Texas, but in these latter states the ratio of whites to Negroes is higher and the level of living is slightly less depressed.

The Challenge

The problems, then, which the Negro veterans must face—and which all America must solve if we are to meet our obligation of citizenship to over a million men and women who served in World War II—are the problems which the South and the urban centers of the North raise. Each is peculiar unto itself, steeped in the traditions and folkways of the region. The pace in each is different. The degree of progress is different. But the central issue is the same in all areas: How can economic and educational discrimination be ended in our lifetime?

WARTIME GAINS

LIKE all of the men who fought in the recent war, Negro veterans came back home with a wide range of experience. Over two-thirds of those in the Army had been overseas and had seen the way people of other lands live. Many had been to France and England where they had been accepted by civil populations

without discrimination. Many were embittered over the menial tasks to which they had been assigned. They resented being kept from combat after having sailed to the battlefronts. In the Army over 70 per cent of all overseas Negro troops were assigned to unskilled duties behind the lines; in the Navy 90 per cent were assigned to such tasks as stewards, cooks, mess boys, and seamen.

Yet they had moved out of their homes and seen new faces and new habits for the first time. They had learned many new skills which could be applied to civilian life. Although Negro veterans found conditions at home no worse than when they went away to war, they were far more restless and dissatisfied when they returned to civilian life.

Among Negro Civilians

In the North, particularly in the Northeast and Midwest, there was greater prosperity among Negroes than ever before. More skilled jobs were being held down by Negroes; wage rates were higher; and public indignation against discrimination had grown. The Negro had shown himself to be able and skilled as a worker, and nothing has done more to help his status than this demonstration of competence. Scarcely a public official in the North could afford openly to look down upon the Negro people. There was tension in the great urban centers where Negro districts were spilling into formerly all-white districts, where overcrowded living conditions gave outlet to latent prejudices. But there had been a definite and important improvement in race relations.

The Fight for Citizenship

In the South, the traditional caste system was feeling the effect of Northern protest. A larger number of Southern whites and Negroes—many of them veterans—were becoming conscious of the injustice of the traditional pattern of segregation, though the group was still a small minority. The South as a whole was becoming conscious of the race problem instead of merely accepting the double standard. A wave of violence swept the least enlightened areas.

During the height of the primaries in 1946, at which Negro veterans took the lead in bringing out a record Negro vote, six Negro veterans were lynched. All six slayings occurred between July 20 and August 8, 1946. In addition, a number of colored veterans disappeared around registration time in the fifteen Southern states. Many left the region because of threats; the bodies of others were found floating in the Mississippi River or mutilated in the woods.

The South was reacting to the postwar protest, as it had after the first World War: resisting the general, nation-wide rise in living conditions among Negroes, attempting desperately to hold color lines fast. But many white veterans as well as their Negro comrades-in-arms had broadened their outlook. With distances shortened, with widespread use of aircraft and modern communications, the more liberal and less discriminatory North was moving physically closer to and having greater influence on the South.

WHAT THE NEGRO VETERAN WANTS

THE way in which the white South and the North allow the Negro veteran to exercise his rights as a citizen will shape the whole future of the Negro in America for this generation. The needs of Negro veterans are essentially the needs of all Negroes, but the veterans have a greater chance of fulfilling them. A special survey of some sixty-seven communities, mainly in the South, reflects the special problems of the Negro veteran and the difficulties he faces in solving them. The accompanying chart points up, for example, the difference between opportunities for white and Negro veterans.

Housing

Although housing for Negro veterans has had a relatively low priority, Negro veterans need houses more than any group in the population. But the shortage of homes has been no more acute than the shortage in jobs—that is, real jobs paying more than $20 a week. And, until they can find jobs with decent wages, Negroes simply cannot afford to buy homes or pay higher rentals.

HARRY A. HERZOG, FOR THE PUBLIC AFFAIRS COMMITTEE, INC.

Jobs

It is distressing to find jobs the number one problem of Negro veterans at a period when employment in the nation is soaring to new heights. The reason is twofold: first, Negro veterans want jobs that are more than menial; second, most employers and many unions refuse to lift racial barriers to employment. Negro veterans want to develop skills, to get better jobs. The Negro veteran has not only been unable to find better jobs, but he has had no place to go for advice on where to seek them.

Education and Training

Where Negro veterans have sought to enter college under the GI Bill, or have attempted to find an on-the-job or on-the-farm training program, they have found that the educational and training facilities were overcrowded, understaffed, or simply nonexistent. The overcrowding encountered by the 1,800,000 veterans who have applied for schools has been particularly serious for Negro veterans. Most white colleges have strict quotas for Negroes, and Negro colleges are small and few in number.

For practical purposes, Negro veterans have been treated as second-class citizens, regardless of their rights under the law.

GOOD JOBS—NO. 1 NEED

DESPITE the handicaps listed above, the Negro veterans have many advantages never before enjoyed by a large Negro group. They have been aided tremendously by the GI Bill of Rights, particularly the provision of fifty-two weeks of unemployment compensation at $20 weekly. Without this readjustment allowance, Negro veterans would probably have been forced to return to their old jobs as menial workers at wages of ten to fifteen dollars weekly. Actually only 15 per cent of all Negro veterans returned to the jobs they had prior to the war. Those on farms did not want to go back to a sharecropper's existence. Those in small towns working in unskilled jobs in mills or in low-paying cigarette factories wanted a future with greater promise. The "52–20 club," as the veterans call the unemployment compensation, has given Negro veterans an opportunity to look around before taking a job.

Many Negro soldiers and sailors visited war-boom cities while in the armed forces. They talked with many of the Negro workers who had been up-graded and had learned skills in war production. Negro war workers jumped from a total of .6 per cent to 6 per cent in skilled categories in the two years from 1942 to 1944. In the industrialized North, Negro veterans knew that precedents had been broken, that some of the race barriers to employment had been broken down. They were determined to

obtain good jobs or the training that would eventually provide them with better employment. The "52–20 club" permitted them to wait it out.

For the first year after V-J Day, an average of approximately 15 per cent of all Negro veterans were receiving unemployment compensation. But this does not take into account the nearly 35 per cent who shifted their jobs every few months.

Jobs Aplenty—At Low Pay

In forty-one out of sixty-seven towns and cities surveyed, the desire for better jobs ranked first among all needs. In most places Negro veterans have found only menial old-line Negro jobs offered. In Arkansas, for example, 95 per cent of the placements made by the USES for Negroes were for service and unskilled jobs. A survey in Georgia concludes, "Jobs are aplenty but at low pay and in unattractive work. In town after town, it is being found that Negro veterans are being offered jobs at twelve, fifteen, eighteen, or twenty-odd dollars a week. A large proportion of the men can show industrial or army experience at work better than common labor, and they are therefore entitled to draw the readjustment allowances. This is 'rocking chair' money." Even in the West, where many Negro veterans have gone in the hope of better wages, figures for October 1946 showed 12 per cent of Negro veterans were receiving unemployment com-

pensation. For the first half of 1946, unemployment ran 11 per cent higher among former Negro service men than it did among white veterans.

On the whole, Negro veterans have been accepted in new small businesses rather than large ones. In industries which have large plant units, race lines are usually settled; a firm policy of

HARRY A. HERZOG, FOR THE PUBLIC AFFAIRS COMMITTEE, INC.

nonemployment is normal. But many small shops in new industries, particularly in the service and repair fields, have successfully employed Negro veterans.

Discrimination in the Building Trades

An example of an industry which badly needs skilled workers but bars Negro veterans is the building trades. With a construction boom of unprecedented proportions, the industry needs some 1,500,000 workers. There are thousands of trained Negro construction workers who were electricians, plumbers, sheet metal workers, carpenters, and other mechanics in the Army and Navy. Yet, except for work as common laborers and hod-carriers, Negro veterans are virtually banned from the industry. Only four cities out of twenty-one surveyed by J. A. Thomas of the National Urban League had an adequate training program for veterans in the building trades.

Take, for example, Negro carpenters. Although more than 24,000 of them were trained in the Army, not more than 5 per cent of these have been employed as carpenters since returning to civilian life. The discriminatory practices of the AFL craft unions is chiefly responsible for the inability of Negro veterans to find skilled jobs in the building trades. Chief offenders are the International Brotherhood of Electrical Workers and the United Association of Journeymen, Plumbers, and Steamfitters which virtually shut out all Negroes from membership. These unions serve as hiring agents in their trades. Continuation of their policy of discrimination automatically cuts off all Negro veterans from these jobs. If the construction industry were to expand its labor force to its full needs, it alone could furnish employment for almost all Negro veterans. The outlook, however, is a dismal one. The building industry will continue to hang out a shingle which says "No Negroes wanted here."

Apprentice Training

In view of the lack of skilled and semiskilled labor in the South, Negro veterans are seeking training in trades. They are particularly anxious to enroll in an apprenticeship or on-the-job training program. Part of this demand for job training comes from the failure to find decent full-time employment. Part is a positive desire for self-improvement and a better life. Successful apprentice-training programs have been set up for carpenters, plasterers, and brickmasons. In each case, the program has been worked out because strong Negro locals of unions have pushed the training. Three Southern cities—Memphis, New Orleans, and Augusta—have developed a significant apprentice program in these three trades. In the North, Boston, Chicago, New York, and Philadelphia have begun apprentice programs. This apprentice training can be considered a success only in comparison with the dearth of opportunity for the training of Negroes that previously existed. Even in the best programs, white veterans have outnumbered Negro veterans about fifty to one. In electrical, sheet metal, plumbing, machinist, and other crafts, no Negro veterans are receiving apprentice training. As long as the federal and state governments' apprentice-training divisions refuse to

give special consideration to locating Negro veterans in training programs, and as long as unions and employers pursue a policy of shutting out all Negroes, apprentice training will not be a real hope for thousands.

On-the-Job Training

Potentially the most valuable provision of the GI Bill for Negro veterans is on-the-job training. This training is not limited to the crafts as is the apprentice training, and the government pays the veteran a subsistence allowance while he is learning a job. The record, however, is not impressive. Out of a total of 102,200 receiving on-the-job training in twelve Southern states, only 7,700 were Negroes. Only one out of twelve veterans receiving this training is a Negro, although one veteran out of three in the area is colored. A major obstacle to the development of job-training programs for Negroes has been the attitude of state departments of education, who have to approve all programs. Many of these departments have followed tradition in conceiving of all training programs and schooling as being segregated, and have assumed that the on-the-job training-program is "for whites only." The programs that have been most successful for Negroes have been in small repair and maintenance shops employing small numbers of men, where each individual has a better chance of being judged as an individual according to his ability and capacity to learn rather than by the color of his skin.

On-the-Farm Training

On-the-farm training has been even less successful. It has usually been limited to owners and tenants, while most Negro veterans come from families who are either sharecroppers or laborers. The program is highly decentralized and the white landholding interests who direct the training in many areas do not seem to be inclined to train Negroes to operate farms which they might some day own. Out of 28,000 veterans who have received on-the-farm training in the South, only 3,500, or approximately 11 per cent, are Negro veterans. Thus, only 1 per

cent of the 350,000 Negro veterans who were drafted from farms have received training for this vocation at government expense.

Vocational and Trade Schools

Vocational and trade schools also present a disappointing picture. A survey of fifty key cities by the Urban League revealed that only eleven cities had any formal vocational or technical training facilities. Only Baltimore, Maryland, and Washington, D. C., among those cities with segregated school systems, had satisfactory schools which Negro veterans could attend. In cities where color lines were not drawn, Negro veterans were able to attend only the industrial arts departments of high schools. These give only a general training which is not applicable to a specific job. Negro veterans attending trade schools have been particularly anxious to get training in radio and electrical work, machine shop and mechanics, business training, carpentry and woodwork, and commercial photography. These trades have been almost entirely closed to Negroes.

Substandard Courses

Because of the limited training opportunities, a number of individuals and groups have set up special vocational training courses for Negro veterans. Although these courses have, in every case, been approved by the Department of Education in the respective states, it is doubtful if many of them meet minimum standards for this type of training. In the absence of other opportunities, the Negro veteran may easily be exploited.

In view of these conditions, it can be readily understood why so many Negro veterans have remained in the "52–20 clubs." Shut out of industry after industry, offered only old-line Negro jobs at low pay, unable to obtain a workable job-training program, it is surprising that the Negro veterans have not given up the struggle for advancement. But most of them are patiently seeking to take advantage of each new job opening, each new opportunity to become better citizens. The responsibility lies with white America to see that the gates of economic opportunity are opened to Negroes.

HOMES FOR NEGRO VETERANS

ALL veterans agree there is no place like home—if you have one. The housing situation remains acute for 4,000,000 veterans. It is worse for Negro veterans. Not more than 100,000 Negro veterans can afford to pay for the homes built under the Veterans Emergency Housing Program. In the South, for every four units being constructed for white veterans, only one is being built for Negro veterans although the ratio of white to Negro veterans is two to one.

The Negro veteran in the South is eager both to buy and to rent new homes. This is probably a reflection of his discontent with life in his prewar home as compared with life in Army barracks. It is part of his general feeling of unrest and the desire for a change for the better which affects all Negro veterans. The Negro veteran cannot afford, on the average, however, more than $30 or $35 a month rent, nor a purchase price, on the average, over $4,000. Since it is impossible to build for less than $6,500 and to rent new houses at less than $60 per month, the Negro veteran must look to public, low-cost housing for housing within his means. This will continue to be the case until the general income level of Negro veterans is raised to the level of other veterans.

Negro veterans by and large have not been able to buy houses at the high prices which have prevailed since V-J Day. They need rental housing—at low rents. That the need of Negroes for housing is more acute than that of the general public is borne out in the 1940 general housing census. This showed that while the house of one white family out of four was substandard, one Negro family out of three had substandard housing.

Government-sponsored low-cost housing projects, which offer rentals within the present price range of Negro veterans, undoubtedly offer the greatest hope. But if wartime governmental policy is any indication, Negro veterans may not obtain their share of such housing. In the building of defense housing, only 2 per cent of the units were allocated to Negro families. Of the 200,000 public units which Congress authorized to be built in 1946–1947, Negro veterans will do well to get 10,000 or 15,000.

Discrimination in Housing Costs

Rents have jumped more for Negro dwellings since 1936 than for white. Today, the Negro veteran and his family receive considerably less for their housing dollars than the white veteran or any group in the white population. This can be readily seen in the overpopulated Negro ghettos of Northern cities and the

HARRY A. HERZOG, FOR THE PUBLIC AFFAIRS COMMITTEE, INC.

increased population in the Negro districts of Southern communities.

Steep increases in rents are not the only disadvantage Negro veterans have to face in meeting their housing needs. In every kind of home financing with the exception of government-sponsored HOLC and FHA mortgages, Negroes have had to pay higher interest rates. And, in many cases, commercial banking institutions have used high interest rates as a means of enforcing restrictive covenants for keeping Negroes out of predominantly white areas.

As Dr. Frank Horne, director of the Race Relations Division of the National Housing Agency, has pointed out: "The privilege of being a Negro comes at a high premium in the current real-estate and financial market."

Fewer New Houses

Current plans for veterans' housing in eight Southern states allot only 21 per cent of the new homes to Negroes although one-third of the veteran population is Negro. Tennessee is the only state where the proportion of houses for Negro veterans exceeds the proportion of Negroes among the veterans. Memphis, Tennessee, with 3,500 out of 8,500 homes planned for Negro veterans; Meridian, Mississippi, with 800 out of 2,000 units available to Negroes; and Jackson, Mississippi, with 1,000 out of 3,000 for Negro veterans have the best record among the Southern cities.

The immediate future for Negro veterans' housing lies in low-cost housing projects and in the development of inexpensive prefabricated homes. But in the long run the fundamental solution lies in raising the wage scale so that Negro veterans, and all Negroes, can afford to pay the costs of decent housing.

EDUCATION

THE educational benefits under the GI Bill, along with on-the-job training, are among the most substantial benefits provided for veterans of World War II. But once again, Negro veterans have been prevented, through discrimination, segregation, and second-class facilities, from obtaining the advantages which are theirs under the law. Out of 100,000 Negro veterans who are eligible to attend college under the GI bill, only 20,000 have been able to obtain admittance. Another 15,000 applied but were unable to find a college or university which had room for them. It is estimated that if there were space, another 50,000 would have applied for higher education. Upwards of 70 per cent of the Negro veterans who have succeeded in enrolling in colleges are attending all-Negro institutions.

Those who are attending college are specializing for the most part in education, social work, and social services. It is in these fields that Negro college graduates traditionally have been able to find employment. In the past, few Negroes have taken up engineering, chemistry, physics, law, and medicine. Today, how-

ever, there are signs of greater diversity among the interests of veterans in Negro colleges—one more indication that Negroes are beginning to demand the right to full citizenship in every walk of life.

Some of the Obstacles

Chief sources of difficulty for Negro veterans who want a college education are: the lack of physical plant, difficulties in obtaining surplus materials, strict quotas adhered to by most Northern universities, and the inadequacy of governmental allotments. As with all universities, housing is the number one shortage of Negro colleges. The National Housing Agency helped by providing some 6,000 dwelling units to Negro colleges in the fall and winter of 1946–47. Shortages of equipment have prevented one-third of all Negro colleges from admitting more veterans. The inability of the colleges to outbid noneducational buyers for laboratory equipment in War Assets Administration sales has seriously curtailed the courses in the physical sciences available to Negro veterans. Classroom space has been another limiting factor. A number of colleges report a shortage of recreational equipment.

A survey of twenty-one of the leading Negro colleges, with a total veteran enrolment of 11,043, showed that 55 per cent of all veteran applicants had to be turned away because of a lack of space. Among veterans as a whole, approximately 28 per cent were turned away for lack of space. The loss of potential leadership as a result of these rejections is great. It is unlikely that the opportunities which the GI Bill presents young Negroes for higher education will be duplicated for many years to come. Fortunately, veterans have seven years in which to take advantage of these benefits. But the casualty rate will be high.

Gains

Despite the barriers which prevent the majority of eligible Negro veterans from receiving a college education, more Negro youth are attending universities than ever before—20,000 of them are ex-GI's. These men and women, the majority of whom are

now veterans, will provide leadership for Negroes in the years ahead. If their training is sufficiently diversified, they can easily become the first generation of Negroes in American history who have furnished leadership in every field of our nation's life. Much depends, however, upon the willingness of the white majority to allow these veterans to use their capacities fully. It is not enough to train Negro doctors, lawyers, engineers, physicists, and social scientists. They must be offered the same opportunities as are offered all others in their professions.

DISCRIMINATION IN GOVERNMENT OPPORTUNITIES

FEDERAL laws give blanket benefits to veterans. All laws passed by Congress to assist veterans are meant to apply to all veterans. No federal legislation has ever exempted certain veterans from benefits because of the color of their skin, the religion to which they hold, or their ancestral backgrounds.

"For White Veterans Only"

But the administration of these laws is quite another story. Consistently, as though the legislation were earmarked "For White Veterans Only," federal agencies, particularly in the South, have discriminated against Negroes. The chief government agencies which serve veterans are the Veterans Administration, the Veterans Employment Service, and the Apprentice-Training Divisions of the Department of Labor, the National Housing Agency, and the Reemployment and Retraining Administration. The United States Employment Service was returned to the states on November 15, 1946, after wartime federal control.

Discrimination by federal agencies can be measured only in terms of failure to render adequate service to individual veterans. But this is difficult to measure. Federal agencies keep few statistical records of service according to race. In the South, there are virtually no records of how Negro veterans have fared in their relations with their government's representatives. When

asked why no accounting is made, the agencies correctly point out that under the law no distinction is made between races. But every survey that has been made points up the lack of vocational and educational guidance facilities for Negro veterans, especially in the South. And precisely because discrimination exists, governmental agencies must statistically examine their services to all minorities in order that abuses may be avoided.

Typical of answers given by governmental administrators when pinned down on this question of discrimination was that of a top official in the Apprentice-Training Service who said, "It is not our policy to approve or register programs which would exclude persons because of race or religion—but we cannot interfere with the rights of employers and unions to hire whom they wish."

White Personnel a Factor

One reason for the almost automatic discrimination produced by the federal agencies in the South may be found in the employment of almost exclusively white personnel. In Atlanta, Georgia, for example, only seven out of 1,700 employees of the Veterans Administration are Negroes; in Louisiana, out of 700 employees, only three are Negroes; in Tennessee, six out of 900 are Negroes. Even in New York, the only division of the VA which has adequate Negro representation is the Vocational and Rehabilitation Section. An unofficial check showed no Negro employees on the Merit Rating Boards or in the Legal and Adjudication Divisions. In fact, only one city in the country was found to have Negro representation on the Merit Rating Boards, despite the many Negroes who must be served there.

In the Veterans Administration

In the South, virtually the only Veterans Administration offices which are properly manned to handle Negro veterans are the branch offices at Negro colleges. Of these, there are, on the average, one or two in each state. Negro veterans cannot be expected to travel fifty, a hundred, or two hundred miles to go to a Veterans Administration office.

Veterans with service-connected disabilities or injuries are promised treatment in Veterans Administration Hospitals. Yet twelve out of 116 VA hospitals do not accept Negro veterans except in emergency cases. And of the 10,612 Negro veterans hospitalized in VA facilities, 4,379, or 42 per cent, were being

treated in segregated wards. The twelve hospitals refusing admittance are located in Texas, Kentucky, Georgia, Mississippi, Alabama, Arkansas, and Nevada. There is an all-Negro hospital at Tuskegee, Alabama. A report by the National Association for the Advancement of Colored People points out that "In Army and Navy hospitals, service men are not segregated by race, but when the VA takes over such a facility from the Army, it immediately organizes the hospital according to the 'pattern of the community.' The service men in the hospitals are discharged and become veterans under a blanket order. Colored veterans are immediately moved to Jim Crow wards if the hospital is located in the South." For wounded Negro service men, the first taste of civilian life is segregation. And they don't even have to get out of bed to find it.

Although top VA officials point to the no-discrimination pledge of the agency, admitted difficulty is encountered when enforcement of this policy is attempted on the local level.

Discrimination in the USES

Of the most importance to the Negro veteran in terms of job placement is the United States Employment Service, which is now controlled by the states. While still under federal control, the USES did not have a single Negro employee in the states of Louisiana, Alabama, Mississippi, Tennessee, South Carolina, Arkansas, and Texas, although more than 50 per cent of the job applicants were Negroes. Negro veterans were not allowed to use the same employment offices as white veterans in these states. North Carolina is the only Southern state which employs a significant number of Negro interviewers and employment officers. Facilities for job guidance and placement of Negroes in the government employment offices certainly cannot be expected to improve with the return of this agency to local autonomy. Dependence upon Congress for funds might have made some federal agencies reluctant to undertake a fair race-relations program, but when these same offices must appeal to state legislatures, elected in the South by a predominantly white electorate, the situation can hardly be expected to improve.

The Veterans Employment Service, which continues under federal controls, has done little to assist Negro veterans with skills in obtaining employment. The pattern in this agency parallels closely that of the USES. Very few Negroes are employed by the agency, and Negro veterans do not find a welcome reception at most of its offices below the Mason-Dixon line.

The Race Relations Service of the National Housing Administration

Shortly after he assumed office as National Housing Expeditor, Wilson Wyatt announced that his Veterans Emergency Housing Program was meant for "all veterans—not just for white veterans." Early in the program, which was eventually destroyed by the removal of price controls, Wyatt appointed Dr. Frank S.

Horne as head of a Race Relations Service. The Race Relations Service was designed to:

1. Review all policy statements for compliance with fair standards for minorities.
2. Develop techniques and methods essential to secure homes for minority veterans.
3. Effect equitable participation of minority groups in all phases of the housing program.
4. Provide representation of the Service in all parts of the Agency.
5. Provide information to and reflect accurately all observations of all organizations or individuals interested in minority groups.
6. Accumulate and release operational experience in handling minority group aspects of the program.
7. Assist the personnel division in securing positive application of the nondiscrimination policy of the Agency.

The section under Dr. Horne's direction was a model of what services a federal agency could offer minority veterans. It was reflected in a generally better record in housing for Negro veterans than other agencies could show in their fields. Only by recognizing the tendency toward discrimination can a government agency ever satisfactorily meet the needs of those less privileged citizens.

The Race Relations Service of the NHA can take the lion's share of the credit for the record of 20 per cent allocation of all veterans' homes in the South to Negroes. Had the Wyatt program been maintained, Negro veterans would have made a significant stride toward getting a fair deal in housing. It is to be hoped that the Race Relations Service will continue in existence and become a model for other agencies.

Reemployment and Retraining Administration

Coordinating over 3,000 Community Advisory Centers, which are financed and staffed on the local level, is the Reemployment and Retraining Administration. The RRA has assisted cities and towns throughout the nation in establishing centers which have

advised veterans on all phases of their problems. For Negro veterans generally, the centers have been of moderate value since most of their employees are white and little emphasis has been placed on minority aspects of veterans' problems. In the South, the Community Advisory Centers were nearly always manned by whites. But in October 1946, General Graves B. Erskine, administrator of the agency, appointed a special advisory committee of four Negro leaders to develop a race-relations program for the Advisory Centers. At least one of these leaders is optimistic over the chances of introducing a race-relations service successfully in a majority of the 3,000 communities.

Progress Being Made

Slowly, government agencies are beginning to provide services for Negro veterans. Step by step, from the new precedents set in such agencies as the NHA and the RRA to the relatively well-staffed USES offices of North Carolina, the official instruments of the people of America are moving toward meeting the needs of Negro ex-service men. The outlook in the South is still dismal, however, when a Veterans Administration office or a Veterans Employment Service office is the last place a colored veteran will go.

Unsolved Problems

The major obstacles blocking full service by federal agencies to Negro veterans are:

1. The failure of top officials to recognize the special difficulties of Negro veterans.
2. The failure to implement broad policy directives which hold out pious promises of equal service.
3. The unwillingness of local officials of federal agencies to take the lead in establishing services to all veterans, regardless of race.
4. The lack of participation by organized minority groups in federal programs.
5. The reluctance of federal agencies to measure statistically the present status of Negro veterans, with a view toward defining their needs.

6. The lack of minority personnel on the staff of government field offices, particularly in the South.

7. The lack of enabling legislation such as the Fair Employment Practices Act which would allow federal agencies to enforce policies and open up opportunities in local communities.

8. The lack of integration between agencies in racial policies, so that uniform service is rendered.

On the credit side, it should be pointed out that the federal agencies are in a better position to deal fairly with the Negro than most local and state agencies, particularly in the South. It is an advantage, whether in the North or South, to be divorced from the local attitudes, direction, and control present in almost every community. The federal agencies are, in effect, the spokesmen for all of the people in every part of the nation, whether in Biloxi, Mississippi, or in Chicago, Illinois. Potentially, these federal agencies can serve the Negro veteran better than any other agency.

THE POSTWAR PROTEST

DESPITE all the restrictions and miseries of a disciplined, segregated life in the Army or Navy, hundreds of thousands of Negro veterans found that only in uniform did they have warm clothing, good meals, adequate medical services, regular pay, and a job that was sometimes exciting. Civilian life simply did not provide these advantages to many Negro veterans. Irrespective of their protests against segregation in the Army and Navy, Negroes provided proportionately more volunteers in the first year of the peace than did any other part of the population. Although Negroes made up only one-thirteenth of the total number who served during the war, 25 per cent of all volunteers from September 1945 to September 1946 were Negro veterans. Finally, in early September 1946, the War Department set a quota on Negro enlistments. This quota, supposedly based on the over-all percentage of Negroes in the population, has remained intact despite vigorous protests from enlightened groups who saw in the order the curtailing of still another opportunity

for full participation by Negro veterans. The large percentage of Negroes who want to reenlist is not so much a commentary upon the advantages in the armed forces as an indication that life back home is still insecure and lacking in the promise of fruitful living.

Veterans' Organizations

Among the Negro veterans who have not reenlisted, migrated, or simply submitted to traditional caste patterns, there has been a widespread desire to join forces with their former comrades-in-arms. Throughout the South hundreds of local veterans' clubs have been set up in small rural communities. Negro veterans are usually in all-Negro groups. Although they are mainly social, they give the Negro veterans a sense of "belonging" and of having common strength to meet the problems of adjustment. For the most part, however, Negro veterans have found themselves not wanted as fully participating members by such old-line veterans' organizations as the American Legion, the Veterans of Foreign Wars, and the Disabled American Veterans. The only opportunity to participate in these groups has been in segregated Negro posts, according to the "pattern of the community."

In response to protests against their discriminatory policies, the leaders of the Legion, VFW, and DAV say that the Negroes "want it that way." There is a surprising demand on the part of many Negro veterans to join these old-line organizations. Recently in Louisiana, after the Legion state department abandoned its policy of not admitting any Negroes, some thirteen Negro posts were organized within three weeks. In these cases, the desire to be part of a larger organization undoubtedly counterbalances the hostility toward segregation. Generally, however, Negro veterans have waited before joining a national organization, weighing the advantages of a small but nonsegregated local group against those of a large but discriminatory organization.

The alternatives to membership in all-Negro units are as rare as are the small islands of progress which exist throughout the country for Negroes as a whole. The largest veterans' organization with a complete no-discrimination policy is the American Veterans Committee. Segregated chapters, regardless of region,

are not allowed by constitutional provision in the AVC. The provision is strictly enforced.

The national counterpart to the localized, all-Negro veterans' groups which have been formed chiefly in the South is the United Negro and Allied Veterans of America which, although claiming a biracial structure, is in the main Negro in membership.

If the history of Negro protest organizations has any meaning, its lesson lies in the necessity for Negroes to join with whites wherever possible to strike out for greater freedom. It is highly improbable that Negro veterans will find fulfillment of their needs for better jobs and social and political advancement in organizations in which segregation is either forced or self-imposed.

CONCLUSIONS

THERE are two major sets of facts surrounding the life of Negro veterans in America today: (1) Over a million dark-skinned ex-service men are, by training, discipline, sacrifice, and determination, prepared for integration into the nation's life as first-class citizens. (2) The nation has almost universally failed to grasp the enormous opportunity which is presented through veterans' benefits for this minority group. Whether or not this generation of Negroes succeeds in gaining improved social and economic conditions, the present-day Negro veterans are the leaders of their people. Full citizenship is demanded by Negro veterans. It can be safely assumed that the majority will hold to this demand for the rest of their lives.

Whether the road these veterans travel is one of peaceful progress or violent frustration will be determined in the specific problems which must be met now:

Jobs

1. The "52–20" club is a disappearing cushion which does not answer the need for a decent paying job.

2. In the position of being the last-hired and first-fired, the stake of the Negro veteran in maintaining full employment is high.

3. Negro veterans particularly will migrate to those areas where some Negroes already serve as skilled workers.

4. They will continuously press for openings at other than unskilled jobs until they secure them.

5. When they are turned down on the basis of lack of training, Negro veterans will press for greater on-the-job training facilities, apprentice-training opportunities, and better vocational and trade schools.

6. Restrictive practices by employers and unions in many industries, chiefly the building trades, will have to be curtailed before full participation by Negro veterans in the labor market can be obtained.

Housing

1. Negro veterans will continue to live in substandard dwellings until they are economically able to participate equally as renters and buyers in the housing market.

2. Restrictive covenants, the legal device to keep Negroes confined to urban ghettos, should be abolished.

3. Discriminatory mortgage rates should be equalized.

4. Greater quantities of low-cost housing and prefabricated houses must be made available to Negro veterans.

Education

1. Segregated Negro colleges are neither well enough equipped nor numerous enough to meet the demands of Negro veterans for higher education.

2. Quota systems in most colleges severely limit the number of Negroes attending, and already have forced at least 50 per cent of eligible Negro veterans to abandon plans for higher education.

3. The traditional pattern of entering the teaching, social service, and social work field is giving way to greater diversity

of study—an indication of the demand for full citizenship in all fields.

Governmental Opportunities

1. Governmental agencies excuse failure to service Negro veterans properly by claiming that they would be discriminating if they dealt specially with minority problems.

2. Federal agencies fail to administer a broad biracial policy on the local level, particularly in the South.

3. Most agencies either have very few or no Negro personnel to staff Southern offices, although almost two-thirds of all Negro veterans live there.

4. There is little uniformity in over-all administrative policy in dealing with the race-relations aspects of veterans' problems.

5. The National Housing Agency, under Wilson Wyatt, stood out as a model of what a government bureau could do to establish an equitable policy for minorities.

FACTS are needed by thoughtful citizens in a democracy. But how is one to get at the facts? Here is a suggestion. Get the habit of reading ***Public Affairs Pamphlets.*** Over eleven million copies have been bought by people seeking facts. Have these summaries of millions of dollars worth of research studies at your elbow on less than one foot of your book shelves!

Special Offer

For $7 you can get all the ***Public Affairs Pamphlets*** in print (see back cover), and new ones as they appear each month, to a total of 75. If you already have some of these pamphlets, check the ones you want, and we'll extend your subscription accordingly to the total of 75. Mail your order today. Simply write: "I want the ***Public Affairs Pamphlet Library***" and mail us your check for $7.

The publication of the ***Public Affairs Pamphlets*** is one of the activities of the Public Affairs Committee, Inc., whose purpose as expressed in its Constitution is "to make available in summary and inexpensive form the results of research on economic and social problems to aid in the understanding and development of American policy. The sole purpose of the Committee is educational. It has no economic or social program of its own to promote." The members serve in a personal capacity and not as representatives of their respective organizations. Publication of a pamphlet does not necessarily imply the Committee's approval of the statements or views contained in it.

COMBAT OFFICERS HEAD ROTC UNIT
AT SOUTH CAROLINA STATE COLLEGE

ORANGEBURG, South Carolina--South Carolina Agricultural and Mechanical College is the most recent Negro college to receive authorization for a senior ROTC (Reserve Officer's Training Corps) unit.

The Military Science and Tactics Department is headed by Lieutenant Colonel James H. Robinson, Washington, D. C., and is composed of three officers and four enlisted men. Four members of the department served with the 366th Infantry Regiment during World War II.

The members of Colonel Robinson's staff are: Captain Frederic E. Davison, Washington, D. C.; First Lieutenant Frank T. Talley, Louisville, Kentucky; Technical Sergeants Thomas J. Simmons, New London, Connecticut; Burt A. Mayberry, Jr., Kansas City, Missouri; Jesse C. Scott, Pleasant Hill, Louisiana and Technician Fourth Grade John Evans, New Orleans, Louisiana.

Colonel Robinson joined the 366th Infantry as a captain in 1941 and served with that organization until 1945. He was awarded the Bronze Star Medal and the Combat Infantryman Badge for participation in the Italian Campaign.

Colonel Robinson returned to the States in November, 1945 and was appointed to the Army Discharge Review Board, Washington, D. C. He received a Regular Army commission in July, 1946 and was appointed professor of military science and tactics in July, 1947. He is a graduate of Howard University and the University of Pennsylvania.

Captain Davison was graduated from Howard University in 1938 and entered active military service as a second lieutenant in 1941. During World War II he served as plans and training officer for the First Battalion, 366th Infantry Regiment and was awarded the Combat Infantryman Badge and Bronze Star Medal for participation in the Italian Campaign. He returned to the States in November, 1945 and entered Howard University School of Medicine. Captain Davison received a Regular Army commission in July, 1947 and was appointed assistant professor of military science and tactics at South Carolina State College.

Lieutenant Talley was graduated from Wilberforce University, Wilberforce, Ohio, in 1937, and received his Master of Science degree from New York University. He entered military service in 1941 at Fort Devens, Massachusetts, with the 366th Infantry Regiment and served with that unit until March, 1945. During the Italian Campaign Lieutenant Talley served as intelligence officer for the Third Battalion, 366th Infantry and was awarded the Bronze Star Medal and the Combat Infantryman Badge. He returned to the States in November, 1945 and was separated from the Service.

MORE

He was recalled to active duty and assigned to the 25th Infantry Regiment at Fort Benning, Georgia in October, 1946 and remained with the 25th Infantry until August, 1947 at which time he was transferred to South Carolina State College.

Sergeant Simmons entered the service from New London, Connecticut and was assigned to the 366th Infantry Regiment at Fort Devens, Massachusetts. He served with the 366th Infantry for three years and in October, 1944 was transferred to the 92nd Infantry Division at Viarreggio, Italy. He returned to the States in November, 1945 and served at Fort Benning, Georgia, and Fort Bragg, North Carolina, before being transferred to his present assignment.

Sergeant Mayberry entered the service in February, 1943 and was assigned to Headquarters Troop, 5th Cavalry Brigade, Fort Clark, Texas. He remained in the cavalry until June, 1943 when he entered Prairie View State College, Prairie View, Texas, as an engineering student under the Army Specialized Training Program. He joined the 92nd Division in February, 1944 and served in the Mediterranean Theater of Operations until October, 1946. Sergeant Mayberry returned to the States in November, 1945 and served at Camp Beale, California, Fort Lewis, Washington and Fort Belvoir, Virginia before receiving his present assignment.

Sergeant Scott entered the service in December, 1940 and was stationed at Camp Shelby, Mississippi from December, 1940 to July, 1946. He was transferred to Fort Bragg, North Carolina in August, 1946 and joined the 555th Parachute Infantry Battalion. He was transferred to South Carolina State College in July, 1947. Before entering the service, Sergeant Mayberry attended Southern University, Scotlandville, Louisiana.

Sergeant Evans joined the Army in 1943 and went overseas with the 2053rd Quartermaster Truck Company. He served with the quartermaster unit in Australia, Leyte and Japan. Sergeant Evans has recently returned from the Pacific.

"GEORGE W. CARVER DAY"
CELEBRATED IN JAPAN

WITH THE EIGHTH ARMY IN KOBE, Japan--Soldiers stationed at Camp Carver, Kobe, Japan, recently observed "George Washington Carver Day" in honor of the great Negro scientist and founder of the Carver Foundation, Tuskegee, Alabama.

The program, held at the Tomodachi Service Club, included music by the 15th Army Band, a summary of the life of Doctor Carver by First Sergeant Nolan Bailey, Louisville, Kentucky, and an address by Lieutenant Colonel Judson M. Smith, former commanding officer of Camp Carver.

Miss Gladys Martin of New York City, club director, presented a portrait of Doctor Carver to Major LeMoine E. Isandi, present commander of the post.

Formerly known as West Camp, the installation was renamed Camp Carver on February 12, 1947. Prior to the renaming, a contest was held among the men of the camp, and the name of Doctor Carver was chosen from a list of twelve prominent Negroes.

The list included the names of Marian Anderson, Paul Robeson, Jesse Owens, Dorie Miller, Jackie Robinson, Joe Louis and Doctor Charles R. Drew.

In choosing the name, George Washington Carver, the soldiers paid tribute to one of the great scientists of modern times. In 1923

MORE

Doctor Carver was awarded the Spingarn Medal, an award made each year to the Negro who has made the most significant achievement in fostering better race relations and in 1932 he was awarded the Franklin D. Roosevelt Medal.

In 1940, Doctor Carver donated his life savings, thirty-three thousand dollars, to establish the Carver Foundation in order to further his research. He died at Tuskegee, Alabama, on January 5, 1943.

NATIONAL GUARD COMMISSIONS
OPEN TO FORMER ENLISTED MEN

WASHINGTON, D. C.--Major General Kenneth F. Cramer, Chief of the National Guard Bureau, recently announced a new policy on the direct appointment of second lieutenants to the National Guard that materially increases the number of former enlisted men who can now qualify for commissions.

Former enlisted men in all grades having a minimum of six months service in the Army of the United States between December 7, 1941, and June 30, 1947, are now eligible for direct appointment as second lieutenants in the National Guard if they meet the following requirements:

(1) They are graduates of an accredited college or university where no advanced Reserve Officers Training Course was given or, if it was given, their period in school before graduation was too short to permit them to complete the ROTC course,

(2) They are 21 years old and have not passed their 28th birthday at the time of appointment in the Guard.

Commissions as second lieutenants in the National Guard are also open to advanced ROTC graduates without previous military service.

Hitherto, direct appointment as second lieutenants was limited to eligible warrant officers and enlisted men of the first three grades whose war record attested their professional fitness.

BRONZE STAR MEDAL AWARDED
MEMBERS OF 24th INFANTRY

WITH THE EIGHTH ARMY IN GIFU, Japan--Sixteen officers and enlisted men of the 24th Infantry Regiment were recently presented the Bronze Star Medal. The decorations were presented during a Regimental review held on the parade ground at Camp Gifu, Japan.

Colonel Michael E. Halloran, Oconto, Wisconsin, commanding officer, 24th Infantry Regiment, presented the medals "for exemplary conduct in ground combat against the armed enemy" during World War II.

Those receiving the award were: Lieutenant Colonel Gaston Eikel, Sherman, Texas; Captain Raymond A. Diggs, Washington, D. C.; Captain John J. Phillips, Lockland, Ohio; Captain Charles R. Penrose, Ayer, Massachusetts; Captain Clifford R. Wright, Dayton, Ohio and First Lieutenant Richard W.F. Hughes, Madison, New Jersey.

Also, First Sergeant Albert Bartley, Monticello, Georgia; Technical Sergeant Otis Gritney, Cleveland, Ohio; Technical Sergeant Roosevelt Pettis, Saint Louis, Missouri; Technical Sergeant David Robinson, La Grange, North Carolina; Technical Sergeant Brister Dickerson, Estill, South Carolina; Technical Sergeant Goree Martin, Amarillo, Texas; Staff Sergeant William Davis, Jr., Newton, Georgia.

MORE

Staff Sergeant Roy Miller, Lynchburg, Virginia; Staff Sergeant Robert Edwards, Columbus, Georgia and Technician Fourth Grade Otis Young, Detroit, Michigan.

QUARTERMASTER SERGEANT RECEIVES
ARMY COMMENDATION RIBBON

HEADQUARTERS EIGHTH ARMY, YOKOHAMA, Japan--First Sergeant Wilbert L. Hopkins of Washington, D. C., was recently presented the Army Commendation Ribbon. The decoration was made at a ceremony held at the Eighth Replacement Training Center, Atsugi, Japan.

Sergeant Hopkins, a member of Company "E", Kobe Quartermaster Depot, was commended by Lieutenant General Robert L. Eichelberger, commanding general, Eighth Army, for meritorious services performed while serving with the Eighth Army Replacement Training Center from October 15, 1946 to October 8, 1947.

The citation reads in part, "in addition to performing his normal duties as first sergeant in an exemplary manner, he accomplished a great many projects designed to benefit the morale and welfare of the troops in his unit.

"Through his initiative, untiring efforts, devotion and intelligent application of administrative ability, First Sergeant Hopkins established a high degree of efficiency within his unit, thereby contributing materially to the success of the training mission."

Mrs. Mildred Hopkins, wife of Sergeant Hopkins, arrived in Yokohama in December, 1947 aboard the U.S. Army Transport General Eltings.

"THE CROSSROADS CLUB"
OPENS IN YOKOHAMA

HEADQUARTERS EIGHTH ARMY, YOKOHAMA, Japan--"The Crossroads Club," a recreation club for non-commissioned officers of the first three grades, was opened recently in the presence of Brigadier General Frank C. McConnell, Commanding General of the Second Transportation Major Port.

Only first sergeants, master sergeants, technical sergeants and staff sergeants assigned to the Second Transportation Major Port are eligible for membership. The club was established in May, 1947, but was placed on an inactive status until rehabilitation work on the club building was completed.

Ninety-five sergeants from the 194th, 207th and 489th Transportation Truck Battalions compose the club membership. Second Lieutenant Jesse D. Thomas, Sharon Hill, Pennsylvania, serves as club officer.

Officers of the club are: Technical Sergeant Willie West, Jr., Shreveport, Louisiana, president; First Sergeant Walter Gomes, Waterbury, Connecticut, vice president; Staff Sergeant Christopher F. Simmons, New Brunswick, New Jersey, secretary-treasurer; and Staff Sergeant David H. White, New Orleans, Louisiana, steward.

Members of the Board of Governors are: First Sergeants Jesse J. East, Montpelier, Louisiana; Harry Jones, Columbus, Ohio; Earl O. Savage, Chester, Pennsylvania and Staff Sergeants Hashiel G. Thompson, Henderson, Tennessee and Saunders Wright, Cleveland, Ohio.

MORE

GI FLIES FROM JAPAN TO
OFFICER CANDIDATE SCHOOL

HEADQUARTERS EIGHTH ARMY, YOKOHAMA, Japan--Sergeant William O. Love of Little Rock, Arkansas, was recently flown from Yokohama to Fort Riley, Kansas to attend the Officer Candidate School.

Before leaving Yokohama, Sergeant Love was congratulated by Lieutenant General Robert L. Eichelberger, commanding general, Eighth Army, upon being selected as a student officer.

Sergeant Love entered the Army in 1941 and served in the European Theater of Operations with the 99th Infantry Division. For combat participation in the European Theater Sergeant Love wears the Combat Infantryman Badge, four battle stars, the Purple Heart Medal and is entitled to the Bronze Star Medal.

Before entering the service, Sergeant Love attended the University of California at Los Angeles. His parents, Mr. and Mrs. William M. Love, live at 3404 Chester Street, Little Rock, Arkansas.

* * * * * * * *

CAMP LEE SERGEANT RETIRES
AFTER THIRTY YEARS SERVICE

CAMP LEE, Virginia--Technical Sergeant John Carter, 899th Quartermaster Laundry Company, Camp Lee, Virginia, was recently retired after thirty years service.

He enlisted in the Army on December 1, 1917, at Columbus, Ohio and was assigned to the 24th Infantry Regiment. Three months later he was transferred to the 312th Service Battalion and served in France with that unit during World War I.

Carter returned to the States in 1920 and was again assigned to the 24th Infantry Regiment, Camp Furlong, New Mexico. After five months he was transferred to the 9th Cavalry Regiment and served with that organization in the Philippines for two years.

Sergeant Carter returned to the States in 1922 and began a tour of duty at Fort Huachuca, Arizona, where he served until 1935. In 1935 he was transferred to Fort Belvoir, Virginia and remained there until 1939 when he was assigned to the Army War College, Washington, D. C.

After brief tours of duty at Camp Holabird, Maryland, and Camp Lee, Virginia, Sergeant Carter was assigned to the 362nd Engineer Regiment, Camp Claiborne, Louisiana, and became first sergeant of the Medical Detachment. He left Camp Claiborne in 1943 for overseas duty; while in the Pacific Carter served in Australia, New Caledonia, New Guinea and Truk. He joined the 8th Army in 1944 and participated in the Japanese Invasion.

Sergeant Carter returned to the States in 1945 and was assigned, upon request, to the 899th Laundry Company, Camp Lee, Virginia, where he remained until his retirement. As to the future, Carter intends to open a small business in his hometown, Eldorado, Arkansas.

When asked his opinion regarding the thirty years of Army life, Sergeant Carter said that he was completely satisfied and advises the young men in the Army today to remain in the service, and to retire after thirty years.

Appendix E	Chronologue

MORE

FOREWORD

On July 26, 1948, the President issued Executive Order No. 9981 establishing the President's Committee on Equality of Treatment and Opportunity in the Armed Services. In connection with the issuance of this Order, the Office of the Civilian Aide to the Secretary of the Army feels that this is the time to summarize the policies and practices adopted by the War Department and the Department of the Army during the past few years with respect to Negro manpower.

The Department has been engaged in a continuous study of this problem for several years. With its objective, the most effective utilization of Negro manpower, the Department has developed extensive administrative and educational programs which are summarized in this report. Their degree of effectiveness may best be judged by the utilization of Negro manpower within the Department, which is summarized from the latest available figures. It is our hope that this material will be helpful to the President's Committee in its search for ways and means to implement the policies set forth in the Executive Order.

In addition, the enactment of the Selective Service Act of 1948 calling for the first peacetime draft in the history of the nation provides basis for a significant change in the direction of the military manpower policy of the United States. This transition gives further occasion for recording pertinent facts and delineating certain significant trends with respect to the participation of the Negro citizen in the armed forces.

Prior to World War II the Negro soldier was accepted in the Regular Army primarily for four outfits provided by law. At the conclusion of World War II, policy was established for Negro inclusion proportional to the population ratio in the nation.

Total strength and Negro strength continued to decline as the Army returned toward peacetime status. The recent enactments reverse this trend, while retaining the population ratio concept. It is the situation at this turning point which this Report essays to record. The status, trends, and implications are presented in a selection of significant items. Only in this sense is this a special Report, since it is based upon data drawn from routine reports in official channels.

It need not be emphasized that this Report is not exhaustive. No effort is made here to present, even in summary, the vast amount of data on Negro participation in the Army. Suffice it for present purposes to focus attention upon a number of aspects which, through pointing toward optimal utilization of Negro manpower and all manpower, will contribute to national strength, safety, and security.

Again there is no detailing here of problem areas with reference to the Negro in the armed forces. These are receiving the continuous attention of civilian and military officers, and of educators, attorneys, ministers, editors and sociologists whose assistance is being utilized. Resulting analyses, findings, decisions and orders are to be found in appropriate channels in the Department.

This Report and other documents mentioned herein outline awareness, actualities, and action upon which to predicate the more complete development and utilization of the manpower resources of the nation.

THE NEGRO IN THE ARMY
Policy and Practice

A. World War II and Before

Since colonial times Negroes have been in units of the Army. By Acts of Congress dating from 1867 it is provided that "the enlisted men of two regiments of infantry and . . . . of two regiments of cavalry shall be colored men."

As World War II approached the 24th and 25th Infantry and the 9th and 10th Cavalry Regiments provided basis for the five officers and 4,435 men in the Regular Army.

Wartime expansion carried this nucleus to peak enlisted strength of the Army and Air Force combined of 701,678 and a maximum officer strength of 7,768. These men served in all arms and services and in all enlisted and commissioned ranks through Brigadier General.

Brigadier General B. O. Davis, 0-1217, holds the unique distinction of being the only Negro to attain a rank this high in any of the armed services. Having been promoted to the rank of Brigadier General in October 1940, he was retired as a Regular Army Colonel on 31 July 1941. On 1 August 1941 he was recalled to active duty with the rank of Brigadier General.

On 13 July 1948 he concluded fifty years of service, the longest of any soldier currently in the Army, and returned to inactive status with the rank of Brigadier General. In appropriate ceremonies, he was personally commended upon his long and distinguished career by President Truman and by Secretary Royall. General Davis participated in, led, and in many respects exemplified the sound advancement of the Negro in the Army.

From the inception of planning for entry into World War II, the War Department gave serious attention to the question of effective utilization of the Negro potential. The Office of the Civilian Aide to the Secretary of War was reestablished "to assist" as Secretary of War Henry L. Stimson stated in the letter of authorization dated 25 October 1940, "in the formulation, development and administration of policies affecting the fair and effective utilization of Negroes in the Army and with policies involving their employment as civilians in Army installations and by Army contractors."

Further, a Negro Interest Section was established in the Bureau of Public Relations to provide effective contact with the civilian populace. A staff committee on policy regarding Negro troops was organized at the Secretarial level. Negro officers and units were called to active duty from the Reserves and from the National Guard.

Developments in this area as the war advanced may be traced through such official publications as the following:

War Department Pamphlet 20-6 (1944) "Command of Negro Troops"
Army Service Forces Manual M-5 (1944) "Leadership and the Negro Soldier"
Army Talk 43, "Our Best Weapon, Teamwork"
Army Talk 70, "Prejudice, Roadblock to Progress"

Of similar import were the films:

"The Negro Soldier" Army Orientation Series OF-51 - - - - 41 Minutes
"Teamwork" Army Orientation Series OF-14 - - - - - - - - - 20 Minutes
"Don't Be a Sucker" Educational Film EF-9 - - - - - - - - - - 30 Minutes

The cessation of hostilities overseas brought rapid demobilization but the War Department remained on the alert. Analysis, evaluation, and the quest for methods of improving upon wartime practices, extended into many areas, including the utilization of Negro manpower. Differing from earlier days, a positive interest was maintained in weighing the Negro potential into a peacetime program for national strength, safety and security.

MORE

B. Post-War: The Gillem Board Report.

In October 1945, following the close of the active phase of World War II, the Secretary of War appointed a board of officers headed by Lieutenant General A. C. Gillem, Jr., to prepare a broad policy for the future utilization of Negro manpower in the military establishment.

During several months of study, the Gillem Board examined War Department practices and policies on Negro utilization through testimony of competent authorities, civilian and military, and through exhaustive examination of documents and files of primary and secondary import.

The resulting report "Utilization of Negro Manpower in the Post-War Army Policy" was promulgated as War Department Circular No. 124, dated 27 April 1946. Subsequently reaffirmed, it continues in effect as the autoritative policy statement on participation of Negroes in the post-war Army.

In Summary, this policy provides that:

a. One-tenth of the Army strength shall be Negro.

b. Negro units will be trained in a wider variety of combat and non-combat arms. (Current plans include combat units in anti-aircraft artillery, field-artillery, infantry and airborne infantry, tank battalions, combat engineers, chemical mortar companies, medical collecting and ambulance companies. Non-combat units will include ordnance, signal construction, construction engineers, chemical smoke companies, port companies, quartermaster units, military police, fire-fighters, auto-maintenance units, special service companies, and bands.)

c. Negro units will be smaller.

d. Groupings of Negro and white units in composite organizations will be accepted policy.

e. Negro personnel with special skills or qualifications will be employed as individuals in appropriate overhead and special units.

f. Qualified Negro officers will replace white officers in Negro units.

g. Attention will be paid to such morale factors as favorable community attitudes and the availability, without racial discrimination, of army facilities for recreation and transportation.

Though the Gillem Report could not issue a time-table, a number of its findings have become established policy. Currently, authorizations in keeping with the spirit of the Report are being detailed regarding the selectees soon to begin entering the service. For the first time it is assured that (a) all selectees will be called by birth dates without racial quotas, and (b) Negro selectees will train at installations where community attitudes are not unfavorable.

The Gillem Board Report will have enduring significance as a Department document for the following reasons, among others:

1. The bibliography covered every document and publication, classified and otherwise, bearing upon the subject, and thus has permanent value.

2. The Department received for the first time a comprehensive recorded account of past policies on and utilization of the Negro soldier.

3. Prospective participation of the Negro citizen in the Armed Forces was analyzed, outlined, and recorded, thus establishing a base from which to measure future utilization.

MORE

C. Significant Developments.

Assembled from official reports, the items which follow show a marked advance over earlier status. Even so, they have been selected more for what they portend than for what they portray. The trends evident in these and many similar examples are highly significant as relating to the future utilization of the Negro citizen and all citizens in the Army, in the armed forces as a whole, and in other arms of public service.

1. Strength. The following data show the Negro strength in the Department of the Army as of 31 May 1948:

a. Army Department Strength, total, all races		569,704
Negro personnel		63,511
Negro percent of total		11.15
b. Army Officer Strength, total, all races		73,171
Negro Officer Strength		987
Negro percent of total		1.32
c. Negro Officer Ranks		
General	1	
Colonel	2	
Lieutenant Colonel	10	
Major	28	
Captain	241	
First Lieutenant	538	
Second Lieutenant	114	
Total Commissioned Officers		934
Warrant Officers		53
Total Negro Officers		987

d. Negro Women included above are as follows:

	Officer	Enlisted	Total
Army Nurse Corps	69	0	69
Women's Army Corps	8	264	272
Total Negro Women	77	264	341

e. Negroes in the Army held duty assignments, by branch, in the following as of the above date:

General Officer
General Staff Corps
Armored Force
Cavalry
Coast Artillery Corps
Field Artillery
Infantry
Adjutant General's Department

MORE

Chemical Corps
Corps of Chaplains
Corps of Engineers
Corps of Military Police
Finance Department

Medical Services:

Dental Corps
Medical Corps
Medical Service Corps
Veterinary Corps
Medical Department
Army Nurse Corps

Ordnance Department
Quartermaster Corps
Signal Corps
Transportation Corps
Women's Army Corps

f. Negro personnel are on duty in all Army commands in Continental U. S. and in all overseas commands including the Far East, Pacific, Alaska, Europe and the Caribbean.

g. Regular Army officer strength stood at five (5) as the war approached. The increase from this small number is shown in the following tabulation corrected to 30 July 1948:

July 1, 1940	On duty	5
1941-1946	From West Point Military Academy (Army)	4
June 1946	Appointments	17
January 1947	Appointments	2
June 1947	Appointments	3
October 1947	Appointments	9
January 1948	Appointments	1
June-July 1948	Appointments	3
		44
May 1948	Commissioned upon qualifying as distinguished military (ROTC) graduates and at least 21 years of age	9
30 July 1948	Total Negro Regular Army Officers (Including one retired 13 July 48)	53
	Qualified candidates awaiting 21st birthday	4
	Names, rank, and branch are given in Appendix B.	

2. Specialized Preparation. Operations at two installations among numerous others may be cited as examples of Army attention to details in the program of preparing the Negro soldier to measure up fully in proficiency.

MORE

a.. The 82nd Airborne Division based at Fort Bragg, North Carolina has approximately 18% Negro troops in the Division and attached units. The former 555th Parachute Infantry Battalion was redesignated 3rd Battalion, 505th Airborne Infantry Regiment and performs its duties as an integral part of the Division. The 503rd Antiaircraft Artillery Battalion and the 758th Tank Battalion have recently become part of the famed 82nd "All-American" Division.

During the recent Army-Air Force training maneuver "Exercise Assembly" the 3rd Battalion, 505th Airborne Infantry Regiment was used to spearhead the Division's mass paratroop drop at Camp Campbell, Kentucky.

b. The Kitzengen Basic Training Center near Nurnberg, Germany is the training center for Negro troops in the European Command. Units undergo a training period of one month at Kitzengen and during this period the troops receive six hours military training and two hours academic training from Monday through Friday.

Enlisted personnel who have completed high school or college are given instructions in the technique of teaching and are placed on duty with the instructors' pool at the training center.

The academic program at Kitzengen is designed to increase the soldier's general proficiency and thereby render him more effective in performing his military assignments.

c. Postwar, the program of the Army Schools has been re-examined so as to assure not only parity in training opportunity, but also effective utilization of Negro School trained personnel. This is in addition to the comprehensive program of the Armed Forces Institute through which every individual in uniform may enroll in courses for general educational improvement.

Department of the Army Letter AGAM-PM 220.63 (1 Mar 48) GSGPA 4 March 1948 summarizing this development is attached as Appendix A - 1.

3. Human Relations. The War Department, and now (since the unification of the Armed Forces on 17 September 1947) specifically the Department of the Army, may well claim that it has given more attention, in quantity, quality, and duration, to the subject of effective coordination of human effort as regards race than any other arm of the government. As evidence may be mentioned one item on literature developed on the subject, and one on practical implementation.

a. Literature. All soldiers have available courses and literature with visual aids, bearing upon human relations as they relate to the most effective utilization of the Negro manpower in the Army. Publications on this subject issued since the war include:

1. "Utilization of Negro Manpower in the Postwar Army Policy", War Department Circular 124, 1946.

2. "Negro Manpower in the Army", Army Talk 170, 1947.

3. "Prejudice", Army Talk 210, 1948

4. "Of One Blood", Chaplain's Hour Lecture No. 41, 1948.

Class, committee, and seminar study, depending upon the type of operation, make scheduled use of this and more general literature on the subject of human relations.

b. Recreational Facilities. Policies covering off duty activities without segregation supplement the general principles set forth in the Gillem Board Report and elsewhere. These are covered in Army Regulation 210-10, par. 19; W. D. Memorandum 600-45, 14 June 1945; and W. D. Letter AG 353.8 (5 July 44)

MORE

(O-B-S-A-M) 8 July 1944, subject Recreational Facilities. Violations and efforts to evade this policy at Army installations anywhere in the world meet with prompt corrective action when brought to official attention.

4. West Point. Eleven Negro cadets have graduated from the U. S. Military Academy at West Point, New York. A larger total has been in attendance at various periods during the 145 years history of West Point.

Of these eleven graduates, four are deceased and three are in the Air Force. Four are on active duty in the Army and their names appear in Appendix B, with additional data in Appendix C.

The authorized strength at West Point is 2496 cadets. All are Congressional appointees except 352 who come from the Army, the National Guard and military schools. Places are allocated within the total for four cadets from the Philippines and twenty from the Latin American countries. For 1947-48 there were 301 graduates from an enrollment of 2101.

Nine Negro cadets, the largest number ever in attendance at one time, were included in the total enrollment. Data on these nine Negro West Point cadets follows:

NAME	HOME	AGE	CLASS
Brown, Norman J. from Lincoln University	Philadelphia	19	1951
Carlisle, David K. from California Institute of Technology	Los Angeles	21	1950
Green, Robert W. from Oakland High School	Oakland	19	1950
Howard, Edward B. from Dartmouth College	Washington	22	1949
Robinson, Roscoe, Jr. from St. Louis University	St. Louis	19	1951
Smith, Charles L. from Air Force, Aviation Cadet	St. Louis	25'	1949
Wainer, Douglas F. from Air Force	Norwalk	22	1951
Woodson, William B. from Dunbar High School	Washington	17	1951
Young, James R., Jr. From Rutgers University	Brooklyn	20	1951

5. Reserve Officer Training. Military Training in the Land-Grant Colleges and Universities is provided for first in the Morrill Act of 1862. The ROTC program as a development, dates from 1916. A post-war official statement indicates that the ROTC program is again, as between World Wars I and II, the chief source of Army officers. Thus the current import of data on Negro college student participation in the Reserve Officers Training Corps.

a. Negro Officer Strength for World War II developed in general terms from five officers of the Regular Army at the beginning to almost 8000 Army and Air combined at the peak. There were approximately 574 Negro reserve officers available in 1940 and estimates indicate that about one-half of these were physically qualified for active duty. It is clear then that fewer than 400 Negro ROTC graduates went forward in response to the early calls. Practically all of

these were from Howard University and Wilberforce University.

The officer candidate schools, operated by all branches on a completely integrated basis as regards race, accounted for the more than twenty-fold expansion in Negro officers.

As against less than 400 Negro ROTC graduates, a report of ROTC prepared by the Information Section, AGF, 30 June 1947, indicates that by 1941 the ROTC programs had produced approximately 120,000 reserve officers and given military training to approximately 1,600,000 enrollees in all levels of the ROTC.

b. The Army has ROTC units in nine Negro colleges, with branches of service as shown in the following list.

1. A & T College, Greensboro, N. C.	Infantry
2. A & M College, Orangeburg, S. C.	Infantry
3. Hampton Institute, Hampton, Virginia	Coast Artillery
4. Howard University, Washington, D. C.	Infantry
5. Prairie View State College, Prairie View, Texas	Infantry
6. Tuskegee Institute, Tuskegee, Alabama	Infantry
7. Virginia State College, Petersburg, Virginia	Quartermaster
8. Wilberforce University, Xenia, Ohio	Infantry
9. West Virginia State College, Institute, West Virginia	Field Artillery

Three additional colleges received authorization on 1 July 1948 to inaugurate ROTC programs in the fall term. These are

10. Florida A & M College, Tallahassee, Florida	Anti-Aircraft
11. Morgan State College, Baltimore Md.	Infantry
12. Southern University, Baton Rouge, La.	Transportation

These constitute the major training opportunities for developing Negro college military potential. There are a few Negro students in Army units and in Navy units in racially mixed universities, while the Air Force maintains Air ROTC units at Howard and Tuskegee.

c. The sharp increase in Negro ROTC enrollment with the advent of the war is shown by the rise to --

1,450	in	1939
1,589	in	1940
2,715	in	1941

d. The strength of the units in the colleges above was 3,035 on 1 December 1947. This, compared with a total collegiate ROTC enrollment of 72,946 for this term, shows a participation approximating 4.2 per cent.

MORE

Herewith should be weighed the facts that (1) there are no standard High School ROTC units as such allotted to separate Negro High Schools, thus limiting such opportunity to those Negro youths outside the segregated school areas; (2) the Negro officer strength, developing largely from ROTC units in Negro colleges, has recently approached 1.5 per cent of the total Army officer strength, as compared with the above ROTC participation; and (3) Negro strength in the Army is to be maintained at approximately 10 per cent of the total.

e. The enrollment by level, with college years roughly corresponding, is shown as follows in the nine institutions above as of 1 December 1947:

Basic	I	1,835	Freshman
Basic	II	626	Sophomore
Advanced	I	383	Junior
Advanced	II	191	Senior
		3,035	

The ratio of Basic enrollment to Advanced approximates 5 to 1 and is in accordance with national norms for college ROTC units.

6. Headquarters Staff Assignments. Negro officers performing staff duties in the Pentagon during World War II and subsequently have rendered significant service, yet to be fully realized. This development, as much as any other, exemplifies the growing concept of optimal placement of personnel without regard to race. (Those now on duty are indicated by *).

Officers	Branch	Duty Assignment
Lt. Samuel W. Allen	JAG	AGO

Major Orion Page*	FA	OSA
Lt. Orlando B. Pino	MAC	SGO
Major Homer Roberts	MP	BPR
Lt. Colonel James H. Robinson*	Inf	OSW-OSA
Lt. Willard W. Savoy*	AC	AID
Lt. Col. Raymond Watkins*	FA	NGB
Major Harriet West*	WAC	AGO

These Negro officers from the field, and others in the field, have shared much of the responsibility for the advances in policy and practice typified by the examples recorded herein, and, more significantly, evident in the field.

APPENDIX A-1

DEPARTMENT OF THE ARMY
Office of the Adjutant General
Washington 25, D. C.

AGAM-PM 220.63 (1 Mar 48) 4 March 1948
CSGPA

SUBJECT: Utilization of Negro school trained personnel

TO: Commanding Generals:
Army Ground Forces
All Armies, ZI
Military District of Washington
Chiefs of Administrative and Technical Services

1. Reference is made to C 4, Memorandum 615-515-1, replacing letter, Department of the Army (AGPA-U 220.63 (31 Dec 47), 2 January 1948. This change increased the quotas for Negroes selected from the replacement stream for Army schools. These over-all school quota increases were based on three factors:

a. An increase necessitated by present world-wide requirements as computed from the WDGPA-45 Report.

b. An increase to accommodate personnel recruited under Memorandum 600-75-26, "Enlistment of Negroes for Special Units," which was the subject of recent instructions to army commanders contained in letter, Department of the Army (AGPA-U 291.2), 29 January 1948.

c. An increase for the specific courses listed below, the output of which is destined for assignment to zone of interior army area or technical or administrative services bulk authorization overhead within current manning levels and allocations for such overhead positions.

2. The courses referred to in paragraph 1c are--
a. Military policeman (677)
b. Cablesplicer (039)
c. Central office technician (095)
d. Installer - Repairman (097)
e. Automatic telephone system maintenanceman (115)
f. Teletype mechanic (239)
g. Dental laboratory technician (067)
h. Medical equipment maintenance technician (229)
i. X-ray technician (264)
j. Medical laboratory technician (858)
k. Pharmacy technician (859)

3. That portion of the total quota in these courses to be utilized for this particular overhead assignment is not large. There has been no change in the normal selection criteria for the specific courses listed.

This portion, moreover, has been based upon a careful study of actual overhead bulk utilization of these particular specialists and is within the principles of Circular 124, War Department, 1946. For these reasons it is desired that when these school trained Negroes are allocated to your command, you provide appropriate destinations within your manning level in your bulk overhead authorization, unless Negro T/O&E positions in these MOS are also open, where this personnel can actually be utilized in their school trained primary MOS, notwithstanding the fact that you will thereby be forced to convert existing white positions to Negro positions and reassign or report as surplus white personnel presently filling such positions. In providing assignment destinations you will bear in mind the fact that Circular 124 permits duty interspersal of white and Negro soldiers in bulk overhead positions. Consideration, however, should be given to the presence of a Negro company, detachment, or unit for housing and messing purposes unless you have integrated these facilities at the installation

MORE

provided as the assignment destination.

4. It is further desired that upon receipt of this school trained personnel they be actually utilized in their school trained primary MOS. Immediate redesignation of primary MOS under Circular 211, War Department, 1947, or immediate readjustment under Circular 82, Department of the Army, 1947, should not be resorted to as a means of avoiding the required initial utilization of this school trained personnel in their school trained primary MOS.

BY ORDER OF THE SECRETARY OF THE ARMY:

/s/ EDWARD F. WITSELL
Major General
The Adjutant General

Copies furnished:
Director, Personnel and Administration, General Staff,
United States Army

APPENDIX A-2

WAR DEPARTMENT
The Adjutant General's Office
Washington 25, D. C.

AG 353.8 (5 Jul 44) OB-S-A-M FM/md 2B-939 Pentagon

8 July 1944

SUBJECT: Recreational Facilities

To: Commanding Generals,
Army Air Forces
All Service Commands
Military District of Washington

1. Reference is made to letter AG 353.8 (5 Mar 43)OB-S-A-M, 10 March 1943, subject as above, in which it was directed that all personnel, regardless of race, would be afforded equal opportunity to enjoy recreational facilities on each post, camp, and station.

2. While in general the spirit of the above mentioned letter has been observed, occasional reports indicate that practices exist on some installations that are not in harmony with its provisions.

3. Exchanges--While exchanges and branch exchanges may be allocated to serve specific areas or units, no exchange will be designated for the exclusive use of any particular race. Where such branch exchanges are established, personnel will not be restricted to the use of their area or unit exchange, but will be permitted to use any other exchange on the post camp or station.

4. Transportation--Busses, trucks, or other transportation owned and operated either by the Government or by a governmental instrumentality will be available to all military personnel regardless of race. Restricting personnel to certain sections of such transportation because of race will not be permitted either on or off a post, camp, or station, regardless of local civilian custom.

5. Army Motion Picture Theaters--Army motion picture theaters may be allocated to serve certain areas or units but no theater or performance in any theater will be denied any group or individual because of race.

6. Effective compliance with War Department policies enunciated herein will be obtained through inspection by responsible commanders and inspectors general. Each inspector general will be directed that if, during a periodic inspection a post, camp, or station, he discovers evidence of racial discrimination or direct or indirect violation of War Department policies on this subject, he will inform the commanding officer of the installation that such discrimination is contrary to War Department policy. If subsequent inspection of the installation indicates that proper remedial measures have not been taken, the commanding general of the service command will initiate action to insure full compliance with the announced policy.

7. The Commanding General, Army Air Forces, will bring the contents of this letter to the attention of each unit of his command which is authorized an Inspector General.

By order of the Secretary of War:

s/J. A. Ulio
J. A. ULIO
Major General
The Adjutant General

COMPARED: FM/md Major Davis/md

NEGROES and the WAR

BEST COPY AVAILABLE

U. S. GOVERNMENT PRINTING OFFICE: 1942

Official publication of the Office of War Information

This book has been prepared to celebrate the achievements of Negro Americans in many fields and to recognize their important contributions, in all fields, to the fighting of the war.

By word and picture it tells:

What Negroes are doing in agriculture, industry, and the armed services.

What Negroes have to lose if the Axis wins.

What Negroes have to gain by an American victory.

HAND THIS BOOKLET TO SOMEONE ELSE WHEN YOU HAVE FINISHED

Chandler Owen, well-known Negro publicist, is a resident of Chicago. Born in North Carolina, he was graduated from Virginia Union University and did his post-graduate work on fellowships both at Columbia University and the New York School of Social Work, majoring in political and social sciences. He has a wide acquaintanceship among Negro leaders all over the country and has contributed for many years to newspapers and national magazines. He is widely recognized for his trenchant style, his inquiring and objective thinking, his solid and scholarly research, and his cultural understanding.

NEGROES and the WAR

by Chandler Owen

Some Negro Americans say that it makes no difference who wins this war. They say that things could not be any worse under Hitler. These are the people who emphasize liabilities; they never appraise their assets. They magnify the bad. They minimize the good.

Without underestimating the Negro's liabilities, without denying the fact of handicaps and inequalities, I want to set down just what stake the Negro has in America—just what he has to lose under Hitler.

That he would lose it goes without saying. Race prejudice, from the first, has been Hitler's stock in trade. In his book, *Mein Kampf*, he brutally calls Negroes "half-apes." At the 1936 Olympic Games in Berlin he greeted Aryan winners at his private apartment so that he would not have to shake the hands of Jesse Owens, Cornelius Johnson, John Woodruff, and the other great Negro athletes who played so large a part in bringing victory to the United States. Hitler's newspapers called these fine university-trained boys "the Black Auxiliaries."

Hitler and his false prophets have told the people of Germany that a Negro has neither a soul nor an intellect, that he is incapable of being civilized. The man in the street in Germany, deluded by the very magnitude of the Hitler lie, would not believe you if you told him that our Army is proud to have in its ranks many regiments of Negro soldiers, that there are now two full divisions of Negro soldiers, that Negroes serve in all branches. He would not believe you if you told him that there are Negro officers in our Army,

Negro judges on the bench, Negroes in State legislatures and in the American Congress.

Germany backed up Mussolini in the rape of Ethiopia. In truth, Italy would not have defied the sanctions of the League of Nations without the support and encouragement of Hitler, and up until the end of the last World War Germany herself had extensive Negro colonies in Africa. In his book, *Germans in the Cameroons*, Harry R. Rudin, Assistant Professor of History at Yale, says this of German colonial administration:

"Whipping was the typical form of punishment inflicted on natives in the colony. . . . In the Reichstag stories were told of whips made of hippopotamus hide cut so as to have sharp edges, of ropes soaked in water and then dried or dipped in tar and then rolled in sand."

Our stake in America

Just what stake does the Negro have in America? What has he got to lose? We have come a long way in the last fifty years, if slowly. There is still a long way to go before equality is attained, but the pace is faster, and never faster than now.

In 1890 there were 12,159 Negro clergymen in the United States; in 1930 there were 25,034. In 1890 there were 15,008 Negro teachers; in 1930 there were 54,439. In 1890 there were 208 Negro physicians and surgeons; in 1930 there were 3,805. In 1890 there were 120 Negro dentists; in 1930 there were 1,773. In 1890 there were 431 Negro lawyers, justices, and judges; in 1930 there were 1,247.

Progress? Yes. Too slow? Yes; but progress.

Not all of us can be professional men. As a matter of fact, few of us are. The great majority of Negroes are working people—skilled, unskilled; organized, unorganized. But during the last decade a good many doors have been opened to us, and other doors are ajar. There has been enlightened appreciation of the Negro's problem by the Government. There has been increase in Negro labor organization; many so-called "white" unions have abandoned color-line policies.

What would happen to labor under Hitler? I can tell you what happened to the Czechs, to the French, what happened to the Germans themselves. Their labor unions were suppressed. Strikes were prohibited. Union treasuries were seized.

This, applied to America, means that the Brotherhood of Sleeping Car Porters, the tens of thousands of Negroes in the United Mine Workers of America, the Negroes in the automobile, steel, rubber, packing, shipping, needle trades, and transportation unions, all would be reduced to economic impotence—turned into slaves or turned into the street.

The Negro businessman would fare no better than the Negro worker. The first thing Hitler does when he occupies a country is to seize control of the banks. Then he proceeds with a systematic confiscation of factories, stores, all industry. The National Negro Business League would be abolished. Negro banks, stores, loan associations, restaurants, real-estate firms, insurance companies would be suppressed at once.

There are 680,000 Negro farm operators in the United States, with 95 percent of them living in the Southern States. During recent years, and particularly during the last 5 years, the Federal Government has waged a vigorous program to aid and relieve the farmer—a campaign in which the Negro farmer has shared. The Farm Security Administration has made 60,440 loans to Negro farmers. These loans, both short-term rehabilitation and long-term purchase loans, total some $50,000,000. Negro farm operators represent 21 percent of the farm operators in the 17 Southern States (including Maryland and Missouri) and they have received 20.9 percent of the Farm Security loans in that area.

What stake has the Negro farmer to lose under Hitler? He has his land, his buildings, his machinery, his livelihood to lose. In Czechoslo-

vakia, in Poland, in Yugoslavia, in Greece, and Norway millions of acres of land were seized. Farmers were removed from their acres, and Germans installed. It is needless to add that the Farm Security program would be supplanted by plantation slavery.

Since the advent of the New Deal, the phrase "social security" has rung like a pleasant bell in the ears of American Negroes. They are enthusiastic about old-age pensions, health and unemployment insurance, and pensions for the blind. During the economic depression, Federal and State relief payments kept many families together. Negro youth found work and training in the CCC and the NYA. What kind of social security could they expect under Nazi rule?

In the *New Republic* for May 5, 1941, Michael Straight wrote this about Germany:

"The facts are these: In September, October, and November of 1940, 85,000 blind, incurably ill or aged Germans were put to death by the Gestapo. They were put to death as casually as the Society for the Prevention of Cruelty to Animals chloroforms old and helpless dogs. They were not killed for mercy. They were killed because they could no longer manufacture guns in return for the food which they consumed; because the German hospitals were needed for wounded soldiers."

These were not Negroes or persecuted Jews; they were Germans, members of what Nazis call the *Herrenvolk*, the master race. Eighty-five thousand Germans, old, helpless, harmless, put to death!

There, men and women of color, is your social security under Hitler.

In 1937 the United States Government started a slum clearance program. The object of this program was to provide decent homes for poor people. Of the 121,500 homes now contracted for in urban districts, approximately 40,600 are or will be occupied by Negro tenants. Thus, although Negroes are approximately one-tenth of the population, the Government is assigning to them about one-third of the new homes—because Negroes have the greater need for improved housing. What would Hitler have done?

The doom of the churches

A high quality of religious leadership has been one of the glories of Negro culture in the United States. The names of such sainted men as Richard Allen, Lemuel Haynes, Peter Williams, and Josiah Bishop are written in permanence on the pages of American history. Alike in humble wooden churches and in the magnificent brick and stone churches of our metropolitan cities, Negro clergymen steadfastly have kept alight the lanterns of the spirit.

Today Negroes own church property valued at nearly 200 million dollars. Baptist, Methodist, Episcopalian—all other denominations—enjoy complete religious freedom. It is easy to foresee what would happen to these churches under Hitler. He has persecuted the churches in his own Germany and in occupied countries. He has murdered or jailed clergymen brave enough to defy him. In the Nazi code there is not room for both Hitler and God.

A man who denies the Negro a soul will deny him a church. And in America Hitler would have reason. The Negro churches, before Emancipation, were hotbeds of revolt, meeting places of crusaders for abolition. Today the churches are the strongest organizations of Negroes in the world, and churchmen are leaders in the fight for equality. To Hitler, then, they would be dangerous—and, because dangerous, doomed.

There are more than 60 secret and fraternal organizations of national membership among Negroes in this country. These secret societies are divided into two classes: The old-line societies such as the Masons, Odd Fellows, Knights of Pythias, the Elks, and the benevolent secret societies such as the True Reformers, the Grand

United Order of Galilean Fishermen, and the National Order of Mosaic Templars. Under Hitler these fraternal organizations would be abolished as the Masonic orders were abolished in Germany—because the Negro fraternal organizations have a tradition and a history of fighting for the rights of Negro manhood.

Educational opportunity has always been precious to the American Negro because it is the keystone of race progress. Today there are approximately 100 universities and colleges devoted exclusively to Negro education in this country. Our boys and girls in the North attend State universities and such institutions as Harvard, Yale, Columbia, and Cornell. In 1916 there were 1,643 students in Negro colleges. By 1941 the number had grown to 40,000. During a 25-year period, the number of students in Negro colleges increased some 2,400 percent.

What Hitler says about us

Hitler has made himself very clear on what he thinks about education for the Negro. In his book *Mein Kampf*, he says this:

"From time to time it is demonstrated to the German petty *bourgeois* in illustrated periodicals that for the first time here or there a Negro has become a lawyer, teacher, even clergyman, or even a leading opera tenor or something of that kind . . . It does not dawn upon this depraved *bourgeois* world that here one has actually to do with a sin against all reason; that it is a criminal absurdity to train a born half-ape until one believes a lawyer has been made of him, while millions of members of the highest culture race have to remain in entirely unworthy positions; that it is a sin against the will of the Eternal Creator to let hundreds of thousands of His most talented beings degenerate in the proletarian swamp of today, while Hottentots and Zulu Kafirs are trained for intellectual vocations.

"For it is training exactly as that of a poodle, and not a scientific 'education.' The same trouble and care, applied to intelligent races, would fit each individual a thousand times better for the same achievements."

That's what Hitler thinks.

A ruler who regards Negro lawyers as born half-apes, trained like poodles, would drive from the bench such Negro judges as Charles E. Toney and James S. Watson of the New York Municipal Court, Herman E. Moore of the United States District Court in the Virgin Islands, Justice Myles Paige of the Court of Special Sessions in Brooklyn, Justice Jane Bolin, America's only colored woman judge, who presides over the Domestic Relations Court in New York. He would drive from the bench Judge Edward Henry of the Philadelphia Municipal Court and Judge Armand Scott of the District of Columbia Municipal Court. He would suppress the Law School at Howard University over which Dean William H. Hastie, now Civilian Aide to the Secretary of War, has presided so ably.

In the field of music and art the Negro would fare no better. In Norway the Nazi oppressors have made it a crime to listen to the phonograph records of Paul Robeson and Marian Anderson, these great artists of international fame. In 1933 when Hitler came to power there were Negro orchestras in some of the smart Berlin cafes; they were banned at once. Hitler hates all music that mirrors the aspirations of free people. In Poland the playing of Polish music is forbidden, and in America Negro musicians and Negro music would be silenced. The universally beloved old spirituals, the compositions of Still, Burleigh, Dett, Handy, and Boatner, the voices of Roland Hayes and Dorothy Maynor, the gay rhythms of Ellington, Calloway, Waller, Count Basie, the clatter of Bill Robinson's dancing feet would be heard no more.

The drawings and paintings of E. Simms Campbell, Aaron Douglas, Sam Brown, Jacob

Lawrence, Hale Woodruff; the sculpture of Richmond Barthé and Sargent Johnson would be forbidden; the books of all Negro writers from Phyllis Wheatley to Richard Wright would be forbidden and burned.

Unity against America's foreign foes does not mean that Negroes must forego legitimate protest against discrimination in industry or the long struggle for political equality. This is known as the right of peaceful petition. Many people take for granted the right of peaceful petition. Hitler wouldn't take it for granted. President Roosevelt invited A. Philip Randolph and Walter White to the White House to discuss with him in person injustices to Negroes in war industry and Government employment. Can you imagine Hitler doing that? President Roosevelt created the Committee on Fair Employment Practice to enforce his order that no worker be barred from war industry because of race, creed, color, or national origin. Can you imagine Hitler doing that?

The end of our newspapers

Under Hitler the National Association for the Advancement of Colored People would be outlawed. The Urban League would become a criminal organization. And the Negro press would vanish. The doors of 300 newspapers and periodicals would be locked the day the Nazis took over. Hitler says half-apes need no newspapers.

Hitler's record on the free press is consistent. In Belgium, Holland, Poland, Norway, Czechoslovakia the free press was abolished. Hundreds of journalists in occupied countries were imprisoned by the Gestapo, the German secret police.

So it does not take a fortuneteller to call the roll of the Negro journalists who would feel Hitler's lash. The Murphy brothers of the Baltimore *Afro-American*, P. B. Young of the Norfolk *Journal and Guide*, Ira Lewis, Mrs. Robert L. Vann, P. L. Prattis, George S. Schuyler and J. A. Rogers of the Pittsburgh *Courier*; Mrs. R. S. Abbott, John Sengstacke, and Lucius Harper of the Chicago *Defender*; Chester Franklin of the Kansas City *Call*; Mrs. Charlotta A. Bass of the California *Eagle*; E. Washington Rhodes of the Philadelphia *Tribune*; P. M. H. Savory and C. B. Powell of the New York *Amsterdam Star-News*; the Rev. A. Clayton Powell, editor of the *People's Voice*; Roy Wilkins of the *Crisis*—all these would be immediate candidates for the solitary cell or the concentration camp.

Germany in this war has drawn the color line even in the prison camps. Hans Habe, a refugee Hungarian who fought for France and was captured by the Germans, told the story of his experiences in an American magazine after escaping from his jailers. He was quartered at Dieuze along with a large detachment of captured French Negro troops.

"We arrived at the camp in Dieuze," Habe wrote in *The Nation*. "Here, as in all German prison camps, the Negroes were immediately isolated. Barbed wire was strung around their barracks. No white man was allowed to converse with a black. Our own shelters were miserable enough; those of the Negroes, crowded into a narrow space, were much worse. Our food, though insufficient, was princely in comparison with that given to the Negroes, who practically starved. Hundreds of them fell sick, but were not cared for."

Under Nazi rule there have been thousands of executions and imprisonments in unspeakable jails and concentration camps. More than 1,700,000 Poles have been transported to Germany to work at forced labor. At least 1,260,000 French war prisoners have been made actual slaves in Germany, while the able-bodied people of France have been compelled to labor long hours in mines and munitions plants to feed the German war machine.

Julius Streicher, editor of *Der Sturmer*, Hitler's anti-Semitic and anti-Negro newspaper, says:

"The emancipation of the Jews and the liberation of the black slaves are the two crimes of civilization committed by the plutocrats in the last few centuries." But white or black, conquered people become slaves under Hitler.

We can be a mighty force

Some Americans say that it makes no difference who wins the war. Dorie Miller doesn't say that. Joe Louis doesn't say that. Most of the 13,000,000 loyal Negro citizens know that America is fighting not only to live, but to live more fully. Because we have known the weight of chains, because we have known the helplessness of bondage, we can be a mighty force in this nation's fight for freedom.

This war, said Vice President Wallace in his great speech of May 8, 1942, is not a war for the preservation of outmoded ways of living but a crusade for the common man.

"Through the leaders of the Nazi revolution," said the Vice President, "Satan now is trying to lead the common man of the whole world back into slavery and darkness. For the stark truth is that the violence preached by the Nazis is the devil's own religion of darkness. So also is the doctrine that one race or one class is by heredity superior and that all other races or classes are supposed to be slaves."

But darkness shall not prevail.

"The people," said Mr. Wallace, "are on the march toward even fuller freedom than the most fortunate peoples of the earth have hitherto enjoyed. . . . I say that the century on which we are entering—the century which will come out of this war—can be and must be the century of the common man. . . . The people's revolution is on the march, and the devil and all his angels cannot prevail against it."

Recently the *Christian Review*, the religious journal edited by the Rev. L. M. Smith in Philadelphia, recalled the triumphs of America's Negro athletes at the Olympic Games and the insults that were heaped upon them by the German propaganda machine.

"Hitler," the editorial said prophetically, "will see some new 'Black Auxiliaries.' Negroes have been trained in the rudiments and sciences of war and it is likely that some Negroes will see action in Berlin. . . . These Negroes will be wearing the insignia of the United States and will conduct themselves as champions. The Negro of America stands ready to bring new victories to his native land. And he will do it despite all the propaganda of the German and Japanese machines."

We already know something about champions. One cool summer night in 1938, under the arc lights at Yankee Stadium, *our* champion knocked out the German champion in one round. Sergeant Joe Louis is now a champion in an army of champions.

Joe Louis doesn't talk much, but he talks truly. He talks for 13,000,000 Negro American citizens, for all American citizens, when he says:

"We're going to do our part, and we'll win 'cause we're on God's side."

Negro Americans Today

We've come a long way

TWO AGES: Slaves dragging their chains through the streets of Washington just before the Civil War (from a contemporary engraving), and Negro boys of today studying the graven countenance of the Liberator at the Lincoln Memorial. The Emancipation Proclamation, signed 80 years ago during the stress of another great war, made them free Americans.

For many years we have picked the cotton, done the housework, carried on strong shoulders the work-day burden. Beyond these limited opportunities there are now new horizons.

LAWYER

POSTMAN

We are not ashamed of working with our hands, of an honest day's work, honestly done. But a progressing world now offers many of us a chance to prove ourselves in varied jobs and occupations.

NURSE

SURGEON

SHIPYARD WORKER

DRESSMAKER

FIREMAN

POLICE LIEUTENANT

EMPLOYER AND STENOGRAPHER

These are the things we do, these and many more. We are doctors and lawyers; we are the skilled and unskilled who man the war industries; we are the clerical help and the white-coated porters; we are—Americans. These opportunities and the promise of still greater opportunities in the future are our stake in America.

GOVERNMENT WORKER

FACTORY INSPECTOR

AIRCRAFT WORKER

PULLMAN PORTER

ENGRAVER

HUNDREDS OF THOUSANDS OF NEGROES are now employed in the factories and plants which are busily producing war materials. This girl at her sewing machine is helping to give America's answer to the Axis. She is making parachutes to save the lives of our intrepid combat fliers. The factory is owned by Eddie Anderson, Negro radio star better known as "Rochester."

We have built great institutions

WE HAVE MADE GREAT STRIDES in higher education. These are home economics students at Alabama Agricultural and Mechanical Institute.

THESE STUDENTS at Tuskegee Institute are doing plant research. Dr. George Washington Carver, eminent scientist, teaches at Tuskegee.

THERE WERE 1,643 STUDENTS in Negro colleges in 1916. By 1941 the number had grown to 40,000—thus increasing 24 times over in 25 years. This young man is a law student preparing for his classroom work at Howard University in Washington, D. C.

CHEMISTRY STUDENT AT ATLANTA UNIVERSITY. There are now approximately 100 universities and colleges devoted exclusively to Negro education in this country. Ever since Emancipation, as we all realize, education has been the keystone of race progress.

THE RESERVE OFFICERS' TRAINING CORPS AT TUSKEGEE INSTITUTE. In the background is a statue of Booker T. Washington, founder of Tuskegee and pioneer educator. Many of these cadets will see active war service as officers in the United States Army.

DR. G. W. CARVER,
GRAND OLD MAN
OF PLANT SCIENCES

E. FRANKLIN FRAZIER,
FAMOUS SCHOLAR
AND HOWARD PROFESSOR

WALTER WHITE,
VETERAN LEADER
AND N.A.A.C.P. HEAD

President Roosevelt says:

"The steady progress of our Negro citizens during the three-quarters of a century that have elapsed since their emancipation emphasizes what can be accomplished by free men in a free country. Moreover, their achievement in art, letters, sciences, and public service during a brief 75 years of freedom should give all Americans renewed determination to marshal all our strength to maintain and perpetuate our priceless heritage of free institutions . . . MAY I EXPRESS CONFIDENT HOPE THAT A RACE WHICH HAS ACHIEVED SO MUCH IN SO FEW YEARS MAY GO FORWARD TO EVEN NOBLER THINGS IN THE GENERATIONS AHEAD."

PAUL ROBESON'S SONG CARRIES OUR MUSIC ACROSS THE WORLD

JUSTICE JANE BOLIN, ONLY NEGRO WOMAN ON COURT BENCH

CHARLES S. JOHNSON, SOCIOLOGIST FROM FISK UNIVERSITY

Hitler says:

"From time to time it is demonstrated . . . that for the first time here or there a Negro has become a lawyer, teacher, even clergyman, or even a leading opera tenor or something of that kind . . . It does not dawn upon this depraved *bourgeois* world that here one has actually to do with a sin against all reason; that it is **A CRIMINAL ABSURDITY TO TRAIN A BORN HALF-APE UNTIL ONE BELIEVES A LAWYER HAS BEEN MADE OF HIM . . . FOR IT IS TRAINING EXACTLY AS THAT OF A POODLE,** and not a scientific 'education.' The same trouble and care, applied to intelligent races, would fit each individual a thousand times better for the same achievements."

LUCIUS HARPER

CHESTER FRANKLIN

P. L. PRATTIS

WE HAVE OUR OWN PRESS. There are more than 200 Negro newspapers in this country. Editors and publishers pictured on this page (right to left) represent the New York *Amsterdam Star-News*, Baltimore *Afro-American*, Philadelphia *Tribune*, Chicago *Defender*, Kansas City *Call*, and Pittsburgh *Courier*.

Our newspapers are free—like the rest of the American press—to say what they think, print what they believe. They represent an investment of $4,000,000 in buildings and equipment.

CARTOONIST AT WORK

THIS IS A SPORTS EDITOR

From the humblest beginnings

... out of our deepest need we have built the Negro Church

STORE FRONT CHURCH IN WASHINGTON, D. C.

YOUTHFUL WORSHIPERS IN A CATHOLIC CHURCH

AN EPISCOPALIAN CHURCH IN CHICAGO

OUR NATION IS AT WAR. This war will decide whether the Christian Church as an institution will survive. This war will decide whether Negro Americans will have the right to continue their march to freedom or will sink into slavery.

There can be no question as to where anyone of us stands in this grave world crisis. The democracy which the United Nations fight to preserve has its deep fountain in the principles of Jesus Christ. Our Nation is builded on Christian principles. **WE STAND BEHIND OUR NATION AND OUR PEOPLE FOR VICTORY OVER HITLER AND SLAVERY.**

Because we know the great stake involved in this war, we have lost no time in throwing the full weight of the Negro church behind the task of mobilizing the Negro people for victory. That is why we declared to the President of the United States on February 17, 1942:

"WE PLEDGE EVERY SPIRITUAL AND MATERIAL RESOURCE AT OUR COMMAND IN SUPPORT OF OUR COUNTRY IN THE IDEALS OF FREEDOM AND DEMOCRACY . . . "*

**From an address by the Rev. W. H. Jernagin, president of the Fraternal Council of Negro Churches of America*

On the land

The Negro farmer's life improves steadily with Government help

THE NEGRO FARMER IN THE SOUTH, like the poor white farmer, has been the victim of the single crop. Cotton is a cash crop but cotton planted straight to the shanty door not only bleeds the soil but makes the farmer buy much of the food he might grow on his own acres. The Federal Government has made progress in creating a healthy small farming population out of exhausted land and exhausted people. This is done by loans, by adjustment of farm debt, by teaching modern farming methods. Where the furrows once ran up to the dooryard, you now see vegetable gardens to feed the farm family, hay and corn crops, chickens, pigs, and cows.

SEVEN YEARS OF THE FARM SECURITY ADMINISTRATION'S PROGRAM have prepared the small farming population for the vital job of increasing food production for the war. A survey at the end of 1941 showed that those who had been on the FSA program for more than a year have doubled their food production. For 1942 FSA farmers pledged an increase of 1,150,000,000 pounds of milk over 1941, 235,000,000 pounds of pork, 34,000,000 pounds of beef, 77,000,000 dozen eggs, and a similar increase in vegetables. There are 683,327 Negro farm operators in the United States. Some 95 percent live in the Southern States. They have shared generously in the Federal Government's program to aid the farmer. The Farm Security Administration has made 60,440 loans to Negro farmers. These loans total about $50,000,000. Negroes represent 21 percent of the farm operators in the Southern States; they have received 20.9 percent of loans in that area. While the farmer learns how to get the most out of his land, his wife learns how to preserve food by pressure cooking and canning and the family lays aside the surplus from its vegetable garden for the winter. Left: farmer paying back a part of his loan. Below: the old shanty and the new home built with a Government loan.

CUTTING A SLICE OF HIS OWN HOME-CURED HAM IN THE SMOKEHOUSE

PLENTY: HOME-RAISED FRUITS AND VEGETABLES READY FOR THE WINTER

THE YOUNG GENERATION ON THE LAND: In the 17 Southern States during the year 1915 only 58 percent of the Negro children between 6 and 14 were enrolled in school. By the school year 1939-40, some 85.9 percent of the children between 5 and 17—a much wider age range—were regularly in attendance. There were 2,174,260 in elementary school and 254,580 in high school. The number of youngsters in high school has more than doubled in 10 years.

There is increasing care for the very young, which brings down disease and mortality rates. These nursery school children are getting their spoonful of cod-liver oil.

We stay longer in school. Ten years ago only 26.6 percent of the children went beyond the fourth grade. Now that figure has been raised to 37.5 percent.

And we increase our knowledge of the world by going to school more days a year. Ten years ago we attended an average of 97 days; now we attend 126 days.

In the city

ONCE WE WERE A FARM PEOPLE, prisoners of the soil but friends of the soil, wakened in the morning by a country dawn, sweated at noon by a country sun. Now 6,450,000 of us live in cities: 470,000 in New York alone, 280,000 in Chicago, 250,000 in Philadelphia, 190,000 in Washington, 165,000 in Baltimore. The city pavements are our children's playground, the crowded areas our home. Jobs brought us to the city. There we built our churches, learned new ways, struggled for recognition. The city meant opportunity—opportunity for better education, opportunity for economic advancement. But though the city meant opportunity, a place to work and live and play, it also meant—for many of us—bewilderment, hardship, overcrowding. We of the city, even more than those still on the land, feel the cycles of employment and unemployment. Too often we have been the last to be hired on the job and, when the times were bad, the first to be let go. During the depression of the nineteen thirties, thousands of us were able to survive, even to make progress, because a friendly Government, through the Work Projects Administration and the National Youth Administration, took a hand.

The city is the glitter of Lenox Avenue in Harlem and the neon lights of State Street in Chicago. It is Beale Street and Central Avenue. It is the Armstrong Technical High School with its 1,300 students and the Abyssinian Baptist Church with its 13,000 members. It is the Regal Theatre and the Savoy Ballroom. But it is also the grim tenement with its crumbling wood and stone, the overpopulated lodging house and high rents, the back street and the long ride to and from work.

This, too, is the city, the "kitchenette," home in one room. In 1937 the United States Government started a slum-clearance program. The object was to provide decent homes for poor people. Of the 121,500 homes contracted for in city areas, approximately 40,600 are or will be occupied by Negro tenants. Although Negroes are about one-tenth of the population, the Government is assigning them about one-third of the new homes—because our need is greater.

This is one of the great Government housing projects, the Ida B. Wells Homes in Chicago. It cost $9,638,000 and 1,662 families live there. Below is a picture taken inside one of their comfortable apartments. Other famous housing projects include the John Hope Homes in Atlanta, Harlem River Houses and South Jamaica Homes in New York, Poindexter Village in Columbus, James Weldon Johnson Homes in Philadelphia, Terrace Village in Pittsburgh, LaFitte in New Orleans, Beecher Terrace in Louisville, College Hill in Chattanooga.

BATHROOM IN THE FREDERICK DOUGLASS HOUSING PROJECT, WASHINGTON, D. C.

There were about 30,000 Negro-owned stores in this country in 1939. The number has grown since. Sales for the same year totaled $71,000,000. There are eleven banks owned and operated by Negroes. There are forty-one member companies of the powerful National Negro Insurance Association; they have 2,800,000 policies and $422,000,000 worth of insurance in force.

PAUL R. WILLIAMS

CARL HANSBERRY

JUDGE EDWARD HENRY

JUDGE HERMAN E. MOORE

CLAUDE BARNETT

DR. ABRAM L. HARRIS

DR. F. D. PATTERSON

THESE LEADERS: C. C. Spaulding is president of the North Carolina Mutual Life Insurance Company. Paul R. Williams is a noted architect. Carl Hansberry is the Chicago real-estate man who fought residential restrictive covenants to the Supreme Court. Edward Henry is on the bench of the Municipal Court in Philadelphia. Herman E. Moore is judge of the United States District Court in the Virgin Islands. Claude Barnett is head of the Associated Negro Press and is now assistant to Secretary of Agriculture Wickard. Dr. Abram L. Harris is a professor at Howard University and a famous economist. Dr. F. D. Patterson is president of Tuskegee Institute.

THE GREAT TRADITION: Out of New Orleans, out of Beale Street, out of tinny pianos and levee songs and the rhythm of dark feet dancing has come our music. It is a mouth organ on a street corner, it is a steamboat whistle, it is an all-night party in Harlem, it is laughter and an infectious drumbeat. It is Louis Armstrong (below) and his trumpet. It is W. C. Handy and the plaintive blues. It is barrel house and boogie woogie and show business. It is a slave song in a cotton field and a sorrow song at a burying ground. It is American music—our music.

THE SERIOUS NEGRO ARTIST is now coming into his own. Such novelists as Richard Wright, Jessie Fauset, Zora Neale Hurston, and such poets as the late James Weldon Johnson, Langston Hughes, and Countee Cullen are already well known to American readers. On the concert stage Marian Anderson, Dorothy Maynor, Paul Robeson, Roland Hayes, and others have brought the finest expression of the human voice to audiences all over the world. Dean Dixon is a well known symphony orchestra conductor. There are many rising Negro artists including Hale Woodruff, Jacob Lawrence, and Charles Alston. Richmond Barthé and Augusta Savage are able sculptors, and E. Simms Campbell is an outstanding cartoonist. There are many other important personages among Negro artists, including the artists of the theatre and motion pictures. Recognition of their unique talents is steadily increasing.

RICHMOND BARTHÉ

THE PEERLESS JESSE OWENS RUNNING IN THE OLYMPIC GAMES AT BERLIN IN 1936

SOME OF THE GREATEST American athletes have been and are Negroes. Our roll call of stars is long and dazzling. Who can forget such football All-Americans as Fritz Pollard of Brown, Duke Slater of Iowa, Paul Robeson of Rutgers, Brud Holland of Cornell, and Kenny Washington of U. C. L. A.? Or the Harlem Globe Trotters, world champion professional basketball team in 1940? Our track stars have been setting records ever since the days of John B. Taylor and Howard Drew, and our boxers have held championships in every division of pugilistic competition.

CORNELIUS JOHNSON OF THE UNIVERSITY OF CALIFORNIA, OLYMPIC JUMPER

HENRY ARMSTRONG, ANOTHER CHAMPION

WILLIAM WATSON OF MICHIGAN

SATCHEL PAIGE, FIREBALL PITCHER

THIS IS THE MAN WHOSE HAND HITLER REFUSED TO SHAKE. Jesse Owens won three events at the 1936 Olympics in Berlin, and was the outstanding individual star. Archie Williams, John Woodruff, Cornelius Johnson also won their events and swelled the points which brought victory to the United States in track and field events. Hitler greeted "Aryan" winners in his private apartment in the Berlin stadium so he would not have to shake hands with our Negro victors. There was a different story in England when the Olympic team went there to compete in the London games. Here Jesse Owens is signing his autograph for British schoolboys.

We go forward in health

THE DEATH RATE AMONG NEGROES HAS GONE DOWN REMARKABLY IN THIRTY YEARS' TIME. In 1911 insurance statisticians placed the death rate at 18.5 per thousand people. In 1930 U. S. Census figures placed it at 16.5 and in 1940 at 13.9 per thousand. This represents not only advancements in medicine, but more hospital beds (though not enough), better care, and an increase in government-financed clinics and health services. The rate of sickness and death among our children also has been greatly lowered. It is, however, still too high, and compares unfavorably with the rate among our white neighbors. But we march ahead.

OPERATING ROOM IN PROVIDENT HOSPITAL, CHICAGO

There are 110 Negro hospitals in the United States. Some 22 of these are fully approved and 5 provisionally approved by the American College of Surgeons. Such hospitals as 50-year-old Provident in Chicago, Harlem in New York, and Mercy and Frederick Douglass in Philadelphia are well known in the North. In the South there are 14 approved hospitals; all have Negro doctors and nurses on their staffs. These include such institutions as Flint-Goodridge in New Orleans, the 1,500-bed Veterans' Hospital at Tuskegee, McRae Sanitorium in Arkansas, the excellent Freedmen's Hospital in Washington, D. C. Despite our advances, the need for more hospitals is an imperative one that must be dealt with after the war. There is now one hospital bed for 1,000 Negroes as against one bed for every 110 whites.

ONE OF THE REASONS FOR BETTER CHILD HEALTH—A "WELL BABY" CLINIC

There were 3,805 Negro doctors in the United States in 1930. There are two Class A medical schools for Negro students, Meharry at Nashville and Howard at Washington. Below: doctor and nurse taking this youngster's first picture—his X-ray picture.

The young generation in the city

THERE ARE MANY EXCELLENT HIGH SCHOOLS and elementary schools in the cities. Booker T. Washington in Atlanta is the largest Negro high school. The building above is Armstrong Technical High School in Washington. Students in the city schools, like all young Americans, are now all doing their part to help win the war.

WORK ON ENGINES IS PART OF VOCATIONAL TRAINING

We are moving ahead

THIS PHOTOGRAPH WAS TAKEN DURING A UNION ELECTION AMONG AUTOMOBILE WORKERS

In June of 1941 President Roosevelt issued his famous order directing that all defense contracts contain a provision obligating the contractor not to discriminate against any worker "because of race, creed, color, or national origin." Since that time thousands of Negroes have been hired in the aircraft industry; additional thousands are pushing war production in iron and steel, in ship construction on both coasts, in automobile plants, in meat packing and rubber, in many other industries. There is nothing new about Negroes doing skilled work: Census figures twelve years ago listed 12,000 brickmasons, 32,000 carpenters, 2,000 electricians, 8,000 machinists, 27,000 mechanics, 18,000 painters, 4,000 chemical workers, 25,000 iron and steel workers, 63 architects, and 351 technical engineers. But the demands of war production and defense training classes are swelling vastly the number of workers in skilled jobs, and there is a determined and succeeding drive to upgrade qualified men and women already in the plants.

EXECUTIVE ORDER 8802

FAIR EMPLOYMENT PRACTICE IN DEFENSE INDUSTRIES

. . . . . I do hereby reaffirm the policy of the United States that there shall be no discrimination in the employment of workers in defense industries or Government because of race, creed, color, or national origin, and I do hereby declare that it is the duty of employers and of labor organizations, in furtherance of said policy and of this order, to provide for the full and equitable participation of all workers in defense industries, without discrimination because of race, creed, color, or national origin . . . . . .*

Franklin D. Roosevelt

THE PRESIDENT OF THE UNITED STATES OF AMERICA

THE WHITE HOUSE
June 25, 1941

**Excerpt from Executive Order 8802*

In the Armed Forces

BRIGADIER GENERAL BENJAMIN O. DAVIS, HIGHEST RANKING NEGRO OFFICER

BECAUSE WE HAVE COME A LONG WAY, because we are proud of our achievements in a few short years, because our future like the future of all freedom lovers depends upon the triumph of democracy, we are now fighting shoulder to shoulder with our fellow Americans in the present world conflict. We already have our own roll-call of heroes and martyrs. A Negro, Robert H. Brooks of Sadieville, Kentucky, was the first war casualty of the United States Armored Forces. Private Brooks, son of a sharecropper family, was killed near Fort Stotsenburg in the Philippines on December 8, 1941. Since that time the parade ground at Fort Knox, Kentucky, has been named Brooks Field in his honor.

Civilian into soldier: the sergeant teaches the private to handle his gun. Thousands of Negroes in camps from one end of the country to the other are learning to use the tools of modern war.

AMERICA FURNISHES ITS TROOPS WITH THE VERY LATEST IN EQUIPMENT. THIS IS A GAS-MASK DRILL

THIS OUTFIT UNDER FULL PACK IS BOARDING A TRANSPORT

Our troops are now stationed all across the world, in the Orient, in England, in North Africa, in all the far places where men in the American uniform carry the battle to the enemy. They are in every branch of the Army: Air Corps, Infantry, Artillery, Armored Forces, Engineers, Cavalry, Quartermaster Corps. Selective Service calls us from civilian life in exact proportion to our percentage of the national population—which is approximately one-tenth. There are now two Negro divisions. Many regiments are Negro-officered. There are Negro doctors, Negro nurses, Negro chaplains. There are hundreds of Negroes in the various officers training schools—serious, hard-working, well-educated candidates. Fliers are being made at the Basic and Advanced Flying School at Tuskegee, Alabama. Our troops are making a record for themselves which will not only equal but surpass the distinguished record made by Negro Americans in the first World War.

THE DRILLING IS TOUGH, BUT IT'S A TOUGH WAR. HERE TROOPS CHARGE ACROSS BROKEN COUNTRY IN OPEN FORMATION

ENGINEERS CONSTRUCTING A TEMPORARY BRIDGE IN NEW GUINEA

The Negro soldier has a proud tradition. There were Negro soldiers in the Revolutionary War, in the War of 1812, in the Mexican War, in the Civil War. During the Spanish-American War the celebrated Ninth and Tenth Cavalry, and the Twenty-fourth and Twenty-fifth Infantry, carried much of the burden of the assault on El Caney and San Juan Hill. More than 400,000 Negro soldiers served in the World War. Among the regiments famous for gallantry in combat were the Eighth Illinois which became the 370th Infantry and fought as part of the French "Blue Devil" division, and the 15th New York which became the 369th Infantry and fought as part of the French "Red Hand" division. Four Negro regiments were awarded the Croix de Guerre. The record of the 369th itself is one to inspire all Americans: it was under fire 191 days in France, suffered casualties in killed and wounded of 1,500 men, never lost a prisoner, never lost a foot of ground in defensive operation and took every objective except one in offense operations. That time there was a lack of artillery support. Some record. Some regiment.

ADMIRAL C. W. NIMITZ DECORATING DORIE MILLER, HERO OF PEARL HARBOR, WITH THE NAVY CROSS

COAST GUARDSMAN FROM THE PEA ISLAND STATION NEAR NORFOLK WHICH IS MANNED ENTIRELY BY NEGROES

For a number of years the United States Navy permitted the enlistment of Negroes only as mess attendants and in a few other capacities. This policy was changed on April 7, 1942, when Secretary of the Navy Knox announced that thereafter Negroes would be accepted as seamen in the Naval Reserve and given duty which included service on mine sweepers, tankers, and in shore establishments. Contingents of these seamen train at Camp Smalls, Great Lakes Naval Training Station, which is named for Captain Robert Smalls, Negro naval hero of the Civil War.

Literacy, The Negro and World War II

HERBERT APTHEKER

Modern educational and social psychologists, interested in the question of the comparative intelligence of peoples varying in class status, cultural pattern, and ethnic origins, or combinations of these differences, have long dreamed of a particular type of experiment. This dream experiment was one which would involve scores of thousands of subjects of all groups, classes, and backgrounds. These subjects would be carefully tested and sorted, and would all be about equally deficient in a common skill or aptitude. They would then be put through a learning process—not a mere test—and that process would be conducted by carefully selected teachers who would be provided with all the equipment that they needed and desired. The motivation of the subjects would be nurtured, and the rapport between teachers and learners would be good. The learning process would be continual for the period of the experiment, and it would not be broken by subjecting the examinees to other and extraneous environments while it was being conducted. And the living conditions of the subjects would be excellent and as uniform as could be established. Finally, having achieved these ideal conditions and situations, the experiment would be climaxed by an objective test to discover whether or not the common deficiency had indeed been eliminated.

Exigencies of the Second World War made possible, as we shall show, the realization, in very large part, of this dream. But to appreciate the full significance of this, it is necessary that one understand the reality that called it forth.

The fact is that educational and social psychology has been and still is plagued by what is termed the nature-nurture controversy as concerns the comparative intelligence of peoples. As the result of social needs there were developed in America and in Europe, starting some fifty years ago, so-called intelligence tests whose purpose was to provide a measuring rod of the learning capabilities (as deduced from past accomplishment) of individuals for obvious uses in educational, vocational, and industrial fields.

Very soon after the formulation of these tests their function was distorted and vicious conclusions based upon this distortion were announced. The view was expounded that these tests did not demonstrate merely the level of learning capabilities attained under given conditions and as ascertained by specific questions; but rather that they were instruments measuring an innate, unchangeable quality of human beings—labelled intelligence—and that, therefore, where particular groups did poorly on these tests those results scientifically proved the innate inferiority of those groups. Using these tests uncritically, and applying them as indicated, one was able to assert that science had demonstrated the innate inferiority of the rural folk as compared to the urban, of the poor as compared to the rich, and of the Negro (predominantly rural and poor, anyway) as compared to the white.

From Jour. of Negro Educ.

It did not matter to these mythologists masquerading as scientists that the pioneers in testing, the creators of the tests, had themselves denounced these interpretations. Thus, for example, the greatest of these pioneers, the Frenchman, Binet, had explicitly denounced[1] "some recent philosophers" who supported "the deplorable verdict that the intelligence of an individual is a fixed quantity . . . ," and had, himself, experimentally increased scores made on his tests by the same individuals by changing conditions affecting them. And, again, an American pioneer in this field had been careful to point out[2] that the tests could have validity in terms of ascertaining native ability, only *"when we compare individuals in a group who have had common experiences,"* and that, *"Tests are valid only within a group who have had identical or very similar opportunities for gaining familiarity with the materials of the test, and who have not only the same opportunity to learn, but the same desire to learn."*

And these mythologists persist in promulgating their notions — which, being attuned to and derived from the demands of the socio-economic status quo and functioning as props for that status quo, retain a widespread popular acceptance[3]—notwithstanding the series of devastating blows dealt them in recent years.

Let us summarize these blows. First, is the fact that the median score of Negroes on intelligence tests is practically identical with (indeed, slightly higher) than that recorded for some white groups, as Portuguese, Italians, and Mexicans.[4] Second, is the fact that in several tests, where environmental conditions were approximately the same, the scores of Negroes matched, and at times surpassed, that made by whites.[5] Third, is the fact that where environmental conditions for Negroes may be assumed to be better than that for whites, the former scores have been higher than the latter.[6] Fourth, studies have demonstrated, as a rule, that improving environmental conditions improves scores obtained in tests. This has been true, of course, not only of Negroes, but of all other peoples. The cumulative effect of environment —good or bad—upon scores has also

[1]A. Binet, *Les Ideés Modernes sur les Enfants* (Paris, 1909), pp. 141-46.

[2]Stephen S. Colvin, "Principles underlying the construction and use of intelligence tests," in *The 21st Yearbook of the National Society for the Study of Education* (Bloomington, 1922), pp. 19, 20, 23. Emphases in original.

[3]For an example showing this popular acceptance see E. L. Horowitz, "'Race' attitudes," in O. Klineberg, *Characteristics of the American Negro* (N. Y., 1944), p. 226.

[4]See Klineberg, *op. cit.*, p. 35.

[5]Thus, early tests by Stetson (1897), Ferguson (1916), and Sunne (1917) found Negroes getting equal or higher scores in the entire tests or in critical sections thereof. Tests by Peterson and Lanier (*Mental Measurement Monographs*, 1929, V, pp. 1-156) showed higher scores for whites in Nashville, very slightly higher in Chicago, and identical in New York. Practically identical scores were found by McAlpin in Washington in 1932 (*Journal of Negro Education*, I, pp. 44ff.), and Long had the same result there in 1934 (*ibid.*, III, pp. 205ff.). Note, too, the well-known test of 500 Negro youngsters in Los Angeles (1925) by Clark, where the scores achieved by them (median of 104.7) was slightly higher than that of the whites (*Education Research Bulletin*, Los Angeles City Schools, 1925).

[6]An outstanding example of this is, of course, the result of the Army intelligence tests during the First World War, in which Negroes from Pennsylvania, New York, Illinois, and Ohio achieved higher median scores than whites from Mississippi, Kentucky, Arkansas, and Georgia.

been demonstrated. Fifth, the intimate connection among such things as formal education, rapport, and motivation, in all of which Negroes are, generally, at a disadvantage, and scores obtained on intelligence tests, is established without any question.[7]

Of even more importance than all of the above, however, and that phase of reality which has been most decisively responsible for evoking the dream that has been described, is the fact that the validity of the intelligence tests as scientific instruments for measuring any and all population groups, has been seriously, and successfully, challenged.

Otto Klineberg has demonstrated and insisted upon the importance of cultural and environmental factors in explaining and accounting for differences in scores. Another has shown, specifically, that one particular cultural distinction—that between urban and rural groups—is important, and that, since the intelligence tests generally in use were standardized by using urban examples, it is to be expected that their results would favor urban folk. In addition, it has been demonstrated that a test standardized on rural individuals resulted in lower scores for urban examinees.[8] The importance of this for the Negro —so largely rural—is obvious.

Moreover, application of the tests now in use have uniformly resulted in lower scores for the poor and higher scores for the middle-class and the rich. An essential reason for this, in addition to the data presented above, is that *the intelligence tests were standardized using white, urban, middle and upper class subjects.* Employing the tests, therefore, as measures of some absolute quality labelled "intelligence" is not merely unfair, but is absolutely invalid, absolutely unscientific. Such a procedure is analogous to using a linear standard to measure a liquid, and speaking of a gallon of wood, for example.

This is why a psychologist recently wrote, after surveying the literature on this question:[9] ". . . *that these tests cannot be used for measuring the capacity of different social levels within our own society* . . . [and that] the mean difference in IQ found to exist between children of the lowest and highest status may be accounted for entirely in environmental terms."

A final point bearing on the validity of the results obtained from these tests must be mentioned. This is the fact that these results are expressed in terms of a quotient (IQ) in which

[7]Specific documentation of these facts would cover almost the entire literature of educational psychology for the past twenty years. As examples, see W. C. Bagley, *Determinism in education* (Baltimore, 1925); Clark Foreman, *Environmental factors in Negro elementary education* (N. Y., 1932); O. Klineberg, *Race Differences* (N. Y., 1935); and *The 39th Yearbook of the National Society for the Study of Education* (Bloomington, 1940), Part I.

[8]M. E. Shimberg, "An investigation into the validity of norms with special reference to urban and rural groups," *Archives of Psychology* (1929), No. 104. For an awareness of this problem of standardization see David Wechsler, *The Measurement of Adult Intelligence* (3rd edit., Baltimore, 1944), chapter 8. Of his own device, the Wechsler-Bellevue Scale, he writes (p. 107): "We have eliminated the 'colored' vs. 'white' factor by admitting at the outset that our norms cannot be used for the colored population of the United States."

[9]Walter S. Neff, "Socio-economic status and intelligence," in *Psychological Bulletin* (1938), XXXV, pp. 727-56. Emphases in original. For a critique of Neff, which does not refute his basic point, see Hollingworth, Terman, and Oden, "The significance of deviates," in *The 39th Yearbook, op. cit.*, p. 48.

the mental score age is divided by a chronological score age. But this mathematical process presupposes that the two scores possess a constant relationship. This basic presupposition "in point of fact does not exist" as a leading psychologist[10] has written very recently.

Thus, we have a situation where mathematical figures derived from a non-existent relationship and based upon measuring instruments standardized upon particular sets of subjects, are used to describe levels allegedly attained by differing sets of subjects! And, to confound confusion, these levels are then put forth as marking the innate intellectual capabilities of the individuals concerned, which is contrary to the avowed intent of the inventors of the very instruments from which the levels were derived!

With this as the situation one can readily understand the origin of the dream delineated in the beginning of this paper,[11] and the crucial character of the results of the realization of that dream becomes readily apparent.

As has been remarked, the necessities of war accounted for this realization. In the *First Report* of the Director of Selective Service, he quite frankly remarked that he had believed,[12] upon assuming his task, that he was dealing with a "literate America." The result of this assumption was that the first regulations of Selective Service on literacy, promulgated in the Winter of 1940, stated that those registrants "who passed the physical examination and could understand orders given in the English language" were acceptable.

What immediately followed disillusioned General Hershey as to the literate quality of large masses of the American population. In the first place, it was found that in the two registrations prior to Pearl Harbor there were over 347,000 men who made marks on their cards because they were unable to write their names, and that of these over 125,000 were white and over 220,000 were Negro.[13] Secondly, and as a consequence of the practical absence of literacy requirements for induction, about 60,000 illiterate men entered the Army in the half-year prior to the onset of war.[14]

These illiterates, thrust into the midst of desperate efforts to mold a modern war machine, were, generally, "useless to commanders,"[15] and, though some feeble efforts were undertaken "to make them more literate" even these were largely abandoned, for "under the circumstances of peacetime . . . the Army felt its facilities and personnel could be more profitably used."[16]

Thus it came about that, on May 14, 1941, the Army, by regulation, announced that no registrant possessing an education less than that attained

[10]D. Wechsler, *op. cit.*, p. 12.

[11]For lamentations over the fact that experiments such as the one described in this paper were impractical for they would be "so difficult and expensive," see Hollingworth, Terman, and Oden, *op. cit.*, p. 49.

by one who had completed the fourth grade in an American elementary school was to be inducted. This, it was believed,[17] "was certainly a low enough minimum," but facts and necessities were to prove the contrary. Within six weeks after the promulgation of this regulation about 55,000 registrants were deferred because of it, and by September 15, 1941, this number had increased to over 140,000 men, of whom about 60,000 were white and the remainder Negro.[18]

The situation was critical. Thus, during the three months from April through June, 1942, it was found that of every thousand whites rejected, illiteracy, as defined by the regulation of May, 1941, accounted for over 38, and of every thousand Negroes rejected, it accounted for 112. Moreover, figures compiled at about that time showed that of all men then registered, except those with dependent children, approximately three-quarters of a million (about half million white, quarter million Negro), though physically fit, might be lost to the armed forces because of insufficient schooling.[19] When it is remembered that the United States, at the conclusion of the war, had put into the field no more than eighty-nine combat divisions (*i.e.*, about one million men) the meaning of this educational failing, in terms of the very life of the nation, becomes clear.

Remedial action was vital. New Army regulations announced[20] that, effective August 1, 1942, "any registrant who is able to understand simple orders in English and who possesses sufficient intelligence to absorb military training rapidly is eligible for induction into the military service." To prevent wholesale swamping, however, it was added that the number of men unable to read and write English in a fourth grade standard accepted for induction on any one day at any station was not to exceed ten per cent of the white and ten per cent of the Negro registrants.

Nevertheless, General McNary informed the Senate Committee on Military Affairs on October 14, 1942, that[21] "The Army has inducted 135,000 illiterates." Thus, the situation remained unsatisfactory.

On December 5, 1942, a Presidential Executive Order stopped all voluntary enlistments, and also placed upon the Selective Service Administration the responsibility of supplying men for the Navy. This, together with the impending decision of the Navy to accept Negroes provoked a restudy of the entire problem of the induction of illiterates. The decision (taken February 1, 1943) was to revert to the fourth-grade educational

[17] *Idem.*

[18] It may, perhaps, be unnecessary to remark, as does General Hershey (*Selective Service in Peacetime* . . . p. 259), that this very much higher rate of illiteracy for Negroes as compared to whites exists "not because Negroes resist education or for any other reason than that 'educational opportunities just are not available to them.'" It is of particular interest to note that while the percentage of Negroes rejected from May 15-September 15, 1941, because of illiteracy (12.3%) is about eleven times that of the white rate (1.1%), in fifteen States the rejection rate for Negroes was *less* than the total percentage of white rejections and that in twenty-six States the rejection rate for Negroes was less than that for whites in ten Southern States. See *The Black and White of Rejections for Military Service* (American Teachers Assn., Montgomery, Ala., 1944), p. 3.

[19] *Selective Service in Peacetime* . . . p. 174; *Selective Service in Wartime* . . . p. 231.

[20] *Selective Service in Wartime* . . . p. 232.

test for induction into both services, but "the Army would now accept educationally deficient selectees not to exceed five per cent of the total number of men accepted and assigned to the Army by color at each induction center on each day."[22]

This makeshift for an intolerable condition lasted but four months, and on June 1, 1943, both the Army and the Navy began to accept, with no limitation on percentarge of illiterates, all registrants who passed certain intelligence tests. This, however, was no improvement in terms of solving the manpower problem. Indeed, as might have been foreseen, under this arrangement the rate of rejection was even greater than before, particularly for Negroes. This was so, because to the "educational and cultural background" that had accounted for the high rate of rejection under the illiteracy requirement, were now added, since tests were given, the conditions under which this was done, and "attitudes of the testers" plus the resulting "noncooperative attitudes on the part of the registrants."[23] Indicative of the consequence is the fact that as of September 1, 1943, it has been estimated that over 340,000 men were placed in class IV-F because of educational deficiency.[24]

The problem, resulting from generations of chronic and inexcusable social injustice, was insoluble, in any immediate sense. Remedial action was possible and necessary, however, and this was introduced in earnest by the Army in June, 1943. At that time Special Training Units were created with the purpose of giving those illiterates who had survived the so-called intelligence tests, an intensive 13 weeks' course (later reduced to from 8 to 12 weeks) aimed at the specific task of raising them to a minimum literacy level equivalent to that obtained as the result of successfully completing the fourth grade in an "average" elementary school.[25]

Here, then, one had men from many walks of life, of all colors, creeds, and nationalities, from all sections of the country, from urban and rural backgrounds, identified only by a common intellectual failing—illiteracy. The theoretical value of the experiment in terms of the question of comparative intelligence is enhanced, too, by the fact that these men were to be subjected not to a mere test of brief duration, but were to be put through a learning process of appreciable duration, the results of which had a relatively well-defined and objective base—namely, have the subjects overcome their illiteracy to the indicated level? When it is remembered that fundamental to all definitions of intelligence is the idea of "ability to learn," or "ability to meet new situations quickly and successfully"[26] the significance of this effort becomes clearer.

The plan of the experiment was as

Witty, "New evidence on the learning ability of the Negro," in *Journal of Abnormal and Social Psychology* 40:404 (1945).

follows:[27] Illiterates accepted for training in the Special Training Units were to receive psychological interviews, and careful medical tests. They were then to be given placement tests designed to reveal their degree of functional literacy, as a result of which they were to be placed in classes of appropriate levels. In addition, periodic achievement tests were to be administered and men reassigned, if necessary, as a result of these findings, thus permitting them to advance as quickly as possible, and assuring an homogeneous content (in terms of learning standards) to the classes.

The classes were to be small (not over about 18 members was the desideratum), and the teachers were to be carefully selected for ability and eagerness. The content of the material presented to the students was to be alive and functionally useful, and related to their own experiences, both past and present. Expense was not to be spared, and physical facilities and training aids were to be excellent, practical, and helpful. Negro teachers were to be employed extensively for Negro students. Special attention was to be given to motivation and morale of the students. Not all the work was to be academic, but rather physical exercises and some military training were to be included. Of course, the living conditions of the subjects (food, clothing, medical service, etc.) were to be the equal of the average domestic army post.

This was the plan and, of course, as in all plans made by and for human beings, there was not identity between the concept and the execution. It is certain that not all the teachers and administrators (company commanders) were of equal quality, and it is likely that some were poor. Certain it is, too, that in different units there existed varying levels of motivation and morale, and that even physical conditions varied somewhat throughout the experiment.

It is likewise a fact that the plan itself envisaged no breaking away from the Jim-Crow pattern of the Army. In the words of the Acting Deputy Director of Military Training of the Army Service Forces:[28] "There were some Negro special training units as such. The majority of the units contained both Negroes and whites, who were organized into separate companies and instructed separately." It is true, too, that while Negro instructors were used in Negro units, many Negro classes in general units were taught by white instructors, and the latter were not always entirely free of that bigotry

[27]For descriptions of the work of the Special Training Units, see: A. G. Trudeau, "Army experiences and problems of Negro education," in *Education for Victory* 3:13-16 (1945); P. Witty, *op. cit.*, pp. 401-04; S. Goldberg, "Psychological Procedures Employed in the Army's Special Training Units," in *Journal of Clinical Psychology* 1:118-125 (1945); P. Witty and S. Goldberg, "The use of visual aids in Special Training Units in the Army," in *The Journal of Educational Psychology* 35:82-90 (1944); Witty and Goldberg, "Evolution in education through Army experience," in *ibid.*, pp. 338-46; Witty and Goldberg, "The Army's training program for illiterate, non-English speaking and educationally retarded men" in *Elementary English Review* 20: 306-311 (1943); N. Kaplan, "Salvaging illiterates in the Army," in *Occupations* 23: 74-6 (1944); J. C. Evans, "Adult education for Negroes in the Armed forces" in *Journal of Negro Education* 14:438-9 (1945). None of these articles is in any sense critical, and all are in reality more descriptive of the plan than its execution.

[28]Letter from Colonel S. M. Prouty to the present writer, dated Washington, 5 March, 1946.

which plagues our nation.

Yet the great fact remains that the plan was carried out substantially as envisaged, and that scores of thousands of Americans received, finally, a fraction of that education which is supposed to be their birthright.

Specifically, one is able to present these data: from June 1943 through October 1944 approximately 180,000 men were placed in Army Special Training Units as functional illiterates. Of this number about 150,000 (85%) successfully completed their training and attained—or were said to have attained[29]—a basic degree of literacy. Among the 150,000 men just mentioned, 86,670 were Negroes.[30]

Of particular importance is the fact that of the whites who entered these units during the aforesaid period 84.2 per cent successfully completed it, while 15.8 per cent failed and were discharged from the Army. Of the Negroes who entered these units during the same period 87.1 per cent successfully completed it, and 12.9 per cent failed and were discharged. "In other words," as General Trudeau has stated,[31] "experience in the Army indicates that a slightly higher percentage of the Negroes than the whites successfully complete the Special Training Program, *i.e.*, achieve fourth grade standards in reading, language, and arithmetic and demonstrate sufficient mastery of prebasic military subjects to warrant their being forwarded for regular training." It may further be remarked that no great difference between Negro and white appeared in the speed with which this learning process was accomplished, for while 71.7 per cent of the Negroes completed the training in less than sixty days, the comparable figure for the whites was 75.6 per cent.

The conclusion is clear. The learning accomplishment of scores of thousands of Negroes from all sections of the country over an extended period of time compares quite favorably with that attained by scores of thousands of similarly diversified whites, in this greatest experiment of its kind ever conducted by the American government. And the other striking characteristic of this experiment is the fact that the conditions to which Negroes and whites were subjected were fairly similar—certainly more nearly similar than are the conditions under which Negroes and whites live, work, and study in the conventional American civilian pattern.

These data not only constitute a shattering blow at racists, but present a challenge to their opponents to urge and to demand that their government do in peacetime what it felt had to be done and what it at least began to do in wartime—namely, conduct an all-out, scientific and democratic assault upon the twin disgraces of illiteracy and educational inequality that remain as huge blights upon the lives of untold millions of its citizens.

[29]Figures created by men and dealing with men are subject to error. The writer has heard, from people whose opinions he respects, of men who "completed" STU work but remained illiterate. Pressure did exist, it may be believed, on administrators to make as good records—on paper if necessary—as possible. Yet these figures are official, nothing else exists, and the numbers involved are so vast that individual iregularities probably would not materially affect the percentages.

Implications of Military Selection and Classification in Relation to Universal Military Training*

ROY K. DAVENPORT

INTRODUCTION

Is it desirable that there should be a system of universal military training in the United States? Does military training offer a means of more readily accomplishing certain social goals? Will such training be of greater or less significance to Negroes than to the majority population group? These questions are being discussed by professional educators and sociologists and by lay individuals. The basis for such discussions frequently develops from a general social or military experience or both. Information relative to the results of selection for military service and the classification of persons selected for military duty may be expected to contribute to efforts which seek to resolve the questions mentioned above.

This article is presented in order that there may be a more complete understanding of military experience in selecting and classifying men for military duty. Since certain Army test results tend to reflect differences in the social experiences and opportunities of the groups under consideration, the significance of these data may rest in the relationship between achievement on the tests and educational opportunities. Perhaps, in part, these data may suggest the extent to which Negroes will receive greater or less benefits from a system of education which includes compulsory military training.

INDUCTION TESTING

The induction of men into the military services was influenced by three major policies operating for limited periods during the period of mobilization. Prior to August 1942, regulations excluded from service all men who did not have the capacity of "reading and writing the English language as commonly prescribed for the fourth grade in grammar school"[1] and provided that men who had not completed the fourth grade should be tested at induction stations to determine whether they possessed this capacity. The second period, effective from August 1942 to June 1943, permitted the induction of men who could not meet the above standard when they possessed "sufficient intelligence to absorb military training rapidly. . . ."[2] The added stipulation was made that such men would be inducted within a fixed quota, a percentage of the total number of men inducted each day from each point of induction. The percentage of such men to be inducted was changed during the period from ten percent at the beginning to five percent in February 1943 when induction stations began the processing of selectees for both Army and Navy.

*Data which are the basis of tabulations and observations in this article were obtained from reports, and consolidations of them, received by the Adjutant General's Office, War Department.

[1]Changes to Mobilization Regulation (MR) 1-7, dated 18 April 1941.

[2]War Department Circular No. 169, dated 1 June 1942.

The importance of this second period of induction policy is in the fact that it introduced two concepts into the screening of men being selected for military service. *Intelligence* became a factor for consideration. Those men who were unable to meet the requirement of a fourth-grade education but who were accepted on the test findings were designated *illiterate*. In both instances the criteria recognized only the military requirements and were without reference to accepted interpretations of them. Thus, *intelligence* meant those factors which were important for military success, and *illiteracy* indicated inability to meet the fourth-grade standards for expression in and understanding of the English language as printed or written.

The third period may be considered to be that during which improved screening tests were applied in order to insure that the above criteria of acceptability were functioning. This period is sometimes characterized as one during which no limits were placed upon the number of "illiterates" to be inducted. Chronologically, the first portion of the period extended from June 1943 through May 1944, while the second portion of the period extended from June 1944 to the termination of hostilities. The first twelve months differed from those which followed in that in June 1944 new psychological tests were introduced after having been thoroughly evaluated during the preceding year.

In the interest of discussions to follow, it is pertinent to outline procedures, effective during these periods, which bear relationship to the problem of Army Grade classifications resulting from the application of the Army General Classification Test (AGCT). During the first and second periods men were forwarded from induction stations to reception centers where they were tested and classified. From this point, they were forwarded to regular training centers. During the third period, however, those men who were of low "intelligence" or "illiterate" were forwarded from reception centers to special training units before being forwarded to regular training centers.

Although men in the low "intelligence" group were first tested with the AGCT at reception centers, the results of these tests are not generally included in data pertaining to the distributions of test scores since some men were subsequently discharged from the Army when they failed in the special training units and others showed improvement on the test. All men in these units, low "intelligence" and "illiterates," were tested near the completion of their course at the special training unit and, upon being forwarded to regular training, their test results were included in the general distributions. It is recognized that these data tend to give weight to the effect of the special literacy training received by men of the low "intelligence" group. While this is true, the distributions of Army General Classification Test scores represent men actually in the Army and undergoing regular training or participating in military duties rather than men tentatively selected for service.

Experience in training men for military duty had early indicated that men in the borderline ability

group (AGCT Grade V) were not generally good risks. This was especially true of those men who fell in the lower extreme of this grade. There was considerable reason to believe that men who lacked literacy skills could be developed into better soldiers than those who, having these skills, fell in the lower three or four per cent of the normal distribution of ability as measured by the AGCT. The decision was made at the end of the second period to eliminate men who might be expected to score in the lower extremes of this test and to induct those "intelligent illiterates" who, with a minimum of literacy training, might be expected to become better soldiers than the eliminated group. This was achieved by adjusting critical scores on tests employed at induction stations. The effect of this decision may be observed in the lowered proportions of Grade V men during the third period.

Under procedures in effect at induction stations throughout the nation, men were selected by local boards to fill quotas allocated to the local area. These men were forwarded to induction stations where they were examined to determine whether or not they possessed the minimum mental and physical capacities required for military service. Screening of selectees to determine mental acceptability was accomplished by military psychologists who recommended to the commanding officer that men be accepted or rejected. Final determinations rested with this officer but only in rare instances were such recommendations not accepted. Selectees were considered acceptable without mental examination if they had completed a standard high school course. Non-high school graduates were given a verbal test which measured both mental capacity and minimum literacy skills. Those men who failed this test were given an opportunity to take a group non-verbal test measuring mental ability. This was followed by an individual test of the same type for men who failed to make a passing score on the group test. No selectees were rejected for failure to possess minimum mental capacity until they had failed to perform successfully on at least one of the multiple hurdles and had been interviewed by the military psychologist to determine the validity of the test score. Many men who were acceptable on each of the above screens were subsequently rejected for physical reasons.

During the period September 1944 through August 1945, 2,331,042 selectees were given pre-induction examinations. Approximately ten per cent (9.47%) of these were Negroes. Although 21.16 per cent of the total number were recommended for induction as high school graduates, Negroes comprised only 2.07 per cent of this group. Of the 367,537 "illiterates" examined during this period, 35.63 per cent were Negroes, and they comprised 60.77 per cent of the total Negroes processed. Of the Negro "illiterates" processed, 32.34 per cent were recommended for induction, 18.5 per cent possessed sufficient "intelligence" for induction but had disqualifying physical defects, while 49.16 per cent did not possess sufficient "intelligence" for induction. A similar analysis of the experience with white "illiterates" reveals percent-

ages of 37.98, 32.36 and 29.66, respectively.

Table I provides data for each of the nine service command areas[3] covering a period of twelve months during which the processing of selectees at induction stations may be considered to have been most carefully conducted. It is of interest to observe that the rate of acceptance of Negro inductees was lower in the First and Seventh Service Commands (446 and 443 per 1,000, respectively) than in each of the others except the Fourth. A parallel condition existed for white inductees in these Service Commands. A possible explanation of this may be that the application of physical standards was more rigid in the First and Seventh Service Commands. Support for this suggestion is to be found in the data reflecting the number of physically-disqualified, literate, non-high school graduates who were rejected. In this classification, the First Service Command's rejection rate was 211 colored per 1,000, while that for the Seventh was 238 per 1,000. Similar figures for the white selectees of this group are shown by the rates of 213 and 201 per 1,000 for the respective Service Commands. While it is difficult to deter-

[3]States included within service command areas were as follows: *First*, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island; *Second*, Delaware, New York, New Jersey; *Third*, Pennsylvania, Maryland, Virginia; *Fourth*, North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi; *Fifth*, Ohio, Indiana, West Virginia, Kentucky; *Sixth*, Michigan, Illinois, Wisconsin; *Seventh*, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas, Wyoming, Colorado; *Eighth*, Arkansas, Louisiana, Oklahoma, Texas, New Mexico; *Ninth*, Montana, Idaho, Utah, Nevada, Arizona, California, Oregon, Washington.

mine the extent to which there were differences in the application of uniform standards among the commands, it is important that either (1) the physical condition of selectees in these areas was poorer than in others, a condition which is to be doubted, or (2) that the criteria of the medical authorities, as factors in the interpretation of uniform standards, reflect a generally higher goal in physical health as sought for these areas by members of the profession.

The data for the Fourth and Eighth Service Commands show an extremely high proportion of Negro selectees being rejected as non-acceptable "illiterates." Almost two-thirds of the rejection rate for Negroes in the Fourth Service Command, and only slightly less in the Eighth, was in this category. The figures shown include those for men without physical disabilities, as well as those disqualified for physical reasons. Among the men in this category in the Fourth Service Command there were two physically qualified for each one disqualified. In the Eighth Service Command the physically qualified were in equal ratio to the physically-disqualified, mentally non-acceptable Negroes. Exactly the reverse condition was observed among the white mentally non-acceptable white selectees in these Service Commands. In general, for all service commands per 1,000 processed, there were eighteen white physically qualified to sixteen disqualified and 189 Negro qualified to 110 disqualified physically. The significance of this condition to education and to the Negro people should be considered in any contemplation of a program of universal training.

There is reason to doubt that purely cultural factors such as education and general socio-economic environment can be completely eliminated from objective tests and the situations under which such tests are administered. It is reasonable to assume that successful performance in a non-verbal test requires a minimum relative social experience. Criteria of success on such tests are determined not by an objective and quantitative measure of intelligence; rather statistical techniques are applied to a total population group in order to eliminate either a fixed percentage of the total group or to establish a cut-off point below which it is considered uneconomical to attempt to train individuals whose test scores are so located. Thus, there remains the probability that failure to qualify on military tests of mental capacity indicates only that the total experience of the individual has been so devoid of those experiences basic to military success that the armed forces could not profitably undertake to train him for military service. This may well be considered an indictment of the social system and not proof of the lack of inherent ability. Since considerably larger proportions of Negroes than whites were found to be non-acceptable on tests of mental capacity it would be well to consider the scope of proposed universal military training with attention being directed to its effect upon the group found to be mentally non-acceptable for induction under selective service procedures. If such training is planned so as to include this group, it may well be that a contribution can be made toward improving the condition of large numbers of illiterate Negroes.

It is of interest to observe that during 1943 and 1944 the special training units absorbed larger proportions of illiterates than men of low intelligence (Grade V). Illiterates were 66.56 per cent of the white group and 63.87 per cent of the Negro group sent to these units. During this same period, literate graduates of these units were found to score principally in Grades IV and V on AGCT with 72.3 per cent and 26.5 per cent of the white graduates and 50.5 per cent and 49.1 per cent of the Negro graduates scoring in the respective grades. During this two-year period approximately 14 per cent of the white and 12.3 per cent of the colored trainees were discharged from these units, and the Army, because of inability to meet graduation standards in the prescribed period of time.

It must be recalled that the program of the special training units included elementary arithmetic, literacy, and military training and utilized the most progressive teaching techniques in order to make available for military duty thousands of men who otherwise would have been unable to qualify for induction. These same techniques, if applied to men who could not qualify for service because of inability to meet minimum mental standards, might reveal that with somewhat longer training periods thousands of men could qualify for either service in a military type occupation or greater participation in the social and economic life of the nation. Perhaps a program of universal military training could achieve a goal such as this in much less time than would be required for state and local educational programs.

Classification Testing

The Army General Classification Test (AGCT) has been administered to more than nine million men. Because of its general application to military personnel it has come to be, for some persons, the yardstick by means of which a number of final determinations are made. Popularly referred to as "the Army's intelligence test," there have been, and will perhaps continue to be, efforts to compare the intelligence of sectional and racial groups on the basis of distributions of scores obtained from the experience with AGCT. Such comparisons are of interest to many people. They should be made, however, only when there is a complete understanding of the nature of the test and the purpose for which it was designed.

The AGCT apparently measures the individual achievement resulting from (1) native capacity, (2) effective schooling and educational opportunities, (3) socio-economic status and (4) cultural background. In answer to the question of what the test measures, Dr. Walter V. Bingham indicated that the Army General Classification Test

> . . . . does not measure merely inherent mental capacity. Performance in such a test reflects very definitely the educational opportunities the individual has had and the way in which these opportunities have been grasped and utilized. . . . There is nothing in the title of the test which says anything about native intelligence. It is a classification test. Its purpose is to classify soldiers into categories according to how ready they are to pick up soldiering—how likely they are to learn easily the facts, skills, and techniques necessary for carrying out Army duties.[4]

[4]Ambrose Caliver, *Postwar Education of Negroes.* U. S. Office of Education, Federal Security Agency, p. 25.

The test is composed of three kinds of tasks: (1) there are verbal items of increasing difficulty to sample the grasp of meanings and differences in words; (2) items are included which involve the solution to arithmetical problems and mathematical computations; (3) ability to visualize relationships of things in space is measured by selected items. Prior to April 1945, these abilities were measured by a variety of items in a single test which yielded a single score. Subsequent to that date four unit tests were introduced from each of which a score may be derived. The composite score, comparable to earlier AGCT scores, is used when a single index is desired. In this series separate tests are used to measure ability in arithmetical computation and arithmetical reasoning, thus separating these two abilities.

While each raw score on the AGCT is converted to a standard score, the actual position of scores on the scale is seldom the basis upon which judgments are based. Rather, five categories of scores, known as Army Grades, serve to reduce the effect of chance scores and provide convenient groups for comparing abilities. The groups, or grades, cover, with one exception, one standard deviation distance on the standard score scale with the mean score of 100 being the center of Grade III. Thus, Grade I includes scores above 129; Grade II, those scores from 110 through 129; Grade III, 90 through 109; Grade IV, 60 through 89; and Grade V, scores below 60. Until July 1942 the upper limit of Grade V extended through 69 but the decision was made to lower this limit since it was felt that certain men in the "Slow Learners" group (Grade V) had abilities which made them better risks than those in the lower portions of this group.

During an early period of experience with the Army General Classification Test an effort was made to study the relationship of the test results to education. More than one-half million cases, distributed in educational categories as indicated in Table II, revealed the definite relationship which exists between educational achievement and achievement on the test. Of those individuals for whom some schooling was recorded, although none had completed the ele-

TABLE II

THE AGCT ARMY GRADE PERCENTAGE DISTRIBUTION BY EDUCATIONAL CATEGORIES FOR COLORED AND WHITE SELECTEES PROCESSED JUNE 1941 TO FEBRUARY 1942

		Grade					
Educational Category	Race	I	II	III	IV	V	No. of Cases
Some Schooling	W	0.3%	3.5%	18.9%	42.9%	34.4%	81,033
	C	0.2	1.1	4.9	20.7	73.1	24,456
Completed Grade School	W	2.0	21.8	42.8	27.6	5.8	212,949
	C	0.3	3.6	19.4	43.4	33.1	22,343
Completed High School	W	15.1	50.5	28.5	5.4	0.5	177,556
	C	1.6	16.5	41.5	32.6	7.8	8,404
Completed College	W	47.5	45.0	7.1	0.4	0.0	19,580
	C	6.4	34.9	44.3	12.9	1.5	776
College Post-graduate	W	53.3	40.2	6.0	0.4	0.1	2,533
	C	12.5	56.3	25.0	4.2	2.1	48

mentary grades, 3.8 per cent of the white and 1.3 per cent of the colored selectees scored above Grade III on the Army General Classification Test. In each of the successive categories of educational achievement the percentage of men scoring above the central grade on the test increased. In the "Completed High School" category 65.6 per cent of the white and 18.1 per cent of the colored selectees were in the highest two categories and in the group of men for whom college post-graduate training was recorded, 93.5 per cent of the white and 68.8 per cent of the colored selectees were similarly placed. The consequent reduction in the proportions scoring in the lowest two grades in the progression of educational categories indicates the influence of education upon the achieved results.

Experience with the Army General Classification Test from June 1941 to September 1945, as summarized in Table III, reflects the condition of the total manpower pool of the nation during specific periods, and the calls which were made upon it by the military and industrial fronts. There were other factors which influenced the flow of men into the Army such as the ability of the Army to absorb certain types of men. When the decision was made which inaugurated the third period of induction, mentioned earlier, it altered the flow of manpower by admitting unlimited numbers of "illiterate" selectees and screening out a considerable proportion of "Slow Learners." Thus, the distribution of AGCT grades over these periods does not reflect the condition of the total male population. Instead, the data tend to reflect the condition of that part of this population which was selected for military duty. It is of interest that although the Army's selective process tended to reduce the proportions of men falling

TABLE III

ARMY GENERAL CLASSIFICATION TEST SCORE DISTRIBUTIONS DURING SELECTED PERIODS FOR WHITE AND NEGRO INDUCTIONS, SHOWN AS A PER CENT OF TOTAL FOR EACH PERIOD

Period*		AGCT Grades I	II	III	IV	V
June '41-August '42	W	7.7	28.6	32.2	22.2	9.3
	N	0.5	4.3	14.8	31.5	48.9
	T	7.1	26.6	30.7	23.0	12.6
September '42-May '43	W	5.2	27.2	33.1	28.4	6.1
	N	0.2	2.7	11.0	43.1	43.0
	T	4.7	24.7	30.9	29.8	9.9
June '43-May '44	W	8.1	33.2	31.9	25.4	1.4
	N	0.3	3.8	13.6	63.0	19.3
	T	7.1	29.4	29.6	30.1	3.8
June '44-April '45	W	4.4	26.4	34.3	32.9	2.0
	N	0.2	2.3	10.1	61.7	25.7
	T	4.1	24.3	32.2	35.4	4.0
May '45-September '45	W	5.4	29.0	33.5	28.7	3.4
	N	0.2	3.0	13.1	58.8	24.9
	T	4.9	26.6	31.7	31.4	5.4

*Each period, subsequent to the first, reflects changes in procedures. In the order listed, the second period was that in which the upper limit of Grade V was lowered 10 points; in the third period, illiterates were inducted without quota and a proportion of potential Grade V men were rejected; the fourth period introduced new psychological tests at induction stations; the final period introduced a series of tests giving a composite score for the Army General Classification Test in the place of the former unit test which yielded a single score.

in Grade V other factors operated to reduce the proportions of men scoring in the highest category.

The variations among the states with respect to the extent of educational opportunities afforded the youth of school age is well known. Any grouping of states within a given area may be expected to bear the approximate relationship to any other similar grouping as a particular state in one bears to a given state in the other grouping. While this cannot be true for every state in every grouping, it will be sufficiently true for most to enable one to infer from data representing an area of the nation the extent to which the adequacy of educational opportunity is a factor for consideration in interpreting those data. The data of Table I, revealing results of induction station selection and rejection, when analyzed in this respect tend to support this hypothesis.

Table IV presents the percentage distributions of AGCT grades in the service command areas for the period from June 1943 to May 1945. The proportions of men concentrated on either side of the center of Grade III may be said to correspond to the general condition of educational and social opportunity of the areas under consideration. The data also show the general imbalance in the proportions of Negro inductees scoring in the extreme grades on the test. It is true, as evidenced by a comparison of service command experiences with the anticipated results, that the distributions do not conform to the curve which represents the statistically normal distribution. This was true in part because of factors of selection which have been discussed earlier.

TABLE IV

PERCENTAGE DISTRIBUTION OF ARMY GENERAL CLASSIFICATION TEST GRADES FOR INDUCTEES PROCESSED FROM JUNE 1943 TO MAY 1945 IN NINE SERVICE COMMANDS

Service Command	White Grade I	White Grade II	White Grade III	White Grade IV	White Grade V	Negro Grade I	Negro Grade II	Negro Grade III	Negro Grade IV	Negro Grade V	Total Grade I	Total Grade II	Total Grade III	Total Grade IV	Total Grade V
First	6.6%	34.9%	37.3%	20.9%	0.3%	0.6%	8.3%	32.5%	55.6%	3.0%	6.5%	34.3%	37.2%	21.6%	0.4%
Second	8.8	37.0	33.8	19.7	0.7	0.4	6.3	24.6	59.8	8.9	8.1	34.2	32.9	23.3	1.5
Third	6.0	30.5	35.0	27.3	1.2	0.3	4.4	16.0	64.1	15.2	5.2	26.4	32.0	33.0	3.4
Fourth	3.1	17.7	28.1	46.9	4.2	0.1	1.0	4.0	61.7	33.2	2.2	12.9	21.2	51.2	12.5
Fifth	5.5	27.4	32.3	32.2	2.6	0.4	4.7	19.7	61.4	13.8	5.1	25.7	31.3	34.4	3.5
Sixth	10.0	37.4	32.5	19.6	0.5	0.8	8.0	23.2	60.6	7.4	9.3	35.2	31.8	22.7	1.0
Seventh	8.8	33.7	32.8	24.1	0.6	0.7	7.0	21.5	62.6	8.2	8.5	32.7	32.4	25.5	0.9
Eighth	3.5	21.1	30.0	42.1	3.3	0.1	1.0	5.8	66.5	26.6	3.0	17.6	25.8	46.3	7.3
Ninth	7.3	35.3	34.1	22.5	0.8	0.3	5.1	19.9	66.5	8.2	7.0	34.0	33.5	24.3	1.2

Differences which appear between areas reflect, however, more than statistical error in the estimate. They point with certainty to the conditions within each area which influence the type of abilities which the AGCT measures.

Education and social experience cannot be ignored in interpreting the differences which are observed. The distance from the anticipated distribution which is present in the results of this program of classification offers support to the theory that opportunity for social experience is related to the results achieved by the men who were examined and classified on the basis of test scores. Such scores, especially those achieved on the AGCT, reflect the total experience of the individuals being tested. Adequacy of schools and extent of participation in community life are in large measure the determinants of success on these tests.

Conclusion

The highest rates of rejection for failure to possess the required minimum mental capacity were those for areas comprising the Southeast and Southwest states. While this was true for both white and Negro selectees, the rate for Negroes was in excess of four times as large as that for white selectees. Similarly, the highest proportions of men scoring in Grades IV and V on the Army General Classification Test were in the service commands comprising these areas. It is significant that the educational opportunities afforded by public school systems in this section of the United States are less adequate than in the other sections. The condition of education for whites in this area bears the same relationship to educational opportunities in the North and West as the opportunity afforded Negroes in this area bears to that for whites in the same region. Comparisons of rejection rates in service commands, by race, as well as results achieved on the AGCT, lead inescapably to the conclusion that if educational opportunities in all areas, for both races, had been identical nearly all of the sectional and racial differences observed would disappear.

The Army special training units provided elementary arithmetic and literacy training for "illiterate" and "low intelligence" white and Negro selectees in equal numbers. Since Negroes constitute approximately one-tenth of the population of the nation, it may be concluded that, in relation to their population ratio, five times as many Negroes profited from this training as white selectees. The Army required the manpower thus provided and was not motivated by any desire to raise the literacy level of the population. While this program served the ends of the Army, it cannot be denied that society-at-large has been benefited or that the greatest contribution was made to the Negro population. It is inconceivable that a program of universal military training will exclude men of low level literacy or intelligence. If such a program seeks to improve the position of this segment of our population for purely military reasons, it follows that Negroes, as a group, will profit proportionately to a greater extent than other groups.

I . . . . . WHAT WE ARE FIGHTING FOR

★

ALL thoughtful Americans are mindful of the way in which this global war has touched our lives. Americans are fighting today on nearly a hundred major battle fronts. Our troops and ships are scattered over five continents and the seven seas. The forces that have brought the most distant point of the earth only sixty flying hours from our homes have also foreshortened cultural and social distances and blurred the dividing lines between races and nations.

In charting a new course for human freedoms everywhere, we in America must realize that the eyes of the world are upon us; and the way in which we are meeting the problems of our minority groups has tremendous and far-reaching influence. Every gain in human insight and social justice here is a world gain, any set-back, a world loss. In the process we move either in the direction of world chaos or world order.

Alain Locke has observed that "most of all, these new forces of unification are closing in on that great divide of color, which has so long separated not only East and West, but two-thirds of mankind from the other third . . . for this very reason, not since the Civil War has the Negro's cause been of greater significance. The paradox of race has become our democracy's dilemma. But speeded on its way to solution it could become a triumphant vindication. Clear credentials on this score would give America a passport to world confidence, especially in the eyes of that two-thirds of humanity who happen to be non-white. . . . Thus it is that race prejudice not only provides

fertile ground for Axis propaganda, but dangerous soil for the possible growth of Facism."

Another great American, Wendell L. Willkie declared only a few weeks before his death that "the war has given new opportunities to the Negro and at the same time has emphasized the injustices in our attitude toward him. It has made us conscious of the contradictions between our treatment of our Negro minority and the ideals for which we are fighting. The equitable treatment of racial minorities in America is basic to our chance for a just and lasting peace. For it cannot be too much emphasized that in the world today whatever we do *at home* affects our foreign policy, and whatever we do *abroad* affects our domestic policy. On no single question is this truth so inescapable as in the repercussions all around the world that result from our treatment at home of our colored citizens."

It has been reported that in Italy a German tactic against the Negro troops was distribution of leaflets bemoaning the Detroit race riots. They were fired into American lines where the all-Negro 92nd Division had been fighting.*

One of the 500 Nazi prisoners, aboard the S.S. Booker T. Washington on the way to internment in the USA, had more to say on the subject of Axis propaganda. The fact that the ship was manned by a Negro captain and a crew of several races was to him and his fellows an amazing contradiction of all that German leaders had told them. Their spokesman said, "They told us Negroes were no better than slaves in your country. But what we have seen on this ship, the happiness, comradeship among all of you, your fairness to us when we had been told that you would beat and abuse us, all that has made us think. At night after the lights go out down in the hold, we talk about it, all of us."*

Fortunately we are beginning to realize that some common human denominators must be found in terms of "liberty, equality and fraternity for humanity-at-large." When so much of life is fraught with fears and frustrations, it is well to take stock of the factors which give us cause to take heart and go forward. Though the headlines scream about our failures in human relationships and play up the riots, stabbings, arrests and brutalities, volumes could be written about our successful experiences in releasing tension and erasing prejudice.

In the social experiment which is the USO we have learned a great deal about our American minorities and have developed policies and ways of work which have emphasized the full contribution

*Negro Digest, *December, 1944.*

and participation of all groups in American society. By everyday experience we have come to know that the same prejudices, inequalities and racial arrogances that operate against one minority—the Negroes, Mexicans or Jews, for example—operate against all minorities the world over. Out of everyday experience, too, we are learning to accept our differences and to find the things that unite us. In the past we have been insensitive to the reactions of people who are "different," but today we are struggling for greater understanding and insight. The Constitution of the United States does not recognize *first-* or *second-*class citizens but guarantees liberty, justice and equality for all men. Scientists refute the idea of racial superiority, and the religious concept of the Fatherhood of God implies also the brotherhood of mankind, and the intrinsic dignity and value of every human life.

In carrying out the basic principles of the USO and "serving all involved in the war effort" much depends upon the integrity, emotional stability and maturity of our USO leadership. The purpose of our organization is not advanced by sentimentality, fanaticism or martyrdom. In USO we must accept people for what they are and recognize their great human potentialities. We are all learning together. We make the same human mistakes, but we have the same opportunities to take part in this educational process and to go forward in the direction of our ideals.

This pamphlet records some of the steps the USO Division of the National Board YWCA has taken toward achieving its goals of "service to all involved in the war effort" and of setting forward Negro-white relationships in America. It is not in any sense complete nor authoritative. The material has been gathered from the correspondence of USO staff and volunteers, narrative reports of club directors, the observations of regional supervisors and headquarters staff, and includes also a summary statement of the official policies and operating practices of the USO in the various aspects of its services to Negroes. This pamphlet is a program tool indicating the scope of services and pointing out ways of working in the area of race relations with understanding and social insight to the end that our efforts may put America forward in its achievement of a true democracy.

II . . . . . FACTORS AFFECTING USO'S SERVICES TO NEGROES

★

THE greatest mass migration in the history of our country has occurred in World War II. In this great re-shuffling of populations Negro servicemen and war workers and their families have been moving into all sections of the United States.

* The latest official War Department figures showed the following numbers of Negroes in the armed forces:

Army	701,678
Air Forces	73,686
Navy	142,628
Coast Guard	3,695
Marines	15,771
Total number of commissioned officers in all branches of service	5,804
Negroes in essential war industries approximate figure (Sept. 1944) (including men and women)	1,000,000
Total Negro population	13,000,000

From a report to Board of Directors of USO by Henry W. Pope, *Director of Services for Negroes, USO Headquarters, October 13, 1944.*

In spite of the fact that Negro troops have been assigned to military duty in many very small units, ranging from 150 to 400, USO services have been provided, wherever needs have been presented.

Notwithstanding the movement of enlisted personnel to the theaters of war and the subsequent elimination of a few large clubs, services to Negroes are now being provided in the following number of operations. . . .

National		294
	Clubs and Extensions	238
	War Production Clubs	14
	Military and War Production Clubs	19
	NTAA Service Units	12
	Troops in Transit Lounges	11
Community Conducted		65
	Clubs and Services	57
	Troops in Transit Lounges	8
Total Operations		359

The constituent groups included in USO's services to Negroes are men and women in the armed forces; men and women in war production areas and families of both groups; civilian women and girls employed in military areas—as for example in camp offices, laboratories, laundries, restaurants, stores, etc. USO also carries on a decentralized program with the families of war production workers in housing projects.

Mobile and maneuvers service units travel to Negro troops stationed at outposts and on maneuvers.

A large number of clubs in the North staffed by white personnel have provided services to Negroes. The extent of integration in these clubs ranges from practically no contact and complete separation, to complete integration except social dancing. It also has been practicable to have mixed staffs (Negro and white) in a few communities in which Negro and white constituencies have used USO facilities without reference to race. In many clubs staffed by Negro personnel only, there has been a good attendance of white servicemen.

It cannot be emphasized too strongly that one of the major problems encountered in serving Negroes effectively is psychological in nature. The morale of the Negro is more affected by race relations in continental USA than any other single factor. Many Negro serv-

icemen resent segregation not because they want to mingle with whites but because of the idea of racial inferiority it implies. Many Americans are sensitive to the anachronism of fighting a war against racism with an army constructed on racial lines. Quality and quantity of services are of vital importance, but *how* services are provided and the relation of this *how* to the great American creed of freedom and equality are also of vital importance to Negroes.

Conditions Directly Influencing USO's Services to Negroes

The following analysis of social and economic conditions which affect USO's services to Negroes was presented by William Y. Bell, former USO associate regional executive, at the Regional Staff Conference in Region VII*, December, 1943. While Mr. Bell's report stresses the particular problems of the southern region, much of the material is pertinent to other sections of the country, and merits the thoughtful consideration of USO staff and volunteers.

1. Transportation

   In acutely dislocated areas transportation is overcrowded and uncomfortable for everyone. Negro servicemen have difficulty getting bus transportation to and from camp. White bus drivers may, and do, refuse to pick them up. The inadequate or nonexistent Negro taxicab service is additional hardship for servicemen and the relatives who visit them.

   Negro USO club directors are aware of the additional assistance to travelers which they must give under such circumstances. They realize how hard it may be to secure the services of volunteers who have transportation difficulties getting to and from the club. Club attendance shows that men may prefer to remain on post rather than risk being left at the gate by successive buses. Negro soldiers may arrive at the USO club so upset by their experiences in getting there that they are psychologically negative prospects for any sort of program participation.

2. Eating

   Since there has never been a large, middle-class Negro traveling population to support more desirable restaurants, Negro eating places are, in the main, few and inferior. They are of

**Region VII includes the following states: Alabama, Florida, Georgia, Mississippi, South Carolina, Tennessee.*

the cafe variety, specializing in short orders, sandwiches and soft drinks. Prices are apt to be higher than those of comparable or even better white establishments because food prices in Negro neighborhoods are higher. At the same time, the quality of food served is apt to be poorer. The implications are obvious for first-class snack bar operation in Negro USO clubs.

3. Civil Liberties

The degree of civil liberties afforded by a community to visiting servicemen, in-migrant war workers and their respective families affects the attitude with which these constituencies approach the USO program and the effectiveness of the USO director and staff in dealing with them. Some communities are particularly oppressive upon Negro soldiers.

When four white civilians approached a Negro private in his home town demanding that he remove his army uniform, he refused and a fight followed in which one of the civilians said he was cut by the soldier. For the next three and a half years the soldier will be in jail, because he resisted a demand for which he could have been court-martialed by the Army. A Negro sentry was ordered to move by a state trooper. When he refused to leave his post of duty, he was shot dead by the trooper who was later punished by one day's suspension from the force. Similar violations of servicemen's rights are widespread and occur frequently. Obviously, it is difficult for the USO club to design a program for men who have personal knowledge of such matters.

Infringement upon civil liberties affects more than the serviceman, however, and USO services in some places have been upset by experiences suffered by directors and volunteers. In connection with a vice drive, police made wholesale arrests of Negro women on the streets at night. Their tactics were so extreme that volunteers, including the director's wife, were afraid to come to the club. A Negro director was asked to leave town because he pointed out in a public meeting the effect of inadequate playgrounds on the increasing juvenile delinquency rate. USO is concerned not only with the morale of our servicemen but also with that of our USO staff.

4. Housing

Housing for Negro transients throughout the country is a problem even in normal times for two main reasons. First, there are few desirable hotels open to Negroes because of the absence

of a large, traveling Negro middle class to support them. Second, the outer limits of most Negro neighborhoods are fixed by Real Estate Boards. In general Negroes are allowed to expand into areas vacated by whites only slowly and upon payment of rents higher than those charged the former white tenants. Wartime conditions merely heighten these problems. USO is one of the few agencies to which servicemen, war workers and their families may turn.

Conditions Indirectly Affecting Program, Volunteers and Lay Leaders

1. Economic Conditions

   Since Negro males are, on the whole, confined to common labor at low wages or else have not received the training which would enable them to hold better paying jobs, the income of the average Negro family, in comparison with the average white American family, is extremely low. To increase the family income, the woman usually works. In many places, 80 to 90 per cent of Negro women work, most of them in domestic service, where long hours are the rule. The reservoir of Negro volunteers is, therefore, smaller than would ordinarily be expected.

2. Lack of Social Agencies

   There are few southern communities with Negro social agencies. In such places, USO is the only agency present which even approaches a social agency with professional personnel. Local civilian Negro individuals and families are apt to turn to the USO club for advice on problems. While the USO club is not set up to render services to groups other than servicemen, war workers, etc., public relations dictate that the USO director at least listen to requests for social services and then give advice or refer applicants to whatever help may be available. This is an additional responsibility upon the director and staff.

3. Educational Cultural Development

   The South as a whole spends one-fourth as much on the education of the average Negro child as it does on its average white child—although even the average southern white child receives half as much in school expenditures as the average north-

ern white child. School systems in this region are generally lax about school attendance: few insist on Negro school attendance especially. Negro schools are apt to be scattered far apart. Many children drop out of school to work. Obviously, the reservoir of volunteers and lay leadership who can bring the benefits of formal education to USO activities is limited. The school system in one city pays one Negro high school teacher $600 while a white teacher of the same training and experience receives $2,400. This highlights a condition of low, differential wages which has caused southern Negroes to migrate to other sections of the country, resulting in a drain of native leadership. While this emigration of leadership is not limited to Negroes (4,000,000 Southerners have left the region in the last generation, compensated for by only a 600,00 influx; one child out of every eight children educated in Alabama leaves the state), it is more serious because of the relatively greater need for Negro leadership. The need for volunteer training programs and interpretation is relatively greater because of these reasons.

4. Recreation
   a. Commercial—The Negro middle class is small, conservative and has not encouraged or been able to support more desirable commercial recreation. That which has been established has been set up for the large marginal population. The result is that almost the only commercial recreation available to Negro servicemen and war workers consists of substandard pool halls and theaters. Negroes have little or no access to informal centers such as hotel lobbies, theaters, restaurants, etc., which take some of the strain off white USO clubs. The need for USO service is, therefore, relatively greater.
   b. Nonprofit—*Private* recreation among Negroes has been limited. *Public* recreation is even more lacking. Junior hostesses and volunteers in Negro USO programs have relatively no previous recreational experience. Much greater emphasis upon training programs is, therefore, indicated.

While these problems may seem great, they are not insurmountable. It is to the credit of USO that it is in a position to recognize these military and community conditions for the effect they may have on USO services. The whole field of services to Negroes presents a tremendous challenge to USO. It is heartening to observe the way in which USO has attempted to meet it.

III .... EXPERIMENTS IN DEMOCRACY

★

IN A true democracy differences of race, religion, political opinion are encouraged and respected. Our American creed is based on the premise that all citizens have a right to equal opportunity for participation in the economic, political and social organization of our nation; but what we have done in practice has been too often contrary to what we profess to believe. The war has greatly speeded up the rate of social change and has taught men and nations the values of cooperative effort. It has helped many to see what can be gained by working *together*, instead of in *separate* groups. Indeed the greatest social progress has been made in areas where there has been greatest tension.

The USO Division of the National Board YWCA has been moving step by step in the direction of equality and freedom, and has brought together Negro and white citizens in the following ways:

a. As members of leadership groups—USO councils, Operating Committees, staff conferences, volunteer training courses.
b. Through the use of the same USO buildings and facilities on a segregated or sometimes non-segregated basis.
c. Through USO programs in which both white and Negro constituents participate.

The program developed by the USO Division of the National Board YWCA is focused upon the basic needs of people, and YWCA leaders are concerned not only with the business of providing services and activities, but also with what happens to people in the process.

Changing Community Attitudes

When USO began over four years ago, some communities resisted the idea of USO's plan for services to Negroes. Even talk about establishing Negro clubs was sometimes resented. So often the white clubs got started first, even though large numbers of Negro troops were being sent into all sections of the country. But soon it became clear to most communities that something had to be done for everybody affected by the war; and community leaders came to realize that USO had a responsibility for all.

Sometimes separate facilities were set up for services to Negro and white groups when separate clubs were not necessary. But in many instances the separate club has been a step in the direction of integration because there has been an exchange of professional leadership in staff conferences, and Negro and white volunteers have learned to work together on councils and committees. Even the separate facilities have demonstrated USO's concept of equality. While in some places it has been almost impossible to find centrally located buildings which were suitable for renovation, and those that were available were often in the worst slum areas, USO headquarters and the national offices of the agencies have made every effort to prevent the use of old furniture or worn equipment. In many communities residents were used to having new schools and churches for white people, and old rickety buildings for Negroes, but USO has sent in standard equipment, attractive new furnishings and has designated federal buildings or up-to-date renovations for Negro operations. USO has proved to communities that Negroes can administer these buildings, and has certainly changed the status of Negroes in every community where Negro services have been provided.

It has taken considerable work on the part of regional supervisors and club directors to secure Negro lay leaders. Because community problems have seemed to such leaders to be so insurmountable, there often has been a tendency on their part to withdraw from these problems and become preoccupied with their own business and professional and social life apart from the total community. Many have made an adjustment to the transportation problem by using their own cars, rather than public conveyances. All of these factors have tended to lessen their contact with general community conditions and discriminations. USO staff members have been urging these local leaders to be related to USO, asking them to serve on committees to raise funds, to help to operate USO buildings—thereby achieving some racial collaboration and over-all community planning.

Racial antagonisms and barriers have been heightened through the years. There is among some Negroes as much feeling of prejudice against white people as white people have shown against Negroes. The process of clearing away these clouds of hatred and distrust is slow and often painful, but USO has not retreated!

One of the Negro supervisors has a room in the home of a Negro woman who "simply hates white people." When the Negro supervisor wanted to entertain the white supervisor of the region in her room, most careful interpretation had to be made to her landlady. When the guest arrived, the landlady reluctantly agreed to meet her. The next time the white supervisor visited her home she was more cordial, and with each successive visit she is discovering that people are people and that she and the white supervisor have a lot in common.

When Negro troops were stationed just beyond the borders of an acutely crowded community, USO went in to operate a club. Race tensions grew, community feelings ran high. When the morale of the Negro troops had reached an all-time low, the mayor appointed an Interracial Committee made up of Negro and white civic leaders representing the Council of Social Agencies, Child Welfare Association, YWCA, Negro Civic Club, USO Council, City Community Committee and the Operating Committee of the Negro USO club. The purpose of the committee was "to study problems of concern to both races, to work for better race relations in the community, to study local conditions in order to eradicate sources of possible friction." At the first meeting in the mayor's office, the president of the Chamber of Commerce was present. Better recreational facilities for Negroes were considered and instances of brutality to Negroes on city streetcars were discussed. This was the first time that actual *facts* of this nature had been dealt with by civic leaders. USO staff and volunteers were there to help with further facts and interpretation. White and Negro members of the committee have been working with the churches of the community, as well, on steps to improve conditions. Women's groups in the churches are studying basic problems of Negro-white relations, and various denominational pronouncements have been made to indicate that church leaders are doing some thinking, too. Although the committee was appointed to work only on emergency problems, the mayor expects this to be a permanent committee.

Community Cooperation

When the hordes of Negro war workers in a Pennsylvania community jammed the small USO clubhouse to overflowing, community organizations representing many faiths and nationalities promptly offered to share their recreational facilities with USO. Now the USO club operated by Negro staff is used mainly as a lounge and operational headquarters, while most of the war workers' activities are carried on all over town as cooperative, community enterprises. The dances are supervised by USO staff, planned by war workers and community representatives, and held at the YWCA building or at the Federal Housing Project.

The Operating Committee working with the USO staff assigned by the YWCA to a middlewest USO operation is concerned about needs of the Negro servicemen who have been regularly attending USO clubs in the area. There are rumors that the Negro boys have not felt free to use USO facilities, because of the attitude of many of the white men at the post.

Some of the white soldiers have said, "Let one of those niggers come to the USO, they'll see how quickly they'll get thrown out!"

The women on the committee have agreed that their town has a responsibility for helping servicemen from other sections to see that in their locality the customs pertaining to Negroes are quite different. They feel that their community pattern of providing hospitality to all men in uniform ought to be continued—not changed.

A New Role for Negro Leaders

One of the outstanding achievements of USO in its services to Negroes has been its contribution to the development of an appreciation of the value of community organization among Negroes and the development of Negro leadership. In many smaller communities Negroes have had the benefit of trained professional leadership for the first time.

A white club director has made this comment about her Negro co-worker: "Wherever Miss B went, she was a revelation to the local whites . . . but more startling to me than the change in the white community was the total change in the Negro community. When Miss B, who looks like a *Vogue* fashion plate, went to work, with her home economics training and her flair for organization, things began to happen fast. The Negroes began to paint and refurnish their shabby little homes; yards were cleaned up. They themselves seemed to improve their personal appearance. The knowledge that

Miss B was living in the home of a white person because of the crowded conditions in the town set up a small barrier at first, but finally the Negroes accepted it as an indication that segregation might not be a permanent thing."

Community Planning for the Future

There were two critical problems in a military community in North Carolina—an acute shortage of labor, particularly in domestic service, and a lack of community recreation facilities for adolescents. The USO Operating Committee sponsored a two-day conference on "Negro Women and the War" attended by Negro and white church women, school officials, civic and social leaders, who considered their problems. A panel discussion on "Negro Women as Domestic Workers" brought together, as panel participants, officers' wives as "employers" and Negro women and girls as "employees." They discussed every angle of the problem frankly and constructively and came through with some specific agreements about standards in domestic employment—the "employers" agreeing with the "employees" on wages, hours and conditions of work, and the "employees" agreeing with the "employers" on how to work efficiently and well. As another result of the discussion, the USO staff was asked to assist the community in setting up an employment bureau and training center for girls in household employment.

The conference also did some "long-range" planning for teenage recreation, and discussed with the park commission, school and church leaders how more adequate recreation could be provided.

USO Councils

One of the outstanding achievements of USO in the development of services to Negroes is its representative pattern of organization and administration. Council members have learned that careful planning is directly related to the business of providing adequate services. They are discovering that the degree to which democracy has pervaded USO structure and operating practices locally greatly conditions the attitude and behavior of the Negro constituency and staff alike. USO councils, which are truly representative of all community groups, have been an important factor in aiding many American communities to begin interracial work. Throughout the country Negroes and whites have had an opportunity to work together

—in many instances for the first time—planning and organizing over-all USO services. And in the process of getting this job done, councils have faced, and often overcome, many kinds of interracial difficulties, thus achieving, as a by-product of effective services, improved race relations.*

On occasions when the white leadership of the community was confronted by a "Negro problem," which they were making no headway in solving, white directors have suggested that help might be forthcoming from Negro leaders, and that Negro representation on the council might be useful in avoiding further "problems." Most communities have seen the logic of these suggestions even when they have been reluctant to accept USO's policy. Many white citizens, long accustomed to paternalism, have been amazed that there were able Negro leaders to count on in an emergency. And the Negroes themselves have been able to develop much new leadership with the help of the professional staff made available to them by the USO.

Leadership in the Negro group which is selected by Negroes themselves tends to be drawn from the professional class—ministers, teachers, physicians and dentists. Too frequently, a few are selected and then expected to represent the group in everything, regardless of their qualifications. Once the leaders are selected, they are not apt to be challenged by the rank-and-file. Often the Negro leaders selected by white people are not considered leaders by the Negroes. Sometimes they may be amenable "yes-men" who say what white leaders want them to say in order to have their favor. Negroes are occasionally selected by white people because of their position, e.g., a school principal or minister, without inquiry into their real qualifications for the job, or knowledge of their status with the Negro group. Obviously, Negro leadership must be carefully chosen because of its great influence in determining the direction of USO program. Regional supervisors and executives as well as club directors have a great responsibility to make certain that they are dealing with really representative Negroes.†

In communities in the North, South, East and West Negro council members work with white members in raising War Chest funds, planning for community recreation and health services. By and large, Negro leaders feel that the opportunities offered in council

†*From a report presented at the Regional Staff Conference in Region VII by* William Y. Bell, *December, 1943.*

groups are such that real and permanent gains can be made if they can only continue to work.

The YWCA is now emphasizing more active participation of Negro leaders in council meetings, and is helping staff on location to work closely and constructively with council members so that they may be prepared to speak on matters other than race and relate themselves to the total program. There is considerable evidence that Negro representatives themselves are coming to see the importance of remaining on USO councils, in order to represent the Negro group, even though in the beginning it may mean overlooking indignities and discourtesies, as they move toward the larger goals.

Where Negro representation does not exist, USO regional executives responsible for organizing and working with councils are continuing their efforts to make all USO councils interracial. There is rather general community acceptance of this USO policy even in states with segregation laws.

Compromise—Not Retreat!

In one of the most complicated situations in the country Negro representation on the USO Council was not achieved for many months. The Operating Committee of the Negro club sent regular written reports to each council meeting and extended frequent invitations to white leaders to attend special activities in the Negro club. White staff members and regional supervisors made every effort to keep the Negro leadership in touch with council actions; and through these various understanding approaches to the situation, the USO Council eventually responded with wholehearted decision to invite the Negro representatives to regular council membership.

The chairman of the USO Council in a Rocky Mountain State has devoted a good deal of time to reading material suggested to him by the Negro staff. He used to avoid difficult situations but now he has learned some good techniques for handling them. He went to a neighboring town to see a movie about Negro soldiers because he "felt a USO council chairman should be able to discuss race relations." He is insistent that USO shall "practice democratic principles in the way it solves the problems of serving Negro and white soldiers with equally good facilities."

Times Are Changing!

Three years ago one USO Council threatened to "burn the place

to the ground" if a federal building was designated for services to Negroes in their town. But a lot of things have changed. USO now provides a very effective Negro program in a large federal building there and the USO Council recently invited the Negro director to be a member.

The Council Takes a Firm Stand

Thousands of Negro soldiers were assigned to a training camp, and the USO staff and council in an adjoining community moved at once to meet their needs. They agreed to include the men on an integrated basis in the regular activities and services of the club. Only one Negro family lived in the community and Negro junior and senior hostesses came from a number of nearby towns.

As the wives and families of the Negro men began to arrive at the camp, housing needs were most urgent. The situation was discussed in the area staff conference with the result that a committee was set up to find accommodations for Negroes. The committee sponsored an evening reception attended by some thirty Negro officers and their wives and about the same number of white residents. One of the guests invited a number of the officers to her home to introduce them to her white neighbors and many pleasant acquaintances developed.

In canvassing the local residents for rooms, the Housing Committee asked local landladies if they would be willing to rent rooms to Negro soldiers and their wives. Some refused, but many agreed, and a number of rooms were made available. One couple, who had at first refused USO's request, later called to say "Yes." They had thought over the questions raised by the USO director, and had decided to rent two rooms to Negroes, and to turn over the garage in their backyard for housing. A Negro major arranged for the renovations and repairs which were done by Negro soldiers in their off-duty hours.

The integrated program has been an unusually successful experiment—thanks to skillful staff and volunteer leadership. Recently a few dissenting, conservative elements in the community have attempted to "high pressure" the council into setting up separate services to Negroes. But the USO Council has not been willing to "turn back the clock" and has taken a firm and united stand against this point of view.

Staff Relationships

USO professional workers have helped to demonstrate two basic principles of good race relations: *first*, "that it is feasible and greatly acceptable to establish a program on the premise of equal services to all," and *second*, "that it is possible to create an atmosphere that reflects democratic practice." Negro and white staff have not dramatized this democracy but have gone ahead quietly establishing the principle of equality. Before USO appeared on the scene, the only contact many whites had had with Negroes was with the servant group; and in many communities there was considerable surprise that Negro directors had full responsibility for the administration of clubs, signed checks and received salaries comparable to the white directors.

Some white staff members have helped to bring about better race relationships by their willingness to take the initiative in local communities and make a courageous stand against discrimination and inequality. The Negro staff have contributed much to the experiment by their professional competence, patience and sensitivity to human needs and attitudes. They have given many of their white co-workers a lift over the tight places and tensions by their genuine understanding and buoyant spirits.

A white director in a small western town cites a case in point:

"When it came to establishing a Negro club on the white side of town, diagonally across the street from the largest and wealthiest church, rumblings arose and protests were made to the mayor and city fathers. Fortunately the USO Council stuck to its guns and got the club opened, more or less on trial. Mothers began re-routing their children to school, to avoid D Street. But when none of the anticipated street riots developed, curiosity got the better of everybody, and one by one the neighbors began coming by to see what was going on. Mrs. A was the first Negro professional worker to come to the town. Local residents had been in the habit of seeing Negroes only in janitorial or kitchen roles and it was a pleasure to me to introduce Mrs. A to the ministers, bank presidents and civic groups. Through her leadership the tide of public opposition was turned into genuine cooperation. In the month she spent with us she also pointed out the problems which lay ahead for a professional staff, and some of the limitations of housing and eating.

"For a week before Miss B and the YMCA worker arrived I tried to find living quarters for them. No rooms were available in the Negro community, and finally, in desperation, on Saturday night, I

called on the ministers of the town, asking them to state our need in their churches. Two white people volunteered to house the Negro staff. The YMCA worker was taken in by a rancher in the country, and it was a soldier's wife, recently arrived from Texas and living in an exclusive part of town, who invited Miss B to share her home. At first, eyebrows were raised, but soon she was just another neighbor. Some months later when the troops were shipped out and Miss B was leaving for another USO assignment, the white neighbors said, 'If the men come back and you are able to return, we'll be glad for you to have a room with us.' "

It is the firmly-adhered-to policy of a southern USO staff conference of white and Negro workers to hold all meetings and social gatherings where Negro members are welcome. A few months ago after plans were completed to hold a meeting of the staff conference aboard a Mississippi River Boat, arrangements were changed when it was discovered that the Negro members of the group could not be included.

A United Approach

The USO staff in a New England club has always approached the matter of integrated services for Negroes as a total staff responsibility. They have thrashed out difficulties frankly and worked out staff strategy as a group. Their technique for meeting criticism from servicemen is on an individual basis: when a white soldier complains about having Negroes around, he is guided by one of the staff to an office where he can "blow off." Then the staff member will gently but firmly bring the conversation around to what this war is all about, what it means to be a citizen of the United States. The serviceman is reminded that it is USO policy to provide services to *all* men in uniform, and is asked for his suggestions about an equitable way to achieve this service. The same method has been used with Negro servicemen who gripe for one reason or another—and it has worked!

Sure Cures for That Dull Feeling—in Staff Conference

"The staff conference has great potentialities for training-on-the-job for all professional leaders, but too many meetings involving hours of staff time are poorly planned," reports one of the associate regional supervisors. "Many staffs do not tackle real problems, but waste time with non-essentials and routine clearance of building

schedules. It is difficult to convince the Negro staff that they should continue to attend when they have no real job to do. On the other hand, the Negro staff ought to take more initiative in pointing up the basic problems to be discussed and should be frank in expressing their dissatisfactions."

Negro staff agree, too, that their white co-workers are at times "too protective" of their feelings and that frequently there are not frank enough professional discussions of conflict situations.

Some staff conferences have appointed Program Committees, representing Negro and white members, to plan agenda for staff meetings so that matters of vital professional interest are considered. One staff conference has been studying techniques of community organization—preparing themselves to work more successfully with over-all community groups and to help USO Council and Operating Committees to plan for the postwar period when USO has withdrawn.

In an Oklahoma town where there are Negro and white USO clubs, Negro and white staff discussed how they could work together for improving race relations in the community. They called together a small group of interested citizens—Negro and white—to consider the need for better recreation facilities and leisure-time activities for Negroes. This group voted to ask the mayor for the use of a park. The mayor refused their request, but promised to clear some vacant lots near one of the USO clubs. These did not prove to be satisfactory; but instead of being defeated by the situation the USO worker writes, "I guess our committee will have to work a little harder!"

Fair Exchange—of Leadership!

A white supervisor and a Negro supervisor were visiting a Middle Atlantic community where no facilities—not even the public library—have been open to Negroes. Two junior hostesses were pressing the white supervisor for help with some junior hostess problem. Said the white supervisor, "Mrs. D, our Negro supervisor, is here with me and she's quite an expert on that question. Wouldn't you like to discuss your problems with her?" The girls liked the idea, arranged an appointment and were so skillfully assisted with their difficulties that they invited the Negro supervisor to come back and work with them again.

A Negro director in the Southwest has been teaching in a white housing project. White girls are now coming to the club and have had some interracial activities.

Standard Equipment for All USO Staff—a Sense of Humor!

In USO, Negro and white professional workers do their jobs most effectively when they approach even the grim and complicated problems of race with the lighter touch. Those who have succeeded in bringing about better race relations have learned that there is a difference between obsession and conviction. USO's purposes are served best not by fanaticists but by emotionally mature leaders who take setbacks and suffering all in their stride.

One of the Negro associate supervisors put it this way, "Every time somebody gives you a kick, somebody else comes along and dusts you off!"

Training-for-the-Job

The USO interagency orientation courses, institute workshops and refresher courses help to prepare professional workers to do an effective job in providing services to all groups. All of these training sessions are attended by white and Negro workers and are held in places where all persons may have equal eating and hotel accommodations. USO staff, therefore, have not only the experience of working and studying together, but also of knowing each other as persons, and demonstrating to the communities, in which the training sessions are held, the fact that policy is something to live by!

In each training conference the agenda includes discussion and thoughtful analysis of community tensions and problems related to race, and to the study of ways of work in improving USO's services to Negroes and achieving greater interracial understanding.

Color in the Program

"Back home was nothin' like this!" a Negro soldier was heard to remark to his buddies as they swung into the USO club in a new Federal Recreation Building. Thousands of Negroes have stepped into an amazing new world when they have entered USO clubs. The program with its varied kinds of recreation, informal education and dozens of personal services has taken them into vast, new, unexplored territory. USO leaders, professional and volunteer as well, have the chance of a century to help the young people coming into their clubs to get "the feel" of a creative, democratically planned program, and to gain new experiences that will enrich their lives and broaden their interests for many years to come.

America, too, might have her renaissance in recreation if USO leadership has the skill and imagination to pioneer in new recreational fields.

Program in some clubs has been limited by inadequate facilities, but where staff has been resourceful in securing use of supplementary community facilities, the program has flourished despite lack of space. In general, services to Negroes have the same variety and range as services to white constituency. They include many kinds of social activities—dances, game nights, parties, outdoor events; educational programs—forums, discussions, language classes, reading and writing groups for soldiers of limited formal education; hobbies and interest groups—arts and crafts, music, sports; emphasis on spiritual guidance—vesper services, worship services, hymn sings. USO's multiplicity of personal services has also been appreciated by Negro men and women. In many communities the USO club is the only place where Negroes are permitted to go to read, write letters, meet their friends, wash and freshen up after long journeys, have clean, well-cooked food, find suitable rooms to rent, get help with personal problems.

Program in USO clubs where YWCA staff members are working varies greatly in its interracial emphasis. There are clubs in all parts of the country where services to Negroes are provided in separate facilities with little or no contact between white and Negro constituents; yet some interracial activities are regularly scheduled and quite generally accepted by community leaders in a few clubs in the North, Southwest and on the West Coast. More clubs could be moving ahead on some kinds of integrated program in terms of leadership training, exchange of leadership, occasional joint use of facilities, if professional staff and volunteers were convinced of the importance of such program, and if regional supervisors could guide such experimentation more closely.

Wanted—Community Recreation

Sometimes such experimentation comes about as a natural part of the process of meeting a community need. The club designated for services to Negroes in a small conservative town was located in a renovated store near the center of town, opposite a large and prosperous church. At first, church members protested the location of a Negro club in their neighborhood. The USO Council, however, resisted this pressure and the club stayed open. Later the groups which had protested the loudest came with their visiting relatives

to show them "our club"! The young newsboy who delivered papers to the club told a few of his pals about the place and soon the younger group of teen-agers were using the club on afternoons when the soldiers were not there. Many liked to come in to sit and read, and play ping-pong. The boys enjoyed sports, book reviews, reading and group discussions. The girls were busy with sewing, art activities and simple crafts. When summer came, the club was filled every week day with Negro and white children, ranging in age from the five-year-olds, who wanted to play paper dolls and eat ice cream, to the teen-agers of fourteen and fifteen years.

Because the children continued to come into the club, one of the white ministers in town saw the need for a community center for youth, and asked the USO director to help him organize a Planning Committee to work on such a center. Just as this interest was at its height the soldiers were moved out of the area and the need for USO services to the military was no longer present. Staff was quickly withdrawn and reassigned to other locations and the attractive club house closed. The minister and several community leaders keenly regretted that the staff could not have stayed on for at least two or three weeks to help to get some community-wide recreation plans under way. The club director felt very strongly about USO's responsibility for training community leadership to carry on after the withdrawal of USO, and wished that she could have aided the community at this point. In her present USO assignment she is already working with an interracial community-wide committee that she hopes will take definite responsibility for postwar planning.

Talent—Not Race

Art activities have given USO participants of all faiths and races a thrilling glimpse of a new world. An amazing array of talent has been discovered. Practically every club has its murals painted by artists-in-uniform. Many have craft and hobby rooms filled from morning to night. USO has sponsored art exhibits of the work of white and Negro artists. A white soldier artist teaches sketching and portrait groups in a Negro USO club, helping to break down prejudice of Negroes against whites. A group of Negro and white art students from a well-known eastern art school go each week to a USO club to conduct classes in portrait painting, oils and water colors and sculpture. A New England USO worker reports on a bit of strategy in program planning: "We scheduled the arts and crafts program on the Negro servicemen's program night, bringing

the white men into *their* program, rather than bringing Negro men into what began as a 'white group.' "

Interracial Harmony

Music has brought many groups of Negroes and whites together in all parts of the country. In one club the Negro staff member plays extremely well, and often has mixed groups gathering around the piano to sing, as she plays on in an unplanned casual way. One white staff member, also skilled in music, plays piano duos with Negro or white servicemen. Sometimes the servicemen themselves play together. White soldier musicians go to Negro clubs.

The Intermediate Girl Scouts, sponsored by a USO staff member in the Middle West, expressed an interest in folk music. After a session on Negro spirituals they voted to visit the Negro USO club. The director there arranged for a Negro Girl Scout troop to act as hostesses, and they were so gracious and hospitable that a white girl who had been "afraid to sit in the chairs where Negroes had sat" said afterwards, "Why, of course, they were nice—Negroes are just like other people!"

The USO Negro People's Chorus has been described as "a moving force for interracial understanding." This group of Negro servicemen and war workers, led by the former choir director of the radio program, "Wings over Jordan," has introduced several communities on the West Coast to the cultural contribution of famous Negro artists and has helped them to get better acquainted with their new Negro neighbors as well.

Discussion Groups and Forums

A group of Negro servicemen and junior hostesses in the Northwest have a weekly discussion group on the postwar outlook. A member of the headquarters staff of the USO Division YWCA attended one of the sessions and found those youngsters in their early twenties discussing questions that would stump the experts in any broadcast of "Information Please" or the "Town Hall Meeting of the Air." They knew every angle of the GI Bill of Rights; they were going to write to the President to urge some permanent peacetime extension of the Fair Employment Practices Committee. A group of junior hostesses working as aircraft mechanics in one of the great bomber plants met afterwards in a "rump session" to see what they could do about the attitude of the union at the plant about recognition of the status of Negro members. It had been a

common practice in the union to collect dues and initiation fees and then fail to notify Negro members of meetings and to deprive them of voting privileges for many months of apprenticeship. The girls were bitter about "grievance machinery" in the plant, and felt that it was almost impossible to get "upgraded." If individual workers asked for advancement and upgrading and showed sufficient skill to be given more responsible jobs, they were given wage increases, but relatively few workers had been upgraded. One attractive junior hostess lingered on to talk with the staff member after the group had disbanded. She wanted to know what the YWCA was doing about those conditions. She had heard that spotters were already stationed in the war plants to find reasons for discharging white women and older men, Negroes and Mexicans. While she was glad to know that the YWCA was emphasizing full employment in its regular public affairs program, she was not convinced that "the YWCA could do anything to keep Negroes from being the first to be laid off when V Day came"!

One USO director has organized "Global Gab" discussion groups in two communities in the Southwest which have brought together servicemen and junior hostesses of both races and a great variety of local residents. These groups have discussed all sorts of topics. "For many of the civilian whites the experience of seeing Negroes and whites sit down together to talk about their special and common problems is a genuine soul-stretcher. Negroes are excluded from most organizations and agencies in the community, and 'Global Gabbers' feel that USO gives them the perfect laboratory in which to work to improve race relationships in the town." Negro groups are gradually coming to use the club on other nights, too. They enjoy the lounge, reading room, an excellent library of classical recordings. They also participate in radio programs and attend a monthly Negro dance. A prejudiced white sergeant recently told a USO staff member in that club how much the experience had meant to him. "Thanks," he said, "for exposing me to an educated Negro." A shy Negro private said, "I wish we all could let you know how we feel about this club—we haven't been welcome in most USO's—people let us in, usually, but gee! You folks really want us, and that's something new for us."

Social Activities

A ping-pong tournament was another successful interracial venture in the Southwest. It was planned by the USO staff conference

on a community-wide basis. Each club was instructed to run off preliminaries and to send final club winners as entries in the community-wide tournament. The Negro club assumed that full participation was in order and got club preliminaries under way. When the director of one of the white clubs (where the tournament was to be held) heard that the Negroes were planning to enter he had some misgivings about the use of his building by an interracial group, but the Negro director quickly tried to reassure him and offered the facilities of the Negro club for the match. The white director did not want to lose the group and finally agreed to go on with the original plan. Junior hostesses and Negro servicemen came to the tournament, refreshments were served, the awards were presented and the party was a great success. The names of all entries were listed in the newspapers, and a Negro serviceman was a runner-up in the finals.

Negro sailors attend a USO club on Saturday nights. They bring their girl friends and have a wonderful time dancing and playing games with them. White senior hosts and hostesses are always on hand to greet the Negroes and serve them at the canteen. Though the boys are shy and reserved at first, their eyes speak volumes. Volunteers write letters to the families of all the men who register at the club, and the Negro mothers in the southern states have written most appreciative replies.

Volunteer Training

USO workers are discovering that it is extremely important to train volunteers not only for their immediate jobs in USO clubs but for community service for the future. This emphasis on leadership in the postwar period is especially urgent in Negro groups, where trained leadership has been so sadly needed.

Many USO clubs have organized junior hostess groups with an interracial set-up. Negro and white junior hostesses have been enrolled in the same training courses. In an eastern city the training courses are conducted by Negro and white leaders. Senior hostesses of both races work with the junior hostesses in planning the training sessions. When there are dances and parties at the club, Negro junior and senior hostesses serve, the Negro girls being the dance partners of the Negro men. When Negro servicemen and junior hostesses first attended the dances (dancing with each other as they do at the present time) the white hostesses ignored the Negro volunteers; but several months later, when subcommittees were being

organized, each chairman wanted several of the Negroes on her committee.

When no Negro junior hostesses participated in the junior hostess mass meeting in one New England club, the staff and senior hostesses made certain that the Negro girls were represented on all the Junior Hostess Planning Committees. Result—a large group of Negro junior hostesses have attended the mass meetings and training sessions and have taken a lively part in the discussions.

However, in many clubs where USO is not providing services to Negroes, the USO staff of the National Board YWCA are emphasizing in the training of the white junior hostesses some excellent interpretation of USO's interracial concerns and the National USO policy of "service to all." Thus, even in a segregated program there is opportunity for creating new social insights and greater understanding.

Pioneering for Social Progress

There have been several extremely interesting experiments in interracial program in USO clubs on the West Coast, where there has been a great influx of Negro troops and war workers into communities with few Negro residents and no traditional pattern of segregation to limit experimentation. In one white club the staff has developed an unusually fine relationship with groups of Negro women leaders who have helped them to organize and train groups of girls and younger women as junior hostesses.

It all began in 1942 when members of the local branch of the National Association for the Advancement of Colored People appealed to the USO for program and service for two groups of Negro soldiers stationed near a community which has had restrictions against any Negro residents; and where consequently no Negro civilian volunteer leadership could be found. The white director called a meeting in response to this appeal for services and brought together white and Negro members of the YWCA Board of Directors, local leaders from the NAACP, and representatives of the USO Council. A club of Negro girls who were members of the local YWCA had been declining in membership and seemed to need some new program emphasis "to get out of the slump." This was an excellent nucleus for a junior hostess group, and the YWCA agreed to lend the group to the USO for the duration. One of the Negro women on the Interracial Committee was chosen as the volunteer chairman to work with the junior hostesses. After some junior

hostess training the USO staff and Negro volunteers arranged for them to go to on-camp dances where the Negro troops were stationed, and parties and dances were also held at the YWCA and a nearby college campus. The Negro junior hostesses were also invited to attend a fashion tea with the white junior hostesses and two Negro girls were elected to represent their group on the community-wide Junior Hostess Council.

The Interracial Committee has been helpful, too, in promoting home hospitality plans to entertain the Negro men for the Thanksgiving and Christmas holidays. But perhaps its most important function has been to interpret the need for services to Negroes to the USO Council. At the beginning of the experiment the council had some objection to the program if it meant that the Negroes were to be included in the activities at the white center. But when council members found that the program would be very successfully developed outside the club—in the YWCA or in service clubs at the post—they became more interested in the project. The staff member working with the Negro group had not made an issue of the use of the building, but had gone along quietly helping the girls to do an effective, interesting program and has gradually won USO Council support.

Renovations are now under way for another center and the executive group of the council voted with no dissenting voice to permit Negro members of the armed forces to use the facilities in the building—showers, game room, reading and writing rooms—and have agreed that for special social events an entire floor of the USO club would be available to the Negro groups.

A Negro minister in town is now a member of the USO Council. He is frequently asked to open the meeting with an invocation and seems to be generally accepted as a member of the group.

Meanwhile, the program of the Negro junior hostesses is flourishing. The girls go by bus or truck to rather distant camps and isolated coastal defense areas, helping very successfully with dances, picnics, beach parties, game parties. The group is now well integrated in the whole junior hostess organization and the Negro representatives are well accepted by the white girls. The Negro group has grown from a small group of seventeen to an active club of more than fifty members. The majority work in the air craft factories, but before the war they were, for the most part, in household employment.

Meetings of the junior hostess group usually include some aspect

of training. The training sessions are popular and well attended. The girls love their club and have unusually clever ideas for activities. At the last meeting the training angle was subtly developed in a "Bad Taste Party" for which the girls dressed in what they considered poor taste for a USO dance. A professional dress designer gave a talk on "The Language of Clothes," using the girls as models. This informal approach to training has accomplished many things, and has given the girls invaluable experience in human relationships, social conduct and group leadership.

Services to Returned Veterans

Another new emphasis in program and in the training of volunteers is USO's work with the servicemen who are returning from overseas. Junior and senior hostesses, who are assisting with hospital parties and working with the ambulatory wounded coming into USO clubs, need special preparation for their important responsibilities, and for the interracial experience which such program often involves. In all general hospitals in all parts of the country Negro and white veterans are receiving care and treatment in the same wards; and the hostesses going to the hospitals bring candy, cigarettes, books, games to *all* the men in the wards. When they entertain the wounded in the day rooms of the hospitals they also entertain *all* the patients. Girls of both races have accepted this interracial service as a natural part of their new duties, and never refuse an opportunity to go on hospital parties.

Many more evidences of increased interracial understanding could be recorded here. Through USO program persons of both races have met on the common ground of natural interests and concerns, the divide of color swept aside. They have shared in a creative experience that has been a tremendous force in many lives and have taken many steps in the direction of true democracy.

November 23, 1944

Director, USO Club
24 South 4 Street
Harrisburg, Pa.

May I express my sincere approval of your policy of permitting Negroes at your dances? It is a policy that symbolizes in the most concrete form what we are fighting for.

Undoubtedly you have received some thoughtless complaints — even from servicemen. But your courage in this democratic step to help overcome racial prejudice will do much to convince people that only ignorance justifies Jim Crowism.

Keep up the good work. Yours is one of the finest USO clubs I've run into.

Sincerely,

M. Zepris, SK 2/C

P.S. I am white!

The serviceman likes to bring his family and friends to the USO. He knows that a warm welcome awaits them there.

The place to find friendliness, hospitality and an atmosphere of home.

The Navy navigates a straight course to the nearest club for repairs.

No color lines in the front lines and no segregation in the hospitals for our war wounded! These veterans are among the thousands of ambulatory patients coming to USO clubs.

After several days of hard traveling, the man in uniform looks to USO for a shower, a shave, refreshments and clean comfortable sleeping quarters.

Turkey for two! Get-it-yourself dinners are much appreciated "home-away-from-home" services for men in uniform and their wives.

Before the war there were few vocational opportunities for Negro white-collar workers. Now thousands hold responsible jobs in war plants and government offices.

Racial barriers break down on the swing shift. Women of both races have taken their places on the assembly line in jobs requiring skill, speed and dexterity.

Along with welding airplanes these girls weld friendship between two races. When the whistle ends their day they'll head for a USO club to get needed recreation and a welcome cup of coffee.

Nursing is another field for Negro women that has widened with the war effort. In dozens of professions Negroes are using their abilities for the first time.

Recognition for the new volunteer leaders who are serving USO. A senior hostess proudly receives her award after completing the training course.

Serving girls and boys in uniform makes the whole world kin—when the busy snack bar is run by volunteers and the guests are hungry for something with a real home flavor.

Keeping the cookie jars filled for hungry guests gives volunteer housewives an unusual opportunity for friendly cooperation and exchange of kitchen lore.

One of the many servicemen's wives who avail themselves of USO hospitality has the agreeable task of pinning tags on convalescent soldiers at a formal dinner dance.

In addition to working together, community volunteers and USO staff enjoy occasional gatherings to honor visiting celebrities. Langston Hughes, famous poet, is the honor guest at this party.

Negro and white community leaders have responsibility for the successful operation of USO clubs. The Operating Committee plans the opening of a new WAC Center.

Soldiers serve on planning committees and program councils to work out their own ideas for education and entertainment. They corral soldier talent for skits and specialty numbers at parties.

USO volunteers take a look at their community, study its present wartime needs and make plans for the future.

Almost as much fun as the party is the get-together of USO junior hostesses to write invitations and plan decorations for gala social events.

Teen-agers drop in for after-school activities during week days when servicemen are on duty. USO has helped many communities to plan much-needed recreation for youth.

Global Gabbers do some clear thinking and plain speaking on problems of the postwar world. Servicemen and civilians regularly meet in discussion groups in USO.

Promoted by attractive junior hostesses, sports, games and outdoor activities are as popular as dancing.

Buddies in war, these sailors are buddies at play, too. Heave ho for the finger painting!

New creative leisure-time activities are being discovered at the USO—not for the duration, but for life.

This wives' club is making a quilt for a day nursery. Services like this win admiration from townspeople, who are sometimes unfriendly when the wives first arrive.

USO worker in a war production area keeps two eyes on the youngsters while mothers attend Red Cross First Aid class.

The line forms on the right for a turn at the loom. Rugs make lovely gifts for mothers and sweethearts and future homes.

Singing America—a student, war worker's wife, farmer's wife and ordnance worker join the chorus.

Time out for fun and relaxation—if jitterbugging can be called relaxation.

To sing or not to sing is never any question. Junior hostesses, servicemen and servicewomen all like to gather around the piano for some close harmony.

Wac special service officers plan with USO staff for Brotherhood Week observance. A luncheon meeting and vesper services will bring together civilians and women in uniform of different races and religions.

Friendships among men and races have flourished on the fighting front—and auld acquaintance is ne'er forgot in USO.

IV. . . . . "USO HAS A POLICY"

★

OF NECESSITY the program described in Chapter III has been experimental—with successes and failures to mark its rapid evolvement. But it has moved in the general direction of USO's initial commitment to serve all persons affected by the war effort, irrespective of religious or racial differences.

The following statements of policy and procedure concerning the USO's services to Negroes have been excerpted from the manual *USO General Operating Practice*, USO Field Service Bulletins and other directives approved by the USO Board of Directors, and document USO headquarters and interagency agreements. Paralleling each statement of USO policy is a summary of the interracial policies of the National Board YWCA for its work as a member agency of the USO.

*USO Services to Negroes**

"The services and facilities of all USO clubs and units of work are open to all involved in the war effort as extensively as resources permit.

"USO policies and practices are so planned that in accordance with the basic premises of USO, increased understanding and tolerance between different groups in American life will result. The problems in providing adequate services for Negroes are given due consideration at all times.

"It is the policy of the USO through its local units, field workers, councils and committees, to give all possible aid toward providing services for Negro troops and war workers, particularly where local welfare and recreational resources are limited. The morale of the

---

**From* USO General Operating Practice, *pp. 46-47, USO National Headquarters.*

Negro troops and war workers in our national effort is most important.

"In some communities separate facilities are necessary." (Sometimes this is required by law, either as separately operated clubs or as extensions from white clubs—see *USO Field Service Bulletin* ‡32, "Extension Service from Established Clubs," April 15, 1943. However, when separate facilities are used, USO has been successful in its efforts to make the Negro facilities meet general USO standards in attractiveness, equipment and furnishings.)

"In other communities adequate services may be provided in the same facilities. Local community attitudes, state and local laws and army regulations are taken into account." (In a few communities program is conducted by an interracial staff, with a wide variation in the degree of integration in program activities. Great care in selection of staff is essential in this type of operation. See *U.S.O. Field Service Bulletin* ‡24, "Statement of Policy Regarding USO Services to Negroes," September 17, 1942, and page 20 of this pamphlet.) "Wherever the camp (or war plant) may be located, the USO endeavors to help the entire community, regardless of race.

"Close cooperation with chaplains, special service officers of the Army and Navy, and other camp officials, and with national and local Community Chest organizations is maintained in order to provide the best possible service to Negro troops and war workers.

"In addition to the usual program, USO may be called upon to furnish added services and facilities which are not otherwise available to Negro troops."

As a further emphasis upon the democratic structure of the USO, the following principles and procedures were officially approved by the USO Board of Directors, September 10, 1942, and incorporated in *USO Field Service Bulletin* ‡24:

"It is agreed that:

"1. USO field workers and USO councils will give all possible consideration to providing USO services for Negro troops and war workers, particularly where local resources are limited, even though the number of persons involved in a particular community may be somewhat smaller than ordinarily considered necessary for a Unit.

"2. USO staff conferences and training institutes will be conducted on a basis which recognizes that Negro and white workers of the USO, or any of its member agencies, are working in a professional relationship and should be able to participate accordingly.

(a) The problems of race relationships and the problems

involved in providing adequate services for Negroes should be given due consideration along with all other problems in the programs of training conferences.

(b) Planning for institutes and conferences should be based on local and national consultation, and should include Negro representation in the planning. It is desirable that the Negro Service Committee be consulted in the selection of Negro speakers for national regional meetings.

"3. The central importance of well-selected and qualified personnel is recognized and a continued emphasis on careful selection and training is urged.

"4. Close cooperation with chaplains, special service officers and other camp officials, and with national and local community church organizations should be emphasized."

USO Councils

"The USO council should be representative of the community. Both agency leaders and other able community leaders should be members. . . . Representatives from each USO Management, Operating or Advisory Committee and the director of each USO operation should be included. . . ." *Field Service Bulletin* #25, October 15, 1942.

The USO regional staff members in their interagency relationships are making special efforts to interpret to local communities the importance of interracial representation in developing an effective local program.

The USO Division of National Board YWCA has placed special emphasis upon Negro representation on USO councils, and is working toward fuller participation of representatives in council meetings and other policy-making groups.

USO Operating Committees

The USO Division of the National Board YWCA has established equal administrative responsibilities for each operation which it directs in a community, regardless of white or Negro constituency. In a single instance where local conditions prevented the Operating Committee of the Negro unit from having full responsibility and direct relationships to the USO Council, the USO Division of the National Board YWCA withdrew its staff and discontinued its services to the community.

USO Staff Conferences

". . . The staff conference is comprised of employed professional personnel of each of the USO agencies operating in the community or camp area. Membership need not consist of the total personnel of all of the agencies. In some situations each agency [where it operates more than one club or unit in the community] may wish to designate one of its workers to serve regularly as its representative on the staff conference. . . .

"In most cases Negro staff participate, sometimes being elected, even in southern communities, as conveners and secretaries. There is, however, a wide variation in the degree of participation, often for reasons other than race."—From *USO Field Service Bulletin* #22, "USO Staff Conference," May 26, 1942.

Arrangements for Meetings

STATEMENT OF USO PRINCIPLES AND OBJECTIVES

"The primary purpose of USO is to provide appropriate services to members of the armed forces, war workers and associated civilians without consideration of race, color or creed. Through its administrative structure and staff personnel, USO can demonstrate to itself, to its constituency and to the communities in which it operates the effectiveness of people of different races, faiths and agencies working together in the interest of common objectives.

"Therefore, every effort should be made to apply the following principles:

"A. Respect and tolerance for human personality should be expressed by providing the same opportunities and facilities for USO staff workers—housing, eating and facilities of meeting places.

"B. Democratic principles should be followed in maintaining effective staff relationships and, as far as possible, volunteer relationships.

SUGGESTED PROCEDURES

"A. Housing, meeting and eating arrangements.

Arrangements for the category of meetings referred to in this statement probably do not require overnight housing. However, elevator service, eating and other physical comforts are important. Thus accommodations should be secured that provide common or equal facilities for all workers.

"1. Planning Committees should explore all possibilities

before selecting a particular meeting place. They should select that community as the place of meeting that will most nearly provide the conditions described above.

"2. Planning Committees should consider the possible availability and use of colleges, private institutions, etc., as well as hotels for USO meetings.

"B. Negotiations

"1. Both white and Negro representatives should be included as members of the Arrangements Committee.

"2. Where problems or difficulties are anticipated, the cooperation of USO council chairmen and other influential leaders in the community as well as regional executives and regional supervisors should be sought in advance of the point of direct negotiation.

"3. In the approach to institutions, organizations, etc., it is important to make specific clearance of the following: dates, prices, facilities (required and available), nature of conference and membership of conference."
—Directive from USO National Headquarters, August 8, 1944.

Personnel Policies

The USO National Headquarters Interagency Personnel Committee sets salary ranges for the various categories of workers. These are based on the type of responsibility, qualifications of worker and make no differentiation as to race.

The USO Division of the National Board YWCA pays all staff in the various categories of work—directors, assistant directors, staff assistants—on the basis of the responsibilities they assume, irrespective of race.

The USO Division of the National Board YWCA has also defined the following staff relationships and responsibilities:

1. Each USO staff member shall be equally responsible to the National Board YWCA.
2. The professional skills of Negro and white staff shall be interchangeable with, or made available to, both Negro and white constituency.
3. All USO staff consultation, meetings and relationships in YWCA-operated units shall be set up and conducted irrespective of race.

4. Each USO staff member employed by the USO Division of the National Board YWCA shall be committed personally to interracial cooperation and prepared in her own attitude and actions to follow the interracial policies of the YWCA.
5. On each regional staff there shall be a Negro associate supervisor whose duties include responsibility for interracial matters.
6. All associate supervisors shall participate freely as members of their respective USO regional staff, contributing to the effectiveness of the total program within the region.
7. On the headquarters staff of the National Board YWCA a Negro staff member shall serve part time as consultant to the USO Division on interracial affairs, and also part time as a member of the training staff.
8. All methods of procedure for dealing with questions of race relationships should be arrived at through full and free discussion and joint decision by representatives of both Negro and white groups.

Training

All interagency training projects are interracial and follow policies of arrangements for USO meetings described above. In all orientation courses and most institute workshops a special period is given to clarifying the responsibility of USO professional workers in the area of race relations, including techniques for dealing with interracial situations. Leadership of all interagency training projects is interracial.

YWCA sessions of USO training reinforce the interagency approach and emphasize the YWCA's special concern, commitments and experience in the area of race relations, in an effort to help staff meet in the most constructive way possible situations arising in USO.

Professional Courtesy

The USO Division of the National Board YWCA has accepted as its universal practice—irrespective of race or regional custom—equal professional courtesy for all staff and the same use of staff titles and names upon all occasions and in all news releases.

In accord with correct English usage, it is also the long-accepted practice of the Young Women's Christian Association to use the word "Negro" in capitalized form, just as Indian, Jew, American are capitalized in all written material—letters, reports, releases for the press, magazine articles, program materials.

Opportunities for Experimentation in Interracial Services and Program

Whenever possible the USO Division of the National Board YWCA together with other USO agencies is experimenting with interracial program and is alert to opportunities to demonstrate the interracial use of facilities and services.

Position of the Young Women's Christian Association on Race

The interracial procedures which have been so clearly defined by the USO Division of the National Board YWCA have grown out of the long experience of the Young Women's Christian Association in matters of race relations.*

"From the beginning, the women who started the organization desired that all girls and young women might share in the abundant life. In seeking to make this possible they became aware of the minority racial groups in the nation's population who, either by law or custom, occupy a less favored position. As the years have passed, the women who have been responsible for the growth and development of the YWCA have tried, both within and without the organization, to eradicate the shadow across our democracy cast by the inferior treatment of minority racial groups. From the time the present national movement was formed in 1906, when Grace Dodge, the first president, called a conference in Asheville, North Carolina, to consider the needs of Negro women, no year has passed without study and consideration of ways to improve the condition under which racial minorities live. The steps agreed upon in any year have been hewn out of current facts and the wisdom available at that moment. These steps have taken the YWCA, sometimes slowly but always surely, in the direction of a truer realization of democracy.

"Throughout the records of the YWCA is abundant evidence of the Association's philosophy of equality of peoples regardless of

---

**Traditional Position of the Young Women's Christian Association.*

race. The national conventions of the Young Women's Christian Associations of the United States of America have taken, through the years, official actions on the problems of racial minorities. These actions, as contained in the public affairs program over the past ten years, are summarized here as indicative of the way in which the Association has sought to put this philosophy into practice in the broader realm of social action as well as in its own membership and constituency:

1932—Action directed toward fostering right public opinion for effective dealing with lynching and all forms of mob violence; study and support of measures for enlarged economic opportunities for Negroes.

1934—Support of the federal government in policies of interracial cooperation rather than separation; support of efforts to assure equitable economic opportunities and protection of basic civil rights for all, as well as support of state and federal legislation which would serve as a deterrent to the crime of lynching; support of government policies to make possible adequate health and educational opportunities for Indian youth and to help build normal life and a share in the larger community of state and nation.

1936—Same as 1934.

1938—A restatement of the 1936 program, augmenting it to include support of other agencies as well as the federal government in working to establish policies and practices of interracial cooperation, and to enunciate the principle of initiation as well as support of efforts to assure equitable economic opportunities.

1940—Reaffirmation of the 1938 goals for Negroes and Indians, and including thought of Mexicans and Orientals, with a new statement on 'law and order in a free society' directed toward equal enforcement of law as it applies to all groups in the population. In 1940 the convention also requested a study of interracial practices in community YWCA's. This project was authorized by the National Board YWCA, and members of the 'Commission on Interracial Practices' were appointed by the president after she had solicited nominations from many volunteers and staff.

"On January 7, 1942, the statement which the Public Affairs Committee made after Pearl Harbor was passed by the National Board; it included the recognition of all people, of whatever racial background, as having not only equality of status before the law but being entitled to equality of treatment in the life of the nation."

On March 3, 1943, the National Board adopted the following statement on Negro-white relationships.

STATEMENT ON NEGRO-WHITE RELATIONSHIPS

"As the National Board of the Young Women's Christian Association entered into the tasks of 1943, we reaffirmed our belief in and respect for the dignity and worth of human personality; we said that 'across all boundaries of class and faith, race and nationality, the Young Women's Christian Association seeks to act as a vitalizing, steadying influence.'

"In the months following this affirmation, there has been clear evidence that the vitalizing and steadying influence of the Young Women's Christian Association is urgently needed in working for the elimination of the heavy injustices experienced by the Negro people. A world-wide struggle for freedom is meaningless and the sacrifice of life in the war will be of little avail, unless democracy is made real for all people.

"The times demand that we make an honest examination of all interracial practices within the Association. Are they Christian and democratic?

"The times demand that we move courageously to correct the practices in our own organization which do not meet such tests.

"The times demand that we adventure in new ways of integrating Negroes into all phases of Association and community life.

"We believe that along this path will be found new vitality for the Association. Standing firmly upon our faith in God and on commitment to the way of life exemplified by Jesus we must all be willing to pay the price for this program.

"To this program we dedicate ourselves, pledging mutual helpfulness to each other as we move step by step toward making it real in the Young Women's Christian Association. In the life of our nation we can be a cross-section group in which there will be no racial discrimination, no crippling prejudices. As we strive to achieve this in our organization, we shall be an effective witness to democracy in our communities."

A report of the findings and recommendations of the Commission on Interracial Practices was made to the National Board YWCA on January 5, 1944, upon completion of the study.

It was voted "that the National Board receive with appreciation the report of the Commission to Study Interracial Practices in Community YWCA's and make provision for necessary study by the National Board and local Associations in preparation for its transmission to the next national convention."

Following this action the president of the National Board sent a letter to every YWCA urging the appointment of special local committees to plan for local experimentation, study and discussion of the material, and for reporting their favorable or adverse reactions to the recommendations of the commission.

There has been a great and varied response to the study from local YWCA's and regional groups and the report of the commission will be an important item of business at the National Convention of the Young Women's Christian Associations of the USA which will be convened whenever wartime travel restrictions are no longer necessary.

"These steps toward interracial understanding and the hundreds of others, which they symbolize, have been taken as integral to the Christian purpose of the Association. Today the high goals which have been voted by the last two conventions as the major emphases of the YWCA's of the United States—the Christian faith, democracy and building a world community—with the deep implications these ideals have for the equality of peoples, give tremendous impetus toward a new era in race relationships."*

**Traditional Position of the Young Women's Christian Association on Race.*

V. . . . . GENERAL SUGGESTIONS FOR IMPROVING RACE RELATIONS

★

ALL of us can do a great deal to help or hinder the process of breaking down barriers. The following principles of program planning and suggested ways of work have been tested and found "workable" by staff and volunteers in USO clubs in all parts of the country.

A. Principles for Constructive Program Development

1. **Know what you are trying to accomplish. Keep your goal clearly in mind and see to it that all steps taken keep your direction toward that goal. Characteristic USO procedure is to go ahead quietly, *not* saying, "Here are Negroes who are just as good as you," but from the beginning, taking a matter-of-fact attitude of equality, providing equal facilities and services.**

   Example: A town in Arizona found itself with a camp of 30,000 Negro soldiers only twelve miles away. This was "emergency" with a vengeance. Signs were up in all the restaurants: "No Negroes served." Facilities had been designated for a USO club for whites, but no plans had been made for Negroes. The USO staff persuaded the city fathers that 30,000 men on leave could not be legislated out of town, and that 30,000

men of any color, loose on the streets, constituted a threat to property. They pointed out that the men would not be drinking so much if they had some place to go. Such a proposal made sense to the community, and space was immediately found for another club. The Negroes now have a fine building, a flourishing program in which the whole community takes pride! But the staff could never have "sold the idea" of services to Negroes on the basis of Christian equality.

2. **Do not raise racial issues for the sake of raising issues; proceed when to do so is in line with common sense and possible next steps.**

Example: When a group of Negro servicemen arrived unexpectedly in a southern city where the USO Council had no plans for services to Negroes, the Operating Committee voted to make club facilities available to all in the armed forces regardless of race, until council plans could be made for the Negro group. Negro churches and the Negro Women's Club were asked to cooperate with the USO in getting services under way, and the YWCA gym and clubrooms were made available for interim activities. The Negro Women's Club held a very successful reception and dance for the group at the YWCA; the USO provided refreshments and served in an advisory capacity.

3. **Get the most forward-looking support your community affords for undergirding and making possible progress toward the goal.**

Example: We have sometimes failed in USO to go along with the advanced social thinking that is present in the local community. In a New England town, for example, where Negro and white teachers taught side by side, where Negroes served on the YWCA Board and participated in all YWCA activities, where the "Teen-age Hang-out" was completely interracial, including dancing, the only service USO was providing to Negroes was non-descript, dirty, substandard sleeping quarters. The white director had not welcomed the Negro men to the club nor provided a place for Negro junior hostesses. A few hostesses had been meeting in homes and making plans to serve the nearby camp.

The regional supervisors discussed the situation with staff, key volunteers and Negro and white community lead-

ers, and together they finally worked out progressive steps to get Negro constituency into the building. Now the Negro junior hostesses serve on the Women's Committee. While separate dances are held at the club, other program has gradually become interracial. Negro and white boys use the same dormitory, enjoy the lounge and game room, eat at the snack bar, etc. Negro volunteers serve with white volunteers at the information desk and help each day with informal games and "drop-in" activities.

4. **Include in your planning group, representatives of all groups affected by the plans in question (i.e., industrial girls in programs for industrial girls; soldiers in plans for soldiers; Negroes in plans affecting Negroes, etc.). Get first-hand testimony on why the issue is important to those who are affected by it.**

   Example: One of our great resort towns is now a large hospital center for the Army. The wounded of both racial groups are being cared for in these hospitals, and the ambulatory patients—Negroes and white—are coming in large numbers into USO clubs in the area. These clubs had previously served only white troops, and the staff were in some doubt as to the reaction of the volunteers. They discussed the situation with them with complete candor. "According to government policy, these patients are being treated in our hospitals—being cared for in the same wards. According to USO policy, we are to serve all." The volunteers and leaders in the community accepted this interpretation without question and have made the men of both groups feel very much at home.

5. **Be sure to promote good relations between Negro and white staff members.**

   Example: From visitation report of a Negro supervisor: "Our white USO director, in her characteristically gracious manner, prepared dinner for our Negro USO director and me at the white director's home. Both white staff members are extremely cooperative. This way of work is offering the community a quiet demonstration of interracial relations on a plane heretofore unknown."

6. **Delegate responsibilities so that it is a community group, not an individual, which is trying to move forward.**

Example: The Interracial Committee, which USO staff helped to organize in an acutely crowded war production community, sponsored a community forum on the "Place of Religion in a War-Torn World." The meeting was led by a Negro dean of men from a nearby university and brought together an equal number of white and Negro citizens—men and women war workers, members of the school board, teachers, ministers, college students, the director of the War Housing Center and the superintendent and personnel directors of the war plant.

7. **Get reliable facts. Avoid loose generalizations which are expressions of personal fears. Use the particular to throw light on the general.**

Example: When a petition was being circulated with the purpose of evicting Negroes from an Ordnance Housing Project, the USO director described USO's method of meeting the situation: "We talked with several of the Ordnance City Council (three of whom are on our USO Council) to get further facts and to find out how the men felt about the petition; we discussed it with our church representatives who planned to allay any violent reaction in their congregations. We were asked the next week to sit in on the City Council meeting when the petition was formally presented. The council did not in any way agree with the petition but, as requested, sent it on to the commanding officer of the ordnance depot. He, in turn, wrote a magnificent letter to each signer, pointing out the equalities and freedoms for which we are now fighting, as well as the privileges to which all United States citizens are entitled.

"But there is still considerable unrest among a few residents there and this is what we have done about it: We have done our best to bolster up the people who believe in fair treatment—with facts and educational literature so that they may more thoroughly and properly *interpret* the situation to their friends and neighbors. We believe that the roundabout process of getting to the core of the problem and letting the workers themselves do the talking in a casual way was a wiser step than to encourage an open argument. We are keeping our fingers on the pulse of this situation and shall continue to work through our interpreters."

8. **Evaluate possible alternatives. Often a listing of alternatives**

to a proposed line of action will reveal that a positive approach is less dangerous than a negative approach.

Example: How a step-by-step advance was made: Because of the race riots occurring across the country, a Wives' Luncheon Group in the Southwest had scheduled a discussion of "Racial Understanding" in a current events program. When it was suggested by the white USO worker that the Negro USO director be invited to participate, along with several Negro soldiers' wives, some of the girls felt it would be unwise. So the *first* discussion scheduled was "for white only." But such a lively discussion ensued that the girls decided to invite the Negro wives to the next luncheon. They also voted that letters be written to their Congressmen urging immediate passage of the Pepper Anti-Poll Tax Bill and bills appropriating funds for Negro education. Before the joint discussion, there was a meeting of a smaller group at a Negro USO where the discussion was reviewed and the purpose of the joint meeting fully explained. The chairman suggested that one of the Negro girls prepare a talk to help the group see what phases of the problem Negroes consider of major importance. White girls from North Carolina, South Carolina, Georgia, Alabama, Florida and Texas attended the joint meeting and signed, at the end of the discussion, the letters to Congressmen. The very first signer was a girl who had lived in Georgia all her life. Girls from eighteen other states also signed. Some of them explained how their ideas had changed as they had traveled around the country. All seemed to feel the discussion had "clarified their mixed emotions," and had been a really worthwhile experience.

9. **Gear the seed of your progress to the readiness of your group to move forward. Be ready to compromise on speed but not on direction. (Do not step in front of a locomotive—but have the courage to step in front of a tricycle if that is needed.)**

Example: One of the Negro supervisors attending a USO institute was refused the use of the passenger elevator at a hotel where institute sessions were being held on the sixth floor. Rather than accept the use of the freight elevator, she sent for the president of USO who was attending the institute. The president conferred with the hotel manager, who agreed to her riding on the passenger elevator if the president would accompany her. The president met these

terms, but so absurd did this procedure eventually seem to be that the hotel management moved all the meetings to the mezzanine so that it would be avoided. Compromise? Yes, but education, too!

10. **Be more concerned about accomplishment than about *publicity* for what you accomplish. In controversial areas it is sometimes better to forego publicity where there is the likelihood that opposition to your program might result from too general publicizing of your procedure.**

Example: A narrative report from a town in which there are five USO clubs tells of the intelligent manner in which the staff conference handled publicity in relation to an interracial Award Tea for all senior hostesses, both Negro and white. Publicity was withheld for the *first* tea. During the preliminary planning for the event, USO directors quietly proceeded to do an excellent job of interpretation with volunteer leaders in both groups. Thus when the senior hostesses gathered for the party, there were outstanding women, both Negro and white, who made it their business to see that the affair was taken matter-of-factly and that there were no awkward moments. For the *second* Award Tea, a story was given to the newspapers, care being taken to quote *both* white and Negro women leaders in the community. Many USO leaders have learned to avoid labels which arouse fears. They announce a dinner for Negro and white staff not as "an interracial venture" but rather as "a USO dinner."

11. **Break your problems down into manageable units and work with imagination and perseverance *until you discover a next step* which can be taken in the direction of the goal.**

Example: L———— is an ultra-conservative eastern community founded in Colonial days. The oldest residents recall with some nostalgia the good old days when the whipping post adjusted a lot of problems and the leaders have steadily resisted "new-fangled notions" about community planning, recreation and welfare. War workers and troops have come to town—among them some 700 or 800 Negroes. While this group would not ordinarily be considered an overload large enough for designation of extension services, prejudice against Negroes was such that some plan had to be considered. After months of careful interpretation and count-

less meetings and conferences, the town fathers eventually got the point that USO was there to serve all groups. But no one was willing to act upon this insight. One complication after another arose in the process of securing a building which would be fairly accessible. The segregated Negro schools were far from the center of town and transportation. One building owned by the city was "sold" in a very mysterious manner while USO was negotiating for its use.

A decentralized program was finally developed by volunteers and a staff aide and has been conducted in private homes of Negro citizens, schools and in make-shift rooms above some stores. The one bright spot has been in the way that leaders in the Negro community have emerged. Through USO they have been able, for the first time, to get their needs before the white citizens, and to have some status and recognition. The Negro group pressed USO Council for a center and the council sponsored a house-to-house canvass of the Negro population to determine the number of inmigrants among the war workers to be served. Two of the Negro women volunteers organized and conducted the survey and found that the number of newcomers was too small to justify the proposal of extension services—except for the decentralized program already in operation. But the Negro leaders are still undaunted—four Negro citizens, a business man, minister, dentist and undertaker, have bought a piece of property in the Negro community in which they plan to organize a community center after the war. Another group of citizens with the blessing of the USO Council are working to set up a community-wide Interracial Committee, which they hope will be sanctioned by the mayor. If this can be accomplished they believe that there is hope of holding some of the gains USO has helped them to accomplish.

12. **Remember that no technique, however good, can avoid all conflict. We must have the courage to proceed *through conflict* when the possible gains outweigh the possible losses.**

"Christian history shows that to deal constructively with controversy means growth and increase of spiritual insight and power, and that to dodge controversy means paralysis and stagnation."

Example: In an eastern community which is in many ways more violent in its anti-Negro feelings than any southern town,

USO has helped to bring some social insight to a group of ministers, and can take a bow for several small evidences of social progress. After months of community resentment against the Negro war workers and troops and deep discouragement on the part of the staff, the chairman of the Ministerial Association (inspired by the suggestions of the USO white director) invited one of the Negro ministers to attend a regular monthly meeting. It was the first time many Association members had ever met any of their Negro colleagues.

Following this initial step the Ministerial Association has become an interracial group, representing all white and Negro clergymen. The Ministerial chairman is planning to use a lecture fund set aside in his church for speakers' fees at the annual open meeting of the congregation to bring in speakers on the subject of "Interracial Understanding"—an anthropologist, a sociologist and a clergyman. Negro and white citizens will be invited to the meeting. One of the Episcopal rectors recently preached a sermon on "Our Community Responsibility to Minority Groups"—the first time such a topic had been mentioned from that pulpit! Through the efforts of USO and the Ministerial Association, a community-wide Interracial Committee is about to be organized.

B. Ways of Work for Staff and Volunteers

Belief in the dignity of human personality is another fundamental principle of work—expressed in social attitudes and philosophy, but also implied in these matters of courtesy and good manners which are an essential part of human relationships.

When working with interracial groups:

1. Encourage full and frank discussion in all staff groups of the pro's and con's of situations. When white workers are "protective" of the feelings of Negro co-workers, Negro staff feel frustrated. If much-needed changes in race relations are to be

achieved, all situations must be squarely and objectively faced and frankly considered.

2. Never, under any circumstances, plan facilities, programs, or select leadership personnel for Negroes without the counseling assistance and active cooperation of Negroes themselves.

3. Avoid calling professional meetings from which Negroes who have a professional relationship to them are barred.

4. Do not arrange professional meetings which Negroes are expected to attend in places where it will be embarrassing to them to be denied the use of main entrances to the meeting place, elevators, wash rooms, etc.

5. Avoid luncheons and dinner meetings in connection with conferences where special table arrangements must be made for Negroes, or to which Negroes are not admitted on the same basis as everybody else.

6. Never address Negroes—professional workers or members of lay committees or community groups—by their first names in public, or in private, unless your acquaintance and relationships with them have become so cordial and friendly that they naturally and without embarrassment to you or them will call you by your first name.

7. Negroes are more formal in their approach to strangers, and find it most embarrassing to be introduced to an audience or to strangers, white or Negro, as "Tom Jones," or "Mary Williams." When all introductions are made the titles "Mr.," "Mrs." and "Miss" should be used.

8. Never tell "darky" and "black mammy" stories.

9. It is rarely ever fitting or in good taste when speaking to a Negro group to refer to those assembled as "you people." It is always more acceptable to Negroes to say "we Americans."

10. Read Negro newspapers, magazines and journals regularly to keep in close touch with Negro thought and opinion. Leaders cannot understand and "know" Negroes unless they are well acquainted with such publications as the *Atlanta Daily World, Pittsburgh Courier, Chicago Defender, Afro-American, Norfolk Journal and Guide, The Negro Digest* (*monthly*), *The Journal of*

Negro Education (published by Howard University). Turn to Bibliography, page 77, for other publications.

11. Remember that the majority of thinking Southerners are essentially liberal.

12. Learn what liberal groups have been able to accomplish in interracial relations in the South in general, in your own community in particular. There are individuals or agencies in every community to help you with your problems.

    Consult these resources in interracial affairs:

    Progressive persons in the community including a representative range of Negro opinion.

    The local YWCA.

    National Board of the YWCA, 600 Lexington Avenue, New York, N. Y.

    *Department of Christian Social Relations, 150 Fifth Avenue, New York, N. Y.

    Department of Race Relations, Federal Council of Churches of Christ of America, 297 Fourth Avenue, New York, N. Y.

    *The Interracial Commission, 710 Standard Building, Atlanta, Georgia.

    *The National Student Council of the YWCA, Southern Region Office, 1812 E. Grace Street, Richmond, Virginia.

    *National Association for the Advancement of Colored People, 69 Fifth Avenue, New York, N. Y.

    *The National Urban League, 1133 Broadway, New York, N. Y.

    *The American Council of Race Relations, Chicago, Illinois.

    Bureau for Intercultural Education, 221 West 57th Street, New York, N. Y.

    Harmon Foundation, 140 Nassau Street, New York, N. Y.

    *Southern Regional Council, 63 Auburn Avenue, N.E., Atlanta, Georgia.

**Write to these organizations for names of persons in your community who are forward looking in their attitudes about race relations.*

C. Some Legal Aspects of Race Relations

It is extremely important for all USO leaders—Negro and white—to have information about their basic civil rights. In traveling and going into new communities all staff should know the legal provisions for interstate travel and hotel accommodations and laws affecting use of public conveyances. Staff may be able to take a positive stand against Jim Crowism if they know the laws that protect them.

1. States Having Civil Rights Statutes

   These statutes vary in wording and effectiveness, but in general, these are states in which the rights of all people to use public or semi-public facilities are protected.

California	Maine	Ohio
Colorado	Massachusetts	Pennsylvania
Connecticut	Michigan	Rhode Island
Illinois	Minnesota	Utah
Indiana	Nebraska	Washington
Iowa	New Hampshire	Wisconsin
Kansas	New Jersey	
Louisiana*	New York	

2. States Having Jim Crow Statutes

   These statutes also vary from state to state as to the situations to which they apply. However, in general, it would be felt that these are states where in most instances there is compulsory separation of Negro and white people in public transportation, in schools and other public or semi-public places.

Alabama	Louisiana	South Carolina
Arkansas	Maryland	Tennessee
Florida	Mississippi	Texas
Georgia	North Carolina	Virginia
Kentucky	Oklahoma	

**The Civil Rights Statute of Louisiana was passed during the days of Reconstruction. It has not been taken off the books, but is nullified by the Jim Crow statutes which have since been passed. It is placed on this list only for accuracy in recording. You will note it is also on list II, which more truly describes the situation in Louisiana.*

3. States Having No Statutes

These states, and the District of Columbia, having neither civil rights statutes nor Jim Crow statutes are places where it may be possible to move in the direction of more completely opening up facilities for use of all people since there is no positive law against it. It will be noted that there is a wide divergence of geographical location, and that the situation may be very liberal or very limited in accordance with customs of that part of the country.

Arizona	Montana	South Dakota
Delaware	Nevada	Vermont
District of Columbia	New Mexico	West Virginia
Idaho	North Dakota	Wyoming
Missouri	Oregon	

RACE RELATIONS READING

Books and Pamphlets You Can't Afford to Miss

ABC's of Scapegoating with a Foreword by Gordon W. Allport. Central YMCA College, 19 South La Salle Street, Chicago, Illinois, 25c.

An exposition of the mechanics and conditions of scapegoating which explains why religious and racial minority groups are persecuted.

A Community's War Against Prejudice by Alice L. Halligan, reprinted from *The Journal of Educational Sociology*, Vol. 16, No. 6, February, 1943.

A description of the much discussed "Springfield Plan."

American Counterpoint by Alexander Alland. John Day, 1943, $3.00.

A book of photographs of Americans showing the diversity of racial and national origin in the American population; also shows how difficult it is to tell an American's origin by the way one looks.

An American Program by Wendell L. Willkie. Simon and Schuster, 1944, 25c.

A great American deals in concise, concrete terms with the human, national and world problem of racial discrimination and injustice, as it effects America's efforts to achieve lasting peace and security at home and abroad.

And Keep Your Powder Dry by Margaret Mead. Morrow, 1942, $2.50.

An anthropologist helps us see America through the eyes of one who has studied conflict and adjustment in other cultures. Answers: *What* are Americans?

Brothers Under The Skin by Carey McWilliams. Little, Brown, 1943, $3.00.

A Democrat analyzes the problems of colored peoples (American Indian, Negro, Chinese and Japanese) within the United States and its possessions, and relates these problems to the world scene. The last chapter gives an "Outline for Action" well worth consideration. It should be read by *every* student in America.

"Color: Unfinished Business of Democracy," *Survey Graphic,* November, 1942.

An excellent, graphic presentation of the question of color in the United States and in the world.

Freedom Road by Howard Fast. Duell, Sloan & Pearce, 1944, $2.75.

A moving and inspiring historical novel revealing how democracy began to work in the South during the Reconstruction era and how its enemies crushed it.

"Minority Peoples in a Nation at War," *The Annals of the American Academy of Political and Social Science,* September, 1942.

Racial, religious and nationality group problems discussed by leading authorities.

Negro Churchmen Speak to White Churchmen by Commission on Minority Peoples. Federal Council of Churches, 297 Fourth Avenue, New York 10, N. Y.

Of One Blood All Nations, an Interracial Code for Protestant Churches. Detroit Council of Churches, 404 Park Avenue Building, Detroit 26, Michigan.

A code adopted by the Detroit Council of Churches, February 17, 1944. Includes recommendations in regard to membership, staff and Board of Control.

Probing Our Prejudices by Hortense Powdermaker. Harper, 1944, $1.00.

A manual designed to help high school students and others to become aware of their prejudices, to understand the nature, origin and effect of prejudices, and to suggest activities which can help reduce them.

Race, Science and Politics by Ruth Benedict. Modern Age, 1940, $2.50.

An anthropologist discusses various theories of race.

Races of Mankind by Ruth Benedict and Gene Weltfish. Public Affairs Committee, 30 Rockefeller Plaza, New York 20, N. Y., 10c.

A dramatic presentation of a scientific study of anthropology in simple language.

Sabotage! by Michael Sayers and Albert E. Kahn. Harper, 1942, $1.25.

An interpretation of Fascist organizations in the United States, their methods and techniques, distinguishing between those related to Fascist groups abroad and native American Fascist.

Some of My Best Friends Are Soldiers by Margaret Halsey. Simon and Schuster, 1944, $2.50.

The Black and White of Rejections for Military Service, American Teachers' Association, P.O. Box 271, Montgomery, Alabama, 1944.

Under Cover by John Roy Carlson. Dutton, 1943, $3.50.

A first-hand account of the work of some Fascist organizations in the United States which shows how the divide-and-rule technique is used.

Unfinished Business, A Fair Employment Practice Handbook by Clarence W. Anderson. Metropolitan Detroit Council on Fair Employment Practice, 906 Transportation Building, Detroit 26, Michigan.

Answers to questions most often asked about employment.

What America Means to Me by Pearl Buck. John Day, 1943, $2.00.

A collection of speeches and articles by a great champion of human equality which deals with the American Negro as well as the peoples of Asia.

What the Negro Wants edited by Rayford Logan. University of North Carolina Press, 1944.

Outstanding Negro leaders representing various social, economic and political points of view answer the question of what the Negro wants in a manner that is clear and challenging.

When Peoples Meet, A Study in Race and Culture Contacts, edited by Alain Locke and Berchard J. Stern. Progressive Education Association, 287 Fourth Avenue, New York 10, N. Y., $3.50.

A collection of basic documents showing the effects of the contacts of peoples and cultures and interrelationships between dominant and minority groups—written by accepted scholars. Fundamental material for serious work in intercultural education.

Why Race Riots by Earl Brown. Public Affairs Committee, 30 Rockefeller Plaza, New York 20, N. Y., 10c.

Lessons learned from the 1943 Detroit riots which may be used to prevent riots in any town.

Sleepy Lagoon Mystery by Guy Endore. Sleepy Lagoon Defense Committee, 129 West Second Street, Los Angeles 12, California, June, 1944, 15c.

The real meaning of the zoot suit riot in Los Angeles.

American Negroes, A Handbook by Edwin R. Embree. John Day, 1942, $1.00.

A clear, concise introduction to the present-day life of Negroes in the United States. Includes important statistical facts.

An American Dilemma by Gunnar Myrdal. Harper, 1944, 2 vol., $7.50.

The Swedish scholar who directed the Carnegie Foundation of the Negro in America summarized the studies and draws conclusions which are of great importance. "The 'American Dilemma' referred to in the title of this book, is the ever-raging conflict between, on the one hand, the valuations preserved on the general plane which we shall call the 'American Creed' when the American thinks, talks and acts under the influence of high national and Christian precepts, and, on the other hand, the valuations on specific planes of individual and group living, when personal and local interests; economic, social, and sexual jealousies; considerations of community prestige and conformity; group prejudice against particular persons or types of people; and all sorts of miscellaneous wants, impulses and habits dominate his outlook."

The Negro in America by Maxwell Stewart. Public Affairs Committee, 30 Rockefeller Plaza, New York 20, N. Y., 10c.

An excellent digest of *An American Dilemma* (listed above).

CIO and the Negro Workers: Together for Victory. Congress of Industrial Organization, 718 Jackson Place, Washington, D. C.

The program of the CIO to end racial discrimination and to build racial labor brotherhood.

Color, Class and Personality by Robert L. Sutherland. American Council on Education, 744 Jackson Place, Washington, D. C., 1942.

A summary of the findings of the American Youth Commission studies of Negro youth and a plan for the future.

Deep South by Allison Davis, Burleigh B. Gardner and Mary R. Gardner. University of Chicago Press, 1941.

A study of the caste system of the South as it relates to economic and social life. The field work was done by a white field worker and his wife, and a Negro field worker and his wife, each of whom spent one and a half years in "Old City."

Digest of Myrdal's "An American Dilemma" by Samuel S. Wyer. Columbus Council for Democracy, Room 7, 9 East Long Street, Columbus 15, Ohio.

Important quotations from the long detailed study.

The Negro and the War by Earl Brown and George Leighton. Public Affairs Committee, 30 Rockefeller Plaza, New York 20, N. Y., 1942, 10c.

A forthright account of tensions felt by Negroes because of World War 1.

The Negro People and the Communists by Doxey A. Wilkerson. Workers Library Publishers, Inc., P.O. Box 148, Station D, New York 3, N. Y., 1944, 3c.

The basis of Communist appeal for the support of Negroes.

New World A-Coming by Roi Ottley. Houghton Mifflin, 1943, $3.00.

A reporter's analysis of Harlem, "the most complex of Negro communities," which the author thinks reflects much of Negro America.

The NMU Fights Jim Crow by the National Maritime Union, 346 West 17th Street, New York 11, N. Y.

A description of one of Labor's most thrilling stories of interracial unity achieved during this war.

On Clipped Wings, the story of Jim Crow by William H. Hastie. National Association for the Advancement of Colored People, 69 Fifth Avenue, New York 3, N. Y., 10c.

The story of the struggle of Negroes in the armed forces to get training in the air corps and the truth about facilities at Tuskegee.

Organized Labor and the Negro by Herbert Northrup. Harper, 1944, $3.50.

A realistic account of the position of Negroes in labor unions.

Race Riot by Alfred M. Lee and Norman D. Humphrey. Dryden Press, 1943, $1.50.

A day-by-day account of the 1943 Detroit race riot and a program for preventing race riots.

The Core of America's Race Problem, prepared by Dorothy Height for Public Affairs News Service, Bulletin No. 3. Womans Press, January 1945, 19c.

The Public Affairs Committee of the National Board YWCA submits a careful, factual analysis of the problem of "Segregation," outlining its historical development, its social and political injustices, and its legal and human aspects. Concrete suggestions for further study and social action are also suggested.

The Southern Frontier, Southern Regional Council, 710 Standard Building, Atlanta 3, Georgia. Monthly, 25c a year.

The monthly bulletin of the Southern Regional Council dedicated to the task of building a better South and to the improvement of economic, civic and racial conditions in the region.

There Are Things to Do by Lillian E. Smith, reprinted from *South Today*, Clayton, Georgia, Winter 1942-43, 5c.

Specific suggestions for individuals.

To Stem This Tide, A Survey of Racial Tension Areas in the United States by Charles S. Johnson. Pilgrim Press, 1943, 50c.

Factual data about tensions in industry, agriculture, public carriers, housing, politics, "law" and armed forces. The last chapter is devoted to "Post-War Problems in Prospect."

Interracial Practices in Community YWCA's by Juliet O. Bell and Helen J. Wilkins. Womans Press, 1944, 75c.

Periodicals

Congress Vue, National Negro Congress, 307 Lenox Avenue, New York 27, N. Y. Monthly, $1.00 a year.
Official organ of the National Negro Congress.

The Crisis, National Association for the Advancement of Colored People, 69 Fifth Avenue, New York 3, N. Y. Monthly, $1.50 a year.
Official organ of the NAACP. Is concerned mostly with civil rights.

Journal of Negro Education, Howard University, Washington, D. C. Quarterly, $3.00 a year.
A review of Negro education by educators.

Journal of Negro History, 1538 Ninth Street, N.W., Washington, D. C. Quarterly, $4.00 a year.
Research in the field of Negro history.

Negro Digest, 5619 South State Street, Chicago, Illinois. Monthly, $3.00 a year.
A monthly digest of leading short stories, poems and articles by or about Negroes.

Opportunity, Journal of Negro Life. National Urban League, 1133 Broadway, New York 10, N. Y. Quarterly, $1.50 a year.
Official organ of the National Urban League, whose task is getting greater job opportunities for Negroes.

South Today, Clayton, Georgia. Quarterly, $1.00 a year.

Weekly Newspapers

Afro-American, 628 North Eutaw Street, Baltimore 1, Maryland. $4.00 a year.

Chicago Defender, 3435 Indiana Avenue, Chicago, Illinois. $4.00 a year.

Norfolk Journal and Guide, 719 East Olney Road, Norfolk, Virginia. $3.50 a year.

Pittsburgh Courier, 2628 Centre Avenue at Francis Street, Pittsburgh 19, Pennsylvania. $4.00 a year.

39- World War II - Negroes etc.

IN ANSWER TO EASTLAND

A Statement Prepared By The
Southern Regional Council, Inc.
Atlanta, Georgia

On June 29, when the United States Senate began the day, this was the chaplain's prayer: "We thank Thee for public servants who in the darkened valleys of these tragic times have failed not to lift unto the hills of help the eyes of this stricken generation, messengers of good will, who from the mountain tops of vision are now heralding a dawning day. So guide by Thy wisdom the deliberations of this body entrusted with vast power that awes and solemnizes our hearts that here in the fires of a great passion for healing peace the sacrifices for freedom may be sanctified...."

This was the next to last day of the fiscal year. The business before the Senate was an appropriation bill, carrying funds for the next year for a sheaf of war agencies, including the President's Committee on Fair Employment Practices. Senator Bilbo of Mississippi had wasted days of the Senate's time in his filibuster against FEPC, and now it was the turn of the Junior Senator from that State, 40 year-old James O. Eastland, to block a bill that a great majority of the Senate was ready to vote favorably on.

Senator Eastland trotted out the old, discredited arguments: The FEPC, he said, is staffed with Communists: it is not needed; the object of those who push it is agitation for the sake of division; it prepares the ground for racial amalgamation, threatens free enterprise, and is another step in CIO-PAC's drive to "take over" American business. He was talking for time, and he threw in a long denunciation of Liberia and scathing comments on the personnel of the various FEPC offices.

This was old stuff that ordinarily would not have made the paper. But in the course of the speech, Eastland repeatedly attacked the record of Negro troops in this war. His statements were insulting to the United States armed forces and a bitter wound to the pride of the million Negroes in the Services and the twelve million Negroes from whose homes the soldiers and sailors and marines went into the War.

Here is some of the abuse. "I recently returned from Europe. While there I talked to numerous high-ranking generals of the American Army, some of them in a peculiar position to know the facts.... What is the combat record of the Ninety-second Division, the only Negro division that has seen service in Europe?

"To begin with that division - and I state it authoritatively - had the best equipment...[and] training of any division in the American Army. For political reasons - and when I say 'political reasons' I quote American generals - they were forced to commission some Negro officers for that division. In not one instance could they place upon his shoulders the responsibility of combat, and I tell you now... that division could not be placed in an important position in the line...

"The Negro soldier was an utter and dismal failure in combat in Europe. When I make that statement it is not from prejudice. I am not prejudiced against the Negro."

/Laughter in the galleries/

".... In a number of instances these soldiers would desert their posts of duty, officers would desert their posts of duty, without cause, and the whole division would, without cause, rhyme, or reason, quit fighting. The officers told us the soldiers had no initiative, no sense of responsibility, very low intelligence, and were a failure."

After further charges that Negro troops in Normandy had been guilty of atrocities, and that French Senegalese soldiers had abused captive German women, the Senator declared that "the conduct of the Negro soldier..... all over Europe was disgraceful," and that the Negro soldiers have disgraced the flag of their country. "... He will not fight. He will not work."

Toward the end, after allusions to the views of prejudiced white soldiers, he said, "This agitation for social equality has destroyed racial tolerance, and I state frankly, that the white soldier is openly and avowedly waiting for his chance when he returns to the United States."

Through the weary years of Ben Tillman and Tom Watson and John Rankin and Theo. Bilbo we have become accustomed to race-hate oratory. But it is a new thing to condemn the fighting spirit of Negro soldiers. Think what these words mean to the men who have worked and fought for their country, and to all Negroes, everywhere.

Eastland named no names for his authorities. His charges are belied by repeated praise of Negro troops from Generals Eisenhower, Clark, MacArthur, Stilwell, Eaker, Lanham, Patton, and others. Under-secretary of War Patterson has praised their qualities, since Eastland's speech.

Here are quotes from some of the Generals:

General MacArthur: "Race has nothing whatever to do with a man's ability to fight.... /The Services of the Negro soldiers/" have been magnificent, their patience, their fortitude, their courage, and their complete devotion to their country mark them as belonging to the nation's noblest citizens."

General Stilwell: "Before these troops arrived no one ever thought of working during the monsoon season, but I have seen these men continue on the job when there was 10 inches of rainfall in one day."

General Eisenhower: "I have seen Negro soldiers in this war and I have many reports on their work where they have rendered very valuable contributions and some of them with the greatest enthusiam.... They have done their job, and they have done the job given them."

General Lanham: "I have never seen any soldiers who have performed better in combat than you."

Here is a sample pair of the citations of Negro soldiers in the 104 Timberwolf Division, for bravery in the battle of Germany:

Silver Star

To: Staff Sergeant Claude Pierce, Jr., 308 South 5th Street, Easton, Pennsylvania

"...then private first class, Infantry, Company A, 114th Infantry, United States Army, for gallantry in action in Germany on April 13, 1945. When a tank was hit and set afire by enemy artillery, Sergeant Pierce dashed across open terrain in the face of devastating enemy fire to remove the trapped crew. Although twice knocked from the tank by the concussion of near messes from direct enemy artillery fire, he climbed back on the flaming tank, extinguished the fire, and removed the crew from the tank. After administering first aid, he carried the more seriously wounded men across two hundred yards of fire-swept terrain to safety and medical aid. The gallantry and cool courage in the face of grave danger displayed by Sergeant Pierce, far above and beyond the call of duty, exemplify the finest tradition of the American combat soldier."

Bronze Star Medal

To: Private First Class Peter Dodson, 81 Orchard, Roslyn Heights, Long Island, New York.

"...leading a patrol into enemy territory, Private Dodson (then private) was wounded in the hand, but he tenaciously continued his mission. Observing an enemy tank two hundred yards distant, he advanced alone, threw a rock at the tank to attract attention, and shot the tank commander with a captured pistol when he emerged from the tank. The remainder of the tank crew were so terror-stricken that they immediately surrendered. The audacious intrepidity and cool courage displayed by Private Dodson exemplify the finest traditions of the American combat soldier, reflecting the highest credit upon himself and the military service."

As to the 92nd Division, by April 1945, their men had won seven awards of the Legion of Merit, 65 Silver Stars, 162 Bronze Stars, four Air Medals, and 1,377 Purple Hearts.

We all know Negroes in the armed forces whose spirit we would match against anybody's. White veterans of the Italian war have been heard to say they owed their lives to the combat job of Negro troops.

The South is proud of all her sons who have gone into the War. We want them back, and we want them honored for what they have done.

White Southerners have now a special job of making it clear to the Negroes that we know they did their whole part, notwithstanding the disadvantages and the insults that were put upon them - as civilians and as soldiers. Some justice lives in the South. After Eastland's speech it will be harder than ever to convince Negroes that this is so, but we have the job to do.

Mississippians can write Senator Eastland, and tell him they don't like what he said. That will help. Perhaps the best we can do is to see to it, in our own communities, that as these boys come home their home towns give recognition - public recognition and personal recognition - of the full share they bore in the victory over fascism abroad.

Chicago 1, Illinois

NEGRO GI'S COME BACK

I

There are 900,000 Negroes serving today in the armed forces. By the end of the war well over a million will have been in uniform. Owing to the military and industrial needs of this war, Negroes as a group have been able to approach an economic level above that of bare subsistence and to achieve real gains in the struggle for first-class citizenship.

As the war draws to a close, people make plans for the future. Large scale demobilization of the armed forces is now under way. Ultimately, a million Negro GI's, each with three or four dependents or close family connections, will be discharged. This means that a third of the entire Negro group will be directly affected by the use Negro veterans can make of their rights and benefits. It is necessary, therefore, to view the plans of returning Negro veterans against the background of the society in which they must live while working out their plans.

The Negro GI has fought hard and well in this war, as he has in every war in which this country has been engaged. World War II has called forth many lofty promises for postwar society -- promises of the Four Freedoms, of the Economic Bill of Rights, of the Century of the Common Man. But the Negro, fighting that these promises may be realized, knows that many such promises made in the past have broken against the wall of segregation behind which he is forced to live.

The society to which the Negro veteran returns will be changed in many ways from the one he left. He will have changed too. He will have had training of varying degrees of complexity in many skilled fields, and will have moved over large parts of the world. Recognizing these changes, he counts on the help of the rights and benefits due him to enable him to carry out his new plans.

He is not content to return to serfdom in the South, or to second-class social and economic status in the industrial North. But he knows that in the United States he is faced with a dilemma, the problem of a color caste system which exists as a strongly entrenched anomaly in our democracy. At many points of contact with that society where veterans must act to change their plans into reality, the white GI will be considered first a veteran, secondly and incidentally a white man; the Negro GI will often be considered first a Negro, secondly and incidentally a veteran.

II

The GI Bill of Rights, other laws, and the entire organizational set-up for reintegrating the veteran into civilian society has received wide publicity. It is the function of any veterans' program to devise aids that can be used as tools by veterans in reestablishing themselves as productive civilians. The laws and their administration are far better for veterans of this war than they were for veterans of World War I. But there is still much to be desired before the present aids can be made effective tools.

The Negro GI overseas first hears something of the legal aids and the set-up for veterans in letters from home, through talking with his comrades, and from counseling and orientation officers. When he is about to be discharged, he is shipped, together with hundreds of other men, to the separation center nearest his home. It is at the separation center that the Negro GI first comes into contact with the agencies charged with the responsibility of administering his rights and benefits. The entire discharging procedure at the center takes but forty-eight hours, of which approximately one half day is allocated to the separation counseling phase. During this half-day the GI first meets the military counselor who will advise him as to his general rights and benefits and who will discuss with him his interests and problems.

If there are questions the counselor cannot answer, the GI is referred to the governmental agencies represented at the center. These are: the Veterans Administration, Selective Service, Civil Service Commission, United States Employment Service, and the Red Cross. These representatives can give only general information; the best they can do on specific problems is to refer the man to their local offices nearest the community to which he will return. Under Army policy the military counselor may also refer the GI to non-governmental agencies; this means that the Negro GI may be referred to such organizations as the Urban League and the National Association for the Advancement of Colored People. The Navy, however, has a definite policy of not referring to non-governmental agencies.

Counseling offered at the center is of an entirely voluntary nature. Many men will not take advantage of it; those who do may not receive information that will prove of lasting benefit, for it is unlikely that the returning GI will realize the kinds of information and help he really needs until he is at home and is involved in the practical aspects of putting his plans into effect. The inadequacy of the separation counseling is particularly unfortunate for the Negro GI returning to the South, for the separation center may prove to be one of the very few places at which he can gain the information he needs for getting help in carrying out his plans.

Forty-eight hours after the GI has entered the separation center the gates close behind him and he is a veteran, heading home to civilian life. A few will have specific, well-laid plans; the confused majority will have a vague general knowledge of their rights and possibly the addresses of the government agency offices established nearest their home. The man who returns to a large city may experience no difficulty in finding the proper agencies to help him; but if a man goes back to a small town, as will many Negroes who live in the South, these offices may be located miles from his home community.

There should be a single information center in his own community to which the Negro veteran can take his questions. There may or may not be one but, unfortunately, the military counselor at the separation center will in most cases be unable to tell him whether there is or not. There is no connecting link at present between the separation center and the local information centers.

Since there is much confusion in the local administrative sphere where the Negro veteran must act, it is easiest to see the complexity of the situation by tracing the lines of responsibility as they come down from the top. The administrative supervision of veterans' rights legislation is theoretically gathered under two agencies: The Veterans Administration and the Retraining and Reemployment Administration. These agencies portion out some of the responsibility to other governmental agencies, such as the Department of Agriculture, the United States Employment Service, the Civil Service Commission and the Unemployment Compensation Agencies existing in each state.

Most of the above agencies have separate systems of local offices throughout the country and administer their part of the veteran's rights through these offices. The Retraining and Reemployment Administration in April, 1943, knowing that the veteran would be bewildered if he had to travel from office to office in search of his benefits, ordered the establishment in each state of a Veteran's Service Committee. This committee, representing the federal government, had the function of seeing that veteran's information centers were set up in each local community to provide one central place where returning servicemen could go to learn of their benefits, and where they could apply for them. This was, of course, an excellent idea, but no federal funds were made available for the work in creating such centers, the burden being placed on the local community. As a natural result, the quality of service rendered varies greatly and is worst in the isolated towns that need it most because government agency offices may be inaccessible to the veteran or inconvenient

for him to reach. Independently of the federal government's program, many state governments established their own system of information centers. Further, many communities on their own initiative undertook the marshalling of local facilities and the establishment of community information centers.

Outside the governmental channels a plethora of organizations have made the veteran their problem, have set up their own centers and have issued much pamphlet material. Labor unions, business firms, social work agencies, schools and newspapers, are trying to help -- and are busily grinding their private axes on the veteran. The result of all this government and private activity is a complex and hydra-headed monster of organizations confronting the veteran, with most of the heads talking at once in contradictory language. Good community information centers are the answer, but there must be more of them and they need to be well organized to be effective. Veterans will be returning to every town in the land. There should be in every town a center to aid the veteran. These centers should be in close touch with the military separation centers, other community centers in neighboring towns, and the local administrative governmental agencies.

Under the present system of establishing and maintaining community information centers the hardship worked on the Negro veteran is of a particularly personal nature. If he returns to cities and towns located outside the South, he can at least obtain aid where centers have been established. The main difficulty he will encounter will be that these centers will not have available the kind of information he needs. This is so because of the peculiar limitations surrounding Negroes in American society -- many schools practice racial discrimination in enrollment; financial institutions will be loath to lend money to Negro veterans because of stereotyped prejudice; Negroes are barred from numerous jobs in industry -- and these are limitations which exist

even when there is no legal segregation. In the South the Negro will have to utilize "jim-crow" centers where the service provided him will be -- as is always true where the southern policy of "separate but equal" is applied -- greatly inferior to that provided in centers for white veterans. Moreover, since the local community must finance its center, in many cases there will not be any centers at all for Negroes.

The theory behind much of the administration, evolved to give the veteran adequate aid in reestablishing himself, is based on the belief that the local community can best handle the problems of its own veterans. Consequently, the financing and organization of information centers is left to the community. The right to decide whether a veteran may enroll in a school rests with the local school he wishes to attend. Whether the veteran may make a loan for a business or farm rests with the local bank or other agency which will decide whether he meets the requirements for a loan. The veteran's reemployment in his old job is handled by the reemployment committeeman of his local draft board. A new job will depend upon the policies of local industry and the local United States Employment Service office.

For the white veteran the theory of allowing each local community to take care of its own has a certain validity. It is true that with federal and state aid providing the channels through which local decisions are implemented, the community can, and does, give individualized special service to its own veterans. And the Negro veteran will receive individualized and special treatment in an ironical sense: it is at the level of the local community where he has always suffered the most discrimination. Outside the South he will receive mediocre and often inadequate service. In the South, the Negro will feel the full force of long established discrimination, and, since in theory the local community is given responsibility, the Negro veteran will have little appeal.

At three points, therefore, the Negro veteran will have difficulty not encountered by the white veterans. First, he will have less access to places in which he may obtain information about his benefits and where he should apply for them. Second, once he has, by some means, obtained information, he will be subject to careless treatment and possible discrimination in the offices where his rights are administered. Lastly, he has the very special problem, particularly in the South, that, even if he were to obtain sufficient information, if he were to meet absolutely no differential treatment in the offices of administering agencies, he would still not have the wide choice of schools, loan institutions, or jobs open to the white veteran.

III

Within the various types of benefits opened to the veteran by the GI Bill of Rights and other legislation, the Negro veteran will meet more discrimination in some categories than in others, and the intensity of this discrimination will vary from region to region. Recent surveys made by the Army give the postwar plans which Negro enlisted men now hold. First of all, there will be a substantial amount of postwar migration, the pattern of which will correspond roughly to movements already made by the Negro worker during the war. The net effect of these movements will be a heavy out-migration from the agricultural regions of the South with a considerable increase in the Negro populations of the Northeast and Pacific Coast states. While it is difficult to estimate the numerical volume of such migration, it should total about 300,000 men. Most of the migration planned is from one region to another, involving long distances, and hence will tend to be permanent.

Almost every Negro veteran will be entitled to at least one year's education at any type of school he chooses, on any academic level, and may take

this schooling wherever he wishes throughout the United States. He may also attend approved schools in foreign countries. Among Negro enlisted men, 43.5 per cent have some plans for returning to school after the war. This total includes men with a very wide range of plans, varying from full-time schooling to short part-time courses only. Roughly, 55,000 men have definite plans for full-time schooling, a third of whom have had less than a high school education.

While some Negro veterans will take advantage of specific vocational training rights, most men will receive their benefits under the general education clauses in the GI Bill of Rights. The Bill has two qualifications particularly important for Negroes. First, the veteran must be acceptable to the school and meet its academic standards. Second, the school he chooses must be on the approved list submitted by the state to the Veterans Administration. It is up to the veteran to find the school he wishes to attend and to make application for admission. If the school will enroll him, he must then apply to the Veterans Administration for his benefit.

Because of the formal segregation in education in the South, the Negro veteran will be subject to the differential in the quality and quantity of education available for Negroes and whites. The facts of this differential treatment have been told and retold for years. The 112 Negro colleges, having a present total enrollment of fifty thousand students, will be expected to absorb about thirty thousand Negro veterans. The bulk of higher education for Negroes is carried on in the 32 colleges belonging to the United Negro College Fund. These colleges have a total endowment less than that of Cornell University, and the total number of teachers is approximately that found at Northwestern University alone. The southern Negro veteran will probably not be told by his sources of information that he may go to any college, including unsegregated schools outside the South. Neither will the counselors at Negro colleges be

likely to urge him to go elsewhere, as they have a vested financial interest in his attendance. Men who plan to return to schools below the college level in the South must find their education in the very few, inadequate, and already crowded high schools provided for Negroes.

Outside the South the Negro veteran will be confronted by a high informal barrier; although there is no formal segregation, the majority of schools either will not take Negro students at all or do it grudgingly and often on a quota basis.

Since many states are lax about their standards of approval, all veterans will be exposed to the danger of being exploited by opportunists who start new schools or use their control of existing institutions merely to make money from government tuition payments. The Negro veteran, because he is mainly excluded from attending old and well established institutions, is highly susceptible to the inducements offered by these "sheepskinners". This will be especially true in the South where approval standards are very low, particularly where Negro education is concerned.

About 12 per cent of the Negro veterans are planning their own small business. The stringent requirements that must be met before a veteran can get a government guaranteed loan will operate to make it almost impossible for the 84,000 men with definite business plans to obtain such a loan. The veteran must satisfy the lending agency, governmental or private, that his ability and experience, and the conditions under which he proposes to pursue his business, are such that there is a reasonable likelihood of success. Of the Negro veterans planning business, only an eighth have owned businesses before the war, and the large majority are planning to enter the retail and service fields where the rate of failure is very high. Moreover, the number of Negro veterans planning such business exceeds, by almost three times, the number of retail and

service establishments owned by Negroes before the war. In general, the widespread prejudice as to the Negro's inability to operate a successful business will effectively bar him from obtaining loans.

There is a paradox facing the prospective Negro businessman whose success is largely dependent upon Negro patronage. Outside the South credit is relatively easier to obtain, but he must compete fiercely with white owned business for customers; in the South credit will be difficult to get, but his clientele will be far more assured.

Almost all of the 10 per cent of Negro men who have either definite or tentative plans for full-time farming will be returning to the South. The men with definite plans, a group of about 84,000, contemplate a very low cash investment; over half the men plan $1,000 or less, and consequently will be operating farms at the subsistence level.

In obtaining guaranteed loans for farms, Negro veterans are faced with much the same restrictions as confront them in getting business loans. The processing of farm loans is handled by the Department of Agriculture, and the Negro veteran interested in agriculture must go to the local office of the Department's county extension agent. The county agent has been made the focal point for aiding veterans returning to the farm. He is assisted by the local veteran's agricultural advisory committee, composed of leading farmers, representatives of the federal and state agencies dealing with agricultural problems, and at least one veteran.

The county agents in the plantation South have an attitude on economic, social and racial questions similar to that held by the large landowners. Will the county agent and the local community in the South be more interested in a square deal for the returning Negro veteran than they have been in the past for Negro civilians? The answer is that they most probably will not.

A ray of hope for the Negro veteran desiring a loan is that the GI Bill of Rights also makes each veteran eligible for a loan under the Bankhead-Jones Farm Tenant Act to the same extent as if he were a tenant. This act is administered by the Farm Security Administration which has been the main federal agency helping Negro farmers in the South and has practiced little racial discrimination.

A surprisingly large group, 21 per cent, of Negro veterans have plans for public employment after the war.

Because of the sweeping advantages granted veterans under the Veterans' Preference Act of 1944, the Civil Service for many years to come will be made up largely of veterans. Government jobs hold particular attraction for Negro veterans, owing to the relative lack of racial discrimination and the strong emphasis upon placing the disabled veteran who would find it difficult to complete in the labor market. Due to the impetus given to public employment of Negroes by the policies of the Roosevelt administration, it is not surprising to find that four-fifths of the Negro veterans want federal jobs rather than state or municipal.

If the Negro veteran held a federal government job before the war, his chances of getting it back, or of getting a comparable job, are good. He should apply at the local U. S. Civil Service office nearest his home. If his job was with a state or municipal civil service, it is not protected by the reemployment provisions of the Selective Service Act, but some states have passed laws giving reemployment rights to their employees who joined the armed forces.

While the Negro veteran's chances for a job are better in the Civil Service than at almost any other point in the employment structure of our society, the number of jobs available in the postwar period will only meet a fraction of the demand. The total number of Negroes in public employment in

April, 1944, was about 200,000 in contrast to fewer than 60,000 in the same month of 1940. Taking only the 9 per cent of Negro veterans, about 108,000 men, who have definite plans for government jobs, it is obvious that with the contraction of public employment after the war these men will experience considerable difficulty in carrying out their plans.

Roughly 700,000 Negro veterans, three fifths of all Negroes who will have seen service, plan to join the general labor force after the war. Very few men have plans for returning to their old jobs, and there is a strong desire on the part of the majority for a new job in a different field of work. This desire is due in part to the training men have received during the war. Negroes have been trained in many skilled fields -- such as pilots, mechanics, radio technicians and operators -- and will not be content in the menial unskilled employment of traditional Negro jobs.

The Negro veteran's benefits which allow him to get his old job back and to receive counseling from the offices of the United States Employment Service will be of little value to him. His unemployment benefits may unhappily prove to be of much greater importance to him than to the white veteran if there is depression in the postwar period.

Between April 1940 and April 1944 the employment of Negroes in civilian jobs increased by almost a million, the occupational shift being mainly from the farm to the factory. But, looking to the postwar period, it must be noted that the Negro worker has made his greatest employment gains in occupations such as semi-skilled factory jobs, which will suffer the highest race of layoff once the war is ended. Further, the Negro's occupational gains have been in those industries -- iron and steel, munitions, aircraft and shipbuilding -- which will experience the greatest decline and most radical reconversion adjustments.

IV

If, as the transition from a war economy to one of peace is made, full and intelligent plans are carried out to maintain the highest possible level of general employment, then the Negro worker, traditionally marginal, will be able to hold many of his gains in skilled and semi-skilled jobs; but, if the transition period becomes one of unemployment and confusion, the effect upon the Negro worker will be disastrous. If depression should continue the Negro will once again become almost totally unemployed; or if, after a chaotic transition period, the level of employment again rises, much of what the Negro worker had gained during the war will have been completely lost to him and he must start the fight again.

The war has seen the growth of a strong non-discrimination policy in the government agencies that supervise industrial relations. The National Labor Relations Board and the Fair Employment Practice Committee have taken action against unions and management that exercise racial discrimination. If this policy is continued during the postwar period it will reinforce the policy of many labor unions in championing Negro labor and lessen discrimination by management in hiring Negro workers.

Southern agriculture has long been greatly overcrowded and during the war more crops than were grown in pre-war years have been produced by fewer men, using larger farms, more machinery, and increased capitalization. With the close of the war, the trend toward increased mechanization of farming in the South will be accentuated. Only by mechanization and large scale farming can the South hope to compete with the price of cotton determined in the world market. These new large farms will be owned by wealthy white landowners. In cold fact this means that southern agriculture has a surplus population of a million people and that the Negro in agriculture is at the very bottom of the economic heap.

There is a trend in the South, as it begins to realize that it must progress industrially to hold its place in the framework of American life, toward allowing greater economic and educational opportunity to the Negro -- within a segregated system. In order to give reality to protestations of belief in equal education for Negroes, the South will probably build many more vocational schools. Within these schools the experience gained in training Negro workers for defense jobs can be put to good use -- a training program which was secured only after the federal government had, under pressure, taken a strong non-discriminatory stand.

While the above trends are good, many incidents in recent months would tend to negate them. Such incidents as the brutal beating in a Jackson, Mississippi, railroad station of Negro soldiers just returned from 22 months active service in the South Pacific. This beating, administered by local police and citizens, came only because the Negro soldiers fraternized with their white comrades while waiting for transportation. Or the stabbing of a white attendant by a wounded Negro veteran in the Veterans Hospital in Hines, Illinois, when the veteran was told he could not use the toilet especially reserved for whites. A great bitterness arose in this man who had not been dsicriminated against by the bullets of the enemy nor in treatment at the Army hospitals in Europe.

To America, its veterans have always presented a problem. Having first feted and idolized its soldiers, society then drafted veteran's rights legislation with the feeling that by such mechanical action it discharged all obligation. Civilians, quite naturally, have little insight as to what happens to men at war and, not trying very hard to understand, become bewildered when veterans do not appreciate the legislative efforts made in their behalf.

Veterans have often been frustrated in their desire to reintegrate themselves, by society's tendency to place them in a separate category from other citizens. They have reacted by demanding more rights. Society answers these demands by piously telling the veteran to assume his responsibility. It is very true that the veteran does have the responsibility, but society, having granted certain rights and benefits to the veteran, also has the responsibility of making it possible for him to take advantage of them.

The Negro veteran will have to face the American citizen's misunderstanding of his problems as a veteran, he will also have to face the old misunderstanding of him as a Negro. What veterans, Negro or white, do not want, is to be treated as some special type of war souvenir to be polished with many special rights and taken out on holidays to be exhibited as a curiosity. They need the aid of their rights, but more, they need helpful intelligent understanding of their problem in becoming civilians again.

While laws alone will certainly not solve the problems of the Negro veteran, or Negroes in general, legislation can eliminate much racial discrimination. The Negro's educational position could be improved by federal aid to education, administered strictly on a non-discriminatory basis, designed to bring all state systems up to a national average. The passage of a permanent Fair Employment Practice Act by the federal government and the concomitant passage of such laws by the legislatures of the several states would go far toward providing equality of opportunity to Negroes in finding jobs within industry. This same legislation would give labor unions an overwhelming economic logic for bringing the Negro into their organizations -- without full membership open to Negroes, closed or union shop contracts could not be maintained. Social legislation such as that outlined in the Wagner-Dingell Bill would help to raise the health standards of Negroes along with all other people. The planning,

and putting into effect, of a comprehensive public works program is needed to take up the slack of reconversion and enable workers, Negro and white, veteran or non-veteran, to hold their standards of living and their personal dignity as productive citizens.

But the feudalistic views held by the powerful bloc of southern congressmen now in office and the ambivalence of some sections of the American people toward real democracy are not conducive to the passage of such laws. Fortunately, these non-democratic groups do not represent a majority of power or opinion in America and can only fight a delaying action.

Regardless of whether or not legislation outlined in the preceding paragraph is passed, action must immediately be taken on the local community level. The war has seen the growth of hundreds of interracial committees. One of the definite jobs these committees can now do is to see that returning veterans who belong to minority groups do not face discriminatory treatment in obtaining their rights and benefits. The local interracial committee can take the lead in assembling information and organizing the local veteran's information center. This center would then provide equal treatment and adequate information for all veterans, Negro or white. A link should be established between the military separation centers and the local veteran's information centers. In the South, where "jim-crow" information centers will be set up, positive action should be taken to make these centers equal to those provided for white veterans.

The protest and welfare organizations, such as the National Association for the Advancement of Colored People and the Urban League, have already commenced work on the problem of returning veterans, but a wider development of their activities must take place. Such organizations function in a highly limited sphere, while the adjustments veterans must make extend into all fields -- educational, economic, and social. The Negro press has been strangely silent

on this problem which will so acutely affect a million Negro veterans and the three to four millions who are their families or dependents.

A veteran's information center cannot be successfully developed by a loose grouping of interested organizations into committees or commission form. All the usual channels -- business, labor, religious, educational, social -- through which the local community takes action should be brought together and focused for a time upon this one task. There is urgent need for one organization to take a firm organizing and administrative position with sufficient finances to do its job. Its job is the creation of an information center giving the most efficient and effective aid possible to veterans in their adjustment to civilian life.

In any veteran's program, it should be remembered that discrimination against minority veterans must be attacked at three points: first, in the information center; second, in government administering agencies; third, in the institutions where the veteran will take advantage of his benefits. Unless discrimination can be overcome at these points, there is a danger of a minority developing within the Negro group -- a bitter and disillusioned corps of anti-social veterans.

The preceding paragrphs have presented a pessimistic outlook for the Negro veteran. Pessimistic in the sense that his rights and benefits, difficult to obtain in the first place and available only for a limited period, will not easily help him to achieve his postwar plans. His best opportunities exist in taking advantage of the educational benefits and veteran's preference in obtaining government jobs. His rights as a veteran will, as the situation now stands, be of little help to him in starting a business, farming, or finding a skilled or semi-skilled job in industry.

While the ameliorating trend toward the participation of the Negro people as first-class citizens has been given great impetus by the pressures exerted during the war, and the outlook is far brighter than it was after World War I, a long run trend will be cold comfort to the Negro veteran who must take advantage of almost all his rights within two years after discharge or the end of the war, whichever is later.

The time to assure that the Negro veteran can effectively utilize his rights is now.

37- Veterans

SERVICES TO NEGRO VETERANS IN THE SOUTH

The thirteen Southern states will shortly have some 600,000 Negro veterans of World War II. They are the cream of our young Negro manhood. They are healthy; they have schooling, experience, travel, and a foundation of skill. In a few years time they will be the active leaders of the Negroes in the South. They are ambitious, mature, and reserved. They are mostly determined that early in their lives they will have the normal rights of other Americans to work, to vote, to enjoy themselves.

The next two, three, or four years are the ones in which this body of leaders -to-be will be setting their opinions. If the S outh and the Nation gives them a break, they will repay it with a full measure of responsible, orderly, civic ambition which has characterized Southern Negro leadership in the past. If they are disowned and neglected, as all too generally they are being disowned and neglected in the South today, we shall have built needlessly and extra barrier of bitterness, suspicion, and stunted ambition, the effect of which will be felt in the South for a full generation.

It is an old habit in the South when effort is asked of us to plead, "We are too poor; we are too backward; we cannot do this extra thing that is asked." On this matter of veterans, poverty has little relevance. The Federal Government stands ready to pay nearly all the freight.

The great benefit is education and training. The argument behind this benefit is that when the war took the men away it took them for just those years when most of them would have been in college or high school or learning a trade or getting started at farming for themselves. This gap Government now enables veterans to fill. For one or two years, or even longer, they are entitled to generous benefits while going to school or college or learning a trade or learning to farm too.

The other great benefit is preference for jobs. All branches and all levels of Government offer this preference. Public employment agencies boast a special service in placing veterans. Private employers, so far as I can hear, have seldom been criticised for any shortcoming in giving jobs to veterans first. Fortunately, we are still in a post-war boom that offers in most places an abundance of employment. Negroes are under the usual difficulties in getting desirable jobs and that will be discussed later.

The South has special reasons why we need to scrape from the educational benefits allowed to the veterans every possible gain. We are plunging ahead in industry. That alone calls for remaking of our habits and institutions for education. At the same time our agriculture is about to undergo

an incr se in mechanization which conservative officials think will cut from under them jobs of a million or a million and a half Southern farm breadwinners in the course of the next eight or ten years.

To meet these two great changes we have an ill-adpted educational system. Federal aid to education is called for immediately to apportion fairly the cost of schooling for Southern children. Public and private education at the college level for white Southerners is nothing to boast of, and for Negro Southerners it is far worse. But most of all we need a widespread network of good technical and trade schools. We have only the beginnings of this for white and next to nothing for Negroes.

It is here that the educational benefit for veterans fits in. Only a trickle of the veterans, Negro or white, will go into college, though as everyone knows both white and Negro colleges are already full to overflowing all over the country. It is a still smaller trickle of the Negro veterans who are going into regular high school, but scores of thousands of Negro veterans are asking for trade or technical training. The same is true of course in a greater number for the white veterans. Town after town in the South is suddenly finding itself in need of a building, teachers, and equipment for trade training in auto mechanics, cabinetmaking, brickmasonry, sheetmenal work, shoe repair, drafting, radio and electronics. Present facilities are overflowing. Inadequate equipment is being moved into bad space, and barely competent teachers are being hired to start new trade classes for veterans. This is going on in country towns as well as in cities. The veterans do not want regular highschooling; they want trade training. The reasons may be connected with reluctance to go back into classrooms filled with youngsters, or with the feeling that as they have lost years from their lives, they had best now take the shortest course to better earnings. And I am sure this is the case with many of the Negro veterans who are anxious to complete a skill they began to learn in the armed forces. This insistent demand for trade training by veterans is certain to force into being all over the South new technical schools and classes. Presumably the veterans will be through using them in another three or four years, but by then industry's call for men with technical training and agriculture's release of a million hoehands will provide students aplenty.

The present situation for Negroes is not encouraging either on the score of employment or education.

On employment, jobs are aplenty but at low pay and in unattractive work. In town after town it is being found that Negro veterans are being offered old line Negro jobs at twelve, fifteen, eighteen or twenty-odd dollars a week. A large proportion of the men can show private or army experience at work better than common labor, and they are therefore entitled to draw the twenty dollars a week readjustment allowance for fifty-two weeks. This is "rocking chair money". In some Southern places it is charged that officials of the employment service have refused to recognize claims of Negro veterans

to higher skills, and on the offer of a ditchdigging or portering job have removed the men from the Fifty-two Twenty Club. Use of the twenty dollar a week benefit at this time is very widespread. The men argue that the benefit is there to enable them to wait for an opening at their highest skill, and that they would be foolish to work at a poor job for less than or little more than the twenty dollars a week they can draw for loafing. Occasionally a canny man takes what job he can find, and says he is saving his readjustment benefit for harder times. Many officials in charge of educational or training programs will tell you frankly that they cannot get Negro veterans interested in these programs in large numbers as long as the twenty dollar benefit is still being drawn. These officials say they are waiting until the men have used up their fifty-two weeks. Then education and training will be sought.

Often this is an excuse for inaction. Other communities have demonstrated that if officials go ahead and offer training and educational benefits that are worthwhile, these opportunities will be crowded. Likewise, no tales are told of Negro veterans refusing better type and wellpaid jobs in order to continue to loaf on the rocking chair.

Negroes face other discrimination in employment from prejudice in general, from prejudice specifically applied in apprenticeship training, and from inefficient and prejudiced administration in local offices of the employment service. In addition, large areas of the agricultural South simply do not afford more than a very few jobs for whites or for colored in the new lines of work that the men want to follow.

Prejudice in general is only slightly modified by the fact that the Negroes asking for better type jobs are veterans. Some gain there is. Men are making their way into trades and shops they couldn't get into before because they are veterans. Once employed they are usually liked and they usually stay. In my observation the gain that is significant here is in comparatively new lines of work where patterns are not set. Small shops with one, two, or three employees are frequently better about using Negro veterans than big industries where racial lines are settled. The service and repair businesses are nearly everywhere affording the best field for these men.

Denial of entrance to formal apprenticeship for Negro veterans in the South is a scandal in itself. Practically speaking, the only opportunities are in those cases where strong Negro locals of craft unions exist. That generally means carpenters, plasterers, or brickmasons. A few Negro veteran apprentices can be found in such cities as Memphis, New Orleans, and Augusta. Even in those cities white veteran apprentices outnumber Negro veteran apprentices by fifty or a hundred to one. Generally, over the South Negro veterans are simply not being accepted as apprentices in electrical work, sheetmetal work, plumbing, machinists work, the building trades or other established crafts. Administrative responsibility here is divided between State Apprenticeship Training Councils legislatively established, and the Federal Apprenticeship Training Service. Neither the State Councils nor the Federal Service

will provide any figures as to Negro apprentices.

The various offices of the United States Employment Service handle matters of Negro employment in various ways. There are two patterns, both involving segregation. The usual one is either a separate building or a separate part of the main building to which special place Negroes having business with the employment service go. It will be staffed with white receptionists, white clerks and white interviewers. In some cities in Virginia, North Carolina, Georgia and one or two other states, the special office for Negroes is staffed with Negroes. This arrangement is everywhere statisfactory to the white officials, is considered a gain by the Negro community, and appears to be giving good service to Negro users of the office. Certainly many Negro veterans required to transact business with all-white officials are dissatisfied with the service they get.

Generally, the head officials of local USES offices will tell you that they are careful to make no distinction in race on referrals and that notices of skilled vacancies are sent to both the Negro office and the white office. Some officials will contend that qualified Negroes are regularly sent out for interview at places where skilled vacancies are known. Subordinate officials and Negro candidates for employment will give you another story. The best offices, from the point of view of finding good employment for Negroes, are undoubtedly those that use Negro officials.

It is my observation that the employment service has a lot to learn in simple matters of housekeeping. Far too many of the segregated Negro offices are in space that is inadequate or dingy or dirty. This is usually in considerable contrast to the space for white, but even that is often not much to brag about. In many Southern offices it will be found that the white quarters abound in notices of high-type jobs urgently needing to be filled. On the Negro side such notices are seldom posted and often there is not even a place for posting. The white side will have seats aplenty. The Negro side will have seats for a few. The rest stand in the room or in the hall or out by the garbage cans. White entrances are on main streets; I have found many Negro entrances from back alleys. Often the official address of the employment service used in Information Center and other directories will be the white office. A Negro who doesn't know by the grapevine where to go will suffer delay and embarrasment by appearing at the white office and being directed around to the back.

The matter of housekeeping and the important matter of fair use of Negro personnel in the office could and should still be handled while the USES is a Federal agency. If and when it is returned to the States, continuing effort will be needed to correct these abuses.

The program of GI educational benefits is not in particular good order for many veterans. It is in far from satisfactory order for the Negro veteran.

Available institutional training is almost everywhere overcrowded. In the late spring of this year a committee at Tuskegee wired out to Negro colleges and schools to get the figures. Twenty-two Negro colleges reported an enrollment of 4,235 veterans; 3,451 veterans have been denied enrollment because of lack of facilities; only 682 because of inadequate training of the veterans themselves. 304 secondary schools report an enrollment of 1,264 Negro veterans, refusal of 1,452 others because of lack of facilities or lack of previous education. A 11 but seven of the 304 schools said they did not have adequate practical industrial facilities to take care of the needs and desires of the returning veteran.

For formal academic training the possibility is that Southern colleges, white and Negro, can find ways to carry their loads. It will take expansion in plant and staff, but usually the resources can be found. On trade and technical education, although the white institutions are few and seldom good, they are sufficiently scattered to make it possible for a number of white veterans to get institutional trade training at or comparatively near their home towns. In most of the Southern states Negro veterans have a choice of only one, or possibly two, trade training schools. These will usually be at a distance, and now they are overcrowded. It is everywhere a complain that on sixty-five dollars a month, it is not easy to live away from home. I estimate that 28,000 Negro veterans are now receiving institutional training in twelve Southern states; the corresponding estimate for white veterans is 129,000.

Signs begin to appear of widespread local effort to get Negro trade training courses going. Many such courses are started to fulfill the law and enable receipt by city school systems of tuition money from veterans in training. Such manual training courses masquerading as trade training need, and doubtless in the future will get, tight inspection and rapid improvement. Despite these new courses, and they are still comparatively few and crowded, Negro veterans in the mass are not now able to get institutional trade training in the South.

Job training has its woes, but it has promises too. All over the South this program has been loosely and inadequately serviced by the state agencies that have it in charge. Many of the complaints about abuse both in rates of pay and in quality of training are true. This applies to white and Negro veterans alike. The State set the program up in haste and afforded incredibly small amounts of money for supervision and follow-up. Now that respectable loads of job trainees have been built up, the States realize that they have a bear by the tail. Some of them are begging the Federal Government for funds with which to supervise; some are finding the money by executive action. Some are hoping that the VA will do the job for them.

Whatever be the faults in general, the program has great possibilities and is particularly advantageous for Negro veterans. Most of these men have little schooling, and cannot be induced to go into institutional training. Negro veterans who find places as job trainees are a selected group. They stick on their jobs. They are there under the employer's agreement to teach them a

trade. I for one am willing to blink at the first few months of confusion in administration while these men enjoy this additional access to the better classes of work, and I do not think complaints of abuse as to the teaching of skills applies to more than at most one-fourth of the men. As to wages, I doubt if abuse is any more widespread there. In both these matters improved administration is sure to be forthcoming.

On-the-job training is by a good deal the most helpful offer to Negro veterans. It is still hard to open in many towns. This is partly because Negro veterans are still not asking for it as widely as they might, and also because as the administration of the program has been almost everywhere an exclusively white affair, on-the-job training opportunities for Negroes are simply not being sought with the diligence that would be shown if Negro officials were widely used in the program. In town after town it has been shown that where a committee of leading citizens, Negro or Negro and white, works at the problem, a large number of additional job training opportunities for Negro veterans can be found. With the rarest exceptions your white official concerned with job training will accept as refusal an employer's indication of reluctance to use Negroes. Negro officials know their way through rebuffs of this kind.

Here again statistics are lacking. Thus far in my own experience the officials of principal offices of the Veterans Administration throughout the South have refused to give any figures as to proportion of Certificates of Entitlement for on-the-job training issued to white and Negro veterans respectively. I have found no State educational agencies that would quote figures as to job trainees broken down by race. The Federal Government and the State Governments need this information as an indication of how well they are reaching Negro veterans with this basic program. So long as they refuse to give the figures, interested members of the public can only guess. My guess I make on the basis of fresh field reports from veterans traveling throughout the South in close touch with this program. On the basis of what they tell me, I would say that the total number of veterans getting the job training benefit in one form or another in twelve Southern states is 102,200, and the total number of Negroes included in this group is 7,700, whites are 94,500. Negro veterans are about one-third of all Southern veterans. Today they have less than one-twelfth of the places as job trainees.

On-the-farm training likewise offers great possibilities although the program has got off to a slow start. Negro veterans are at a disadvantage in getting the benefit of it, because for administrative reasons it has generally been limited to full owners and tenants, and a large proportion of Negro rural veterans come from families that are not land owners or renters, but are rather sharecroppers or laborers. The various State contracts with the Veterans Administration now provide the possibility of on-the-farm training for landless men, but so far the problem of a cropper or a laborer getting on-the-farm training is like the problem of getting the camel through the eye of a needle. It does happen that in this extremely decentralized program, local county officials can contrive arrangements that will answer this need, but that

is the exception. In actual numbers, perhaps 3,500 Southern Negro veterans are getting on-the-farm training; whites are about 24,200.

Here are certain recommendations for improvement of Services to Negro veterans in the South:

(1) Sharp expansion of facilities for college-level academic education. In this connection North Carolina's new plan is of great interest.

(2) The founding and concerted supervision of a widespread network of good trade and technical training schools.

(3) Improvement of the work of the Employment Service through a wider use of Negro personnel, fair referral practices, and modern standards of administrative housekeeping.

(4) The habits of the Veterans Administration in its Southern offices as to use of Negro personnel are in direct denial of standing executive orders that should control the entire Federal Government. At the very least, the Veterans Administration should promptly employ large numbers of Negro contact officers and training officers. Also, the office of each deputy administrator and each regional director should immediately take on a Negro assistant.

(5) The various State Veterans Servicing Agencies are almost without exception lily-white outfits. Further, most of them have special links with existing old-line veterans organizarions, and many local offices serve informally as recruiting places for veterans organizations. State Veterans Servicing Agencies perform a valuable function. Generally, I think in the South their local offices are willing to be helpful within limits to Negro veterans. Their work would be greatly improved as it affects Negro veterans by the employment of a fair proportion of Negro officials.

(6) Job training needs more money for supervision. On any past showing of the Veterans Administration there is little grounds for supposing that if this program were directly supervised by the VA, Negroes would be treated with much more fairness than under State administration. Whoever handles it should use adequate numbers of Negro officials. Also, it needs more related instruction. Inevitably, in its operation it becomes to some extent an engine of recruitment for new training opportunities. Thus far this job has been fairly well done for white veterans and scarcely done at all for Negro veterans. The task of recruiting training opportunities should be formalized.

That task will not be well done in the South unless Negroes are given an opportunity to put their abilities and ingenuity and loyalty into it.

(7) On-the-farm training needs speeding up, needs to be offered far more widely than it is at present and needs to be opened to much greater numbers of landless farm veterans than are getting it at present.

(8) Negro veterans need much more self-organization than has yet appeared among them. Only two or three new national veterans organizations have shown an interest in them. If the old-line organizations will open themselves to the Negro veterans on a basis that will seem fair and genuine to these men, that is quite possibly the best gain. Evidence points to progressive loosening up of the old-line organizations, but in many States and cities the World War II veterans are by no means satisfied as to the appeal of these organizations. As to what national group veterans would be best advised to join, I do not offer an opinion. It is easy to see, however, that they gain quickly from almost any form of self-organization. This gives them a body of representative negotiators, and in the present situation of veterans services in the South, these agents of Negro veterans outfits are getting substantial improvement in administration right and left.

AMERICAN COUNCIL ON RACE RELATIONS

CHICAGO

Clearing House Release, No. 21
American Council on Race Relations

April 8, 1946

RECEIVED
APR 15 1946
Southern Regional Council

TO Correspondents of the Clearing House:

Facts About Japanese Americans is the first in a series of fact sheets about minorities prepared by the American Council's Information Service. It has been distributed to newspaper, radio, and magazine editors throughout the country. Because it will also be useful to students, speakers, and others interested in the problems of minorities and wanting background materials in this field, we are making copies available to the general public, upon request, at 50¢ each. Supplements will be issued as changing conditions may warrant.

We call your attention also to a serious situation, recently reported by the Japanese language press: United States Attorney Charles H. Carr and others are said to be urging that if "Tokyo Rose" is to be charged with treason and tried in this country, her trial shall take place in Los Angeles.

At a time when efforts should be concentrated on gaining community acceptance for loyal citizens of Japanese American descent who are returning to their homes on the Pacific Coast, such a proposal is manifestly inflammatory; agencies and individuals concerned with the problem of race relations should do everything possible to make sure that if this trial is to be in the United States, it shall not be held in any area where Japanese Americans are newly resettling; and that a careful distinction is made between "Tokyo Rose" and the thousands of citizens and law-abiding residents of Japanese American ancestry. This trial must not be used to arouse anti-Japanese American feeling anywhere in this country.

The American Council on Race Relations has telegraphed Joseph B. Keenan, Chief Prosecutor for Japanese War Criminals, Washington, D. C., expressing its concern over this proposal. We urge you to send your messages promptly.

Southern Regional Council

Mr. George Mitchell
Southern Regional Council
63 Auburn Avenue, NE, Rm.432
Atlanta 3, Georgia

Dear Mr. Mitchell:

The American Council on Race Relations has been in operation for nearly three years. During this period it has sought to be of service to your own and the hundreds of other national, regional and local organizations concerned with race relations and minority problems. Our activities were based primarily on requests from the field and on needs as pointed out to us by leaders like yourself.

We started in 1944, in a period when many new agencies were being established to deal with pressing minority problems dramatized by the war. Calls for help to the already established national organizations were heavy, and the need was felt for a new non-membership agency whose chief function would be to answer such calls and to serve as a clearing house for the entire field.

Today, most of the new organizations have established their programs and found their role. The need is no longer so much for on-the-spot field service as for a central, fact-finding and informational agency to which any organization can turn for authentic knowledge.

Alert to the changing needs in the field, the Council has reformulated its program. Because your organization has cooperated with us and evinced interest in our efforts, we want to share this program with you.

Enclosed is a copy of the Council program as recently approved by the Board of Directors. In it you will find a description of our goals and areas of interest, the kinds of services you can expect from us, and the contributions we hope to be able to make to the field.

We would like to have your comments, suggestions and criticisms. We look forward to your continuing cooperation.

Sincerely,

Louis Wirth

MEMORANDUM

TO: Agencies Concerned with Race Relations and Minority Problems

FROM: American Council on Race Relations
Louis Wirth, President

SUBJECT: Program of the American Council on Race Relations

1. Background and Program

The American Council on Race Relations was established in 1944 to "bring about full democracy in race relations" through "the advancement of knowledge concerning race and race relations both by the collection and analysis of the records of interracial experience and by original research; assistance to local communities in organizing to meet their interracial problems where existing programs seem inadequate; and increasing knowledge about racial groups by popular education through the radio, the press, moving pictures and other means of mass communication."[1]

The Council further specified its objectives as seeking "to strengthen our democratic way of life by working for the extension of full rights and opportunities to those citizens now restricted through discrimination because of race, creed or national origin" to the end that there might be achieved "full participation of all citizens in all aspects of American life: equal rights and equal opportunities".

While emphasizing the magnitude and severity of the problems of discrimination to which Negroes are subjected, and thus giving special attention to "securing for this group full participation in American democracy", the Council recognized that other minority groups "required adequate attention as part of a total program in the day-to-day implementation of democratic principles."

The Council regarded itself "as an emergency movement performing special functions of giving added impetus to the general movement toward interracial cooperations", thus assuring that under its program "there will be no threat to the autonomy of existing organizations". It expressed the hope that its activities would "serve to strengthen existing agencies" and the intention to "work as closely as possible with all existing agencies".

---

[1] Bylaws of the American Council on Race Relations. Subsequent quotation from statements adopted from time to time by the board of directors.

In the course of its little more than two years' existence, the Council has made significant contributions to a number of these objectives. It has been especially active in aiding local community groups and in the collection and dissemination of materials bearing upon experiences and techniques for dealing with race relations problems. The Council has not, however, carried on much research. On the other hand, in answer to requests and to fill what seemed to be urgent need, the Council has undertaken some activities not specifically encompassed by these statements of policy.

The Council has continued the search for a significant program and for the organization and resources to sustain it. Those responsible for the leadership and continuing life of the Council are willing to adapt the Council's program whenever necessary to meet changing needs and responsibilities.

Late in 1946 the Council undertook an evaluation of its program and decided upon major changes in its organization and administration. The reorganization of the Council went into effect in January 1947. The new administration of the Council was charged with the definition of a program which would encourage and facilitate improved communication and cooperation among the numerous national, regional and local agencies concerned with racial and cultural relations and minority problems, would meet the growing need for planning and common counsel, and would supply those essential services required by the action agencies to make their work more effective.

At the same time a cooperative relationship was established with the University of Chicago's program of education, advanced training for professional personnel, and fundamental research in race relations and minority problems. The University's program is designed to operate in collaboration with the other universities and research centers throughout the country in order to encourage a more integrated attack on problems of education and research in this field.

2. Objectives of the American Council on Race Relations

The problems of race relations and of minorities in the United States and in the world will continue to be with us for the foreseeable future. These problems constitute a most critical aspect of American democracy. If they are not thoroughly understood and effectively treated they will furnish a threat to our social order and an obstacle to the social progress of America. Moreover, considering the actual and potential position of leadership of this nation in the world, the failure to deal adequately with these problems on the domestic scene will undermine the symbolic value of our democratic civilization as a force in world affairs and furnish an insuperable obstacle to the building of a world community upon which the peace and eventually the survival of mankind depend.

The attack of these problems calls for the most enlightened strategy that can be brought to bear upon them. The American Council on Race Relations can, it is believed, make a significant contribution to the improvement of race relations. It is the one organization which is concerned with all of our minorities and with all of the problems which they encounter as minorities. It is concerned with the discovery of fundamental knowledge about these problems and with the funding of valuable experience gained by the numerous action agencies in the course of their work. It has assumed the responsibility of making this

authentic knowledge available to all specialized agencies in the field and to governmental bodies and policy makers whose action affects race relations. It seeks no recognition for itself but is anxious to be of service to all other agencies in the field. Its principal means for obtaining its ends is to cooperate with the principal national organizations for the purpose of securing unified approaches in matters of strategy and programs of action. It is moving in the direction where it will be more concerned with general planning than with the execution of detailed programs of action.

The Council is not and will not seek to become a mass agency in the sense of having mass membership or making mass appeals for its own support and for social action directly. It seeks to work through existing agencies and does not presume to take their place or to enter into competition with them in any of their important established functions. Continuous cordial and effective contact with the existing agencies gives the best promise for attaining better coordination of program and activities than we now have.

It is recognized, of course, that not all that can be done is being done to improve race relations. It is part of the Council's responsibility to call attention to these gaps and possibilities, to stimulate appropriate agencies to assume responsibility for these tasks and only where necessary to undertake them itself on an experimental basis until an appropriate agency can be found to undertake such responsibility.

The Council will concentrate primarily upon national agencies. In view, however, of the great number of regional, state and local official and citizens' organizations that have come into being, the Council must find an effective and economical means of servicing them. Neither the resources nor the staff now exist to service these agencies directly and through personal contacts. It is necessary, therefore, to perfect appropriate means of contact and of influence which are within the Council's potential resources.

There are many significant services which no agency can perform by itself except at great cost and considerable waste. These the Council in many cases will be in a position to perform by virtue of the fact that it does not presume to be a direct action agency and does not pre-empt the province of any existing agency. Because the Council considers the problem of race relations and minorities as a generic problem, it is in an advantageous position to serve as the neutral agency to build bridges to enable other organizations to come together into programs of common action.

The personal effort and the material resources now being devoted by many persons of good will throughout the United States in improving race relations and minority problems are stupendous. Twenty million dollars a year is probably a conservative estimate of the total money spent in this field annually. If the American Council on Race Relations can be instrumental in reducing the cost and increasing the effectiveness of this expenditure by only a small proportion, it will have justified its existence. More important than the waste of resources, however, is the prospect that through the Council the separate agencies operating in the field can find a better division of labor and a superior strategy for accomplishing their common purpose.

In the field of race relations, as in so many other fields, interest and enthusiasm often outrun authentic knowledge. Hence action programs are sometimes based upon assumptions which are questionable and implemented by techniques which, to say the least, can be improved upon. By devoting itself to the search for more reliable knowledge and the perfection of more adequate techniques, the Council can be of service to all agencies in the field and can influence public opinion and national policy.

3. Major Functions of the American Council on Race Relations

The American Council on Race Relations has developed from an emergency agency which was organized to perform an essential function in war-time, into an organization designed to meet the continuing problems of race relations and minorities by the best available means and whose program is sufficiently flexible to contribute substantially to the solution of emerging problems. The Council seeks to achieve its objectives through the following major functions:

a. Compilation of Data

It is the aim of the Council to develop into the recognized center in the country, if not in the world, where authentic information on subjects relating to race relations, in the broadest sense of that term, is collected, collated, and made accessible. To accomplish this end, the Council is undertaking a systematic search of sources of data relating to race relations and minority problems through: (1) contact with and search of publications of agencies, (2) regular correspondence with agencies and other sources of data, (3) clipping services, (4) library services.

The Council maintains continuous and effective contact with what goes on in the field in the way of action, policy making, fact finding, research and evaluation, through published literature, through fugitive materials, through regular correspondence, and through a system of voluntary reporting by means of which the agencies in the field would be induced to inform the Council of important activities and events.

b. Dissemination of Information to the Field

Having collected the data relevant to the subject of race relations and minority problems and organized them so that they will be accessible, the Council in turn makes available through effective methods of dissemination to all of the agencies in the field such important information as it has collected and collated. This involves the following operations:

(1) Regular review of events, trends, knowledge, programs, and policy developments. The Council's own publications are planned in the light of the adequacy or inadequacy -- actual or potential -- of existing organs.

(2) Special coverage of important current or impending information when and as needed, by the most expeditious means possible to make it of greatest service to the agencies in the field.

(3) Promotion and distribution of basic materials on programs of action, the results of research, and the results of pilot projects. This activity is carried on as nearly as possible through cooperation with and stimulation of existing agencies.

(4) Preparation and publication of directories of agencies in the field.

(5) Preparation and publication of manuals. The Council undertakes this activity itself only where no existing agency is in the position to do so.

(6) Development and maintenance of a roster of specialized personnel in the race relations and minority fields as an important aid to operating and research agencies on all levels.

(7) Response to requests for information on the part of individuals and unorganized groups desiring knowledge concerning any aspect of the field. When this information is not available in the Council's files, the Council serves as a referral center to other agencies; but it also uses these requests as a guide to popular demand for information and knowledge and attempts to stimulate the provision of that knowledge through appropriate channels.

c. Analysis of Programs

As a continuing feature of its work, the Council provides a systematic program description of areas of activity relevant to the race relations field and of agencies carrying on such programs. Emphases of individual programs, their regional incidence, and the existence of gaps are noted. Report on the structure of agencies carrying on such programs, on the divison of labor between agencies, methods and techniques of operation, financing, staffing, activity and results are in preparation.

d. Consultation and Advisory Services

(1) The Council undertakes as part of its responsibility the task of consultation with federal and national private agencies on their problems, programs, priorities, division of labor, organization, personnel and operations. This service must be carried on judiciously within the limits of the Council's resources. It involves close contact through correspondence and personal relations with the responsible heads of the appropriate agencies. It also involves conferences of several agencies on a specific problem of common interest.

(2) To a more limited extent, the Council offers a consultation service to regional, state, and local public and

private agencies. This service will of necessity have to be more limited because of the number of such agencies, running into the hundreds, and because of the great cost of direct personal and individual service to any considerable proportion of them. A field staff does not now exist, cannot be developed over night, and in the foreseeable future cannot be financed for direct intensive servicing of the local agencies. More economical and effective methods are being developed through publication of materials, through correspondence, and through regional conferences to bring advancing knowledge and techniques to the many groups operating in the field. The Council regards it as its responsibility to stimulate, plan, and sponsor conferences with groups of agencies covering a given subject matter and relatively broad geographic areas as needs and opportunities arise.

e. Program Development

(1) On the basis of the above activities and with the use of the resources gained through the above services and contacts, the Council attempts to formulate with the cooperation and participation of the agencies in the field and with the aid of appropriate consultants where necessary, programs in specific fields and in specific geographic areas. As a service agency to other agencies, the Council exerts every feasible effort to help existing organizations, governmental and private, to develop their programs and to accomplish their purposes more effectively.

(2) In order to make an effective contribution to the work of the operating agencies, the Council is alert to the discovery of needs in the broad field of race relations and minority problems, the definition and clarification of emerging problems, and the possibility of recommending techniques, standards, forms of organization, and priorities.

f. Inter-Agency Clearance and Service

(1) The Council regards it as its primary function to facilitate and encourage the cooperation of the agencies in the field, both public and private, for the more effective development of a general strategy in the field of race relations and minority problems. It seeks to encourage a rational division of labor and comprehensive coverage of the principal problems areas, minority groups and regions.

(2) To be effective as an inter-agency clearance and service agency, the Council maintains continuing contact on the current and impending programs of the operating agencies.

(3) The Council facilitates the cooperation between different agencies on common projects through joint or cooperative planning.

(4) With the aid of research, its own resources and consultants, the Council conducts, upon the request of the agencies concerned, surveys and evaluations of programs. It does not, however, set itself up as the independent evaluation agency in the field. If an evaluation appears appropriate in a given area or in the interest of improving general strategy, the Council serves as the agency which recruits the appropriate personnel and facilitates getting the job done.

g. Pilot Projects

(1) The Council is constantly seeking to be instrumental in discovering areas of fundamental knowledge and the development of techniques having a bearing upon race relations and minority problems which are ripe for practical application. This requires the development of a continuing broad understanding of trends in the field and intimate contact with the products of research and experimentation. The close relationship established between the Council and the University of Chicago as a center of research should prove of great value in this respect.

(2) The Council is active in the selection of strategic problems and suitable localities for the testing of methods and techniques in the race relations and minorities field in cooperation with the research resources developed at the University and with operating agencies.

(3) The Council actively participates in the installation of pilot projects. These must be operated as nearly as possible by local or national agencies to which they are of greatest concern and into whose province they most nearly fall. The Council offers its services, however, in the actual conduct of the demonstrations.

(4) The Council participates in the evaluation of the results of pilot projects so that the results attained may be generally disseminated to the field, applied as nearly as possible to related areas and thus raise the level of scientifically tested activities in the field as a whole. It is to be hoped that through such demonstration and evaluation in single instances, a sounder basis may be laid for the programs of agencies and the substantiation of scientific and tested knowledge for lay opinion, superstition and common sense. It is also expected that with controlled pilot projects greater economies will be achieved in the application of new methods and techniques to the treatment of problem situations by avoiding random, casual and unnecessarily duplicating testing projects. Such pilot projects are terminated whenever the purposes for which they were designed have been fulfilled. The Council exerts its influence so that the results are assimilated as rapidly as possible into general practice.

h. Education, Training and Research

(1) By agreement with the University of Chicago, the educational, training and research functions of the Council are concentrated in the University. The University is not merely undertaking the development of such a program in its own institution, but also, as nearly as resources and possibilities allow, is attempting to establish an institutional framework of cooperative training and research with other universities and research agencies throughout the country. In this way, it is hoped that all of the more important educational and research agencies in the country will be drawn into a more concerted program for the discovery of knowledge, for the dissemination of that knowledge, for general education and for the training of competent professional personnel.

(2) The Council, in turn, serves as an in-service training agency and a testing ground for the educational and research projects undertaken at the University and at affiliated instutions and receives the benefit of the knowledge obtained and the techniques developed.

(3) The principal objectives of the University of Chicago's program with which the Council cooperates are as follows:

(a) The infusion insofar as this is possible and desirable, of authentic knowledge concerning race relations and minority problems into the curricula of general education and adult education and the development of methods of instruction for the most effective teaching and learning insofar as this field is concerned.

(b) The development of advanced instruction designed to lead to the production of a generation of professionally competent technicians and leaders in the field of race relations and minority problems.

(c) The organization and execution of programs of research designed to develop and test significant hypotheses and theories concerning race relations and minority problems in their broadest context. It is recognized that much of our present-day practice and policy in the field of race relations and minority problems rests upon unsystematized knowledge, where there is knowledge at all, upon miscellaneous collections of empirical wisdom, and not infrequently upon untested and faulty assumptions. It is also recognized that the basic knowledge which must ultimately be built as a foundation for effective programs of action is derived from many sources, from a variety of disciplines, including anthropology, psychology, sociology, economics, political science, law, education and social work, among others. The program of education, training and research, therefore, must of necessity be an interdepartmental program and must draw upon all of the scientific and scholarly resources that are available.

One of the primary aims of the program of research, aside from the establishment of a sound theory and the testing of crucial hypotheses, is the discovery of emerging problems before they are commonly recognized and understood so that the problems which can be anticipated can be analyzed before they become acute, and the results of such analyses called to the attention of appropriate agencies with a view of devising ways and means of meeting them in a rational manner. It is hoped that such effort will not only avoid hysterical action which may be detrimental to all concerned but will also lead to the formulation of well-conceived programs in place of improvised action.

(d) The University, with associated research institutions, should also play an important role through its participation in the establishment and evaluation of the results of pilot projects and demonstration enterprises.

(e) It is also expected that the University, through its educational and other resources, will be instrumental in the development of superior products insofar as manuals and other publications are concerned. The Council expects to aid in the dissemination of such products of research and scholarship and in guiding their use by action agencies.

4. Major Areas of Operation

The major functions of the American Council on Race Relations described above should be understood as applying to a variety of problems. Not all of these problem areas can be anticipated. Their importance may shift from time to time as conditions in the country and in the world may change. The central function of the American Council on Race Relations is to promote the integration of minorities into every phase of life.

For the present, a number of such areas of practical importance confront us to which special attention must be given. These are: (a) housing, (b) employment, (c) education, (d) religion, (e) health, welfare, recreation and community organization, (f) legislation, administration and public policy, (g) public opinion and mass communication.

For the foreseeable future these constitute the important substantive areas to which the major activities of the Council must be devoted. It is possible at this time only to indicate representative tasks which confront race relations agencies, and therefore the Council, in each of these problem areas.

a. Housing

Unequal opportunities, discrimination and segregation in housing represents one of the major problem areas to the solution of which a great deal of public and private effort is now being devoted. This involves both public policy and private attitudes and practices.

The problem of restrictive covenants and the methods of meeting this problem, especially through the courts, has become acute. It

is one of the functions of the Council to aid in the development of a model brief in which the scientific evidence, where now available and obtainable, can be brought to bear upon judicial decisions.

Similarly, in the field of housing, public policy expressed through the action of federal, state and local agencies significantly affects the status of racial and cultural minorities. The Council is undertaking to market authentic data which can be used to affect the policy of these agencies and the action of the citizenry. The Council may also be instrumental in affecting the action of investors, property owners, tenants and members of communities to influence private action in this field.

It is particularly important that reliable knowledge be obtained on the methods for avoiding or overcoming friction and tension. To this end, it is desired that the experience available in many parts of the country be analyzed so as to distill the knowledge gained for guidance toward wiser action in other cases. It is also important that cases of successful integration of minorities in respect to housing be scrutinized, evaluated and disseminated.

It is recognized that housing is merely one phase of community life and is interrelated with problems of social organization, economic and political life, and community planning. The Council is in cooperation with other agencies, and especially the specialized agencies in the field, is therefore, undertaking the following tasks:

> A clear definition of the nature of the housing problem insofar as it affects minorities; discover and maintain contact with the leading sources of information, maintain contact with the operating agencies and the technical personnel in the field; advise the operating agencies on programs, organization and personnel; foster inter-agency cooperation on policy, strategy and procedure; discover gaps in existing programs and call attention to emerging needs; discover gaps and deficiencies in knowledge and stimulate studies to improve that knowledge; promote staff conferences of technicians and policy makers; upon request of agencies, participate in the evaluation of programs; discover the feasibility and significance of pilot projects and stimulate and facilitate the conduct of such demonstrations; evaluate the demonstrations and publish and disseminate the authentic knowledge based upon these and other sources; work toward a wiser general strategy and more enlightened public policy.

b. <u>Employment</u>

The integration of minorities into the economic structure of America is unquestionably one of the chief subject matter areas with which race relations organizations will be concerned for some time

to come. This will be particularly true in the event of a contracting economy. It is therefore one of the on-going subject matter interests of the Council to guide policies and programs and to analyze achievements and failures in public and private employment insofar as it concerns the integration of minorities. This involves contact with unions, industry and business, as well as governmental agencies.

In the case of employment, as in the case of housing, the Council must obviously work in close cooperation with existing agencies in the field to the end that a national strategy may be attained which gives the greatest promise of remedying inequalities of opportunity.

c. Education

In the field of education, as in the two fields already mentioned, the Council is concerned with effective measures leading to the full integration of minorities. This involves both public and private educational institutions at all levels and in all parts of the country.

d. Religion

Notable progress has been made in recent months in calling attention of the American public to the existence of discrimination and segregation in churches and religious institutions. Because of the likelihood that the creeds of the religious denominations themselves may serve as an instrument in promoting the integration of minorities, no more promising area now exists in America for creating a force which will indirectly influence the whole American race relations scene. For this reason the Council is undertaking such collaborative action with other agencies as is conducive to the achievement of the Council's aim.

e. Health, Welfare, Recreation and Community Organization

Although the problems in the field of health, welfare, recreation and community organization are sufficiently akin to the problems of housing, employment and education as to call for essentially the same techniques, it should nevertheless be recognized that technical problems exist and technical knowledge is necessary in these fields to call for a specialized program of action. The Council is therefore cooperating with agencies in these fields for the fuller integration of minority groups and for the minimization of differential opportunities and services.

f. Legislation, Administration and Public Policy

This area of operation is not to be confused with the use of legislation as a means for reducing racial and cultural inequalities and discrimination applicable to all aspects of life. Rather, it should be noted that we are concerned here with legislation, administration and public policy directly affecting the status of

minorities, such as civil rights legislation, fair employment practices laws, the Human Rights Bill on an international scale, and related measures. With reference to these activities, the Council is attempting to become a stimulating, cooperating, and participating agency with the other leading agencies in the field and with such broad organized bodies of the citizenry as are concerned with them. In the case of administration and public policy, the Council is similarly concerned with such measures as executive orders, personnel practices, interpretations of the law by the courts and officials and with the expression of collective attitudes in public action.

g. Public Opinion and Mass Communication

Just as in the past the Council has undertaken a program designed to affect such specialists as policemen and public administrators, so it appears significant, in view of the importance of the mass communication agencies, that the Council attempt to bring to them such stimulation, guidance and facilities for developing a superior strategy as will make these agencies a force for the achievement of a more democratic America. To this end, the Council cooperates with and brings such services as it can to journalists, radio policy makers and technicians, the motion picture industry and agencies attempting through any mass instrumentality, to affect mass attitudes and mass behavior, the authentic knowledge which derives from research, tested experience and systematized theory. The Council does not itself intend to become a public relations agency, but rather to keep abreast of the problems in this field and through the same measures found useful in other areas of work bring its resources and influence to bear upon the policy and operations of the organizations and institutions that make up the opinion forming industry.

5. Organization

In order to carry out its objectives, the structure of the American Council on Race Relations obviously had to undergo significant changes. Among these are:

a. The abolition of the present Clearing House, Community Services and Information Service divisions.

b. The liquidation, as speedily as possible within the limitations of present urgent commitments, of field services to local communities and groups.

c. The establishment of closer working relations with national agencies in the field to the end that a common strategy may emerge, that the crucial issues will be adequately dealt with, and that the Council's role as a service agency to other agencies in the field, rather than as a direct action agency, become effective at the earliest possible moment.

HUMAN RIGHTS—OUR FIRST GOAL

AMERICAN COUNCIL
Report
ON RACE RELATIONS

JANUARY, 1948 VOL. 2, NO. 8

PUBLIC POLICY

OYAMA ALIEN LAND LAW CASE

The Supreme Court by a vote of six to three prevented California from barring ownership of land by Fred Oyama, a minor American citizen, whose Japanese father, Kajiro Oyama, paid the purchase price for the tracts. The Supreme Court refused to declare the California Alien Land Law unconstitutional, even though four justices insisted it should be.

Kajiro Oyama in behalf of his 19 year old son, Fred, challenged the validity of the state statute. He sued after California seized two small parcels in San Diego, bought when Fred was respectively six and nine years old. Oyama who is not eligible for naturalization made the purchase as Fred's guardian.

Chief Justice Fred M. Vinson wrote the majority opinion, from which Justices Stanley Reed, Harold H. Burton and Robert H. Jackson dissented. All three justices who dissented said the judgment against Oyama should not be upset unless the court proposed to declare the Land Law unconstitutional. The four jurists concurring with the result announced by Justice Vinson all held that the California Land laws should be invalidated as violative of the Constitution.

In seizing the land, California held that Kajiro Oyama had bought the land in his son's name as "subterfuge", and actually wanted to possess it himself. Chief Justice Vinson, held that there had been discrimination against Fred Oyama. He was "saddled with onerous burden of proof which need not be borne by California children generally," the Chief Justice stated. "In short," he continued, "Fred Oyama lost his gift, irretrievably and without compensation, solely because of the extraordinary obstacles which California set before him.

"The only basis for this discrimination against an American citizen, moreover, was the fact that his father was Japanese and not American, Russian, Chinese or English."

A WORLD BILL OF RIGHTS

"When are rights rights and what is the use of declaring them?" asks Charles E. Merriam in his recent Walgreen lecture on "A World Bill Of Rights" printed in the Social Service Review, December, 1947. His answer is pertinent to consideration of "To Secure These Rights" and to current discussion about the implementation of the Report.

"Ideals themselves are realities of the most real sort. The rights of man provide the domain of faith and hope in the government, the court of appeal which is never closed, the law beyond the law and beyond the jurists, the lawmakers, the managers, the adjudicators, and the effectuators. . . .

"If men had not believed that there was right beyond the lash and beyond the bayonet and beyond starvation, where would the world be today . . .

"The basic human right, common to all humanity, is the right to live, the right to the fullest and finest development of the potentialities of the human personality in the framework of the common good. This is the root right, from which all others stem. . . .

"On this basic right of life is built a long series of guaranties, protections, and safeguards, such as human equality as a prerequisite of a system of justice; respect for the human personality; equality of treatment without regard to race, creed, or sex; freedom of religion; freedom of the press; freedom of association; and a long and changing series of conditions under which life may be enriched. . . .

"If we aim at peace, security, prosperity, progress, the growth of the human personality — 'life, liberty and the pursuit of happiness' in our own phase—we must not stutter or stammer over the word 'rights' or hesitate to speak boldly and firmly now. We must use the symbols as well as the law of human hopes and aspirations, not the cautious and elaborate language of anxiety and fear of the unknown."

President Truman in his message on the State of the Union January 6th stated "Our first goal is to secure fully the essential human rights of our citizens. The United States has always had a deep concern for human rights . . . Today, however, some of our citizens are still denied equal opportunity for: education, jobs and economic advancement, expression of their views at the polls, and protection under our laws." He described discrimination as "utterly contrary to American ideals of democracy", and indicated that he will send to Congress a special message on the "important subject" of the recommendations of the Committee on Civil Rights.

The message included specific recommendations in areas which are of pressing concern to all minority groups:

Health

". . . a comprehensive insurance system to protect all our people equally against insecurity and ill-health."

Education

"If there are educational inadequacies in any state, the whole nation suffers. The federal government has a responsibility for providing financial aid."

Housing

"Within the next decade we must see that every American family has a decent home" by means of a long range housing program, public and private, and extended rent control.

Employment

Lift the minimum wage to 75c per hour, extend Social Security.

Public Policy

". . . assure the fullest possible civil rights to the people of our territories and possessions" and admit Alaska and Hawaii to statehood.

Introducing these specific programs, Mr. Truman described the source of our strength as a nation as spiritual. "For we are a people with a faith. We believe in the dignity of man . . . We seek answers which will embody the moral and spiritual elements of tolerance, unselfishness and brotherhood upon which true freedom and opportunity must rest."

(Con't from page 1)

Public Policy

MR. JUSTICE WILLIAM O. DOUGLAS

Mr. Justice William O. Douglas of the Supreme Court of the United States addressed the Altgeld Centenary Banquet in Chicago December 30th, describing John Peter Altgeld as "probably unknown to most Americans" but an inspiring figure because of the "character of his advocacy" in pleading the cause of mankind.

"We will be wise if we carry that philosophy into the world problems which confront us today . . . The victims of war in Europe and Asia need and ask our aid. But these people must not be treated as if they can be purchased with the dollar . . . We must make sure they know that our desire is not to make them satellites but to meet them as equals in a world where standards of decency and justice prevail."

On the domestic scene "courage and steadfastness of purpose are needed for protection of the civil liberties of our people. We are apt to leave that task to the faraway court in the state or national capital . . . A more accurate measure of the vitality of our Bill of Rights is not in the sporadic rulings of our highest tribunals but in the day to day attitudes of the lower courts . . . The executive and legislative branches of government also have responsibilities for enforcement," voting booths, habits of the police, city ordinances,—"these are all indices of the vitality of the Bill of Rights in the life of the community. So is the attitude of the community. For an indifferent community, like a misguided one, will surely breed disrespect for the standards embodied in The Bill of Rights . . .

"Yes, it takes courage to stand between an unpopular minority and the community . . . The lawyer may feel uneasy . . . the editor may be tempted . . . Even the clergyman may be under pressure . . . but those who are devoted to the democratic ideal . . . will take the direct and daring course once they are sure of their facts and know they are doing right."

Douglas offered an indirect challenge to his audience to go home and implement the Report of the President's Committee on Civil Rights:

"A people indifferent to their civil liberties do not deserve to keep them . . . a people who proclaim their civil liberties but extend them only to preferred groups start down the path to totalitarianism . . . To allow that to happen is to lose by default . . . But there will be no failure if we adhere steadfastly to our faith. For the goal of people of all races is toward a system which respects their dignity . . . "

COMMERCIAL FISHING

The Japanese American Citizens League is appealing the case of Torao Takahashi, Petitioner, vs Fish and Game Commission, Lee F. Payne, as Chairman Thereof, et al to the United States Supreme Court. The arguments of the JACL are that the California law which prevents "aliens ineligible to citizenship" from receiving licenses to engage in commercial fishing is unconstitutional in that it deprives a person of the right to earn his living and of the equal protection of the laws; because the law is aimed at Japanese aliens; because commercial fishing on the high seas is a matter for national legislation and treaty arrangements rather than one for state control.

The JACL Anti-Discrimination Committee is soliciting the aid of the Justice Department in the legal fight and is attempting to get the Attorney General to file a "friend of the court" brief in the case.

PUBLIC CARRIERS IN VIRGINIA

Stating that Congress had consistently refused to enact legislation which would ban segregation, Federal Judge John Paul in Roanoke, Virginia, ruled the first week in January that a public carrier has the right to establish its own rules for separate seating where separation is in line with local custom. The case, brought by a Negro minister against the Atlantic Greyhound Corporation, followed the recent decision declaring unconstitutional a Virginia statute covering segregation in public carriers.

COMMUNITY

DETROIT

The Interracial Committee of the City of Detroit is preparing a comprehensive report on restrictive practices in housing in Detroit in order to be ready to give the entire community the complete facts by the time the U.S. Supreme Court Restrictive Covenant Decisions are announced. The report will present basic source material which can be used in community interpretation and in the promotion of action programs that will result in the availability of more housing that is non-restricted.

Detroit and many other communities are preparing to use the general interest in the covenant cases to publicize their meaning, and gain new support for public and private action agencies. Whatever the court's decisions, the position of minorities will be more fully protected where the facts are known and objective analysis is encouraged.

LEGISLATION

NATURALIZATION AND IMMIGRATION

Congressman Walter H. Judd, Minnesota, in introducing H. R. 4824 on December 19, 1947 stated, "I believe we can greatly serve American interests by removing the stigma contained in our exclusion laws. We have done this for the Chinese, the Filipinos and the people of India. There is but a short distance to go to complete the task once and for all . . . The essential thing is that we perform as early as possible this act of justice and wisdom."

The Judd Bill (referred to Committee on the Judiciary) would amend the Nationality Act of 1940 to read that, "The right to become a naturalized citizen of the United States shall not be denied or abridged because of race"; and it would amend the Immigration Act of 1924 to extend the quota law so that "no decent person should be excluded from its application solely on the basis of his race or ancestry".

The Bill would remove certain arbitrary discrimination, "and yet admit per year only a few hundred more persons of Asiatic ancestry who are presently ineligible".

While the actual numbers of persons affected in Immigration would be small, the number affected in naturalization would be relatively large; the basic issue is, however, not one of numbers but one of removing basic inequalities from our statutes.

CURRENT LEGISLATIVE SESSIONS IN PROSPECT IN 1948

Listed below are the legislatures which will meet in regular session in 1948 according to The Council of State Governments:

Days on which sessions convene during 1948

California	March 8
Kentucky	January 6
Louisiana	May 10
Massachusetts	January 7
Mississippi	January 6
*Missouri	January 7
New Jersey	January 13
New York	January 7
Rhode Island	January 6
South Carolina	January 13
Virginia	January 14

Special Sessions

Arizona	January 5

*In regular 1947 session.

EDUCATION

REPORT OF THE PRESIDENT'S COMMISSION

The first three volumes of the Report of the President's Commission on Higher Education have been presented to the President and three volumes are in process.

Volume 1, "Establishing the Goals", concludes that "America's strength at home and abroad in the years ahead will be determined in large measure by the quality and the effectiveness of the education it provides for its citizens".

Volume 2, "Equalizing and Expanding Individual Opportunity", urges legislation embodied in Fair Educational Practices Acts in preference to reliance upon voluntary action by individual schools and colleges. The Commission finds that discrimination in admission policies has been aggravated in recent years, and has excluded many qualified Negro, Jewish, Catholic, Oriental and other applicants from educational institutions in all parts of the nation. It recommends legislation that will require fair admission policies in all public and private schools.

Volume 3, "Organizing Higher Education", appraises organizational problems and makes specific recommendations which include a series of two-year community colleges throughout the country to provide free education.

Volume 4, "Staffing Higher Education".

Volume 5, "Financing Higher Education".

Volume 6, "Resource Data".

OKLAHOMA

The U. S. Supreme Court, January 12th, (in a unanimous order rested on the Missouri Law School decision) stated that Oklahoma must afford immediate legal education to an eligible Negro woman and "provide it as soon as it does for applicants of any other group. The petitioner is entitled to secure legal education afforded by a state institution. To this time, it has been denied her although during the same period many white applicants have been afforded legal education by the state. The state must provide it for her in conformity with the equal-protection clause of the Fourteenth Amendment and provide it as soon as it does for applicants of any other group." The Court did not specify how Oklahoma must meet the requirements but during the arguments Justice Felix Frankfurter asked a number of questions about possible methods of immediate compliance: could Miss Sipuel be admitted to the university law school; a separate class be established in that school; could she be admitted temporarily pending establishment of a law school at Langston; or could Langston quickly set up a law school. The Oklahoma attorneys indicated regents had power to apply any of these methods.

When Justice Robert H. Jackson remarked that a law school for one student would provide only a limited law education, he indirectly commented upon the unavoidable inequities in many "equal but separate" educational plans.

NEW YORK

The Temporary Commission on the Need for a State University announced, January 12th, unanimous agreement on two important recommendations to Governor Dewey and the N. Y. Legislature: (1) the establishment of a state university consisting of community colleges in various parts of the state, medical centers and other professional schools; and (2) legislation outlawing racial and religious discrimination in admissions to private colleges and professional schools located within the state.

RESEARCH

An inventory of current research projects in the field of race relations and minority group problems has been initiated by the Committee on Education, Training and Research at the University of Chicago in cooperation with the American Council on Race Relations. The purpose of this inventory is to make readily available an up-to-date record of research in this field. It will provide facts about research projects in, or closely related to, race relations which have been initiated or completed since January 1, 1946. Under the present plans, questionnaires are being sent to all agencies and persons engaged in research in this field.

RELIGION

VIRGINIA COUNCIL OF CHURCHES

A proposal for concerted action in Virginia to end inequalities based on race, creed or color was adopted at the December meeting of the department of interracial cooperation of the Virginia Council of Churches. Citing the report of the President's Committee on Civil Rights, the council declared that "substantial advances have been made in recent years in the area of race relations" and expressed the hope that church, ministerial and lay organizations would use the report as a special project for study and action.

WELFARE

SOCIAL SECURITY

Among federal agencies who prepared information for the President's Committee on Civil Rights was the Federal Security Agency which published in the November issue of the Social Security Bulletin an article "Equality of Rights to Social Security" based on its statement to the committee.

"Since Negroes are heavily represented in agriculture and in domestic service, the limitations in the coverage of the insurance program bear on them with special severity. Relatively fewer Negro workers are insured against the risks of old age, death of the family earner, and unemployment; relatively fewer aged and unemployed Negroes or survivor families of Negroes are in receipt of benefits. One in every 10 Americans is a Negro, but Negroes constitute only 6 in every 100 workers who are fully insured under old-age and survivors insurance and only 6 in every 100 beneficiaries. The remedy, in the opinion of the Social Security Administration, is congressional action to extend coverage to the occupational groups now outside both the insurance programs . . .

"The inequalities in treatment that arise in public assistance are of a somewhat different character. They relate largely to differences among the States and counties in tax resources, in willingness to finance specific programs, and in the elements that are considered in the determination of eligibility . . .

> "Federal funds for public assistance would not be available to States whose plans provided for discrimination on the basis of race, color, or creed . . .
>
> "In November 1944 the regulations governing the administration of the crippled children's program were amended to make it mandatory that an approved plan 'provide that diagnostic services will be made available . . . to crippled children without restrictions as to race, color, creed, economic status, legal residence' . . .
>
> "The experience under all the social security programs emphasizes the importance of positive measures directed toward equality of opportunity and equality of access to needed services."

HOUSING

RACE RELATIONS ADVISORS

The Housing and Home Finance Agency submitted a detailed statement of policy and operation to the Committee on Civil Rights describing the function of Racial Relations Advisors, and quoting from memoranda and correspondence on the subject of due consideration to minority needs.

Examples:

"Our purpose is to provide proper housing for all groups. It is a problem that must be attacked vigorously and by actively seeking the cooperation of realtors, builders and lenders."

"*Planning with* rather than *planning for* such groups (minority) became the prevailing approach."

"The determination by local housing authorities of racial occupancy patterns in public housing projects has been reinforced by the growing trend to decentralization in administration of public programs and limitation of mandatory controls to compliance with statutory requirement."

It concluded that administrative policies would be strengthened by legislative support requiring that

"all elements of the population have opportunity to share equitably in the benefits of housing programs in which public funds and powers are utilized . . ."

ADMINISTRATION

WISCONSIN

The Governor's Commission on Human Rights, created by the 1947 legislature, has established eight committees: Executive, Finance, Publicity, Intercultural Education and

Committee on Affiliated Groups (elective officers and state agencies) to implement a program of anti-discrimination education.

Committee on Inter-racial and Interfaith Activities to cooperate with all other organizations of this nature,

Committee on Civil Liberties to examine literature and incidents of "hate tension", and

Committee to Survey Wisconsin Laws to determine if they adequately safeguard the individual's right to equal treatment irrespective of religion, race or national origin.

The Commission has directed its executive committee to refer violations of Wisconsin Civil Rights Laws to the attorney general and to county district attorneys for prosecution. In this regard a number of alleged violations have been mentioned to the Commission, including statements that a number of Wisconsin resorts violate the law by policies of restrictive clientele.

ACRR PUBLICATIONS

For $5.00 per year, any individual or agency will receive all publications issued by the American Council on Race Relations during the course of the year. Included is REPORT, the ACRR monthly newsletter.

EMPLOYMENT

NATIONAL COMMISSION AGAINST DISCRIMINATION IN EMPLOYMENT

President Truman's budget recommendations sent to Congress January 12th include a million dollars for a national commission "to establish a Federal program for the elimination of discriminatory employment practices based on race, religion, color or national ancestry".

The proposed commission would serve purposes comparable to those of the Fair Employment Practices Committee set up on a temporary basis during the war, and are in line with the recommendation of the Committee on Civil Rights that the Federal and state governments pass fair employment practices acts and to establish Commissions for their administration and enforcement.

CIO CIVIL RIGHTS CONFERENCE

The first national CIO Civil Rights Conference is announced to be held in Cleveland, February 19-20. CIO President Philip Murray and Secretary James B. Carey expect 500 union leaders to meet to plan methods to "back up the recommendations of the President's Commission on Civil Rights and improve the work of CIO unions against discrimination".

HEALTH

NURSES' ASSOCIATIONS—MISS. AND W. VA.

The state nurses' associations of Mississippi and West Virginia are now open to all qualified nurses regardless of race. Tennessee, Oklahoma and Kentucky opened their membership earlier in 1947.

EDUCATION

RESEARCH

As reported in the January, 1948 issue of REPORT the purpose of the Inventory of research in racial and cultural relations initiated by the Committee on Education, Training and Research at the University of Chicago in cooperation with the American Council on Race Relations is to provide information on current research which will be of value to persons and agencies engaged in research and action programs in this field.

The Inventory is being conducted by means of a questionnaire which to date has been mailed to over 250 agencies, including institutions of higher learning, research centers, and organizations concerned with the problems of racial and cultural relations. They were asked to describe their research projects initiated or completed since January 1, 1946.

Since March, 1947, when the Inventory was initiated, 147 agencies have responded. A total of 135 projects was reported by 75 agencies. Of the total number of projects 85 were carried on by colleges and universities.

BRANDEIS UNIVERSITY

Dr. Abram L. Sachar, first President of Brandeis University, has stated that the new Jewish-sponsored secular school of higher learning at Waltham, Massachusetts will open on October 11 with an enrollment of 135 students.

Dr. Sachar told a press conference that he hopes that close "personal relationships" between undergraduates and professors will "develop almost into a tutorial system". "This will be achieved", he added, "by keeping a numerical faculty-student ratio of ten or twelve to one, while the residence of faculty members will be located near student dormitories".

TEXAS

Segregation of Mexican American pupils in Texas schools except in the first grade was held unconstitutional in a ruling handed down by the United States District Court Judge, Ben Rice, in Austin on June 15. Children of Mexican descent can be segregated from Anglo Americans in the first grade only when they are not familiar with the English language, for classroom purposes only.

The suit was brought last November on grounds that segregation of school children of Mexican descent "deprives them of the equal protection of the laws and of liberty and property without due process of law in protection of the Fourteenth Amendment". The final judgment was in the form of an agreed decree; there can be no appeal from it to higher courts. The judgment does not affect segregation of Negro pupils.

Judge Rice further held that schools in which first grade pupils are segregated must be on the same campus as those for Anglo Americans of the same grade.

Mexican Americans "can be separated only after they are given scientific and standardized tests which show they do not possess a sufficient familiarity with the English language to understand classroom instruction in first grade subject matters", the court held. The same tests must be given to Anglo American pupils.

The judgment was entered in a suit brought by 22 pupils in four Central Texas school districts through their parents. The suit was against the districts, the State Board of Education and the State Superintendent of Public Instruction.

The judgment also specified that if any school district, in obedience to the decree, found it necessary to move school buildings or erect new ones to conform to the ruling, it be given a reasonable time, but in no event beyond September 1, 1949.

We are presenting excerpts on civil rights taken from the texts of the platforms adopted by the Democratic and Republican parties.

DEMOCRATIC PARTY PLATFORM:

The Democratic party is responsible for the great civil rights gains made in recent years in eliminating unfair and illegal discrimination based on race, creed or color.

The Democratic party commits itself to continuing its efforts to eradicate all racial, religious and economic discrimination.

We again state our belief that racial and religious minorities must have the right to live, the right to work, the right to vote, the full and equal protection of the laws, on a basis of equality with all citizens as guaranteed by the Constitution.

We highly commend President Harry Truman for his courageous stand on the issue of civil rights.

We call upon the Congress to support our President in guaranteeing these basic and fundamental rights: (1) the right of full and equal political participation, (2) the right to equal opportunity of employment, (3) the right of security of person, (4) and the right of equal treatment in the service and defense of our nation.

We pledge ourselves to legislation to admit a minimum of 400,000 displaced persons found eligible for United States citizenship without discrimination as to race or religion. We condemn the undemocratic action of the Republican Eightieth Congress in passing an inadequate and bigoted bill for this purpose, which law imposes un-American restrictions based on race and religion upon such admissions. . . .

* * *

In his acceptance speech for the nomination of president, President Truman announced that he is calling Congress into special session on July 26 to act upon vitally needed measures such as aid to education; a national health program; civil rights legislation; an increase in the minimum wage; an extension of social security coverage and increased benefits; and funds for projects needed to provide public power and cheap electricity.

REPUBLICAN PARTY PLATFORM:

Constant and effective insistence on the personal dignity of the individual and his right to complete justice without regard to race, creed or color, is a fundamental American principle.

(over)

We aim always to unite and to strengthen; never to weaken or divide. In such a brotherhood will we Americans get results. Thus we will overcome all obstacles. . . .

Lynching, or any other form of mob violence anywhere, is a disgrace to any civilized State and we favor the prompt enactment of legislation to end this infamy.

One of the basic principles of this Republic is the equality of all individuals in their right to life, liberty and the pursuit of happiness. This principle is enunciated in the Declaration of Independence and embodied in the Constitution of the United States; it was vindicated on the field of battle and became the cornerstone of this Republic. This right of equal opportunity to work and to advance in life should never be limited on any individual because of race, religion, color, or country of origin. We favor the enactment and just enforcement of such Federal legislation as may be necessary to maintain this right at all times in every part of this Republic.

We favor the abolition of the poll tax as a requisite to voting.

We are opposed to the idea of racial segregation in the Armed Services of the United States. . . .

We favor equality of educational opportunity for all and the promotion of education and educational facilities. . . .

We favor self-government for the residents of the Nation's Capital. . . .

PUBLIC POLICY

ARIZONA

The right to vote for Indians residing in reservations in Arizona was placed before the State Supreme Court upon conclusion of oral arguments.

Arizona Congressman, Richard F. Harless, who initiated the legal action some time ago when he filed suit in Maricopa County Superior Court on behalf of two Fort McDowell reservation Indians argued in favor of the voting privilege for Indians.

The case was brought before the high court on appeal from a superior court order dismissing the action.

The State's position is that the reservation Indians are not entitled to ballot because they are wards of the federal government.

Harless stated that the Nationality Act passed by Congress in 1924 granted Indians full citizenship. He further argued that there is no Arizona constitutional provision against Indians voting. "There is", he said, "merely a statutory definition of what constitutes guardianship".

HEALTH

AMERICAN NURSES' ASSOCIATION

At the biennial convention of the American Nurses Association held in Chicago, it was voted by the House of Delegates of the ANA that Negro nurses throughout the country be admitted to the ANA. Approximately 300 qualified Negro nurses in the South have been denied membership in the past because of State bans. In these Southern States Negro nurses are not permitted to join district associations thus disqualifying them for State and national associations. Membership in district and State groups automatically entitled a nurse to membership in ANA.

Nurses may now join directly where they have been denied membership in local groups. Out of the 10,000 who attended the convention, about 200 were Negro nurses.

The resolution was an outgrowth of the 1946 biennial meeting when all State groups were notified that in the case of Negro nurses to whom Southern State associations refuse membership, definite action to achieve this end would be taken in this convention.

According to rules of the national group, only nurses who are members of State groups could qualify for membership. This blocked Negro nurses except in Northern States. It also prevented them from securing jobs which required ANA membership. All states except eight have admitted Negroes. These eight refused to do so and ANA passed a resolution which admits nurses to the national body regardless of what the States do.

AMERICAN MEDICAL ASSOCIATION

The American Medical Association refused to change its constitution by which county medical associations throughout the country exclude Negro physicians from membership.

Ignoring a resolution sponsored by the New York State delegation (See June REPORT) which sought to eliminate the barriers against Negro physicians that exist in 17 states and the District of Columbia, the House of Delegates of the AMA accepted unanimously a counter-resolution proposed by the Georgia delegation designed to strengthen the right of the county associations to limit membership.

As recommended by the Georgia delegation, membership in the AMA would be open to only those qualified physicans who are active members in their constituent organizations "as determined by their constituent association". Prior to adopting this change in the constitution of the AMA no mention was made of the rights to be enjoyed in the selection of members by the association that make up the national body.

Exclusion from membership in the AMA automatically prevents a doctor from being certified as a specialist by the various national certifying boards.

HOUSING

POPULATION AND HOUSING

In a study recently completed by the Housing and Home Finance Agency entitled "Housing of the Nonwhite Population, 1940 to 1947", statistics indicate that the nonwhite population increased faster between 1940 and 1947 than the number of dwelling units it occupied. This was true in urban areas (nonfarm) where the nonwhite population rose by a third and the number of dwelling units for nonwhites increased only a fourth. The result has been more doubling up and less space per person among the nonwhite population during this period. (Negroes constitute the bulk of the nonwhite population.)

In certain respects, the study reports, the housing situation for nonwhites showed improvement. The nonwhite population showed a greater proportionate increase in home ownership, reflecting in part improved incomes, and the relative condition of housing occupied by nonwhites showed proportionately greater improvement than that for whites.

Even with this improvement, however, the report shows that nonwhites are still below the level of whites, both in the quality of housing they live in and in the amount of space they occupy per person.

"Although the housing conditions of the nonwhite population have improved in several respects since 1940", Administrator Raymond M. Foley of the Housing and Home Finance Agency, states in the foreword of the report, "we must realize that the job of housing the nonwhite population is far from finished. But to do that job it is necessary to know what has occurred among the nonwhite population during the seven turbulent years since 1940—which is what this study attempts to do".

LEGISLATION

EVACUATION CLAIMS BILL

H. R. 3999, the Evacuation Claims Bill, was signed by the President which gives the Justice Department authority to adjudicate claims of business and property losses sustained by persons of Japanese ancestry as a direct result of the evacuation for losses up to $2,500. Larger claims must be satisfied through private bills which are subject to the approval of Congress.

The Senate made thirteen changes in the wording of the bill, of which the most important is the addition of a provision that no claims will be considered regarding the loss of anticipated profits or anticipated earnings.

Congressional observers noted that the evacuee claims bill was the only part of President Truman's civil rights program to be approved by both houses of Congress.

Credit for the passage of Bills H. R. 3999 and H. R. 3566, the Deportation Stay measure, goes to the work of the Japanese American Citizens League's Anti-Discrimination Committee.

COMMUNITY ORGANIZATION

BIRMINGHAM

A new branch of the National Urban League has been recently formed in Birmingham, Alabama. Dr. Henry M. Edmonds is Chairman of the group. Dr. W. A. Bell is Vice-Chairman; C. W. Lee, Treasurer, and Robert Durr, Secretary.

The League's program of action includes the following aims:

1. Equality of economic opportunity.
2. Slum clearance and low cost housing through cooperation of public agencies, real estate interests and tenant groups.
3. Stimulate and organize vocational training and guidance for Negroes.
4. Investigate conditions under which Negroes labor and live; work with local organizations for special improvements.
5. Work for more efficient use of facilities and services in education, recreation and health to combat effects of population growth and congestion in Negro neighborhoods.

In order to improve industrial relations the League aims to work with management to seek satisfactory employment experience with Negroes. It also proposes to work with labor leaders toward improved relationships between Negroes and whites and among Negroes themselves to assure understanding of their responsibilities as employees.

EMPLOYMENT

NEW YORK AND MASSACHUSETTS

The joint action of the Massachusetts Fair Employment Practice Commission and the New York State Commission Against Discrimination, with the cooperation of the New York, New Haven and Hartford Railroad Company, has resulted in changes in personnel practices on the railroad's dining and grill cars.

In 1947 complaints were filed in New York and Massachusetts which charged that the then existing policy of the railroad in hiring only white persons as stewards and grill car employees violated the Massachusetts and New York anti-discrimination statutes.

The complaints further charged that the overall hiring policy of the railroad in all categories of employment, including clerical, administrative, maintenance and operation, skilled and unskilled, was discriminatory toward Negroes.

After investigation and conferences between representatives of the New Haven Railroad and members of the Massachusetts FEPC and New York SCAD an understanding was reached.

As a result, crew personnel in the dining services will be selected and allowed to exercise their seniority rights in accordance with their qualifications under the terms of the agreement by which they are covered without regard to race.

Negro workers will no longer be limited to jobs as cooks, waiters, and dishwashers, but also will be hired as stewards, conductors and engineers.

PHILADELPHIA

Headquarters of Philadelphia's Fair Employment Practices Commission were formally opened recently in Room 395-A, City Hall with Common Pleas Court Judge Gerald F. Flood, Chairman of the Commission, announcing an early "educational program" to abolish discrimination in hiring employees.

The office will be in charge of James T. Howshall, Assistant Clerk of the Commission, and will operate five days a week. The full Commission will meet weekly.

The commissioners, in addition to Judge Flood, are Louis B. Raycroft, Norman Blumberg, Dr. Tanner G. Duckery and F. Curtis Davis.

ADMINISTRATION

LIBERIAN FOUNDATION

Dr. Edwin R. Embree, after having served 20 years as the president of the Julius Rosenwald Fund which closed permanently on June 30 of this year, has been elected President of the Liberian Foundation it was announced by Edward R. Stettinius Jr., Chairman of the Board of the Liberia Company.

The foundation was set up last fall to assist in the advancement of health, welfare and education programs in the West Africa republic. The foundation received ten per cent of the stock of the Liberia Company as its initial grant. The company is a joint American Liberian organization to develop both the human and natural resources of the republic.

RECREATION

NATIONAL THEATER

Marcus Heiman, President of the East Street Theater Corporation which operates the National Theater, Washington's only legitimate playhouse has announced that he will convert the theater into a motion picture house rather than come to an agreement with the no-discrimination ultimatum set by the Actor's Equity. (See August, 1947 issue REPORT)

Equity has refused to permit its members to play the National after August 1, 1948 unless the management removes the ban which prohibits admission of Negroes. Equity took this position as the result of a campaign initiated by the Committee for Racial Democracy in the Nation's Capital of which Miss Ida Fox is Executive Director.

Education (Cont'd)

NEW JERSEY

New Jersey educational authorities announced that racial segregation practiced in many school districts for many years, was being ended in 22 communities in time for the September opening of schools.

Dr. John H. Bosshart, State Commissioner of Education, reported this progress to the State Board of Education. He was directed to commend the school authorities of the 22 municipalities and continue the work among about 30 more where segregation continues. A survey by the Department in January indicated most of the segregation existed in south Jersey.

NEW ACRR PUBLICATIONS

"To Secure These Rights" in YOUR Community

A Manual for Discussion, Fact-Finding and Action in State and Local Communities.

A practical, flexible and realistic guide which in preparation profited by the critical review of the experts on the staffs of numerous national, state and local organizations.

It is offered to the people, the organizations and the communities of the nation who believe in the American Creed in the hope that through the specific ways and means it outlines, we may come nearer to the day when it will no longer be necessary to qualify our laws, our public policies, or our actions by the words, "irrespective of race, creed or national origin."

It describes steps YOUR community can take in:

Employment	Voting
Housing	Law Enforcement
Education	Recreation
Health Services	Religion
Welfare	Public Accommodations

72 pages, 50c postpaid. Quantity rates on request. Special discount to libraries.

Directory of Agencies in Intergroup Relations

National, State and Local

An indispensable volume for organizations or individuals interested in the problems of minority groups in the United States.

The most complete compilation of its kind. More than 1100 organizations are listed for easy reference, with valuable summary tables.

It answers the following questions:

How many national, regional, state and local organizations—public and private—are concerned with racial, religious, ethnic or cultural relations and problems?

Where are they located; what is their membership; what are their financial resources?

What problems do they work on and with what methods? What services do they offer?

200 pages, $1.50 postpaid. Limited Edition. Special discount to libraries.

EXECUTIVE ORDERS ON DISCRIMINATION

AMERICAN COUNCIL
Report
ON RACE RELATIONS

AUGUST, 1948 VOL. 3, NO. 3

(EDITOR'S NOTE: When information of widespread import to the entire field of intergroup relations warrants, a special edition of REPORT is released. The May issue was concerned with the Supreme Court decisions outlawing restrictive covenants; this issue is concerned with the recent executive orders on fair employment practices in federal government establishments.)

A Political Maneuver?

Executive Orders 9980 and 9981 are significant and far-reaching steps toward the clarification of the policy of the nation as to equality of opportunity and treatment within the agencies of the federal government. The action of the President comes in an election year and has evoked the charge that it is a "political maneuver." However, the considerations which motivated the action of the President are of minor importance except as they may throw light upon the social and political climate of the day; upon the impatience of the general public with our undemocratic shortcomings, and the pressure of our expanding political democracy upon the seats of power and authority. In such a context, it is correct to regard the action of the President as a "political maneuver," but in the proper sense of those words, namely, as a bona fide response to the urgings and insistence of the body politic.

In many respects the present directives have emerged out of a situation not unlike that which produced the wartime Fair Employment Practices Committee and the wartime relaxation of rules and regulations with reference to the utilization of minority group personnel in the armed forces. However, those measures undertaken in connection with the war effort passed from the scene with the termination of the military emergency and there remain only lingering evidences of their influence upon the firmly entrenched practices of the government bureaus and the military establishment. The recent action of the President is of more profound and continuing significance. For it should be recognized that these administrative orders have not been issued in connection with a "national emergency" and are, furthermore, directly within the scope of the normal peacetime authority of the Chief Executive. They are in no wise an invasion of the area of legislative prerogative, as might be the case were the President to seek to establish a general fair employment practices committee without benefit of congressional action. On the other hand, the jurisdiction of the President with reference to the armed forces and the administration of the executive departments of the government is clear.

The action of the President is a direct and forthright implementation of the spirit and meaning of our basic constitutional law. Correspondingly, these executive orders take on an unprecedented significance. In practical political terms, they are irrevocable. They cannot be repudiated or lightly taken by a successor. They are hard, solid facts which are here to stay and represent a condition which every personnel officer of a government bureau or responsible officer in the military establishment must conjure with in the foreseeable future. By the same token, they erect a protective barrier behind which the equitable administration of the civil service code can go forward. Forthright and responsible personnel officers may now effectively resist the incursions of congressmen from "the Hill" who would seek to shape the personnel practices in the several agencies in accord with their own private or sectional views concerning matters racial or religious.

The Orders and Public Policy

The presidential directives do not initiate a new public policy. That policy has long been an implicit feature of the American democratic creed. Furthermore, it has received explicit and frequent affirmation in the acts of legislative bodies, both national and state, and in the host of decisions which have come down from the courts. However, the application of the democratic creed has not always received that direction and specificity which encourages a bridging of the gap between our professed ideals and our practices. Hence public policy as it affects discrimination in federal employment or in the armed services has remained a moot question. Notwithstanding the nondiscriminatory content of the American Creed and our verbal allegiance to that ideal, the agencies which operate directly under its color have exhibited personnel practices and discriminatory arrangements which have given the lie to our presumably democratic public policies. In this respect, the recent executive orders are more than a mere reaffirmation of public policy. They represent a crucial demonstration of its meaning in a specific and practical context and dismiss whatever ambiguity has resided in the contrast between our abstractly stated policies and the agencies which operate under their immediate influence and direction.

The Situation in the Government

The existence of discrimination in government employment and in the armed forces needs little documentation. Varied as are the personnel practices of the several departments of the government, at no point and of no agency can it be said that the civil service regulations forbidding discrimination on grounds of race, religion, or ethnic origin have been fully implemented. It would be enough to say that the executive orders are themselves an acknowledgement of our shortcomings and an effort in the direction of remedying the situation. However, discrimination is so widespread and yet of so variable a pattern that some comment is in order. In the District of Columbia, the government employs fully one-third of the gainfully employed workers. It follows that it lays down the pattern as to personnel practices for the whole community. The picture within the several agencies varies from bureau to bureau. Practices as to race and religious discrimination can be expressed as a continuum. At one end we have the agencies which practice a systematic policy of exclusion. Members of racial and religious minorities are conspicuously absent at nearly all levels of employment in these agencies. Then there are those which employ minorities, for example, Negroes, but confine them to segregated-units. At the other end of the continuum there are those agencies (particularly the new war-

time agencies, most of which are now defunct) which made some genuine attempts at integration. Throughout the whole service the Negro is confined to the lower menial categories, irrespective of education and skill. The general tone of the situation is indicated in the case study of one government agency, conducted by the National Committee on Segregation in the Nation's Capital, which is reported in the Report of the President's Committee on Civil Rights:

"Samples of Negro and white workers in this agency were matched for the variables of age, sex, marital status, educational level, length of service, division in which inducted, and job title and grade at which inducted. Out of 503 whites and 292 Negroes inducted into the agency in the fiscal year 1946, 40 pairs were perfectly matched for these variables. A few more Negroes than whites had veteran status, but the average agency ratings for the two groups were exactly the same.

"A check on promotion and resignation for the sample was made in April, 1947. It was found that the whites had received 12 grade promotions in a total of 22 years. This was an average of one promotion for each two man-years of service. The Negroes had received two grade promotions in a total service of 28 man-years. This was one promotion for each 14 man-years. In other words, it took the average Negro seven times as long as the average white to get a promotion, in spite of the fact that almost all of the variables which could affect promotion were exactly the same."

[Report of the President's Committee on Civil Rights, "To Secure These Rights," (Washington, D. C., 1947, pp. 58-59.]

The National Committee on Segregation in the Nation's Capital has made exhaustive studies of the discriminatory pattern and is presently preparing its findings for publication. [Report of the National Committee on Segregation in the Nation's Capital, "Segregation in the Nation's Capital," to be released in November 1948]. This report should be useful in clarifying the conditions and terms of discrimination as well as the factors which account for the variations in the pattern. Such information can be useful in bringing to the surface the considerations which subvert top-policy directives and subordinate such policies through the informal pressures of bureaucratic organization. The task of achieving more democratic and nondiscriminatory personnel practices throughout the government is essentially one of insuring that the various echelons of organization are so committed and are under such surveillance as to permit the integrity of top policy directives to be faithfully maintained at all levels within the agency.

Systematic discrimination in government service came to the fore during Taft's administration and received terrific impetus under Woodrow Wilson. As recently as 1938, 90 per cent of all the government's colored employees were confined to the lowest custodial-labor jobs. The situation was somewhat improved during the war years when Negroes helped solve the critical manpower shortage and emerged in clerical and filing capacities and also in a few professional categories (mainly as race relations advisers). The postwar years have revealed these gains as temporary and they are rapidly being lost. The same is true of the armed services where unit-segregation is openly practiced and assiduously defended, on the ground of military expediency.

The discriminatory pattern of government service has prevailed notwithstanding the fact that the stated and official policy of the government is unequivocal. Under the Ramspeck Act of 1940 which modernized our Civil Service procedures, Congress declared itself in the following language:

"In carrying out the provision [of the Civil Service classification system], there shall be no discrimination against any person or with respect to the position held by any person on account of race, creed, or color." [Public Law 1881, 76th Congress, 3rd Session, Title 2, Section 3 (E).]

Executive Orders 9980 and 9981 are designed to provide the machinery for effectively implementing that policy and redressing the widespread discrimination which is so abundantly and embarrassingly evident.

The Federal Fair Employment Practices Order

The provisions of Executive Order 9980 are designed primarily to assign responsibility and provide a machinery to " insure that this long-established policy [of fair employment] shall be more effectively carried out . . ." In the absence of such provisions it has been a matter of personal preference and/or administrative expedience as to whether personnel officers were disposed to undertake seriously the establishment of fair employment practices. Under the order, personnel officers are specifically "authorized and directed to take appropriate steps to insure" that discriminatory practices are eliminated from the personnel function. Indeed, the responsible agency heads have been made strictly accountable, for the President has directed that "the head of each department in the Executive branch of the government" is to be held personally responsible for a program to insure that fair employment practices are observed within their respective departments. The effect of such an order is to definitely subordinate the personal preference of the personnel officer in employment matters, and to fix responsibility in the event that such officers permit their private views or outside pressures to interfere with their administrative functions.

In the vast and intricate apparatus of the federal bureaus, purposes of the highest order may be thwarted or put aside in the absence of a specific personnel to pursue those purposes. Executive Order 9980 has provided a machinery for bringing the personnel practices of the various agencies under continuous examination and review. Heads of departments are instructed to designate an official as Fair Employment Officer with full operating responsibility in carrying out the government's nondiscriminatory policy. This officer is called upon to periodically appraise the personnel action of the department; receive complaints and appeals concerning discrimination; deputize other officers or regional deputies to facilitate the investigation and receipt of complaints; and to take necessary corrective or disciplinary action in consultation with or under the authority of the department head.

Important as is the creation of responsible personnel, the full force of the directive order could only be realized if the accountability of the whole procedure and administrative apparatus to the President and the wider public were assured. This has been accomplished by the establishment in the Civil Service Commission of a Fair Employment Board. This Board is of no less than seven members drawn from the personnel of the Civil Service Commission. It has the quasi-judicial function of reviewing decisions of department heads and the authority to commend to the attention of the President those cases in which it finds its recommendations not promptly and fully carried out. The Board also enjoys a rule-making function in carrying out the purposes of the order; advises the several departments on problems and policies; disseminates information; coordinates the fair employment policies and procedures of the departments; and makes reports and recommendations for transmittal to the President. In the event an appeal concerning the findings or action of the Fair Employment Officer to the head of a department proves unsatisfactory, aggrieved employees may bring their complaints before the Fair Employment Board of the Civil Service Commission.

Effect on Government Agencies

The possible short-run effects of the order are difficult to assess. But it can be said that the "freedom to discriminate" has been drastically curbed. What was formerly in the area of personal disposition, permitting even a flat negation of public policy, has become an unmistakable condition of responsible supervision. Personal prejudice and pressures to subvert Civil Service Regulations can be identified and exposed for what they are. Excesses, which for the most part have been permitted to remain covert and informal, are now susceptible to public and formal review. The salutary effects of bringing personnel practices into the open cannot be underestimated. The picture of extreme variation in the workings of the various bureaus gives the lie to protestations that democratic personnel practices are impractical. The plain fact is that nondiscriminatory personnel practices do exist and are found to prevail when department heads and personnel officers elect to act in a responsible and forthright manner. Furthermore, to make known the contrast between the employment practices and experiences of such wartime agencies as the Office of Price Administration and the National War Labor Board on one hand, and the State Department and the Treasury Department on the other, is in itself a guide to action. The coordinating function of the Fair Employment Board can provide the direction and guidance which those agencies and individuals whose discriminatory practices have denied them experiences and adequate basis for generalizing about intergroup contacts, require. Much of discrimination is erected upon a false, pragmatic notion of what will or will not work, irrespective of the facts as to the experience of others. To effectively subordinate these private and questionable notions and elevate personnel practices to the level of the verified knowledge about human relations is not the least important contribution that emerges from the executive order.

Implications for State and Local Governments

The implications for state and local governments are unlimited. Indeed, a pattern is laid down, which becomes a challenge to every state and municipal executive. For as the President has exercised his power and jurisdiction over the federal agencies, governors and mayors might well develop similar machinery in their respective jurisdictions. Thus they may bring their local governmental employment and personnel practices in line with state laws and municipal ordinances. There are a host of such nonfederal jurisdictions whose policy formulations are equal in their democratic content to those of the Federal Constitution and the acts of Congress. The exercise of executive power and authority in the implementation of the democratic creed is equal in importance to its affirmation. Indeed, legislation without such effective implementation can be empty and meaningless. The President's executive order makes possible the realization of the public purpose so clearly set forth in the provisions of the Ramspeck Act.

Committee on Equality of Treatment and Opportunity in Armed Services

Executive Order 9981 is essentially a declaration of policy and the establishment of an advisory committee to explore ways and means of effecting that policy, namely, "equality of treatment and opportunity for all those who serve in our country's defense." Insofar as the order provides the machinery for treating the problem, it is limited to an examination "into the rules, procedures and practices of the armed services in order to determine in what respect such rules, procedures and practices may be altered or improved with a view to carrying out the policy of this order." Hence Executive Order 9981 differs from 9980 in that it provides only a machinery for study and investigation into the pattern of the military organization as it may be deficient in affording equality of treatment and opportunity. This is a more limited scope than the quasi-judicial machinery for redressing specific discriminatory acts which is provided under Executive Order 9980.

The crucial problem which confronts the military is that of racial segregation. This it continues to justify on the ground of military expediency and necessity. The practice is not covert but is openly espoused. The military has clung to these views, notwithstanding the findings of wartime studies within the armed services, the strong statement of the President's Advisory Commission on Universal Training, and the equally strong recommendations of the President's Committee on Civil Rights. All of these have asserted that segregation in the armed forces is a liability and in no wise an asset in the organization of our defense.

Under the circumstances, the order may be described as the President's strategem as Commander-in-Chief of the armed services in coping with the resistance of the military establishment and in working out a program for facilitating changes in the direction of the publicly declared policies of equality of treatment and opportunity. The order gives due consideration to the difficulties inherent in bringing about a democratization of the military establishment. Indeed, there is a concession which may be regarded in some quarters as an escape provision designed to give credence to the military's questionable notions concerning the necessity for segregation. The order provides that "This policy shall be put into effect as rapidly as possible, having due regard to the time required to effectuate any necessary changes without impairing efficiency or morale."

The Advisory Committee which is the kernel of the Act is called the President's Committee on Equality of Treatment and Opportunity in the Armed Services. It consists of seven members appointed by the President. This Committee is to confer and advise with the Secretaries of Defense, Army, Navy and Air Force. It is to make those recommendations to the President and to the Secretaries which are designed to achieve higher standards of democracy in the armed services. The Committee is a continuing one, authorized to exist until terminated by another executive order. For working personnel, the Committee is dependent upon the several departments of the federal government. These departments are authorized and directed to cooperate with the Committee and to supply the services of individuals as they may be required.

Importance of the Order

Executive Order 9981 is primarily important for the stand which the President takes in indicating the direction in which the armed forces must from now on face, and in providing an agency to explore ways and means of encouraging the armed forces to act in that direction. It follows that the effectiveness of the Committee's work will depend largely upon its membership. The personal composition of that body will give to the executive order whatever real force and meaning it may be able to exhibit. There are those who will argue that more specific steps should have been taken and that the Commander-in-Chief of the armed forces possessed the authority to eliminate segregation by express order. In any event, the speed with which we may move in that direction will now depend upon the stature and vigor of the Committee membership. By exercising direct influence on the respective Secretaries, as well as by means of timely reports and recommendations to the President, the Committee is in a position to bring under public scrutiny the military's reasons for retaining segregation and other undemocratic practices.

The two orders are milestones which stand with the recent Supreme Court decisions affecting restrictive covenants and higher education. They demonstrate that in government the area of administration and executive authority is equal in importance to legislation and judicial decision in bringing about a fuller realization of the democratic creed.

EXECUTIVE ORDER 9980

JULY 26, 1948

REGULATIONS GOVERNING FAIR EMPLOYMENT PRACTICES WITHIN THE FEDERAL ESTABLISHMENT

WHEREAS the principles on which our Government is based require a policy of fair employment throughout the Federal establishment, without discrimination because of race, color, religion, or national origin; and

WHEREAS it is desirable and in the public interest that all steps be taken necessary to insure that this long-established policy shall be more effectively carried out:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States, by the Constitution and the laws of the United States, it is hereby ordered as follows:

1. All personnel actions taken by Federal appointing officers shall be based solely on merit and fitness; and such officers are authorized and directed to take appropriate steps to insure that in all such actions there shall be no discrimination because of race, color, religion, or national origin.

2. The head of each department in the executive branch of the Government shall be personally responsible for an effective program to insure that fair employment policies are fully observed in all personnel actions within his department.

3. The head of each department shall designate an official thereof as Fair Employment Officer. Such Officer shall be given full operating responsibility, under the immediate supervision of the department head, for carrying out the fair-employment policy herein stated. Notice of the appointment of such Officer shall be given to all officers and employees of the department. The Fair Employment Officer shall, among other things—

(a) Appraise the personnel actions of the department at regular intervals to determine their conformity to the fair-employment policy expressed in this order.

(b) Receive complaints or appeals concerning personnel actions taken in the department on grounds of alleged discrimination because of race, color, religion, or national origin.

(c) Appoint such control or regional deputies, committees, or hearing boards, from among the officers or employees of the department, as he may find necessary or desirable on a temporary or permanent basis to investigate, or to receive, complaints of discrimination.

(d) Take necessary corrective or disciplinary action, in consultation with, or on the basis of delegated authority from, the head of the department.

4. The findings or action of the Fair Employment Officer shall be subject to direct appeal to the head of the department. The decision of the head of the department on such appeal shall be subject to appeal to the Fair Employment Board of the Civil Service Commission, hereinafter provided for.

5. There shall be established in the Civil Service Commission a Fair Employment Board (hereinafter referred to as the Board) of not less than seven persons, the members of which shall be officers or employees of the Commission. The Board shall—

(a) Have authority to review decisions made by the head of any department which are appealed pursuant to the provisions of this order, or referred to the Board by the head of the department for advice, and to make recommendations to such head. In any instance in which the recommendation of the Board is not promptly and fully carried out the case shall be reported by the Board to the President, for such action as he finds necessary.

(b) Make rules and regulations, in consultation with the Civil Service Commission, deemed necessary to carry out the Board's duties and responsibilities under this order.

(c) Advise all departments on problems and policies relating to fair employment.

(d) Disseminate information pertinent to fair-employment programs.

(e) Coordinate the fair-employment policies and procedures of the several departments.

(f) Make reports and submit recommendations to the Civil Service Commission for transmittal to the President from time to time, as may be necessary to the maintenance of the fair-employment program.

6. All departments are directed to furnish to the Board all information needed for the review of personnel actions or for the compilation of reports.

7. The term "department" as used herein shall refer to all departments and agencies of the executive branch of the Government, including the Civil Service Commission. The term "personnel action," as used herein, shall inclue failure to act. Persons failing of appointment who allege a grievance relating to discrimination shall be entitled to the remedies herein provided.

8. The means of relief provided by this order shall be supplemental to those provided by existing statutes, Executive orders, and regulations. The Civil Service Commission shall have authority, in consultation with the Board, to make such additional regulations, and to amend existing regulations, in such manner as may be found necessary or desirable to carry out the purposes of this order.

AMERICAN COUNCIL
Report
ON RACE RELATIONS

DECEMBER, 1948 VOL. 3, NO. 7

MASS COMMUNICATION

NORC

In view of the widespread interest in and use of sampling and interviewing techniques by intergroup relations agencies, the following statement bearing on the election forecasts by leading polling organizations was secured from the National Opinion Research Center:

"Mr. Truman has been elected President for the next four years, pre-election polls to the contrary notwithstanding. Their epic failure in this election has raised for everyone the question of why the polls proved wrong; for some, it has created doubts about whether opinion polls are ever to be believed, whether it is possible through them to get accurate, meaningful, useful information.

"Before we condemn polls out-of-hand, however, let's look at the steps in predicting an election. First of all, a poll must determine accurately how people are intending to vote as of the date of the poll. The major questions of opinion research methodology all enter here: there must be reliable sampling, careful questionnaire construction, skilled interviewing. But the problems of prediction only begin with the completion of an accurate survey. For, the prediction can be inferred from the opinion results only by bringing to bear upon them a set of assumptions—amounting really to prior predictions—which in no way derive from the opinion survey itself. That is, if we had taken a survey of election preferences on November 1st and taken it accurately, we would still have to predict which portion of the population would actually go to the polls, for it is the opinions of voters only that determine elections. Similarly, we would need to predict the decisions of people in our survey who had not yet made up their minds. Finally we would need some assumptions about the extent to which opinions will change or remain stable between the date of our poll and the actual balloting. Thus, our poll could be taken absolutely correctly without assuring accuracy of prediction.

"The inaccuracy of the national polls this time must be evaluated in terms of this double problem. On the one hand, their methods of collecting opinion data must be examined, to see what, if anything, they contributed to the blunder. And we know already that they have not always used the best sampling methods or the most carefully controlled interviewing procedures. But, on the other hand, the most approved methods of data collection could not have guarded the polls from the errors of unwarranted assumptions. Gallup, for example, correctly assumed a rather low voting turnout, but he further assumed, incorrectly, that this meant an advantage for the Republicans. On the basis of past experience, he assumed that there would be little shifting of opinion once choices were made, and that the "undecided" voters would finally crystalize their opinions in about the same proportions as the rest of the population. These things were true enough in past elections, so true, perhaps, that pollers incautiously began regarding them as general propositions rather than as past experience and present-day uncertain assumption. The special committee appointed by the Social Science Research Council to review the technical procedures and methods of in-

(Continued on Page 4)

The General Assembly of the United Nations at its final session adopted by a vote of 48 to 0 a Universal Declaration of Human Rights designed to guarantee to all mankind freedom, equality and justice before the law.

The following is the Universal Declaration of Human Rights as adopted by the General Assembly:

Universal Declaration of Human Rights

PREAMBLE

WHEREAS recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

WHEREAS disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people,

WHEREAS it is essential if man is not to be compelled to have recourse as a last resort to rebellion against tyranny and oppression that human rights should be protected by the rule of law,

WHEREAS it is essential to promote the development of friendly relations between nations,

WHEREAS the peoples of the United Nations have in the Charter reaffirmed their faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women, and determined to promote social progress and better standards of life in larger freedom,

WHEREAS the member states have pledged themselves to achieve, in cooperation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms,

WHEREAS a common understanding of these rights and freedoms is of the greatest importance for the full realization of this pledge,

Now, therefore,

THE GENERAL ASSEMBLY

Proclaims this Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote

respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the peoples of member states themselves and among the peoples of territories under their jurisdiction.

ARTICLE 1

All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

ARTICLE 2

Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, color, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.

Furthermore no distinction shall be made on the basis of political, jurisdictional or international status of the country or the territory to which a person belongs whether it be an independent, trust or non-self-governing territory or under any other limitation of sovereignty.

ARTICLE 3

Everyone has the right to life, liberty and the security of person.

ARTICLE 4

No one shall be held in slavery or servitude; slavery and the slave trade shall be prohibited in all their forms.

ARTICLE 5

No one shall be subjected to torture or to cruel inhuman or degrading treatment or punishment.

ARTICLE 6

Everyone has the right to recognition everywhere as a person before the law.

ARTICLE 7

All are equal before the law and are entitled without any discrimination to equal protection of the law. All are entitled to equal protection against any discrimination in violation of this Declaration and against any incitement to such discrimination.

ARTICLE 8

Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted him by the Constitution or by the law.

ARTICLE 9

No one shall be subjected to arbitrary arrest, detention or exile.

ARTICLE 10

Everyone is entitled in full equality to a fair and public hearing by an independent and impartial tribunal, in the determination of his rights and obligations and of any criminal charge against him.

ARTICLE 11

1. Everyone charged with a penal offence has the right to be presumed innocent until proved guilty according to law in a public trial at which he has had all the guarantees necessary for his defence.

2. No one shall be held guilty of any penal offence on account of any act or omission which did not constitute a penal offence, under national or international law, at the time when it was committed. Nor shall a heavier penalty be imposed than the one that was applicable at the time the penal offence was committed.

ARTICLE 12

No one shall be subjected to arbitrary interference with his privacy, home or correspondence, nor to attacks upon his honor and reputation. Everyone has the right to the protection of the law against such interference or attacks.

ARTICLE 13

1. Everyone has the right to freedom of movement and residence within the borders of each state.

2. Everyone has the right to leave any country, including his own, and to return to his country.

ARTICLE 14

1. Everyone has the right to seek and to enjoy in other countries asylum from persecution.

2. This right may not be invoked in the case of prosecutions genuinely arising from non-political crimes or from acts contrary to the purposes and principles of the United Nations.

ARTICLE 15

1. Everyone has the right to a nationality.

2. No one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality.

ARTICLE 16

1. Men and women of full age, without any limitation due to race, nationality or religion, have the right to marry and to found a family. They are entitled to equal rights as to marriage, during marriage and at its dissolution.

2. Marriage shall be entered into only with the free and full consent of the intending spouses.

3. The family is the natural and fundamental group unit of society and is entitled to protection by society and the state.

ARTICLE 17

1. Everyone has the right to own property alone as well as in association with others.

2. No one shall be arbitrarily deprived of his property.

ARTICLE 18

Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.

ARTICLE 19

Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

ARTICLE 20

1. Everyone has the right to freedom of peaceful assembly and association.

2. No one may be compelled to belong to an association.

ARTICLE 21

1. Everyone has the right to take part in the government of his country, directly or through freely chosen representatives.

2. Everyone has the right of equal access to public service in his country.

3. The will of the people shall be the basis of the authority of government; this will be by universal and equal suffrage and shall be held by secret vote or by equivalent free voting procedures.

ARTICLE 22

Everyone, as a member of society, has the right to social security and is entitled to the realization, through national effort and international cooperation and in accordance with the organization and resources of each state, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality.

ARTICLE 23

1. Everyone has the right to work, to free choice of employment, to just and favorable conditions of work and to protection against unemployment.

2. Everyone, without any discrimination, has the right to equal pay for equal work.

3. Everyone who works has the right to just and favorable remuneration insuring for himself and his family an existence worthy of human dignity, and supplemented, if necessary, by other means of social protection.

4. Everyone has the right to form and to join trade unions for the protection of his interests.

ARTICLE 24

Everyone has the right to rest and leisure, including reasonable limitation of working hours and periodic holidays with pay.

ARTICLE 25

1. Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control.

2. Motherhood and childhood are entitled to special care and assistance. All children, whether born in or out of wedlock, shall enjoy the same social protection.

ARTICLE 26

1. Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be generally available, and higher education shall be equally accessible to all on the basis of merit.

2. Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.

3. Parents have a prior right to choose the kind of education that shall be given to their children.

ARTICLE 27

1. Everyone has the right freely to participate in the cultural life of the community, to enjoy the arts and to share in scientific advancement and its benefits.

2. Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.

ARTICLE 28

Everyone is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.

ARTICLE 29

1. Everyone has duties to the community in which alone the free and full development of his personality is possible.

2. In the exercise of his rights and freedoms, everyone shall be subject only to such limitations as are prescribed by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

3. These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.

ARTICLE 30

Nothing in this Declaration may be interpreted as implying for any state, group or person, any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.

PUBLIC POLICY

AKRON

The Akron City Council passed unanimously a Civic Unity Ordinance to improve relationships among nationality, racial, cultural and eonomic groups. The ordinance creates a 15-man advisory council with the mayor as ex-officio chairman and a city councilman as a member.

It also provides that the Unity Council hear complaints from citizens and groups, and file reports at least once every two months with the mayor.

The ordinance is a substitute for an early one which would have included religious groups and empowered the unity groups to call upon any city department to aid it in its work. Councilman Leo Berg of the 10th Ward, who sponsored the ordinance pointed out that it eliminates earlier proposals for a salaried secretary and a separate office. Mayor Charles E. Slusser is expected to sign the ordinance.

Passage of the new ordinance brought a protest from Leon Gordy, President of the Akron Chapter of the National Association for the Advancement of Colored People. He had a letter read in City Council meeting which called the ordinance "a watered-down version which would be acceptable in Dixiecrat states".

COMMUNITY ORGANIZATION

PENNSYLVANIA FEPC COUNCIL

Clarence E. Pickett, Chairman of the State Council for a Pennsylvania FEPC, whose office is located at 260 South 15th Street, Philadelphia 2, Pennsylvania, has announced that four field representatives have been added to the staff of the State Council to do organizing and field work throughout the state in an effort to get a Fair Employment Practices Law passed by the next session of the Pennsylvania legislature.

Mr. Pickett, who is also the Executive Secretary of the American Friends Service Committee and Chairman of the Board of the American Council on Race Relations, said the representatives have been released from their regular positions with other organizations to do this special work for the State Council.

The representatives are: Miss Fern Colborn, Assistant Secretary of the Presbyterian Division of Social Education and Action; Clarence Mitchell, Labor Secretary of the National Association for the Advancement of Colored People; Israel H. Moss, Field Director for the Eastern Regional Office of the Anti-Defamation League, B'nai B'rith; and Theodore Leskes, New York attorney, now with the Civil Rights Division of the American Jewish Committee.

Twenty-nine civic, religious and labor organizations are affiliated with the State Council for a Pennsylvania FEPC, Mr. Pickett stated. These include: the Allegheny County Committee on Fair Employment, American Jewish Committee, American Jewish Congress, Catholic Interracial Council, Council for Equal Job Opportunity (Philadelphia), National Association for the Advancement of Colored People, Nonpartisan Civic League (Harrisburg), Pennsylvania Council of Churches, Pennsylvania Federation of Labor (AFL), Pennsylvania Industrial Union Council (CIO), Urban League (Pittsburgh), and the Williamsport FEPC Committee.

CHICAGO CONFERENCE ON CIVIC UNITY

Six of the seven sessions of the Chicago Conference on Civic Unity which is being presented by the Commission on Human Relations of Chicago and ninety-five co-sponsoring agencies have been held. The Conference is a sequel to the Conference on Home-Front Unity which the Commission sponsored in November, 1945.

The first session began on November 17 and covered the subject "Bettering Human Relations Through Recreation". Subsequent sessions have been held on the following: "Equalizing Opportunities for Good Health"; "Human Relations in City Planning"; "Civil Rights, the Frontier of Democracy"; "Educating for Better Human Relations"; and "What Are Wise Personnel Policies in Today's Labor Market in Chicago?"

The plenary session to be held on January 13 in the City Council Chambers will make recommendations and bring Chicago's "Charter of Human Relations" up-to-date.

Mass Communication (Cont'd)

terpretation used in this year's election polls has not yet released its findings. It is safe to say, however, that they will in the last analysis find more to criticize in the interpretations read into the data than in the original data themselves.

"The fact that opinions cannot immediately and in themselves predict behavior need not mean that there is therefore no reason to be interested in opinions. Much information on how people are presently thinking, feeling, acting has been gathered by means of opinion research and have served a function in describing the public state-of-mind, in pointing a problem or in helping administrators make decisions, even though the data offered no predictions. We have, for example, the Army adopting a method of discharge which incorporated the wishes of the men, the State Department trying to adapt its information program to the needs of the public as shown in opinion surveys, or a series of studies showing important relationships between group prejudice and personality structure."

SUBJECT Legislation, Litigation, and Public Policy

Recent Statements of Policy

PARTY PLATFORMS Members of the 81st Congress, which convened on January 3, 1949, have the opportunity to demonstrate that civil rights pledges in the platforms of the two major parties were made in good faith. Representatives of both parties are publicly committed to statements based on the highest democratic principles and thus embodying the hopes of millions of citizens interested in the achievement of American ideals.

The following is an excerpt from the 1948 platform of the Democratic Party:

> The Democratic party commits itself to continuing its efforts to eradicate all racial, religious and economic discrimination.
>
> We again state our belief that racial and religious minorities must have the right to live, the right to work, the right to vote, the full and equal protection of the laws, on a basis of equality with all citizens as guaranteed by the Constitution.
>
> We highly commend President Harry Truman for his courageous stand on the issue of civil rights.
>
> We call upon the Congress to support our President in guaranteeing these basic and fundamental rights: (1) the right of full and equal political participation, (2) the right to equal opportunity of employment, (3) the right of security of person, and (4) the right of equal treatment in the service and defense of our nation.

The platform of the Republican Party was equally insistent on the rights of all minorities to complete equality:

> Constant and effective insistence on the personal dignity of the individual and his right to complete justice without regard to race, creed or color, is a fundamental American principle.
>
> We aim always to unite and to strengthen; never to weaken or divide. In such a brotherhood will we Americans get results ...

> Lynching, or any other form of mob violence anywhere, is a disgrace to any civilized State and we favor the prompt enactment of legislation to end this infamy.
>
> One of the basic principles of this Republic is the equality of all individuals in their right to life, liberty and the pursuit of happiness. This principle is enunciated in the Declaration of Independence and embodied in the Constitution of the United States ... This right of equal opportunity to work and to advance in life should never be limited on any individual because of race, religion, color, or country of origin. We favor the enactment and just enforcement of such Federal legislation as may be necessary to maintain this right at all times in every part of this Republic.
>
> We favor the abolition of the poll tax as a requisite to voting.
>
> We are opposed to the idea of racial segregation in the Armed Services of the United States ...
>
> We favor self-government for the residents of the Nation's Capital ...

During his campaign for the Presidency, in the course of which he addressed some 6,000,000 people, President Truman repeatedly urged the enactment of civil rights legislation based on the findings of his Committee on Civil Rights. He took this strong stand on a major issue of the day despite the adverse counsel of many political leaders in his own party and the open rebellion of the Southern bloc. There is, therefore, reason to assume that President Truman won a large proportion of his total vote from citizens who regard the protection of human rights as a crucial public policy issue; and that he has thus received a clear popular mandate in support of his program.

UNIVERSAL DECLARATION OF HUMAN RIGHTS

Not only have a majority of American citizens expressed at the polls their desire for a strong and progressive policy regarding civil rights, but also their representatives on the United Nations Commission on Human Rights have helped to frame the Universal Declaration of Human Rights, covering civil and political, social and economic rights. This Declaration, adopted by the General Assembly of the United Nations after nearly three years of preparation, establishes -

> a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society ... shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance ...

With the high principles embodied in the international Declaration of Human Rights providing a standard of reference, our legislators will meet to consider what must be done within our own United States.

Civil Rights Legislation Still Uncertain

CONGRESSIONAL ALIGNMENTS

Although under President Truman's leadership the Democrats won 20 out of 32 governorships; established a majority of 262 in the

House to the Republicans' 171; and took 54 seats in the Senate to the Republicans' 41,[1] the outlook for the passage of civil rights legislation is still not clear.

In the Senate as a whole, it is predicted, on the basis of the record, that 31 Democrats and 15 or 16 Republicans, a working majority, will support liberal policies with the possible exception of civil rights legislation. In this area, the 22 Senators from Southern states may oppose the administration; and, of course, if their votes are added to those of conservative and doubtful Republicans and Democrats, they will command a majority. In any case, unless the rules are changed, the Southern bloc is numerous enough to filibuster civil rights legislation to death.

In the House, it is especially doubtful that proponents of civil rights legislation will be able to muster a majority. Chances for democratic developments are brighter there, however, than they have been in the past, since the Congress took action on the first day of the new session to circumscribe the powers of the House Rules Committee. This committee has in previous sessions prevented much civil rights legislation from reaching the floor of the House.

Optimism growing out of election results must be tempered for another reason: chairmanship of many of the key committees is likely to go to legislators from the South on the basis of seniority. In the Senate, under present arrangements, 10 out of 15 committees will have southern chairmen; in the House, 11 of the 19 committees will have southern chairmen.

RECORD OF 80TH CONGRESS — A review of the civil rights record of the 80th Congress, many of whose members may return to leadership positions in the 81st Congress, is relevant in estimating the prospects of civil rights legislation.

FEPC — The bi-partisan Ives-Fulton bill (S. 984, H.R. 2824) was introduced in March, 1947. This bill, applying only to employers of fifty or more persons engaged in operations affecting interstate commerce, would have established an administrative agency, the National Commission Against Discrimination in Employment, which was to be required to attempt to adjust all complaints by conciliation but which could petition the courts for enforcement of its orders. The bill prohibited discrimination by labor organizations in addition to prohibiting employers from discriminating in employment because of race, religion, color, national origin or ancestry or from using any discriminatory source in the recruitment of personnel.

This bill made no progress in the House. In the Senate, the full Committee reported the bill favorably without substantial amendment in March, 1948, but the bill was never called up for a vote.

POLL TAX — As for the poll tax, an effective anti-poll tax measure (H.R. 29), passed the House, 290-112 in July, 1947. The Senate Committee on Rules and Administration finally reported the bill favorably on April 29, 1948. Again, the bill was never called up for a vote.

---

[1] In the 80th Congress, elected in 1946, the Democrats held 188 House seats to the Republicans' 246, and 45 Senate seats to the Republicans' 51. Thus the Republicans had control of both Houses for the first time in 16 years.

ANTI-LYNCH The bi-partisan Wagner-Morse-Case anti-lynching bill (S. 1352, H.R. 3488), was introduced in May, 1947. In January and February of 1948 subcommittee hearings were held in both House and Senate. The full House Committee reported the bill favorably but with restrictive amendments in March. The Senate Committee, delaying action until the last weeks of the session, finally reported a weakened bill accompanied with a report maintaining that a broader bill would be unconstitutional. In neither house was the bill brought up for a vote.

SPECIAL SESSION The action of the 80th Congress in the special session called by President Truman on July 26, 1948, was equally disappointing. For the fourth time in six years, the Senate defeated by filibuster an anti-poll tax bill passed by the House. On July 29, when the acting majority leader moved to call the bill (H.R. 29 mentioned above) from the calendar for consideration, the filibusterers at once began to debate the motion for consideration. The filibuster continued until August 3, when proponents of the measure abandoned their efforts.

Promising Developments of Recent Months

CIVIL RIGHTS REPORT On the other side of the ledger, proponents of civil rights legislation take heart from recent actions of the executive and judicial branches of our government. In October, 1947, "To Secure These Rights," the Report of the President's Committee on Civil Rights, was released to the American people. This report, which has received wide acclaim as a document comparable to the Emancipation Proclamation, sets forth a comprehensive program as a guide to civil rights action. It furnishes a basic platform for all public and private agencies interested in intergroup relations.

The document has been widely publicized, and accordingly has been of great educational value. In addition to the first government printing, which was rapidly exhausted, Simon and Schuster, Inc. published a verbatim edition. Among organizations which prepared and distributed their own summaries, digests, or interpretations of the Report are: American Council on Race Relations, Council Against Intolerance in America, Council for Social Action of the Congregational Christian Churches, American Association of Social Workers, Community Relations Service, Federal Council of Churches of Christ in America, National Community Relations Advisory Council, Southern Regional Council, Columbus Council for Democracy, Public Affairs Committee and several newspapers and periodicals.

Many of the national organizations interested in the field, including the Anti-Defamation League, American Jewish Congress, American Council on Race Relations, Congress of Industrial Organizations, Jewish Labor Committee, National Association of Intergroup Relations Officials, National Urban League, National Association for the Advancement of Colored People, Japanese American Citizens League, American Civil Liberties Union, American Friends Service Committee, Council Against Intolerance in America, National Community Relations Advisory Council, National Council of Negro Women and the National Conference of Christians and Jews, have sponsored distributions of the findings of the President's Committee and encouraged discussion and action on the part of their member agencies.

Local groups throughout the country report the utilization of all available media of community education in publicizing the Report.[2]

---

2 See American Council on Race Relations Releases, Nos. 34, 35, 38 and 39 for reports on distribution of the Report of the President's Committee, as well as community and agency follow-up.

MESSAGE TO CONGRESS

In his State of the Union Message to the 81st Congress in January, 1949, President Truman declared:

> The driving force behind our progress is our faith in our democratic institutions. That faith is embodied in the promise of equal rights and equal opportunities which the founders of our republic proclaimed to their countrymen and to the whole world.
>
> The fulfillment of this promise is among the highest purposes of government. The civil rights proposals I made to the 80th Congress I now repeat to the 81st Congress ...
>
> I stand squarely behind these proposals.

The specific objectives contained in President Truman's civil rights program, developed in the main from the Report of his Committee, are as follows:

1. Establishment of a permanent Commission on Civil Rights, a Joint Congressional Committee on Civil Rights, and a Civil Rights Division in the Department of Justice.

2. Strengthening of the existing civil rights statutes.

3. Provision of federal protection against lynching.

4. Adequate protection of the right to vote.

5. Establishment of a Federal Fair Employment Practice Commission.

6. Prohibition of discrimination in inter-state transportation facilities.

7. Provision of home rule and suffrage in Presidential elections for residents of the District of Columbia.

8. Provision of statehood for Hawaii and Alaska and a greater measure of self-government for our island possessions.

9. Equalization of opportunities for residents of the United States to become naturalized citizens.

10. Settlement of the evacuation claims of Japanese Americans.

Regardless of previous legislative negativism toward the President's proposals, it is most probable that efforts will continue in the direction of implementation of these aims. The public airing of the issues and the resultant legislative pressures may eventually make themselves felt in the halls of Congress.

HIGHER EDUCATION REPORT

The Report of the President's Commission on Higher Education, released late in 1947, suggests further steps in the fight against racial discrimination. The Report declares:

> ... The commission is opposed to discrimination and believes it should be abandoned.

> This commission urges educational institutions to act as pioneering agents of leadership against discrimination. Each institution should conscientiously plan and prosecute a well-organized program to reduce and where possible promptly to eliminate discrimination, not only by correcting its policies and practices, but also by educating its students to seek the abolition of discriminatory practices in all their manifestations.

Volume 2 of the Report urges legislation embodied in fair educational practices acts in preference to relying wholly upon voluntary action by individual schools and colleges.

EXECUTIVE ORDERS 9980 AND 9981

In mid-1948, President Truman took certain steps which lay within his powers as Chief Executive by issuing Executive Orders 9980 and 9981. The provisions of Executive Order 9980 are designed primarily to set up machinery to insure that fair employment practices will be carried out in the federal government. The Fair Employment Board, established in the Civil Service Commission, has the function of reviewing decisions of department heads and authority to commend to the attention of the President cases in which its recommendations are not fully met. The Board also has a rule-making power, advises the departments on problems and policies, disseminates information, coordinates the fair employment policies and practices of the departments, and makes reports and recommendations for the use of the President.

Although no express sanctions guaranteeing compliance are contained in the Order, the very existence of this Fair Employment Board in the federal government sets an example for the rest of the country. If private groups interest themselves sufficiently in its operation, it may become an important factor in the development of democratic practice. The National Association of Intergroup Relations Officials has established a Committee on Federal Personnel Practices for the purpose of keeping intergroup relations workers throughout the United States in touch with developments in the federal civil service.

A significant precedent in administration of Executive Order 9980 was established in November, 1948, when Mortimer Jordan, collector of internal revenue in Alabama, was dismissed from federal service. The dismissal was made by Secretary of the Treasury Snyder, after Mr. Jordan formally refused to carry out the mandates of the Order.

Executive Order 9981 establishes an advisory committee to explore ways and means of effecting "equality of treatment and opportunity for all those who serve in our country's defense." The committee thus established, the President's Committee on Equality of Treatment and Opportunity in the Armed Forces, has power only to make recommendations. Despite this obvious weakness and despite the failure of the Order specifically to direct an end to the policy of racial segregation in the armed forces, the Order is a step in the right direction.

SUPREME COURT DECISIONS

During the past year, the Supreme Court has rendered a number of significant decisions. On May 3, 1948, the Court declared by a decision of 6 to 0 that it is unconstitutional for the courts to enforce restrictive housing covenants. While this decision by no means solves the problem of equal access to housing in our vastly overcrowded urban areas, it does remove the legal prop from the discriminatory device of the covenant, and offers a prospect for long-run improvement in the situation of minorities competing for housing.

Further Supreme Court decisions have voided in effect California restrictions on land ownership and employment in certain commercial occupations of aliens ineligible for citizenship on racial grounds, sustained the right of Negroes to vote in the South Carolina Democratic primary, supported the right of Negroes to equal educational opportunity, and prohibited limitation of the use of a church property to white persons.

The foregoing actions taken by the Executive and Judicial branches of our government, when coupled with the enormous amount of activity carried on by volunteer and public groups throughout the country, establish a more favorable climate for achievement of a positive legislative program on civil rights.

State Action

During the coming year, all state legislatures will be in session with the exception of those in Mississippi, Louisiana, Virginia, and Kentucky.

FAIR EMPLOYMENT Proponents of state fair employment legislation will have before them the encouragement of existing fair employment practice commissions in Massachusetts, Connecticut, New York, and New Jersey, and fair employment practice laws in Wisconsin, Indiana, Utah and Oregon.[3]

EDUCATION New York State has set a precedent in the field of education with its enactment in April, 1948, of the bi-partisan Fair Education Practices Bill. This bill makes it an unfair practice for a post-secondary school "to exclude, limit or otherwise disciminate against any person or persons seeking admission as students ... because of race, religion, color, creed or national origin." The Commissioner of Education is required to attempt to settle grievances (brought by individuals or discovered on the initiative of the Commissioner) by methods of conciliation. If these methods fail, the matter is taken before the Board of Regents, which is empowered to hold public hearings and issue a decision. Orders of the Regents are reviewable and enforceable in conventional court proceedings.

A further educational development which merits special attention on the part of residents of fourteen southern states is the movement for regional universities. The bill which would have given Congressional approval to the southern-sponsored plan for regional universities, and thus might have afforded opportunity for evasion of the recent Supreme Court decision that Negroes must be given equal educational opportunities on the higher levels, was set aside by the Senate by a vote of 38-37 in mid-1948. Opponents of the plan maintain that regional schools would be in essence a device for continuing segregation and inequality, and they

---

[3] The Library of Congress Legislative Reference Service published in November, 1948, an authoritative bulletin entitled, Anti-Discrimination Legislation in the American States. This book, by W. Brooke Graves, contains analyses of the operations of the New York State Commission Against Discrimination, as well as of the commissions in Massachusetts, Connecticut, and New Jersey. Its bibliography is especially worthy of note as an excellent reference facility.

urge continued vigilance with regard to this legislation which southern congressmen may again propose.

It is interesting to note that recent rulings of federal district judges in Virginia and Texas have given impetus to the movement for erasing inequalities in educational opportunities between racial groups on the elementary and secondary school levels. In Virginia, it was held that racial discrimination existed in three counties in question, and that the segregated school facilities must be equalized. In Texas, the segregation of Mexican American pupils in public schools, except in the first grade, was declared unconstitutional.

ADDITIONAL MEASURES

In addition to fair employment and fair educational practices legislation, legislatures will be considering laws prohibiting segregation and discrimination in housing, health and welfare, and places of public resort. Massachusetts has recently amended its public housing law to prohibit racial or religious discrimination in public housing developments.

Judging from past experience, effective enforcement in any of these areas requires the establishment of administrative commissions with adequate powers to obtain compliance. The experience of eighteen states which have civil rights acts forbidding discrimination in places of public accommodation, but relying only on criminal sanctions or civil actions for damages, has proven this type of act to be inadequate. In the case of places of public resort, judicious qualification of the granting of state licenses may be an aid in eliminating discrimination.

In 1947 Indiana enacted a law "to prevent racketeering in hatred." This law, making it illegal for persons individually or in groups to create, spread, or disseminate hatred by reason of race, color or religion, provides that no organization with such purposes shall be chartered by the state and that any corporation found to be violating the act shall have its charter revoked. Persons convicted of violations are to be punished by fine and imprisonment.

In some states it may prove desirable to give priority to a program for repeal of existing discriminatory laws, such as the segregation laws reinforcing social patterns in the South. In addition, there is a movement afoot to achieve coordinated action for the abolition of segregation in the National Guard units of the several states. Early in 1948, Governor Alfred E. Driscoll of New Jersey set aside a national guard order prohibiting Negro enlistment in white units on the ground that the constitution of New Jersey prohibits segregation.

INVESTIGATING COMMISSIONS

In states where it has proven to be impossible to get strong action bills on civil rights through the legislature, a legislative objective may be the establishment of commissions with investigatory powers to study discrimination in specific fields and to make recommendations. New Jersey demonstrated what can be done in this direction with the creation of the Committee on Civil Liberties, established for the purpose of appraising the condition of constitutional liberties in the state. The report of this Committee, containing broad recommendations dealing with personal freedoms, equality of opportunity, and revision of government machinery to guard civil rights, was of great value to sponsors of the New Jersey Comprehensive Civil Rights Bill. This bill, which would have applied to the field of civil rights the administrative procedure of the New Jersey and other FEPC laws, passed the Assembly by a vote of 49-1 but failed narrowly of passage in the Senate.

DECISIONS OF STATE COURTS

Finally, attention must be called to significant precedents set by state supreme courts recently. The Arizona Supreme Court, in July, 1948, ruled that the rights of suffrage cannot constitutionally be denied to Indians, whether on or off reservations, provided they meet the educational qualifications required of all voters in the state.

The California State Supreme Court has also established an important precedent by its recent decision that a California law prohibiting intermarriage between members of the Caucasian and Oriental or Negro races is unconstitutional. This was the first law of its type to be invalidated; twenty-eight states still have similar laws.

Local Action

In contrast to state legislatures and Congress, city councils are ordinarily in continuous session and thus afford opportunity at all times for the passage of civil rights ordinances.

LOCAL PUBLIC AGENCIES

At present there are 48 officially constituted local agencies operating in the area of intergroup relations. Though these agencies differ widely in scope and function, their experience merits close examination by citizens interested in what can be done on the local scale. Most of the local agencies are limited in practice to educational and research efforts in the broad field of human relations; some have investigatory powers and are authorized to adjust complaints of discrimination. While Chicago, Milwaukee, Cincinnati, and Phoenix have fair employment ordinances on the books, only Minneapolis and Philadelphia have succeeded in the establishment of local fair employment practice commissions.

FAIR EMPLOYMENT

In the field of fair employment legislation, local groups are working for ordinances which, as a minimum, prohibit discrimination within the city establishments and condition the granting of city privileges such as franchise, contracts, licenses, permits, and tax exemptions on compliance with fair employment principles. As a maximum objective, local groups are seeking to obtain laws which prohibit discrimination on the part of any employer, employment agency, or labor union operating within the city limits; establish an administrative body with sufficient funds; and provide adequate enforcement powers.

REGULATIONS IN OTHER AREAS

Although it is difficult to regulate the field of public housing and urban redevelopment by city ordinance because a large proportion of support for such projects comes from state and federal aid, still it is thought possible to condition city subsidy on non-discriminatory occupancy policies. An ordinance of this type has recently been introduced into the Chicago City Council, with the endorsement of many civic organizations.

It is possible for cities to invoke the use of their licensing power to eliminate discrimination because of race, religion, national origin, or ancestry in public places. Where state civil rights laws already in existence penalize discrimination, localities have the example of St. Paul in requiring that the city clerk enclose with every license issued a copy of the law.

In addition, specific city ordinances to prevent propagation of racial and religious hatred are advocated by groups in many localities.

COMMUNITY ORGANIZATION FOR ACTION — A significant by-product of the organization of community agencies for local legislative action is the concomitant development of a nucleus for campaign activities on state and federal legislation. The Chicago Council Against Racial and Religious Discrimination has taken advantage of this fact in its recent presentation of a 25-point civil rights legislative program, which sets forth specific goals for state and federal as well as municipal action and thus utilizes its organized community resources to maximum advantage.

ACRR Legislative Service

Beginning in January, the American Council on Race Relations plans to issue regular reports on the progress of civil rights legislation to all agencies listed in the "Directory of Agencies in Intergroup Relations, 1948-1949."

The Council is also collecting copies of all state and local FEP laws, as revised, in order to make these available for distribution in the near future.

MEMORANDUM

TO: ACRR Correspondents on State Civil Rights Legislation

FROM: American Council on Race Relations

SUBJECT: (1) Legislative Reporting Program
(2) FEPC Recording for Radio Use

With this memorandum, we are sending you who are engaged in civil rights campaigns throughout the United States a special report summarizing the most recent information available about the progress of civil rights measures in the states. This report has been made possible through your generous cooperation, and the assistance of other agencies.

It is our hope that our coverage will become more complete and accurate with each month, so that your needs may be served to the fullest. We are counting on you to supply us with the necessary information. Remember that the deadline is the fifteenth of each month.

FEPC Recording for Radio Use

The Institute for Democratic Education, Inc. has recently announced a new recording for use in state FEPC campaigns, "Fair Play in Four States". This is a panel discussion on the operation of FEP legislation in New York, New Jersey, Massachsetts and Connecticut. The panel participants are: Caroline K. Simon, Commissioner, New York State Commission Against Discrimination; Mildred H. Mahoney, Chairman, Massachusetts Fair Employment Practices Commission; Joseph L. Bustard, Commissioner, New Jersey Division Against Discrimination; Frank T. Simpson, Executive Secretary, Connecticut Interracial Commission. The transcription is timed to 13:20, permitting 1 minute, 10 seconds of local live announcements. Also available is a suggested outline for a local live panel discussion to follow the transcribed recording on the air. Order the disc and script, which are being distributed without charge, from the Institute for Democratic Education, Inc., 415 Lexington Avenue, New York 17, New York.

REPORT ON CIVIL RIGHTS LEGISLATION IN THE STATES

Jane

Issued by the American Council on Race Relations, February 24, 1949

Fair employment practice legislation is under consideration in at least eighteen of the forty-two states whose legislatures are in session. Citizens in Connecticut, New York, and New Jersey are sponsoring bills to establish administrative machinery for the enforcement of existing civil rights laws. The legislatures of Connecticut, Massachusetts, and New Jersey have before them measures which would authorize administrative procedures to achieve fair educational practices. In California, Connecticut, Massachusetts, Minnesota, and New York, bills introduced would abolish segregation in the National Guard. California, Connecticut, New Jersey, and New York are attempting by various means to prohibit segregation and discrimination in housing. These and other types of legislation now under consideration are discussed in the following state summary prepared with the assistance of the American Jewish Congress and the cooperation of many agencies in the states.

ARIZONA: The newly-formed Arizona Civil Rights League, in cooperation with the Arizona Council for Civic Unity and many other organizations, is sponsoring a three point platform: (1) a civil rights bill, (2) a fair employment practice act, and (3) a bill to desegregate the public schools of the state. The FEPC bill has been introduced in the House of Representatives, and the other two bills are scheduled for introduction in mid-February.

CALIFORNIA: Eighteen bills affecting minorities have been introduced in the state legislature. AB 739, to establish a commission on political and economic equality, has been placed at the top of the legislative agenda of the California Federation for Civic Unity. In addition, the CFCU recommends passage of other bills to abolish segregation in the National Guard (AB 151), to prohibit discrimination in the writing of automobile insurance (AB 948), and to create a division to investigate and prosecute violations of civil rights (AB 131). Other bills would repeal the state anti-miscegenation law (AB 451); provide specific punishment for establishing restrictive covenants (AB 821); prohibit advocation of hatred based on race, color or creed (AB 529); prohibit discrediting because of religion (AB 403); and authorize the submission to voters of a constitutional amendment abolishing segregation in the National Guard (ACA 2). Intergroup relations agencies are also vitally interested in the progress of bills to provide an appropriation for a state redevelopment agency through 1950, to establish a housing and slum clearance program, and to liberalize the state child care program.

COLORADO: The Colorado Citizens Committee for Civil Rights Legislation, headed by Judge Joseph E. Cook of the District Court, has issued a call for support of SB 655 and HB 877 to secure non-discrimination in employment. The bill has been endorsed by Democratic majority leader Ben Bezoff in the House, and by Republican majority leader Averill Johnson in the Senate. It is now in the labor committee of each house.

CONNECTICUT: Bills affecting minorities include a bill, requested by Governor Bowles, to abolish segregation in the Nation Guard (SB 148, HB 417); a bill to prevent segregation and discrimination in housing programs financed by state funds (HB 414); and a bill to authorize the Connecticut Interracial Commission, which now administers the state fair employment practice act, to administer the existing law prohibiting discrimination in places of public accommodation. A fourth measure modeled on the New York Quinn-Olliffe law, but extending coverage to primary and secondary schools as well as colleges and universities, would establish fair educational practices in the state. Finally a bill (SB 330, HB 945) would prohibit racial and religious discrimination in the sale of insurance.

FLORIDA: Governor Fuller Warren has declared that he will ask the Florida legislature to ban the Ku Klux Klan.

GEORGIA: In January, the Georgia assembly defeated a measure designed to outlaw the Ku Klux Klan's bed sheet disguise. Debate, lasting two hours, terminated in a 89 to 65 vote. Passage of Governor Talmadge's proposed voters' qualification law, which the Governor demands to bar "bloc voting" by Negroes, seems assured. The House has approved the bill, 146-56, and the Senate State of the Republic Committee has voted to recommend passage by the full Senate body. This bill, which is opposed by the Georgia League of Women Voters, NAACP, the Progressive Party, and many minority and labor leaders, would abolish present registration lists and require a 50-question examination of citizens desiring to exercise the franchise. A third measure would bar foreign-born persons from holding public office.

ILLINOIS: A bill establishing a fair employment practice commission in Illinois was introduced in the General Assembly on February 15, as an administration measure with the active support of Governor Stevenson. Conferees from both houses have agreed on the text of a bill setting up a five-man commission and enforcement machinery. The Women's Council for Fair Educational Practices is campaigning for legislation to establish an administrative agency empowered to enforce non-discriminatory educational policies in Illinois. Other bills would require the display of the present civil rights law near places to which it applies (HB 50) and prohibit hospitals from withholding the use of their facilities in a discriminatory manner (HB 51).

INDIANA: The Indiana Council for Civil and Human Rights, with many other interested organizations, is advocating passage of HB 79, to establish a state fair employment practice commission. The Labor Committee held its initial hearing during the last week of January and reported the bill favorably. Another bill (HB 242) would outlaw segregation in public schools and prohibit discrimination in transporting children to school. HB 439 would permit revocation of the license of any place of public accommodation which engaged in discrimination.

IOWA: A fair employment practices law (HF 348) is under consideration.

MARYLAND: The Maryland State Senate adopted late in January the favorable report of its Judicial Proceedings Committee on a bill to repeal Maryland's Jim Crow law. Upon the expected Senate passage of the legislation, the measure will be sent to the House of Delegates, where a similar bill was defeated two years ago.

MASSACHUSETTS: S.B. 133 would secure fair educational practices in Massachusetts by the establishment of an office for Fair Educational Practices with powers similar to those granted in New York by the Quinn-Olliffe Law. It would cover primary and secondary schools and all other educational institutions accepting applications for admission from the public generally. Other measures before the Massachusetts legislature would create a special commission for the purpose of making a study and report of discrimination on grounds of race, color, religion, or national origin in non-sectarian educational institutions (HB 1296); abolish segregation and discrimination in military forces of the Commonwealth (HB 544); prevent loss of employment because of political opinions, affiliations or activities (HB 1362); and repeal the law requiring entertainers and others who appear under assumed names to file their true names with the Commissioner of Public Safety (HB 526).

MICHIGAN: On February 8, an FEPC bill prepared by Democratic Governor Williams' Advisory Committee on Civil Rights was introduced in the House. Chances for establishment of the FEPC Act, which has the support of the Michigan Committee on Civil Rights and many other civic organizations, may be weakened by a Republican-sponsored maneuver to vote the bill out for a popular referendum.

MINNESOTA: Two fair employment practice bills (SF 622, HF 806 and SF 204, HF 198), differing in the definition of "employer," the granting of subpoena powers, and a few additional details have been introduced in both House and Senate. Senate hearings began on February 10, and House hearings are scheduled. Many citizens' organizations are participating in the campaign. Additionally, a resolution has been introduced in House and Senate to memorialize Congress to open the National Guard to all citizens on a non-segregated basis. The resolutions are now before the Military Affairs Committees.

MISSOURI: SB 23 would provide against employment discrimination in state, municipal, school and police departments on account of race, creed, color, marital status, political or organizaitonal affiliations.

The Missouri Association for Social Welfare expects to seek introduction of a bill covering enabling legislation to permit non-segregated schools.

MONTANA: HB 62, to create a fair employment practice commission, has been defeated.

NEBRASKA: Legislative Bill 117, introduced on January 11, would establish a fair employment practice commission in the state of Nebraska. The public hearing on this bill was held in mid-February. The Anti-Discrimination Committee of the Omaha CIO Council is taking the lead in organizing support for the measure.

NEW JERSEY: A large number of organizations under the leadership of the Joint Council for Civil Rights, are campaigning for passage of AB 65, which would give the Division Against Discrimination full authority to enforce civil rights in the areas of education, health, housing, public accommodation and recreational facilities. This bill, which has the support of Governor Driscoll, has passed the Assembly unanimously and is scheduled for Senate consideration.

NEW MEXICO: An FEPC bill and a bill to repeal the statute permitting segregation in the schools are now under consideration by committees of the New Mexico legislature. The League of United Latin-American Citizens, which took the first step in calling for introduction of the FEPC bill, has joined with many other groups in forming the New Mexico Committee on Human Relations to work for passage of the measures.

NEW YORK: A series of bills has been introduced in New York to prohibit discrimination in housing. One would establish a civil right to purchase or lease real property without discrimination (S 296, AI 463); another would prohibit discrimination in the selection of tenants in redevelopment and public housing projects (S 823, S 511, AI 40, 125, 132, 1141); a third would prohibit discrimination in the handling of mortgage loans, as well as fire insurance and automobile liability insurance. Other bills would create a temporary committee to investigate discrimination in housing (S 1800, AI 2045), and forbid discrimination in publicly-assisted housing (S 1801, AI 2021). In addition, bills have been introduced to make racial restrictive covenants illegal (S 513, AI 311, 572). S 290, AI 505, 309 would abolish segregation in the National Guard. Other bills propose to require licensing of the publishers of race hatred literature (AI 279) and to make it a criminal libel to publish such literature (AI 310). S 828 would amend the civil rights law to prohibit inquiry concerning race, color, or religion of persons seeking admission to certain educational institutions. Finally, a bill (AI 1373) has been introduced to implement existing laws barring racial and religious discrimination in public accommodations. The bill would authorize the filing of complaints with the State Commission Against Discrimination, which would then be authorized to proceed as it now does in connection with complaints of discrimination in employment.

NORTH DAKOTA: SB 230, on which committee hearings were held early in February, declares it to be unlawful for any employer to discriminate because of race, color or religion. Although no administrative machinery is called for, a penalty not to exceed one hundred dollars is provided.

OHIO: The Ohio Committee for Fair Employment Practices Legislation, its twelve community councils, and other organizations are supporting HB 106, on which the House Industry and Labor Committee held a hearing February 15. The bill, introduced as an administration measure, would set up a five-member commission. Another FEPC bill (HB 32) is similar to the bill defeated in the previous General Assembly.

OREGON: An FEPC measure based on the laws in effect in the four eastern states is under consideration in House and Senate (SB 6). The bill, introduced by a bi-partisan group of nine senators and nine representatives, has a wide base of organizational support throughout the state. Agencies advocating passage have formed an Oregon Fair Employment Practice Committee.

PENNSYLVANIA: Creation of a fair employment practices commission has been proposed in two measures (SB 6, 137; HB 32, 42).

RHODE ISLAND: An FEPC bill (S 22, HR 59) has been passed by the House, and will soon be considered by the Senate. Governor Pastore called for enactment of such legislation in his inaugural address.

SOUTH CAROLINA: In late January, a joint resolution was introduced proposing a referendum on elimination of the poll tax as a prerequisite to voting. The Senate Judiciary Committee reported this measure favorably.

TENNESSEE: Several bills have been introduced which would greatly alter present poll tax regulations by increasing exemptions, decreasing to fourteen the number of years during which citizens must pay the tax, and eliminating the payment of tax as a prerequisite for voting in primaries and municipal elections. In addition, a bill has been introduced calling for a limited constitutional convention to consider recommendations for a new constitution providing for the complete elimination of the poll tax.

UTAH: Under the leadership of the Salt Lake Council for Civic Unity and other interested groups, a campaign is under way in support of a bill prohibiting discrimination in places of public accommodation (HB 87, SB 100) and an FEPC bill (HB 63, SB 125).

WASHINGTON: The Washington State Committee Against Discrimination in Employment has been organized to work for passage of a fair employment practice bill (SB 12, HB 92). This bill, which has bipartisan support, was referred to the Labor Committees of both chambers. The Senate Labor Committee has voted the bill out with a "do pass" recommendation and it is now in the Senate Rules Committee.

FOR YOUR INFORMATION:

Following are the addresses of organizations handling civil rights campaigns in several states where such issues are before the legislature. A mutual exchange of information may be helpful.

March 14, 1949

RELEASE NO. 42

SUBJECT: Evaluation of State FEPC: Experiences and Forecasts

FAIR EMPLOYMENT PRACTICES LEGISLATION IS A CRITICAL ISSUE THROUGHOUT THE COUNTRY

Fair employment practices legislation has been introduced in eighteen of the forty-two states whose legislatures are currently in session.[1] Most of the bills are modeled on the acts now in effect in Connecticut, New Jersey, New York, and Massachusetts although they vary in some details. With the exception of the bills under consideration in Iowa, Missouri, and North Dakota,[2] the measures would establish commissions specifically empowered to receive and investigate complaints of discrimination, to attempt settlement by conciliation, and in case of failure of conciliation, to hold hearings and issue orders enforceable in the courts. The bills generally apply to employers of more than a certain specified number of employees, excepting non-profit organizations; to labor organizations; and to employment agencies.

Washington has the distinction of being the first state to achieve passage of fair employment practices legislation during the 1949 legislative session, although as of this date the legislation still awaits the governor's signature. Up to this time, FEPC measures have met defeat in only one state, Montana, where the bill failed of passage in the House by a vote of 51-32.

---

[1] Arizona, Colorado, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, Utah, and Washington.

[2] The Iowa bill (HG 348), while broad in coverage, would empower the administering agency only to recommend cases to the Attorney General for prosecution. In Missouri, the bill (SB 23) covers employees in "state, municipal, school, and police departments" only, and does not provide for an administrative agency. The North Dakota bill (SB 230) provides for no administrative machinery for enforcement, but instead provides a penalty of up to $100.

The attached table provides summary information about the status of fair employment practices measures which have been introduced during 1949.

In many of the states where fair employment practices legislation is an issue, the measure has been accorded bi-partisan support. Strong administration backing in several states, expressed in addresses made by governors William Lee Knous of Colorado, Henry F. Schricker of Indiana, Adlai E. Stevenson of Illinois, G. Mennen Williams of Michigan, Frank J. Lausche of Ohio, James H. Duff of Pennsylvania, and John O. Pastore of Rhode Island, has given encouragement to legislators and citizens advocating FEPC.

COMMENTS ON FEPC FROM STATES IN WHICH LEGISLATION IS IN EFFECT

From state to state, the same arguments are being used against fair employment practices legislation. It may be helpful to examine these arguments in the light of statements made by business and industrial leaders in Connecticut, New Jersey, New York, and Massachusetts, where FEP laws have been in operation for some time.

DOES FEPC VIOLATE THE "AMERICAN SPIRIT OF FREE ENTERPRISE"?

One argument commonly raised is that fair employment practices legislation is a violation of the "traditional American spirit of free enterprise" and that it interferes with the exercise of managerial prerogatives. A statement contained in a letter to the New York State Commission Against Discrimination from the head of a statewide organization of retail merchants bears on this question:

> "Surely, the present law imposes no hardships on the employer. It simply applies penalties to acts of discrimination when those acts deprive an inhabitant of our State of the fundamental human rights which he has; namely, the right to earn a living. There is nothing involved or intricate about the requirements of the law. The employer is merely asked to hire or retain in employment, the best man or woman for the job. It simply says that regardless of race, color, or national origin, he or she cannot be barred from employment so long as he or she meets all of the qualifications which the employer has set for the job."[3]

---

[3] This letter and others quoted in Release No. 42 are attached.

R. T. Barker, Superintendent of Personnel Administration, Western Electric Co., Inc., New York, has this to say:

> "It is my own opinion that the administration of the Fair Employment Practice law in the States of New York and New Jersey has been fair and reasonable and has not entailed any undue hardship on employers who are trying to do a conscientious job in their employee relations situations. We have not experienced any difficulty in meeting the requirements of these laws and so far as I know, they have been accepted generally by our employees."

W. P. Morin, Personnel Director of the Hat Corporation of America, South Norwalk, Connecticut, communicated the following in a letter to the Connecticut Inter-Racial Commission:

> "Since the enactment of the Fair Employment Practice Act for the State of Connecticut, I have found that this Law has in no way interfered with our employment practices...
>
> "I think that many firms thought that it would interfere with the operation of its policy covering hiring and promotions but we received such a clear interpretation of the act that we saw nothing in it that would present any difficulties."

The Massachusetts Fair Employment Practice Commission is in receipt of a letter from Roger L. Putnam, President of the Package Machinery Company, stating the following:

> "Neither as Chairman of your Advisory Council, here in Springfield, nor as a manufacturer have I ever heard any one in the last two years say that the law ought to be changed. Every one now admits that the principles that FEP legislation is striving for are just."

DO FEP AGENCIES WIELD A BIG STICK?

Almost without exception,[4] the existing state FEP laws have been administered without resort to public hearings and exercise of punitive powers. The administrative agencies have relied heavily on methods of education and conciliation. Several statements bear witness to the effectiveness of this approach. A letter to the Connecticut Inter-Racial Commission from Ellsworth S. Grant, Vice-President of Industrial Relations, Allen Manufacturing

---

[4] The Massachusetts Fair Employment Practice Commission announced in February, 1949, the settlement of its first case in which payment of compensatory damages to the complainant was part of the terms of conciliation.

Company, reflects a feeling which seems to be general throughout the states:

> "Perhaps even more significant than the actual results has been the Commission's approach to a critical social problem charged with controversy and ignorance. It has proceeded quietly and effectively, keeping its big stick in the closet, and stressing voluntary compliance. It has forcefully applied the techniques of education, relying on the natural common sense of Connecticut citizens, whether they be employers or workers. Its personnel has been carefully chosen and trained to reflect this democratic spirit of administration."

Jarvis Hunt, general counsel for the Associated Industries of Massachusetts, which opposed enactment of an FEP law in the state, emphasizes the same point:

> "The Commission has administered the FEPC Bill in a reasonable manner and without putting any undue burden on industry. They have been very cooperative in helping us solve any problems that have arisen under the law."

A statement from H. D. Hodgkinson, Vice-President and General Manager of Filene's department store in Boston, follows:

> "It is my opinion that under the legislation our State Commission is proceeding soundly toward the cooperation of all kinds of business, such action being largely educational rather than punitive."

J. J. Morrow, Personnel Manager of Pitney-Bowes, Inc., says in a letter to the Connecticut Inter-Racial Commission that many of the problems his firm encountered in its Negro integration program (started before the enactment of the Connecticut Fair Employment Practices Act) would have been less difficult if they had "the support of such legislation and the expert assistance of the Inter-Racial Commission's personnel". He goes on to say:

> "One of the most valuable services of the many being rendered by the Commission, in my opinion, is the educational campaign which it conducts. In the long run, it is this campaign which will bring the greatest and most lasting results; but I am afraid that, by itself, and without the backing of legislation, the educational work would be impotent."

The President of the Boston Chamber of Commerce, Michael T. Kelleher, has made the following statement:

> "I'm very happy at the way the Commissioners are administering the FEPC law. They are doing a real service to the state."

ARE EMPLOYMENT PRACTICES A PROPER AREA FOR LEGISLATION? Often the argument is voiced that it is impossible to do away with prejudice by legislation, and that therefore fair employment practices legislation offers no real solution to the problem of employment discrimination. As a matter of fact, FEP measures are not designed to attack prejudice itself, but instead, to prevent overt expression of prejudice as manifested in industrial discrimination. J. J. Morrow, Personnel Manager of Pitney-Bowes, Inc. has stated this position succinctly:

> "There are of course a number of well-meaning people who oppose legislation to abolish discrimination in employment, most of them through the feeling that legislation is not the real answer to a problem which can best be solved by education. Naturally, legislation cannot itself destroy race prejudice, but it can and should be the framework upon which the building of free economic opportunity for Negroes can be started. The educational side of the picture is the ultimate answer, but - as all of you must know very well from experience - the process is a slow and often painful one which needs the assurance of support that only legislation can give it. The purpose of such laws, and all laws, for that matter, is to protect rather than to punish. With proper administration, and with cooperation from industry, I think these laws are a very important step in the right direction. If they did nothing else, they would at least be helpful to those employers who would prefer to treat the Negro fairly, but who lack the courage to do so without the excuse which the laws furnish."

F. Frank Vorenberg, former Mayor of Springfield and President of Gilchrist and Company, one of the largest and oldest department stores in Massachusetts, has this to say on this question:

> "While there is no doubt considerable value to the threat of legal action if fair employment practices are not followed, I like to think that the principal value of the statute and of the constructive activities of the Commission has been in offsetting the fears so commonly expressed by employers during the committee hearings on the bill and elsewhere, the fear of legislating in an area where moral principles ought to be the guiding factor, and the fear of the effect of employing members of minority groups in positions where they had traditionally not been employed. The statute and the policies of the Commission have gone a long way to prove the truth of the famous phrase used in President Roosevelt's first inaugural, 'The only thing we have to fear is fear itself'."

The President's Committee on Civil Rights, answering the argument that employment discrimination can be eliminated only by education, and not by legislation, stated:

"We believe this argument misses the point and the choice it poses between legislation and education as to the means of improving civil rights is an unnecessary one. In our opinion, both approaches to the goal are valid, and are, moreover, essential to each other."

WILL AN FEP LAW ACTUALLY WORK? Many people express the opinion that a fair employment practices law cannot possibly be an effective instrument for equalizing employment opportunity, in view of the rigidity of discriminatory patterns in many businesses and industries. A measure of the effectiveness of present FEP laws can be arrived at by examination of the annual reports of the administrative agencies in the states where the laws are in force.[5] The reports indicate without exception that, though the process is slow, progress is being made in many areas. In addition, expressions of opinion by authoritative sources are available, such as the statement made by W. Brooke Graves, Specialist in American Government and Public Administration, Library of Congress Legislative Reference Service.[6] After a careful study of the operations of the fair employment practices agencies in Connecticut, Indiana, Massachusetts, New Jersey, New York, and Wisconsin, Mr. Graves writes:

"To many people, perhaps the most convincing argument for FEPC legislation is to be found in the answer to the question: Does it work? In the early stages of development, there were many - even including some who were favorably disposed toward the idea - who doubted whether such legislation could be made to work. Today, with three years of experience on which to judge, with laws in operation in six states,

[6] Graves, W. Brooke, Anti-Discrimination Legislation in the American States. Public Affairs Bulletin No. 65, Library of Congress Legislative Reference Service, Washington, D. C. November 1948. P. 42.

there is ample evidence to support their most sanguine hopes...

"Very often, those who object strenously to a new law are very vocal about it, but there have been surprisingly few 'squawks' about FEPC. Spokesmen for business and for labor have had little to say about it. Some state chambers of commerce have expressed the view that, in practice it applied more to employers than to labor, but the United States Chamber of Commerce has taken no stand on the issue, beyond the point of insisting that the subject was one for state action rather than Federal."

Peter Grimm, former President of the Chamber of Commerce of the State of New York says:

"The...Anti-Discrimination law, after two and a half years of trial (in New York), appears to have operated effectively, so far as I have been able to judge from talks with men in various lines of business. The administration of the law has been effective and salutary."

On February 8, 1948, the New York Herald Tribune bore witness to the effectiveness of New York's fair employment practices law:

"...The Ives anti-discrimination program is something that works; in close to three years of existence the State Commission Against Discrimination, conceived among great argument and misgivings by many, has quietly shown the way that conciliation and persuasion can establish completely new patterns."

WILL FAIR EMPLOYMENT POLICIES ALIENATE CUSTOMERS AND OTHER EMPLOYEES?

Occasionally businessmen say that they endorse FEPC heartily in principle, but that they fear the effects on their trade and on their present employees' morale. Firms that have given fair employment practices a fair trial have found their fears unjustified. For example, Joseph J. Morrow, Personnel Manager of Pitney-Bowes, Inc., Stamford, Connecticut, said recently in discussing the operation of the Connecticut Act:

"If I were asked to select a single fact which impressed me more than anything else in carrying out our program of integrating the Negro worker, I would choose just this: The difficulties one expects to encounter in initiating such a program materialize to the extent of about five per cent of what was anticipated. The 'Bogey Man' of race prejudice can hardly fail to disappear when it is really brought into the daylight and put to the test of normal day-by-day contacts."

A statement made by J. Pickett, Employee Relations Department, Irvington Varnish and Insulator Company, New Jersey, touches upon the matter of effects

upon customers:

> "The act is being carried out along educational lines and the experience of customers as well as manufacturers has been very favorable."

WILL FEPC DRIVE BUSINESS FROM THE STATE?

An argument commonly raised against FEPC is that such legislation will drive business from the state. The available facts disprove this supposition. No evidence has been brought forth from the states now operating under FEPC legislation that business has been lost to other states. Governor Dewey stated in his message to the Legislature, January 5, 1949, (four years after the establishment of the New York State Commission Against Discrimination):

> "Business activity and employment remain at unprecedented levels for times of peace. The number of business establishments has increased by five per cent in the last year.[7] Last year the personal income of our people aggregated some $27,000,000,000 - an all-time high."

ADDITIONAL PUBLIC SUPPORT FOR FEPC

In the foregoing pages, statements of business and civic leaders who have had experience with FEP laws have illustrated that many of the objections raised against the laws are groundless. The validity of their opinions about fair employment practices legislation is affirmed by many other citizens who speak through major national organizations in support of the measure.

Fair employment policies are supported by many religious groups in the United States, including: the Federal Council of Churches of Christ in America, National Council of Catholic Women, Union of American Hebrew Congregations, Synagogue Council of America, National Council of Jewish Women, General Synod of the Evangelical and Reformed Church, General Conference of the Methodist Church, Methodist Ministers Union, Society of Friends, Unitarian Church, Presbyterian General Assembly

---

[7] Figures released by the New York State Department of Commerce show that the estimated number of industrial firms in the state had increased by 107,750 between August 1945 and January 1948; that is, from 436,250 to 544,000.

Council for Social Action of the Congregational Christian Churches, National Conference of Christians and Jews, National Council of Student Christian Associations, National Board of the Young Men's Christian Association, and National Board of the Young Women's Christian Association.

Labor organizations have maintained a strong stand in favor of fair employment legislation. The Congress of Industrial Organizations, the American Federation of Labor, and a number of independent unions have given their endorsement through their national conventions. Veterans' groups, including the American Veterans Committee, Catholic War Veterans, and Jewish War Veterans, are united in support of the measure, and are joined in many states by chapters of the American Legion and the AMVETS. Finally, almost all national organizations representing the interests of American minorities and the protection of civil rights give their unequivocal endorsement to FEPC.

The eyes of the nation are upon the legislators in many states who have the responsibility of deciding whether the interests of the majority of our people are to be served by the establishment of safeguards against discrimination in employment. Upon their decision rests the fate of all Americans, who, by reason of their race, color, creed, or national origin, have been handicapped in their struggle for economic security.

EXCERPTS FROM LETTERS RECEIVED
BY THE
NEW YORK STATE COMMISSION AGAINST DISCRIMINATION

1. From a state-wide retail association, November 14, 1946.

"The Statute under which your Council functions has been familiar to me since it was first introduced in the Legislature. The industry I represent has accorded the State Commission Against Discrimination its unqualified support and cooperation. In fact, I believe the merchants of this State have always conducted their businesses under the principles laid down by the so-called Fair Employment Practice Law. The manner in which the Law has been administered by the competent Commissioners appointed by Governor Dewey has been a model of fair-mindedness, efficiency and good sense.

"When the Law was first enacted, there was a feeling that our State was attempting to legislate virtue, tolerance, etc., which was not the fact, as has been proven again and again in the administration of the Statute. In the first Annual Report of the Commission, one sentence will serve to illustrate that fact, to-wit: 'It (the Commission) has approached its task from the standpoint of a cooperative enterprise rather than a punitive expedition.'

"That statement is in keeping with the highest traditions of the American way of life. Throughout history, true liberalism has sought freedom by keeping government out of it as far as possible. The State of New York has adhered to that concept in the present Statute. It has placed the responsibility and duty on employer, employee and the public to make it work.

"I have always believed that sub-div. 8 of Sec. 130, Chapter 118 of the Law, is the very heart of New York's gesture for justice and tolerance in our relations with our fellow citizens. That section which creates Conciliation Councils is the best evidence of the fact that neither the Governor nor the legislature was attempting to legislate virtues or tolerance, but to promote and encourage them by the forces of education, conciliation, religion and moral enlightenment.

"Surely, the present Law imposes no hardships on the employer. It simply applies penalties to acts of discrimination when those acts deprive an inhabitant of our State of the fundamental human right which he has; namely, the right to earn a living. There is nothing involved or intricate about the requirements of the Law. The employer is merely asked to hire or retain in employment, the best men or women for the job. It simply says that regardless of race, color or national origin, he or she cannot be barred from employment so long as he or she meets all of the qualifications which the employer has set for the job. I believe that in sum to be the simple truth about the Statute."

2. From a Financial District Observer, April 20, 1946.

"Although discriminatory practices are still evident in this area of our city, I have observed that the anti-bias law has had a fine effect upon the employment practices of banks and brokerage houses in the financial district. Every now and then, as I carry on my duties around the 'Street,' I notice young colored boys and girls in jobs where I have never seen them before.

"Last week, I observed that a bank had added three fine colored lads to its staff, each with responsible assignments and working in conspicuous parts of the office.

"I feel strongly that the anti-bias law is a success and is achieving the purposes for which it was designed. I am sure that this is due to you and the diligent efforts of your commission.

"With every good wish for continued success."

3. From a public utility company, August 14, 1946.

"... I appreciate greatly the very fair consideration that you and members of your staff have given to this Company during your inquiry into its employment practices and I feel that it has been of definite value to us in appraising our personnel methods and practices. We welcome the suggestions that have been made and are very pleased indeed to adopt them. If we can help, by precept and example, in creating stronger bonds of kinship among all people, in promoting tolerance and in eliminating prejudice, we feel that we will have rendered the greatest public service of which we are capable."

PITNEY-BOWES, INC.
STAMFORD, CONNECTICUT

January 28, 1949

Mr. Thomas F. Henry, Supervisor
Fair Employment Division
State of Conn. Inter-racial Commission
State Office Building
Hartford, Connecticut

Dear Mr. Henry:

I am very happy to reply to your letter of January 26 in which you ask for a statement of our opinion with reference to the Fair Employment Practice controls operating in Connecticut.

We started our Negro integration program at Pitney-Bowes before the enactment of the Connecticut Fair Employment Practices Act. Many of the problems which we encountered, however, would have been much less difficult had we had the support of such legislation and the expert assistance of the Inter-racial Commission's personnel.

One of the most valuable services of the many being rendered by the Commission, in my opinion, is the educational campaign which it conducts. In the long run, it is this campaign which will bring the greatest and most lasting results; but I am afraid that, by itself, and without the backing of legislation, the educational work would be impotent.

Mr. Hosch's letter requested statements from speeches, etc., which you might quote. The following is taken from a talk I gave before the Annual Convention of the National Urban League in Richmond, Virginia, on September 7, 1948. The title of the talk was "The Negro's Stake in the Future of American Industry".

> "Inclusion of the Civil Rights issue as a part of our two major political party platforms has been a recent dramatic illustration (of the progress made in removing the inconsistency between our democratic principles and the discrimination practiced against Negroes and other minority groups in the United States). Less sensational, but just as significant, has been the adoption of anti-discrimination laws by a number of states, and the contemplated adoption of such legislation in still other states.
>
> "Beside being the initial step in guaranteeing fair employment opportunities for Negroes, the enactment of these laws within our representative State governments is in itself an indication of public readiness to accept the laws. My home State of Connecticut, small in size but mighty in industrial importance, adopted its own Fair Employment Practice Act in May, 1947, and it is functioning very successfully.

"There are of course a number of well-meaning people who oppose legislation to abolish discrimination in employment, most of them through the feeling that legislation is not the real answer to a problem which can best be solved by education. Naturally, legislation cannot itself destroy race prejudice, but it can and should be the framework upon which the building of free economic opportunity for Negroes can be started. The educational side of the picture is the ultimate answer, but - as all of you must know very well from experience - the process is a slow and often painful one which needs the assurance of support that only legislation can give it. The purpose of such laws, and all laws, for that matter, is to protect rather than to punish. With proper administration, and with cooperation from industry, I think these laws are a very important step in the right direction. If they did nothing else, they would at least be helpful to those employers who would prefer to treat the Negro fairly, but who would lack the courage to do so without the excuse which the laws furnish."

Sincerely yours,

/s/ J. J. Morrow
Personnel Manager

BUILDERS OF WRAPPING MACHINES

SPRINGFIELD
MASSACHUSETTS

January 27, 1949

Mrs. Mildred H. Mahoney, Chairman
Fair Employment Practice Commission
41 Tremont Street
Boston 8, Massachusetts

Dear Mrs. Mahoney:

It is natural that other parts of the country should watch with interest the experience of those places that have had F.E.P. legislation. There were lots of people in Massachusetts who looked on the legislation with fear before it was passed. Under the administration that your Commission has given during the two years the Act has been in operation, all such fears have been removed. So far as I know, you have never had to use the powers of compulsion contained in the Act. Conferences, educational talks, and common sense persuasion are the tools that have been used to make the Act work so successfully - but those tools could not have produced the results they have if there hadn't been the knowledge on the part of every one that there was a law on the statute book which authorized compulsion if necessary.

Neither as Chairman of your Advisory Council, here in Springfield, nor as a manufacturer have I ever heard any one in the last two years say that the law ought to be changed. Every one now admits that the principles that F.E.P. legislation is striving for are just. There are still latent prejudices in some quarters, but those who have them feel ashamed of them, rather than militantly fighting for them.

I have no reservation in saying that I think such legislation, administered as you and your Commission have administered our law, would be beneficial practically everywhere. I am not familiar enough with conditions in the deep South to be sure whether we might not have to arrive at the right, through successive stages, but in no other part of this country should there be any hesitancy in passing such legislation.

Sincerely yours,

PACKAGE MACHINERY COMPANY

Robert E. Segal, Executive Director
Jewish Community Council
44 School Street
Boston 8, Massachusetts

Dear Mr. Segal:

As a business man I am in favor of the Fair Employment Practices Act insofar as the act in its administration in Massachusetts is concerned.

It is my opinion that under the legislation our State Commission is proceeding soundly toward the cooperation of all kinds of business, such action being largely educational rather than punitive.

Great difficulty and trouble was predicted during the discussions prior to the passage of the Massachusetts Fair Employment Practice Act and those fears have not materialized. Out of 500 complaints on discrimination during the past two years all but 31 have either been withdrawn or settled to the satisfaction of both parties, and the 31 mentioned are now pending and in the process of adjustment. This sounds like real progress to me.

Sincerely,

/ s / H. D. Hodgkinson

DRAWER 570•HARTFORD 1, CONNECTICUT

January 13, 1949

Mr. Frank T. Simpson
Executive Secretary
State Inter-Racial Commission
State Office Building
Hartford, Connecticut

Dear Mr. Simpson:

As far as I have had knowledge of and contact with it, I have been much impressed with the operation of the State Inter-Racial Commission under the Fair Employment Practices Act.

Since the 18 months that the Act has been in effect, I believe the Commission has accomplished more in the way of equalizing employment opportunities for all groups and in promoting understanding between different groups than any other agency, public or private, serving this area of human relations.

Perhaps even more significant than the actual results has been the Commission's approach to a critical social problem charged with controversy and ignorance. It has proceeded quietly and effectively, keeping its big stick in the closet, and stressing voluntary compliance. It has forcefully applied the techniques of education, relying on the natural common sense of Connecticut citizens, whether they be employers or workers. Its personnel has been carefully chosen and trained to reflect this democratic spirit of administration.

It is obvious that the biggest obstacle in securing fair employment practices throughout the state is getting minority workers past the employment office door. Once this is done, on the basis of proper qualifications for the particular job openings, it is up to these workers to make their own place on the work team. In our employment experience we have found that, given adequate ability and a friendly, willing personality, minority workers have no trouble in being fully accepted by their co-workers and in earning promotions to higher-paying jobs.

Yours sincerely,

/s/ Ellsworth S. Grant
Vice-President of
Industrial Relations

HAT CORPORATION OF AMERICA

South Norwalk, Connecticut

January 31, 1949

In your reply please refer to

Mr. Frank T. Simpson
Executive Secretary
State Inter-Racial Commission
State Office Building
Hartford, Connecticut

Dear Mr. Simpson:

Since the enactment of the Fair Employment Practice Act for the State of Connecticut, I have found that this Law has in no way interferred with our employment practices.

Upon its passage, local personnel groups here in Norwalk obtained a speaker from the State Inter-Racial Commission so that we would all be cognizant of the Law and how it was to be interpreted.

I think that many firms thought that it would interfere with the operation of its policy covering hiring and promotions but we received such a clear interpretation of the act that we saw nothing in it that would present any difficulties.

This Act created no problems but on the other hand has assisted in equalizing employment opportunities for all.

I think that the Fair Employment Practice Law has helped both Union and Management as it has clear out definitions that cannot be misinterpreted.

Very truly yours,

/s/ W. P. Morin
Personnel Director

F. FRANK VORENBERG
417 WASHINGTON STREET
BOSTON

January 25, 1949

Dear Mrs. Mahoney:

It has been suggested that it would be helpful to individuals and organizations interested in promoting fair employment legislation in other states, if they could have statements from business men who have had some experience in states where such legislation has been in effect.

I am glad to go on record for this purpose as one of those who favored the legislation creating the Fair Employment Practice Commission in this State and who has had no change of mind as a result of its workings to date. The creation of the Commission and the policies followed by it have provided an opportunity for education in employment practices not available to business men before the legislation. While there is no doubt considerable value to the threat of legal action if fair employment practices are not followed, I like to think that the principal value of the statute and of the constructive activities of the Commission has been in offsetting the fears so commonly expressed by employers during the committee hearings on the bill and elsewhere, the fear of legislating in an area where moral principles ought to be the guiding factor, and the fear of the effect of employing members of minority groups in positions where they had traditionally not been employed. The statute and the policies of the Commission have gone a long way to prove the truth of the famous phrase used in President Roosevelt's first inaugural, "The only thing we have to fear is fear itself."

In the business with which I am connected, a department store, the employment of Negroes as salespeople, which preceded the enactment of the F. E. P. C. legislation by several years, has been a demonstration of the emptiness of such fears.

Sincerely,

Mrs. Mildred H. Mahoney

March 24, 1949

RELEASE NO. 43 (SUPPLEMENT TO RELEASE NO. 42)

SUBJECT: Evaluation of State FEPC: Experiences and Forecasts

PROGRESS OF STATE FEP MEASURES

Fair employment practices measures have been enacted in three states during the current legislative session. In New Mexico, SB 45, modeled largely on the New York State law, passed both houses and was signed by Governor Mabry on March 17. The Washington state bill against discrimination in employment (SB 12), which is also based on the New York act, became law with the signature of Governor Langlie on March 19. In Oregon, a similar measure (SB 235) received final legislative approval on March 21, and will be signed by Governor McKay on March 25. The Oregon act differs in a number of particulars from the Washington and New Mexico laws, one of which is that it does not provide for an autonomous commission, but instead confers upon the Oregon State Bureau of Labor powers to eliminate and prevent discrimination in employment.

Although FEPC measures have met defeat in Arizona, Indiana, Montana, North Dakota, and Utah, bills are still under consideration and are reported to have a fair chance of passage in Colorado, Illinois, Iowa, Michigan, Minnesota, Missouri, Nebraska, Ohio, Pennsylvania, and Rhode Island.

To meet the continuing demand for evaluation of state fair employment practices acts, especially as regards the experience of business and industrial firms with such measures, the following information supplementary to that contained in ACRR Release No. 42 is supplied.

NEW JERSEY SURVEY

During the month of February, the Division Against Discrimination of the New Jersey Department of Education[1] initiated a survey to ascertain the reactions of industrialists and other employers to the operation of the New Jersey Anti-Discrimination Law.

The questionnaire, which was directed to 158 employers in all parts of the state, representing all sizes and kinds of businesses, made the following inquiries:

1. Has the New Jersey Anti-Discrimination Law caused any new difficulties or problems in your business or community?

2. Has the Anti-Discrimination Law interfered with your basic right to select the most competent workers for your operations?

3. Do you believe that the Anti-Discrimination Law has been fairly and effectively administered by the Department of Education in New Jersey?

By mid-March the Division Against Discrimination had received 65 responses, which, without exception, report reactions favorable to the law.

Several of the letters received by the Division are reproduced in full on the following pages. For further information, communicate with the Division Against Discrimination, New Jersey Department of Education, 1060 Broad Street, Newark 2, New Jersey.

---

[1] The Division Against Discrimination is the agency empowered to administer the New Jersey Anti-Discrimination Law.

Mr. Harold A. Lett, Chief Assistant
Department of Education,
State of New Jersey
1060 Broad Street
Newark 2, New Jersey

Dear Mr. Lett:

This is in reply to your questions regarding the effect on employers of the State's Anti-Discrimination Law. In this connection, you have asked three questions and, briefly, the answers are as follows:

1. As this Company had made some progress in the integration of racial groups prior to the passage of the New Jersey Anti-Discrimination Law, I would say that no serious difficulties since its passage have been introduced. The question is now taken as a matter of course.

2. The Anti-Discrimination Law has not interfered with our right to select the most competent workers.

3. We believe that the Anti-Discrimination Law has been administered with an unusual amount of understanding by the Department of Education.

Yours sincerely,

March 17, 1949

Mr. Harold A. Lett
N. J. State Dept. of Education
1060 Broad Street
Newark, New Jersey

Dear Mr. Lett:

While our observation and knowledge of the operation of the State's Anti-Discrimination Law is somewhat limited, I am pleased to answer your letter of the 16th.

Shortly after the Law went into effect, we were charged with discrimination, and one of your representatives called and made an investigation. He was given every opportunity to interview anyone he saw fit, including union officers. His report showed he found no discrimination. The real point is not that the Company was cleared of the charge, but that the investigation was made in a fair and impartial manner.

In answer to your specific questions, I would say that this Law has, insofar as our Company is concerned, introduced no new difficulties in our business or interferred with our selection of the most competent workers.

I believe from our experience that the Law is fairly administered.

Very truly yours,

Lea Fabrics Inc.

Gentlemen:

In reply to your inquiry of February 24, 1949 we wish to say that the subject Law has caused no new difficulties or problems in our business. Regarding this, it may be well to point out that the Management of this Corporation has always recognized the inherent right of an otherwise qualified individual to be gainfully employed here regardless of race, creed, or color.

We are aware of no added problems or difficulties in the community caused by the Law.

The Law in question has not interferred with our right to select the most competent workers for our operations.

We have heard no adverse criticism concerning the administration of the Anti-Discrimination Law by the Department of Education in New Jersey.

Very truly yours,

New York Shipbuilding Corporation

EXCERPTS FROM LETTERS FROM EMPLOYERS

"March 19, 1949, ... It is a pleasure to hear from you in your letter of March 16th. It is certainly a pleasure on my part also to give a testimonial to the fine manner in which Commissioner Bustard and all of you on his staff have handled the assignment here in New Jersey. I don't know that I can say more, but would be glad to write or talk with anyone who might have any questions on the subject ... Yours sincerely, W. H. Hill, Baldwin-Hill Company, 500 Breunig Avenue, Trenton 2, N. J.

"While we cannot speak from first-hand experience, all that we have learned from observation, discussion, public and private comment, leads to the inference that the Department of Education of the State of New Jersey, is doing an excellent job in fair and effective administration of the Anti-Discrimination Law ... The Lionel Corporation, 28 Sager Place, Irvington, Anthony Mercolino, Assistant to Vice President, Industrial Relations."

"March 10, 1949 ... The administration of the Anti-Discrimination Law, to the best of our knowledge, has been fairly and effectively done by the Department of Education in New Jersey and we have had no trouble nor inconvenience in abiding by the terms of the law. Very truly yours, Sigmund Eisner Company, 240 Bridge Avenue, Red Bank, New Jersey, C. R. Sellar, Controller."

"... March 14, 1949 ... It is my opinion that the Anti-Discrimination Law has been fairly and effectively administered by the Department of Education in New Jersey. We have had several contacts with field representatives of your office, and in every instance have found them to be reliable and open-minded when making investigations. Inquiry on the part of your department has served to point up some of our personnel practices resulting in improved management. Sincerely yours, Irvington Varnish and Insulator Company, Irvington 11, New Jersey, Joseph Pickett, Manager, Employee Relations Department."

"... I not only believe that the Anti-Discrimination Law has been fairly and effectively administered by the Department of Education, but it has been done in such a diplomatic way the majority of the people are not conscious that it is being operated. John Lucas & Co., Incorporated, Gibbsboro, New Jersey, A. W. Smyth, Personnel Manager."

REPORT ON CIVIL RIGHTS LEGISLATION IN THE STATES

Supplement to REPORT, March, 1949, Vol. 4, No. 3

REPORT, Monthly Publication of the American Council on Race Relations

During the past month, four states have passed measures authorizing the establishment of fair employment practice commissions: Washington, New Mexico, Oregon and Rhode Island. Although similar legislation has failed in Arizona, Indiana, Montana, and Utah, chances for passage remain fair in a number of states (see table below).

New Jersey has the distinction of being the first state to achieve passage of an omnibus civil rights bill. The Freeman bill, which gives the New Jersey Division Against Discrimination full authority to enforce equal rights in the areas of education, health, public accommodations, and recreational facilities, passed the Assembly and Senate unanimously.

In Connecticut both houses gave unanimous approval of an administration-sponsored bill to eliminate discrimination and segregation in the Connecticut military organizations. Governor Bowles signed this measure on March 16.

Indiana has outlawed segregation and discrimination in public schools and educational facilities with the passage of HB 242, sponsored by the Indiana Council for Civil and Human Rights. In Missouri a notable report prepared by the House Equal Rights Committee and presented to the legislature on March 2 recognized "the root of the (educational) problem to be segregation by statute," and recommended several measures to abolish statutory segregation of the races in the educational system of the state. One of the recommendations has been incorporated in HB 182, introduced for House consideration on March 9.

Other measures whose progress is of interest to citizens involved in civil rights campaigns are reported in the following table, which has been prepared with the help of ACRR correspondents throughout the United States.

STATUS OF STATE LEGISLATION AFFECTING INTERGROUP RELATIONS, AS OF MARCH 31, 1949

	PURPOSE OF BILL	NO.	AGENCY SPONSORSHIP	PROGRESS
	ANTI-DEFAMATION			
Cal.	To prohibit "advocation of hatred" based on race, color or creed.	AB 529 AB 129	California Federation for Civic Unity.	Introduced: Rosenthal and others. 1-13-49

Tex.	To remove poll tax as a prerequisite to voting.			

JBS

1-American Council on Race Relations

FEP LAWS PASSED BY THREE STATES

AMERICAN COUNCIL Report ON RACE RELATIONS

RECEIVED APR 18 1949 Southern Regional Council

MARCH, 1949 VOL. 4, NO. 3

EDUCATION

INDIANA

On March 8, Governor Schricker of Indiana signed a measure establishing "a public policy in public education and abolishing and prohibiting separate schools organized on the basis of race, color or creed, and prohibiting racial or creed segregation, separation or discrimination in public schools, colleges and universities in the state of Indiana and prohibiting discrimination in the transportaton of public school pupils and students." The new law also provides that no school, college or university supported in whole or in part by public funds shall discriminate in any way in hiring, upgrading, tenure or placements of any teacher on the basis of race, creed or color.

To comply with this law which was sponsored by the Indiana Council for Civil and Human Rights and the Indiana State Conference of Branches of the National Association for the Advancement of Colored People, kindergarten and grade schools must complete their program of integration by September 1950; junior high schools, by September, 1951; and high schools, by September, 1954.

HOUSING

CONNECTICUT

In January at a meeting of the Court of Common Council of Hartford, Connecticut the following resolution was passed by unanimous roll call vote:

"RESOLVED, that whereas, it is a fundamental principle of our democracy that all men are created equal, and

WHEREAS, discrimination against any person because of his race, national origin, political or religious opinions or affiliations is a negation of this principle, and

WHEREAS, the City of Hartford, in the case of any public or private housing development within our City, in which it has a financial interest, as described below, has likewise a moral obligation to prevent such discrimination or segregation,

THEREFORE, BE IT RESOLVED, That no applicant for quarters in any such housing development, constructed with the aid of city funds, whether through tax waiver or abatement, land grant or land development, or through any other assistance from the City of Hartford, shall be subject to discrimination or segregation because of his race, national origin, political or religious opinions or affiliations, and

BE IT FURTHER RESOLVED, That a copy of this resolution be forwarded to Governor Chester Bowles with a recommendation that a similar resolution relating to such housing developments in the State of Connecticut be adopted by the General Assembly of the State of Connecticut."

Representative Alsop has introduced House Bill No. 414 "An Act Concerning the Amendment of the Housing Authority Act" (Chapter 33 of 1939 Supplement to the General Statutes). Section 1 of HB 414 which has been referred to the Committee on Judiciary states "For all purposes of this chapter, no person shall because of race, color, religious creed, national origin or ancestry, be subjected to any discrimination. Discrimination shall include segregation and separation."

This bill is identical with Senate Bill No. 296 introduced by Senator Monchum.

ADMINISTRATION

INDIAN AFFAIRS

President Truman nominated Dr. John R. Nichols, President of the New Mexico College of Agriculture and Mechanic Arts, to be Commissioner of Indian Affairs. The position has been vacant almost a year since Commissioner William A. Brophy resigned. Dr. Nichols has been granted a year's leave of absence from the Las Cruces, New Mexico college.

In three states, New Mexico, Washington and Oregon, campaigns to establish fair employment practices acts have been brought to a successful conclusion.

The New Mexico Act, which became law on March 17, establishes a five-member New Mexico Fair Employment Practice Commission. This Act is broader than most similar legislation in including employers of four or more, rather than the more usual classification of employers of six or more. Also new is the provision permitting complaints to be filed by associates or other persons on behalf of the aggrieved employee, as well as by the employee or his attorney. In addition, the Industrial Commission and the Attorney General may file complaints. The provision authorizing judicial enforcement permits the court to consider the matter solely upon the transcript of the Commission or to order a trial de novo.

The New Mexico Committee on Human Relations was largely responsible for passage of the bill.

The Washington Act, like that of New Mexico, is based on the New York Act; it became law on March 19. This Act also establishes a five-member Commission. It is, however, less broad than most of the existing acts in that it applies only to otherwise included employers of eight or more. Of special interest is the section which removes the state from judicial review when one of its political or civil subdivisions is the respondent. In such instance, enforcement of the Commission's orders is vested in the governor. A vigorous campaign was waged on behalf of this bill by the Washington State Committee Against Discrimination.

The Oregon measure, signed by the governor on March 25, differs from the foregoing acts in several details. Instead of an autonomous agency, it provides for administration of the Act by the Bureau of Labor. This Act classifies employers in the familiar six or more category. An advisory committee is provided for which includes among its functions the formulation of plans to end discrimination. Judicial review is provided for by a trial de novo on application of the aggrieved party and enforcement may be by mandamus, injunction, or a suit in equity to compel specific performance. The Oregon Committee for a Fair Employment Practices Act was instrumental in the passage of this measure.

The New Jersey Civil Rights Act (the Freeman Bill) includes Fair Employment Practices in that State. The sections on employment are almost without change those of Chapter 169 of the Laws of 1945.

PUBLIC POLICY

NATIONAL GUARD

Governor Chester Bowles recently signed a measure to eliminate discrimination and segregation in Connecticut military organizatons on account of race, creed or color. The bill was approved in the House of Representatives without a dissenting vote.

Section 1 of the Connecticut law states as follows: "No person, otherwise qualified, seeking admission to the organized militia, the national guard or the naval militia of this state shall be refused admission because of race, color, religious creed, national origin or ancestry. Nor shall any units in the organized militia, the national guard, or the naval militia be established or maintained which shall segregate or separate personnel because of race, color, religious creed, national origin or ancestry. Any rule, regulation or prior statute or section thereof inconsistent with this enactment, is hereby declared null and void."

Major General Frederick G. Reincke, the adjutant general, issued a statement stating that he is ordering all organization commanders to enlist men between the ages of 18 and 45, regardless of race, creed and color. "All commanders are enjoined to cooperate to the fullest extent in carrying out the spirit of this directive with respect to assignments and promotions," he said.

Governor Bowles had insisted on the measure as a major plank in his legislative program. Commenting on the law, he stated, "It should be a warning to them that decent Americans do not subscribe to the principle that it is right to deny the Negro his rightful place in our society." . . . "I am sure that every democratically-minded citizen in Connecticut must feel a real thrill of satisfaction." He praised the General Assembly for passing the bill and stated, "I believe that our action here will serve as an example which states all over the Union will follow."

Thus Connecticut becomes the second state to have legislation against segregation in the National Guard. New Jersey accomplished the same action with a constitutional amendment two years ago.

Article 1, section five of the New Jersey law states: "No person shall be denied the enjoyment of any civil or military right, nor be discriminated against in the exercise of any civil or military right, nor be segregated in the militia or in the public schools, because of religious principles, race, color, ancestry or national origin."

The New York State Senate on March 14, 1949 adopted unanimously the Panken Bill which would eliminate segregation in the New York National Guard dependent on adoption of a similar program in the United States Army, Navy and Air Force. The Senate has before it now the amended Assembly version of the bill which would eliminate segregation from the New York National Guard without any qualifications.

MISSOURI

Findings and pronouncements of wide significance were read into the House Journal of the State of Missouri in the report of the Missouri Equal Rights Committee on March 2. The Committee had been appointed by the Sixty-Fourth General Assembly to determine "what action should be taken to implement the new provision . . . of our Constitution to make our practice of democracy consistent with its pronouncement of equality."

The report states, "It is our conclusion that some minority groups are denied rights by statute, regulation and custom which are granted under the State and Federal Constitution." The report adds further that "we unanimously find that there is a sociological lag between the culture of the community, or its mores, on the subject of discrimination, and its laws."

The Committee presented evidence of violations of equal rights in the areas of elementary and high school education, vocational training, job placement, the National Guard, higher education, recreational facilities, medical facilities, unions, and public accommodations in the State capitol, itself.

The report oulined the baleful influences of such discrimination on the minority groups and on the community and the state.

The Committee of five: Howard L. Cline, Chairman; Wallace M. Pearson; Floyd L. Snyder, Sr.; Bruno Sendlien and Josiah Thomas recommended unanimously that "as the first step in the security of equal rights for all citizens, as guaranteed by the Constitution, that the State must repeal all statutes, regulations, and precedents which require or induce discrimination between citizens in the enjoyment of constitutional rghts."

It further recommended positive measures to correct the inequalities found, including the establishment of a permanent commission to further the work begun by the Committee. The work of the commission would be of permanent nature and would concern itself with:

"(a) Continuing the hearings at various points in the State,

"(b) Measuring the development of the mores, and recommending further legislation consistent with the community program to take up the cultural lag."

In conclusion the Committee stated, "It cannot be reasonably anticipated that the foregoing recommended adjustments will produce an ideal situation over night.

"Generations of mal-adjustment cannot be off-set by fiat. Early readjustments will produce initial excesses and abuses which will be discouraging. But the basic step must be taken some time in the interests of community welfare. With the rapid developments and progress taking place in every quarter of the land, the question as to why we, too, should not move vigorously forward presents itself forcibly and squarely at this time."

HONORS

ACRR BOARD MEMBERS

Dr. Ralph J. Bunche, acting United Nations mediator in the Middle East and a member of the Board of Directors of the American Council on Race Relations has been awarded the 34th Spingarn Medal, the National Association for the Advancement of Colored People announced.

Dr. Bunche has been cited "for his priceless contribution to the settlement of armed conflict in the Middle East and his enduring patience, industry, courage, and selflessness in attaining that goal," as well as for his work as director of the trusteeship of the United Nations.

The medal which is awarded by vote of a committee of nine was established in 1914 by the late J. E. Spingarn, an official of the NAACP, and is given annually to the American Negro deemed to have made "the highest achievement during the preceding year or years in any honorable field of human endeavor." The formal presentation of the award will be made on July 17 at the NAACP 40th annual conference in Los Angeles, California.

Channing H. Tobias, Director of the Phelps-Stokes fund and a member of the American Council on Race Relations Board was the recipient of the award last year.

Mrs. Mary McLeod Bethune, another member of the Board of Directors of the American Council on Race Relations recently received an Honorary Degree of Doctor of Humanities from Rollins College in Winter Park, Florida. This is one of the few times that a southern white college has so honored a Negro.

Walter White, also a member of the American Council on Race Relations Board, and Executive Secretary of the National Association for the Advancement of Colored People, was one of six men decorated with the Haitian National Order of Honor and Merit by Ambassa-

REPORT ON CIVIL RIGHTS LEGISLATION IN THE STATES

Supplement to REPORT, March, 1949, Vol. 4, No. 3

REPORT, Monthly Publication of the American Council on Race Relations

During the past month, four states have passed measures authorizing the establishment of fair employment practice commissions: Washington, New Mexico, Oregon and Rhode Island. Although similar legislation has failed in Arizona, Indiana, Montana, and Utah, chances for passage remain fair in a number of states (see table below).

New Jersey has the distinction of being the first state to achieve passage of an omnibus civil rights bill. The Freeman bill, which gives the New Jersey Division Against Discrimination full authority to enforce equal rights in the areas of education, health, public accommodations, and recreational facilities, passed the Assembly and Senate unanimously.

In Connecticut both houses gave unanimous approval of an administration-sponsored bill to eliminate discrimination and segregation in the Connecticut military organizations. Governor Bowles signed this measure on March 16.

Indiana has outlawed segregation and discrimination in public schools and educational facilities with the passage of HB 242, sponsored by the Indiana Council for Civil and Human Rights. In Missouri a notable report prepared by the House Equal Rights Committee and presented to the legislature on March 2 recognized "the root of the (educational) problem to be segregation by statute," and recommended several measures to abolish statutory segregation of the races in the educational system of the state. One of the recommendations has been incorporated in HB 182, introduced for House consideration on March 9.

Other measures whose progress is of interest to citizens involved in civil rights campaigns are reported in the following table, which has been prepared with the help of ACRR correspondents throughout the United States.

STATUS OF STATE LEGISLATION AFFECTING INTERGROUP RELATIONS, AS OF MARCH 31, 1949

	PURPOSE OF BILL	NO.	AGENCY SPONSORSHIP	PROGRESS
	ANTI-DEFAMATION

dor Joseph D. Charles of the Republic of Haiti. Ambassador Charles announced to Mr. White that his government was bestowing this honor on him "in witness of its high appreciation of your personal merits, of the magnificent work which you have accomplished for the rights of man, and the eminent services which you have been rendering over a long period of years to the Haitian Republic."

LEGISLATION

EQUALITY IN NATURALIZATION AND IMMIGRATION

On March 1, the House approved by voice vote HR 199 (Judd, R. Minn.), which would remove the last racial barriers to immigration and naturalization. The measure sets up quotas for Asiatic peoples who have previously been excluded from this country and permits naturalization of those already residing in America. The quotas established for this group of more than 250 million people would be deducted from the total quotas for all countries of the world.

The vote came after the House had rejected, 19-118, an amendment to eliminate the provision which would establish a colonial quota of one hundred for the West Indies and other colonies for which no separate quota has been previously established. By a roll call vote of 39-366, it rejected a motion to recommit for the same purpose by Vito Marcantonio (ALP N.Y.).

The E.N.I. bill, which has the support of the Japanese American Citizens League, the Committee for Equality in Naturalization and other organizations, is now in the Senate Judiciary Committee.

"COMPROMISE" ON FILIBUSTER

In spite of the opposition of many nation-wide organizations, which believe that the filibuster constitutes a threat to their entire civil rights program, a coalition of Southern Democrats and Republicans succeeded on March 17 in effecting a "compromise" on an anti-filibuster resolution (S. Res. 15) offered February 28 by Majority Leader Lucas (D. Ill.). The "compromise," sponsored by Minority Leader Wherry (R. Neb.), requires approval of two-thirds of the entire Senate to invoke cloture and prevents application of cloture to any motion or resolution to amend Senate rules. The rule previously in effect limited debate by two-thirds of those voting on "pending measures."

During the course of the filibuster, which lasted for eighteen days, the Senate repudiated a ruling by Vice-President Barkley that cloture could be applied to motions, and rejected amendments which would have invoked cloture by two-thirds of those voting on all matters except rules changes, invoked cloture by a majority of those voting, guaranteed that cloture would be applied to motions to amend the Journal, or invoked cloture by a constitutional majority of the Senate.

The "compromise" plan, which was accepted by Republicans and Southern Democrats on March 14, was rejected by Administration forces. The next day a petition calling for the "compromise" was circulated by Knowland (R. Calif.), Russell, (D. Ga.), and Tydings (D. Md.). It was signed by 52 Senators: 22 Republicans, 18 Southern Democrats, and 12 Democrats from boarder states and the North and West. When the "compromise" came to the floor, in the form of an amendment to S. Res. 15, the vote was 63-23.

This final action, climaxing weeks of debate, was taken without regard to the statements of many organizations which have supported cloture by majority vote to apply to both measures and motions. These organizations include the new Joint Committee on Civil Rights, composed of representatives of twenty-one national agencies; Civil Liberties Clearing House, representing sixty-six national agencies; Civil Rights Congress; National Catholic Welfare Conference; American Jewish Committee; Americans for Democratic Action; National Council of Jewish Women; Women's International League for Peace and Freedom; National Association for the Advancement of Colored People; Unitarian Fellowship for Social Justice; Congress of Industrial Organizations; American Federation of Labor; National Medical Association; and Negro Newspaper Publishers Association.

MASS COMMUNICATION

CLEVELAND

Cleveland's three daily newspapers agreed to drop designations of race, religion, color, nationality or ancestry in their help wanted ad columns. Only ads excluded from this regulation are those for domestic help in private homes or private personal services.

The joint resolutions of the papers, the Cleveland *Press, News,* and *Plain Dealer* read:

"Member publishers agree that they will not accept male or female help or situation wanted advertising which contains references to race, religion, creed, color and ancestry. This includes employment bureau advertising, but does not include help or situation wanted advertising for domestic help in private homes or advertising for private personal services."

COMMUNITY ORGANIZATION

AMERICAN JEWISH COMMITTEE

Presented herewith is a statement of views adopted by the American Jewish Committee at its annual meeting in January. "We of the American Jewish Committee are associated under the mandate of our Charter, adopted in 1906, to prevent the infraction of the civil and religious rights of Jews in any part of the world and to secure equality of economic, social and educational opportunity.

"We join with all other Americans, of whatever creed or color, who devote themselves to the continued fight against those who through bigotry and prejudice endeavor to imperil the rights of any group in this land and thus divide our country and undermine the foundations of American liberty.

"We join with men of good will everywhere in the effort to obtain for all mankind the essential human rights, as set out in America's basic documents of freedom. We hail the historic Report of the President's Committee on Civil Rights and the Declaration of Human Rights, adopted by the General Assembly of the United Nations.

"We call upon our own nation and the nations of the world to protect and enforce these rights by every appropriate means, domestic and international. We urge upon our own and all other countries the adoption of liberal, just and non-discriminatory immigration laws. . . .

"We hold the establishment of the State of Israel to be an event of historic significance. We applaud its recognition by our own and other governments. We look forward to Israel's assumption of its full place among the family of nations as a government guaranteeing complete equality to all its inhabitants, without regard to race, creed or national origin, and as an advocate of liberty and peace in the Near East and throughout the world. Citizens of the United States are Americans and citizens of Israel are Israelis; this we affirm with all its implications; and just as our own government speaks only for its citizens, so Israel speaks only for its citizens. Within the framework of American interests, we shall aid in the upbuilding of Israel as a vital spiritual and cultural center and in the development of its capacity to provide a free and dignified life for those who desire to make it their home.

"In these critical times, when totalitarian forces and ideas again threaten the liberties of the world, we re-dedicate ourselves to the struggle for the maintenance and advancement of individual dignity and freedom."

MEMORANDUM

TO: National Agencies in the Field of Intergroup Relations

FROM: The American Council on Race Relations

SUBJECT: Sessions on Civil Rights and Intergroup Relations at the National Conference of Social Work Cleveland, Ohio, June 12 - 17

Attached you will find a list of the important sessions at the National Conference of Social Work, relating to the topics Civil Rights, Intergroup Relations, and Social Justice. The sessions listed on the attached sheet are excerpts from the Conference Bulletin published by the National Conference of Social Work.

It has been suggested that the national agencies in the field of intergroup relations might want to reproduce the attached list and make it available to their constituents in the city of Cleveland and nearby cities. The Program Committee of the National Conference of Social Work is anxious to have as much lay participation in its 76th annual meeting as possible. Therefore, members of your organization in the Cleveland area and their associates will be welcome.

Attachment: List of selected sessions on intergroup relations at the National Conference of Social Work.

NATIONAL CONFERENCE OF SOCIAL WORK

76th ANNUAL MEETING

CLEVELAND, OHIO * JUNE 12-17, 1949

General Sessions

General Theme--Toward a Better Life--The Positive Role of Social Work in Resolving Social Conflict and Attaining Social Goals.

Sunday, June 12

8:30 P.M.

Social Goals for the Nation and the World.

Louis Wirth, President, American Council on Race Relations, and Professor of Sociology, University of Chicago, Chicago, Illinois

Monday, June 13

9:30 A.M. - 10:45 A.M.

Civil Rights Versus Civil Strife.

Benjamin Youngdahl, Dean, George Warren Brown School of Social Work, Washington University, St. Louis, Mo.

Tuesday, June 14

9:30 A.M. - 10:45 A.M.

Unique Possibilities in the "Melting Pot".

Margaret Mead, Associate Curator of Ethnology, American Museum of Natural History, New York City.

Thursday, June 16

9:30 A.M. - 10:45 A.M.

National and World Cooperation Versus Provincialism.

George E. Haynes, C.B.E., Pres., International Conference of Social Work; Secty., National Council of Social Service, London, England.

Friday, June 17

8:30 A.M. - 10:45 A.M.

Freedom with Security

Paul Douglas, United States Senator from Illinois, Washington, D.C.

Wednesday, June 15

11:15 A.M. - 12:45 P.M.
Group Discussion 3

A Record on Inter-Racial Camping Which Provides an Opportunity to Identify and Trace Through the Process of Dealing with Social Conflict and Tensions in an Educational Project with Democratic Goals.

Chairman: Lolette Crutcher, Program Director, the Cleveland Girl Scout Council, Cleveland, Ohio.

Discussion Leader: Margaret Hartford, Executive, American Service Institute of Allegheny County, Pittsburgh, Pennsylvania.

SECTION XI

METHODS OF SOCIAL ACTION

Louis E. Hosch, Executive Secretary, American Council on Race Relations, Chicago, Illinois
Chairman

Harold A. Lett, Chief Assistant to Director, Division Against Discrimination, New Jersey Department of Education, Newark, New Jersey
Vice Chairman

Monday, June 13

11:15 A.M. - 12:45 P.M.

Civil Rights in Social Work.

Jane M. Hoey, Director, Bureau of Public Assistance, Social Security Administration, Federal Security Agency, Washington, D. C.

Thursday, June 16

11:15 A.M. - 12:45 P.M.
Group Discussion 1

Social Work Action for Social Justice: On the Legislative Front.

Discussion Leader: Frank W. Baldau, Executive Director, Cleveland Community Relations Board, Cleveland, Ohio.

Group Discussion 2

Social Work Action for Social Justice: In Agency Administration.

Discussion Leader: Russell Ballard, Director, Hull House, Chicago, Illinois.

Group Discussion 3

Social Work Action for Social Justice: In Program Content and Operation.

Discussion Leader: Albert Deutsch, Columnist, New York Post, New York City.

CHICAGO

A Big City Has Big Problems

LOUIS WIRTH

THE Report of the President's Committee on Civil Rights has prompted many steps toward democracy. Although Chicago is proud of her part in this year-old progress, temporary setbacks leave some blots on the city's record.

During the past few years, Chicago has continued to be a favorite place of migration for thousands of Negro families from the near and lower South, for a substantial proportion of Japanese-Americans from wartime camps and for thousands of displaced persons. Despite the housing shortage, which is the main obstacle to their full and easy incorporation, these newcomers are being absorbed into the life of the community.

Too Little Shelter

Chicago's housing problems were serious before 1941, were aggravated by wartime demands, and became acute when the end of hostilities brought home service men and women, anxious to found new families. In the face of a negligible addition to the total housing supply, and that at prohibitive cost, the problem of finding living space for in-migrants has generated hardships and understandable bitterness. For Chicago's increasing number of Negro residents, the search for shelter has been further complicated by barriers of racial exclusion.

The story of the Airport Homes Project, in November 1946, received national attention, when the Chicago Housing Authority's attempt to settle a few Negro families in the dominantly white-tenanted project resulted in mass demonstrations and violence. The police were slow in meeting their responsibility. Finally, the few Negro families originally assigned to the project moved out.

But the unfortunate incident did not end there because it stimulated constructive groups to bring the issue to public attention. As a result, there emerged a clearer policy on the part of the Chicago Housing Authority and of the city administration in support of nondiscriminatory principles in housing and of policing adequate to prevent disorder and violence.

Six months later, when another racially mixed project in Fernwood was about to be occupied by the assigned Negro and white tenants, plans to avoid a repetition of the Airport Homes experience were developed in advance. Efforts to welcome the tenants included a canteen established to dispense food for their convenience on moving day. Police were present to prevent disorders. During the evening, the project and the adjacent area were closed to motor traffic, and the police detail was increased. But on the second night, a crowd gathered, and soon degenerated into a mob bent upon ejecting the Negro tenants—by violence if necessary. Unable to reach the project itself, the crowd surged to a nearby main thoroughfare and began stoning Negro motorists. Greatly strengthened police forces were able to disperse the mob, but the disorders were resumed the next night. Even the police were violently attacked. More than a score of arrests were made, and, with the resumption of violence on the following night, nearly a hundred additional arrests were made. Subsequent court hearings showed that a part of the mob consisted of youths imported from neighboring areas.

Law and order were victorious because, as in many other similar instances in Chicago and elsewhere, the Fernwood experience proved that an unequivocal policy of nondiscrimination, consistently practiced and adequately enforced, can win the overwhelming support of the public, provided adequate preparation is made in the local community.

Although organized violence on this scale has not been repeated in Chicago, Negro in-migrants to hitherto white areas have been subjected to sporadic outbursts, vandalism, and even to arson and bombing. Fortunately, few Negro families which have moved into white areas have yielded to intimidation; even fewer have attempted retaliation. But overt and subtle resistance has significantly retarded the ability of Negro families to escape from slums and congested areas.

During the past few years, however, Negro families have been increasingly able to move, and some Negro residents can now be found in more than forty of the city's fifty wards. The notable Supreme Court decision of May 3, 1948, making racially restrictive covenants unenforceable in the courts, has deprived residential segregation of its most effective sanction. It is not to be hoped, however, that it will suddenly

revolutionize long-established attitudes and patterns of settlement; nor has it so far appreciably expanded the total housing supply available to the majority of the Negro population.

While some of the greatest difficulties in the improvement of intergroup relations in Chicago, as in other cities, have been met in the field of housing, similar problems have been encountered in employment, education, health, welfare, recreation, the administration of justice and the use of public and quasi-public facilities.

The City Defends Its Citizens

Chicago's Commission on Human Relations has continued to serve as an effective public agency, and now receives the official support of the municipal government, both financial and moral. Its vigilant and accurate reporting of cases of discrimination, tension and violence—actual and threatened—has helped to check outbreaks. Of special interest, from the point of view of public education and citizen participation, was a city-wide Conference on Civic Unity, in which the problems and progress of the city were reviewed before a group of citizens representing the many organizations concerned with improving racial and cultural relations.

Citizens Defend Each Other

Corresponding to the work of the Commission on Human Relations, on the public side, is the vigorous activity of the Chicago Council Against Racial and Religious Discrimination. It has served as a fact-finding body, as a watchdog and critic, catalytic agent and mediator and, on every crucial occasion, as the mobilizer of constructive community opinion and action. Churches, labor unions, civic organizations, and specialized agencies representing minority groups have cooperated under the Chicago Council's leadership in many crucial efforts to prevent undesirable incidents and to guide the city in the pursuit of democratic policies.

To Secure these Rights has inspired many of the institutions of the community to reexamination of their policies and operations. A notable instance is Michael Reese Hospital and its associated facilities, including its School of Nursing and Mandel Out-Patient Clinic. This institution, operating under the auspices of the Jewish Charities of Chicago, has developed a policy of serving all members of the community, irrespective of race or creed, and has set such an excellent standard for similar institutions that it has received a special award from the Commission on Human Relations.

The Neighborhood Spirit

Neighborhoods in Chicago have also organized themselves in behalf of freedom and justice, sometimes fostered by the Council of Social Agencies to improve housing, health and welfare. Of special interest is the Back-of-the-Yards Neighborhood Council, an effective instrument for education and common action among the scores of business, labor, church, health, welfare and other organizations in the stockyards area.

A unique program of training police for dealing with intergroup problems, under the auspices of the Chicago Park District, is being continued, and serves as a model for a number of police departments throughout the country.

In the Chicago public schools, the General Superintendent has inaugurated a program which goes far beyond what is conventionally done under the name of intercultural education. Undertaken in cooperation with Chicago University's Committee on Education, Training and Research in Race Relations, this program seeks to develop and utilize the resources of social science research, in the better understanding and solution of problems of intergroup relations, as well as to train professionally competent experts in the field.

A Center of National Planning

The American Council on Race Relations, recognizing the need for more effective exchange of information, for the development of professional standards and for a medium of contact between the many hundreds of public and private, federal, state and local agencies in the field of racial and intergroup relations, cooperated with a group of leaders representing agencies from all parts of the country in establishing the National Association of Intergroup Relations Officials. Under the auspices of the American Council and of NAIRO, Chicago has been host to two national conferences on intergroup relations, one held when the President's Committee Report was first issued in November 1947, and the second, a year later, in November 1948. These conferences, attended by several hundred policymakers, executives and professional staff members of agencies and organizations throughout the nation have helped to clarify issues, to analyze policies, to evaluate techniques and to promote mutual understanding and professional standards.

Altogether, Chicago has taken *To Secure These Rights* seriously, for the Big City is awake to its responsibilities in moving closer, day by day, to the ideal of a democratic America.

N.Y. COURT UPHOLDS HOUSING DISCRIMINATION

AMERICAN COUNCIL
Report
ON RACE RELATIONS

JULY, 1949 VOL. 4, NO. 7

HEALTH

NEGRO NURSES

The North Carolina Association of Negro Registered Nurses, Inc. has voted unanimously to dissolve its 27-year old organization in order to join the North Carolina State Nurses Association, which voted to admit Negro nurses last October, it was announced by Mrs. Alma Vessells John, Executive Secretary of the National Association of Colored Graduate Nurses, Inc.

Admission to State Associations will qualify Negro nurses for admission to the American Nurses Association which they can now join as individual members.

Mrs. John stated: "If America is to get the kind and amount of nursing care it needs, we have to help bring full democracy to the profession by recruitment, higher standards of education and service, full participation and membership in professional organizations on the local and state levels."

RECREATION

AMERICAN BOWLING CONGRESS

Joseph L. Bustard, Assistant State Commissioner of Education, stated officially that "as long as the American Bowling Congress continues its policy of exclusion of Negroes from participating in its tournaments, the State Division Against Discrimination in New Jersey will resist every effort on the part of this organization to hold tournaments in this state."

Mr. Bustard defined his position in a letter made public by the New Jersey State CIO Council when it had raised objections to racial segregation in tournaments sponsored by the American Bowling Congress.

"I can assure," Mr. Bustard wrote, "that we have the word of Atlantic City officials, that they are not interested in securing the American Bowling Congress tournament again, as long as the above mentioned policy remains in effect."

THIRD NATIONAL CONFERENCE ON INTERGROUP RELATIONS
November 3, 4, 5, 1949
Shoreland Hotel, 5454 South Shore Dr.
Chicago, Illinois
Convened By:
American Council on Race Relations
and
National Association of Intergroup Relations Officials

The ABC had held its annual tournament in Atlantic City in February of this year at which time the Executive Director of the ABC voted to keep the ABC an "all white" organization despite objections raised by many groups which included the Catholic Youth Organization; the New Jersey State CIO Council; United Auto Workers; the National Association for the Advancement of Colored People; the Japanese American Citizens League; the National Labor Service; the Anti-Defamation League, the National Committee for Fair Play in Bowling; and the American Veterans Committee.

PUBLIC POLICY

MIAMI BEACH, FLORIDA

A law was recently enacted by the state legislature of Florida whereby the city of Miami Beach is permitted to prohibit the publication or display of any notice or sign tending to discriminate against persons because of race or creed in any place of public accommodation.

Although this is not a civil rights law in the accustomed pattern and does not grant to any minority group the right of service in place of public accommodation, it could mean the end of the opprobrious "Colored" and "White" signs throughout the city of Miami Beach.

(*Cont'd P.* 3, *Col.* 2)

The New York Court of Appeals in a 4 to 3 decision ruled that the Metropolitan Life Insurance Company had the right to bar Negroes from the Stuyvesant Town housing project. The high court affirmed lower court rulings dismissing an action brought by three Negro war veterans who applied for apartments in the housing project.

A taxpayer suit brought by Shad Polier, Vice President of the American Jewish Congress was also dismissed which sought to bar discrimination against Negroes in Stuyvesant Town and to restrain the city from granting tax exemption to Stuyvesant Town and the Metropolitan Life Insurance Company unless they ceased their discriminatory policies.

Judge Bruce Bromley stated in the majority opinion that the Legislature "deliberately and intentionally refrained from imposing any restriction upon a redevelopment company in its choice of tenants. Attempts repeatedly made in the Legislature since the law was enacted to alter the policy of the statute in this respect have failed.

"On the other hand," he added, "the Public Housing Law, which is applicable to state-constructed low-cost housing projects, expressly prohibits discrimination. There is no claim that the Legislature refused by amendment to make similar provision in the Redevelopment Companies law because it thought the statute already barred discrimination, and it is undisputed, therefore, that the legislative intent is clear to leave private enterprise free to select tenants of its own choice."

The plaintiffs contended in their arguments before the high court that discrimination against Negroes in Stuyvesant Town "is supported and made possible by state action" since construction of the project would not have been possible without exercise of the power of eminent domain, the power to dispose of public property, and tax exemptions.

To the contention that "discrimination by private agencies is constitutionally forbidden when it is supported, or made possible by state action," Judge Bromley asserted:

"For years it has been unquestioned that the great prohibitions of the Fourteenth Amendment are addressed to that action alone which may fairly be said to be that of the States . . ."

Concurring in the majority opinion were Judges Edmund H. Lewis, Albert Conway and Marvin R. Dye. Judge Stanley Fuld dissented in an opinion in which Chief Judge John T. Loughran and Charles S. Desmond concurred.

COMMUNITY ORGANIZATION

PORTLAND, OREGON

The Mayor of Portland, Oregon, Dorothy McCullough Lee, has by executive order appointed a Mayor's Committee on Inter-Group Relations to serve in an advisory capacity to the Mayor.

The chairman of this Committee is Reverend Myron C. Cole, pastor of The First Christian Church in Portland. The Secretary for the Committee is a city employee, but no specific appropriation has been made as yet for the Committee.

The objectives and functions of this Committee according to Mayor Lee are as follows:

"The purpose of the Mayor's Committee on Inter-Group Relations is to improve racial, religious, ethnic and cultural relations of the people of our City. You should lay special emphasis on alleviating possible tensions among our people.

"It will be your function to advise the Mayor, assist in the formation of public opinion, promote unity and understanding among all groups and remove causes of tension.

"The Committee will serve in the dual capacity of being a citizens' committee and an advisory committee to the Mayor.

"The Committee will carry out its objectives by education of, and by, the Committee, investigation, fact-finding and research, consultation and negotiation, promotion of discussion and good will, holding hearings, giving guidance and submitting and compiling reports of its activities and findings. All of these methods will be used to the end that intolerance and prejudice may be eliminated."

N.A.A.C.P.

A three-day nationwide conference of attorneys for the National Association for the Advancement of Colored People was held recently in New York under the chairmanship of Governor William H. Hastie of the Virgin Islands.

The NAACP reported that the conference "was devoted to an examination of techniques being used by the NAACP in the fight against segregation in interstate commerce now being enforced by carriers, and in education at the elementary and secondary levels as well as in the graduate and professional schools."

Emphasis was given to the fight to break down discrimination in employment and housing and to the problems of disfranchisement of Negroes in the South, with particular reference to the new discriminatory voting qualifications in Georgia.

Working groups of the National Legal Committee were formed to advise and direct the major phases of NAACP legal work on a continuing basis. A committee was also appointed for the purpose of securing broader cooperation of NAACP branches, other organizations and individuals in support of the new and expanded program.

ADMINISTRATION

NEW YORK SCAD

Governor Thomas Dewey announced the appointment of Edward W. Edwards of Albany to the position of Chairman of the New York State Commission Against Discrimination. He succeeds Charles W. Garside of New York City, who resigned to devote his full time to the practice of law.

Mr. Edwards is a Vice-President of the State Federation of Labor, a member of the State Unemployment Insurance Advisory Council and was formerly President of the State Allied Printing Council.

Governor Dewey also appointed Robert H. Thayer, attorney of Glen Cove, Long Island, to fill the vacancy on the five-member commission of the New York State Commission Against Discrimination. Mr. Thayer served as Assistant District Attorney of New York County and as Chief of the Indictment Bureau from 1938 to 1941. From 1946 to 1947, he was assistant to the State Housing Commissioner.

EDUCATION

RECENT DEVELOPMENTS IN REGIONAL EDUCATION

There is a continuing interest in the extension of opportunities for higher and professional education in the southern states through cooperative use of regional facilities and services. This interest is evidenced in an increased study of the problem by southern educators and others, by discussion in professional journals, and by wide news and editorial coverage of both the need for region-wide planning and the fact that any proposal is complicated by the existence of racial segregation and discrimination, in most of the existing institutions.

At a meeting of the Conference of Southern Governors in October 1947 they proposed a Compact to provide "either within the several states or without . . . adequate facilities for higher education for both whites and Negroes . . ."

Subsequently the Regional Council for Education was incorporated with offices in Atlanta and following the formal approval of the first ten states was superseded by the Board of Control for Southern Regional Education through action taken at Daytona Beach on June 11, 1949. Action taken by the various states on the ratification of the Compact is reported in the Legislative Reporting Insert of this issue of *Report* and will be included in subsequent reports.

The Board of Control remains in the offices occupied by the Council at 201-101 Building, Marietta Street, Atlanta 3, Georgia, with Mr. Millard F. Caldwell as President of the Board and Dr. John E. Ivey, Jr. as Director.

UNIVERSITY OF OKLAHOMA

Mrs. Ada Lois Sipuel Fisher recently won her three-year fight to enter the University of Oklahoma Law School. Mrs. Fisher began her fight for admittance to the Law School of the State tax-supported university in 1946 when she was refused admission because of the Oklahoma State Segregation Law.

The State had attempted to set up a law school in Langston, State-supported Negro institution in Oklahoma, but this was defeated on a plea that such a provision would not offer the equivalent of the full law school education offered at the State university.

In January, 1948 the U. S. Supreme Court ruled that the State must provide Negroes with educational facilities equal to those offered to white citizens.

The State Legislature after much discussion over the principle of segregation of the races finally revised the State law to provide that Negro students may be admitted to the graduate schools of the University of Oklahoma when such courses are not offered at Langston.

The new law requires that where possible Negro students shall meet in separate class rooms, or at separate hours from white students, or where this is not feasible, that certain seats or sections in the class rooms shall be designated for Negroes, and set off where possible by a railing.

Officials and students of the University have expressed themselves as willing to receive Negro students in the graduate schools, but will conform to the segregation pattern specified in the new school law.

It is reported that more than 40 Negro college graduates in the State have applications on file for admission to the University Graduate Schools, most of which will not be acted upon until the regular fall term.

REPORT ON CIVIL RIGHTS LEGISLATION IN THE STATES

Supplement to REPORT, July, 1949, Vol. 4, No. 7, REPORT, Monthly Publication of the ACRR

EDITOR'S NOTE: *The insert on state legislation for this issue of REPORT lists only legislation enacted and not reported since the May issue. For a complete roundup on all legislation introduced in the current session, see a subsequent issue of REPORT.*

To repeal Japanese exclusion laws.	HR 199		Senate Judiciary Subcommittee	Passed House. Senate Subcommittee hearings held.
RIGHT OF FRANCHISE				
Anti-poll tax	HR 3199	Norton (D., N.J.)	House Administration Committee	Passed House July 26, 1949.
To provide Home Rule for District of Columbia.	S 1527	Kefauver (D., Tenn.)	House District Subcommittee	Passed Senate. House Subcommittee conducting hearings.
EMPLOYMENT				
FEPC	HR 4453	Powell (D., N.Y.)	Education and Labor Committee	After public hearings, Subcommittee on June 2, 1949, unanimously reported bill to full committee with minor amendments.

ANNAPOLIS AND WEST POINT

Takeshi Yoshihara, eighteen-year old from Renton, Washington, is the first Japanese American to become a midshipman at the United States Naval Academy at Annapolis, Maryland. He was appointed by Representative Thor F. C. Tollefson, Republican from Washington's Sixth District. Wesley Brown of Washington, D. C., was the first Negro to be graduated from Annapolis in June of this year.

In 1947, George Shibata, appointed by Senator Elbert Thomas, Democrat from Utah, was the first Japanese American to enroll at West Point. He is a World War II Army Veteran from Garland, Utah.

EMPLOYMENT

NEGRO POLICEMEN

According to information compiled by the International City Managers' Association for the 1949 *Municipal Year Book*, a total of 2,142 Negro policemen were employed by 252 cities over 10,000 population late in 1948. The ratio of Negro policemen to the total number of police employees in the cities employing them was 2.4 per cent.

Eleven of the 13 largest cities have Negro policemen and only 75 cities between 10,000 and 25,000 employ Negro policemen. The number of cities employing Negro policemen and the ratio of Negro policemen to the total number of police employees for each city-size group is as follows:

Size of City	No. of Cities	Ratio of Negro Police to Total
Cities over 500,000	11	2.1 per cent
250,000 to 500,000	19	2.3 per cent
100,000 to 250,000	39	2.6 per cent
50,000 to 100,000	48	3.1 per cent
25,000 to 50,000	59	3.9 per cent
10,000 to 25,000	75	6.6 per cent

STUDY OF COOPERATION BETWEEN LOCAL INTERGROUP AGENCIES AND LOCAL LABOR ORGANIZATIONS

A study now being carried out by the American Council on Race Relations deals with a crucial aspect of much-needed "stock-taking," the degree of cooperation and participation which over two hundred local intergroup agencies, both public and private have secured from local labor organizations. This study centers around four major questions: (1) What is, and has been, the character and extent of union participation in the activities of local intergroup agencies? (2) What services have been specially developed by local intergroup agencies for unions in their communities? (3) How have local intergroup agencies participated in programs initiated by unions? and (4) What functions do national intergroup agencies and national labor organizations perform for local unions and local agencies in the field of intergroup relations?

A pilot study is now under way in Chicago. On the basis of the findings of this preliminary study a questionnaire will be prepared for distribution to all local intergroup agencies.

The final step in the project will be the preparation of a report analyzing questionnaire returns for the intergroup agencies and labor organizations concerned. It is to be hoped that the study will reveal much information that will be helpful to the entire field in the development of policies and program.

Public Policy (*Cont'd from P.* 1)

KANSAS

The Supreme Court of the State of Kansas ordered the school board of the town of Merriam to admit to the South Park School all Negro children in the community without discrimination.

The National Association for the Advancement of Colored People and the Negro parents had fought for more than a year against the Jim Crow policy under which the Negro pupils had been assigned to an inferior two-room school. The Negro parents, refusing to allow their children to attend the segregated school, had financed home instructions for their children at their own expense for more than a year.

NAACP attorneys handling the case, Franklin H. Williams of New York and Elisha Scott of Topeka, held that arbitrary gerrymandering of school districts to enforce the segregation policy was a violation of state and federal law.

CALIFORNIA AND ILLINOIS NATIONAL GUARDS

California has become the fourth state to abolish segregation in its National Guard (See March issue REPORT). The law is similar to the New York act designed to accomplish the same result in that the initiative for ending segregation now lies with the Governor. The bill, AB 807, was introduced by Representative Byron Rumford, one of two Negroes in the California legislature, who was serving his first term.

The Illinois legislature passed HB 872 which requires all units of the National Guard to accept any enlistee without segregation or discrimination. The bill now awaits the Governor's signature.

CONNECTICUT

Connecticut made more comprehensive its Civil Rights Law by redefining a place of public accommodation to include public housing projects.

The recently amended law now provides that the State Inter-racial Commission may be called upon to enforce the act by the aggrieved person who still may employ the services of his own attorney in the former enforcement procedure if he so desires.

TEXAS

Texas recently passed an Anti-Lynching Law which provides for the death penalty or five or more years imprisonment for persons convicted of participating in an unlawful assembly which results in the death of a lynch victim. Lesser penalties are provided where the victim is not killed.

New York Court (*Cont'd from P.* 1)

In the minority opinion, Judge Fuld stated that "while the Stuyvesant Town housing project was in blueprint and under construction, the public understood, and rightly, that it was an undertaking on which the State and the City of New York had restored the blessings and benefits of governmental power.

"Now that the development is a reality, the public is told in effect that, because Metropolitan and Stuyvesant are private companies, they are not subject to the equal protection clause (of the constitution), and may, if they choose, discriminate against Negroes in selecting tenants. The conclusion strikes me as totally at odds with common understanding."

Charles Abrams and Shad Polier, counsel to the three Negroes who brought suit to compel the Stuyvesant Town Corporation to accept them as tenants, said on behalf of the plaintiffs, the American Jewish Congress, the NAACP, and the American Civil Liberties Union, who sponsored the suit, that an application would be made as soon as possible to the United States Supreme Court for a review of the Court of Appeals' decision upholding the Stuyvesant Town Corporation.

"The decision is particularly important," stated Abrams and Polier, "because of recent federal legislation providing for federal loans and subsidies of $1,500,000,000 for urban redevelopment. Twenty-five states already have passed enabling legislation, and there are ample indications that such projects unless opened to all citizens equally will become another oppressive instrument for removing minorities from their homes and creating enforced ghettos."

HOUSING

NEW FEDERAL PROGRAM

With the passage of the Housing Act of 1949, authorizing provision of 810,000 units of low-rent housing in the next six years, specialists on minority problems in the field of housing have issued statements for the guidance of civil rights advocates. Although the Housing Act is the climax of a long and earnest effort of the American people to gain a comprehensive housing program, the warning is offered that the real job for grass roots implementation of the legislative authorization is just beginning. Vigilance is equally as vital in local situations as it has been previously on the national scene.

Minority leaders are urged to prepare to share in the responsibilities as well as in the benefits of every housing and slum clearance activity launched in their communities. In addition to urging utilization of facilities for privately produced housing to the fullest extent, it is suggested that racial minority group leadership achieve representation on official city planning, land acquisition, and redevelopment bodies in cities where large-scale slum clearance and urban redevelopment programs are put into effect; and effect inclusion of eligible racial minority families in all developments, private or public, constructed as a part of the redevelopment program. It is especially necessary to gain admission of minority group occupants of redeveloped areas into any privately constructed housing on those same sites, since the legislation makes no provision guaranteeing this privilege. Every precaution must be taken to guarantee that slum clearance does not become "Negro clearance."

EDUCATION

AGAINST DISCRIMINATION IN SOUTHERN PUBLIC SCHOOLS

Suit may soon be brought on behalf of Negro students of West Memphis, Arkansas, who may seek to enroll in the city's "white" high school, according to the PITTSBURGH COURIER. Since November, 1947, when the "Negro" school burned, there has been no high school in the district available for Negro students.

The Texas State NAACP has filed two school suits opposing educational segregation in Texarkana and Winnsboro, Texas. The suits seek a permanent injunction restraining the school boards of the two cities "from further discriminating against Negro children . . . because of their race and color."

In Georgia, eighteen parents of Negro children filed suit in August against the board of education and school superintendent of Irwin County, demanding equal educational facilities for Negroes. In bringing suit in the United States District Court, the parents cite a long list of differences between white and Negro school facilities and charge that repeated petitions for improvement of conditions have been ignored.

In an action without precedent in North Carolina, parents and guardians of sixty Negro children of Durham have brought suit against the State Board of Education and the Superintendent of Public Instruction. The plaintiffs charge gross discrimination in favor of white children in quality and number of buildings, equipment, teachers, and recreational and other facilities. The trial has been set for the September 26 term of the Federal Court in Durham.

For the first time since its founding 103 years ago, the American Medical Association will seat a Negro physician in the House of Delegates, its policy-making body. The physician, Dr. Peter M. Murray of New York City, will become a member of the House of Delegates as a result of his election by the New York State Medical Society. Dr. Murray, a native of New Orleans and a graduate of Howard University School of Medicine, is director of the department of gynecology at Harlem Hospital and associate director of obstetrics and gynecology at Sydenham Hospital.

Other major organizations which have taken recent actions toward the elimination of discrimination include the Young Women's Christian Association, the National Education Association, and the American Association of University Women. For the first time, the Southeastern Business and Professional and Industrial Conference of the YWCA has elected a Negro woman as chairman. The new chairman, Miss Ruth Edmondson, is president of the Knoxville YWCA Business and Professional Girls' Club and a Tennessee home demonstration agent.

The Board of Directors of the National Education Association has announced its choice of St. Louis as the 1950 convention site with the provision that there must be no segregation of the Negro members present at their annual meeting. This action was taken after delegates to the 1949 convention of NEA, held in July, demanded that the Association adhere in all ways to the ideals of democracy that it has endorsed.

The reconstituted Washington, D. C. Branch of the American Association of University Women has announced that qualified Negro women will be admitted to membership. Year-long dissension between the AAUW and its Washington branch came to a climax recently when the AAUW, meeting in national convention at Seattle, voted to make admission of Negroes mandatory. Subsequent to this action, the majority of the Washington branch withdrew to form an unaffiliated organization, while about three hundred members who wanted to comply with national policy requested that their group be given the charter. After adoption of by-laws conforming with the principles of the national AAUW, the new Washington organization will be chartered and ready to admit any accredited woman graduate, regardless of race.

THIRD NATIONAL CONFERENCE ON INTERGROUP RELATIONS

Nov. 3-5, 1949, Shoreland Hotel, 5454 South Shore Dr., Chicago, Illinois

Convened By:

American Council on Race Relations and

National Association of Intergroup Relations Officials

COMMUNITY ORGANIZATION

ST. LOUIS COUNCIL ON HUMAN RELATIONS

Subsequent to distrubances at St. Louis' Fairground Park Pool following an order ending segregation of Negroes and whites at municipal swimming pools, Mayor Joseph M. Darst established the St. Louis Council on Human Relations. This new 15-member Council is empowered to advise the city government on interracial problems. Its elected officers include: Henry F. Chadeayne, insurance executive; C. E. Broussard, high school teacher; and Mrs. T. M. Sayman. A salaried executive secretary will be appointed soon.

Articles setting forth the purpose of the Council name as objectives the ultimate elimination of segregation and other discriminatory practices, and removal of inequalities in employment, education, law enforcement, housing, welfare and recreation.

Among the first actions of the Council was the appointment of George Schermer, Director of the Detroit Interracial Committee, to investigate and report upon the outbreak of violence at the swimming pool. Mr. Schermer's report, which was presented by the Council to Mayor Darst, emphasized the need for development of a long-range program of education and action in the field of human relations in St. Louis.

The report called upon the Council to enlist the participation of other constructive forces in the community in seeking the enactment of state statutes ending mandatory segregation in the public schools; urged the Council to request all responsible community groups to join in urging public officials to adhere firmly to the law, and by their example, to encourage citizen respect for the law; suggested that the city administration be advised to recognize and proclaim that the public swimming pools shall be open and available to all citizens regardless of race, subject to necessary regulations on health and safety; asked that before opening the pools there be "a careful and thoroughgoing consultation among all officials responsible for operating the pools, for maintaining peace and for enforcing the law" and "adequate instruction" of agency staffs; recommended that the city administration be advised to adopt and announce the policy that the full force of the law would be used to protect the individual citizen against assault, injury, or interference with proper exercise of his rights; and urged that the police establish a special race relations detail.

COMMUNITY SURVEYS

The Rhode Island Seminar on Human Relations, in cooperation with Providence Chapter One of the American Veterans Committee, has recently made public the findings of its survey of job discrimination against Negroes and other minorities. Presented to the public one day before the Rhode Island Committee for Fair Employment Practices began its legal existence, the survey showed that 67 per cent of the 111 companies surveyed do not employ Negroes in any capacity.

Similar investigations will soon be underway in New York City where the West and East Side Committees on Civil Rights have announced the initiation of community self-audits. The West Side Committee, led by Representatives Franklin D. Roosevelt, Jr. and Jacob K. Javits, plans to examine medical facilities, housing, education, access to public facilities and employment conditions.

In Kansas, Governor Frank Carlson has appointed a five-member commission authorized by the legislature for the purpose of surveying the status of minorities in employment. The new group, known officially as the Kansas Commission Against Employment Discrimination, will prepare a report on its findings by October 15, 1950.

NATIONAL CONFERENCES

Meeting in Los Angeles, July 12-17, for its 40th annual conference, the National Association for the Advancement of Colored People discussed ways of strengthening its legislative, educational, and legal activities in its struggle for equality. Conference speakers included: Mme. Pandit, Indian ambassador to the United States, who presented the Spingarn medal to Dr. Ralph J. Bunche; Philip Willkie, representative in the Indiana legislature; Loren Miller, Los Angeles attorney; Dr. Rayford Logan of Howard University; and NAACP Special Counsel Thurgood Marshall. Roy Wilkins, acting secretary of the NAACP, delivered the keynote address and Governor William H. Hastie of the Virgin Islands presided over the closing session.

The conference urged registration of a million Negro voters in southern states, and get-out-the-vote campaigns throughout the nation. It pledged "vigorous support of organized labor's demands for higher wages and improvements in social security"; and asked for revocation of President Truman's loyalty order, stating that "we feel that the present program helped create national hysteria and fear and is a greater danger than that which the loyalty program was designed to cure." In addition to demanding that President Truman call "a special session of Congress for the exclusive purpose of passing civil rights laws encompassed in the party platforms," the conference urged that a mass conference to bring about passage of civil rights legislation be held in Washington, and instructed Acting Secretary Wilkins to name a committee to direct a national civil rights campaign.

A few days earlier, delegates to the Bacone, Oklahoma Conference called by the National Fellowship of Indian Workers had made similar demands. They endorsed fair employment practices legislation, called for passage of "modernized civil rights statutes on the state level," asked for development of a program to facilitate integration of American Indians in employment, decent living conditions and good community relationships; and recommended the establishment of an Indian American Scholarship Board to further higher education for Indian youth.

EDUCATION

NEGROES IN SOUTHERN UNIVERSITIES

In a recent issue of the bulletin of the American Association of University Presidents, George F. Zook, president of the American Council on Education and member of President Truman's Commission on Higher Education, is quoted as saying that it is practically impossible to provide equality for Negroes and whites in separate colleges and universities. He states, "It is gratifying to note that several of the state universities in the South have modified, at least in a small way, their previous practice of segregation. Students of the University of Missouri, for example, have made it clear that they believe the time has come for a fair deal on this matter."

Dr. Zook's remarks come at a time when reports from several universities indicate the relaxation of previous patterns of segregation. Following a U. S. District Court decision that the University of Kentucky must admit qualified Negro students to the graduate schools, President H. L. Donovan announced that courses in law, pharmacy and engineering would be open to Negroes beginning in the summer of 1949. Twenty-nine Negroes have enrolled, and, according to reports, have been absorbed into the student body without any tension or conflict.

In Arkansas, the second Negro student has been accepted for admission in fall, 1949, to the University of Arkansas School of Medicine. Under a new law enacted by Oklahoma's legislature, the University of Oklahoma has admitted Mrs. Ada Sipuel Fisher to its law school, and more than forty other Negro students are expected to be admitted soon either to that school or to the Oklahoma Agricultural and Mechanical College.

Five of the six Negro students who have been denied admission to the University of Florida by the state Board of Control have appealed to the state supreme court to order their admission. According to the SOUTHERN PATRIOT, publication of the Southern Conference Educational Fund, a poll of 500 students at the University of Florida indicated that 284 favored admitting Negroes, while 94 were opposed. The same source states that 13 of the 17 regular faculty members of the School of Religion at Duke University, Durham, N. C., have gone on record as favoring the admission of Negroes as "day students." About a year ago, 107 members of the student body of the School of Religion, 13 graduate students and 50 members of the Kappa Chi Ministerial Fraternity voted to admit Negroes.

INDUSTRIAL EXPERIMENT

The General Cable Corporation of Perth Amboy, N. J. and the National Conference of Christians and Jews, have recently completed a pilot project designed "to lessen the strains and tensions existing between members of the different groups of Americans in industry." The twenty-five participants in the ten-session seminar on human relations were key people drawn from every department and every ethnic group in the plant, and included representatives from both labor and management. Results of the experiment were analyzed by Columbia's Bureau of Applied Social Research.

During the seminar sessions participants heard priests, ministers and rabbis, anthropologists, sociologists, psychiatrists and educators discuss the origins of prejudice and methods of eliminating discrimination. Free discussion was encouraged in order that a cooperative pattern for resolution of intra-plant racial and cultural tensions might be established.

Dwight R. G. Palmer, president of the company, says of the project: "Already the 'pilot' program has opened up to us vistas for personnel policy that will pay a handsome dividend." He reports that he plans now to duplicate the Perth Amboy experiment in other plants.

ADMINISTRATION

LOYALTY BOARD ACTIONS

More than 50 Negro post office employees in Chicago, Los Angeles, Philadelphia, Richmond, and Cleveland have lost their jobs as a result of Loyalty Board actions. The latest dismissals occurred in Cleveland, where 17 postal clerks were dropped from the department's pay roll early in August. Fourteen of this group are Negro, one is Jewish, and two, white Gentiles. Six of these persons had been in the employ of the post office for more than twenty years. The Cleveland branch of NAACP is joining the National Alliance of Postal Employees in the defense of the dismissed employees, whose letters of suspension failed to specify the charges which form the basis for the action.

Ashby B. Carter of Chicago, announcing the biennial convention of the National Alliance of Postal Employees to be held in Kansas City, Missouri, August 15-19, said that the delegates would consider plans to end the "unfair and undemocratic findings of loyalty board panels." He stated that the Loyalty Order is being used to harass Negroes, Jews, and other liberal Caucasians who fight for the elimination of discriminatory practices, and has resulted in the Negroes and the Jews "producing 80 per cent of all postal employees charged with disloyalty."

PUBLIC POLICY

INDIANS' SOCIAL SECURITY

Navajo and Pueblo Indians, after lengthy litigation conducted by the National Congress of American Indians, have secured recognition of their right to public assistance benefits from the states of New Mexico and Arizona. The two states had refused to make payments in the usual money-matching social security process, charging that the Indians are wards of the federal government and therefore not their financial responsibility.

Commenting on this achievement, Oliver LaFarge, president of the Association on American Indian Affairs, said: "It is not a complete victory, as the two states are being allowed to give less to the Indians than to members of other races. We still do not understand why the federal social security administration permits this illegal discrimination, as though the American Indians were only 85 per cent citizens."

NEGRO REPRESENTATION

The Executive Committee of the Southern Regional Council has recently made public a letter sent by it to each of the governors of the thirteen southern states, pointing out the great public benefit that ensues from the appointment of capable and representative Negro citizens to positions upon policy-making boards. The Committee called attention to the significant example set by the Governor of North Carolina, who recently appointed President Harold L. Trigg of St. Augustine's College to the North Carolina State Board of Education.

The Committee stated that the southern states must speed their efforts "to build a tradition of administration markedly free from politics and patronage," and to "adjust state services to fit more closely the needs of all citizens." Noting the fact that a fourth or more of the citizens in most southern states are Negroes, the Committee called for adequate representation of this minority on all state boards.

Commenting on this letter, the NEW SOUTH, publication of the Southern Regional Council, enumerated precedents for such actions: Kentucky appointments of leading Negroes to the Board of Education, the Advisory Committee on Negro Education, the Commission on Revenue and Taxation, and the Commission on Negro Affairs; appointment in July, 1949 of an election commissioner, Ralph V. Dorsey, and several Negro precinct officials by the Richmond, Virginia Electoral Board; appointment of Negroes to the city school boards of Roanoke, Virginia and Raleigh, North Carolina; and appointment to the Regional Council for Education of President William H. Gray of Florida A & M College, President G. L. Harrison of Langston University, Oklahoma; President R. E. W. Jones of Grambling College, Louisiana; and President J. F. Drake of Alabama A & M College.

The NEW SOUTH stated further that the southern states must recognize that the right of Negro citizens to participate in government on the same basis as other citizens includes not only the right to vote and to be represented on official bodies, but also the right to run for elective offices. The publication mentioned as precedents in this area the 1936 election to the Kentucky state legislature of Louisvillian C. W. Anderson, who this August has won the Republican nomination for Judge of the Third District Municipal Court; the election of Dennis Henderson to the Kentucky State Legislature in 1948; Oliver W. Hill's election to the Richmond, Virginia City Council in 1948; the 1947 election of the Reverend Kenneth Williams to the Board of Aldermen of Winston-Salem, North Carolina; and Dr. W. P. DeVane's recent election to the city council of Fayetteville, North Carolina.

ARMED FORCES

Under the new integration policy in effect in the Air Force, deactivation of the 2,000-man 332nd Fighter Wing, an all-Negro tactical group based at Lockbourne Air Force Base, has begun. On August 6, the PITTSBURGH COURIER reported that 181 officers, 475 enlisted men and 42 WAF's have been passed by the screening board and reassigned to integrated duty at other major Air Force stations. There are as yet no known instances in which officers have not been given the assignment indicated by their orders, though

(*Con't P. 4, Col. 1*)

ARMED FORCES (*Cont'd from P. 3*)

cases of attempted resistance have been reported at some fields.

Reports from the MILWAUKEE JOURNAL indicate that at the Great Lakes Naval Training Center white and Negro sailors serve in the same companies, live in the same barracks, eat together in the same mess and study together to perfect the same skills. Other sources state that Negro midshipmen are integrated in a task force now engaging in a 7-week training cruise.

These developments in the Air Force and Navy are in contrast to actions taken by the Army, which has not yet presented a plan of integration acceptable to Secretary of Defense Louis Johnson. The Army's racial policy today is basically what its chief of staff, General Omar N. Bradley, outlined in a speech at Fort Knox last August. At that time he is reported to have said, "The Army is not out to make any social reforms. The Army will put men of different races in different companies. It will change that policy when the nation as a whole changes it."

GEORGIA RE-REGISTRATION LAW

The Georgia State Supreme Court heard in July a suit challenging the constitutionality of Georgia's new voters re-registration law, which at time of passage was heralded as a new method of preventing Negro "block voting." The suit was precipitated when F. Franklin, chairman of the Richmond County Board of Roads and Revenues, refused to pay the salaries of registrars appointed under the provisions of the new law. Franklin argues that the law violates two provisions of Georgia's Bill of Rights, as well as the Fourteenth Amendment to the Constitution.

AMERICAN COUNCIL Report ON RACE RELATIONS

SEPTEMBER, 1949 VOL. 4, NO. 9

EMPLOYMENT

FEP ORDINANCES INTRODUCED IN LOS ANGELES AND SAN FRANCISCO

LAST MINUTE BULLETIN

Los Angeles FEP Ordinance defeated by an 8-6 vote.

In Los Angeles, an ordinance was introduced into the City Council by Edward R. Roybal of the Ninth District and six others. The ordinance provides for a seven man Commission to be appointed by the Mayor with the approval of the City Council with power to eliminate and prevent discrimination in hiring, firing, upgrading or promotion, compensation, conditions and privileges of work, employment application forms, membership in labor unions and practices of employment agencies. Failure to comply with the provisions of the ordinance or any decision or order of the Commission would subject a violator to a fine not to exceed $500 or imprisonment for not more than six months, or both. Hearings on the ordinance began on September 27. The Council for Equality in Employment, Chairman (Pro Tem) Judge Isaac Pacht, and Secretary (Pro Tem) Milton A Senn representing more than thirty organizations is leading the campaign for passage of the ordinance.

In San Francisco the FEP ordinance recently submitted by the San Francisco Council for Civic Unity is now before the State, County and Municipal Affairs Committee of the Board of Supervisors and the first hearings were held on September 21.

The ordinance provides for the creation of a five member Commission with enforcement powers to work for equal job opportunities regardless of race, creed, color or religion. It provides penalties of $100 to $500 fines and jail sentences up to 90 days.

Recently the San Francisco Mayor's Committee on Human Relations held several hearings on the measure and recommended its adoption by the Board of Supervisors.

Prior to the first hearing it is reported that city officials received more mail urging the adoption of the FEP ordinance than on any other measure. Another hearing was scheduled for October 5, 1949.

RHODE ISLAND FEPC

It is reported that the Rhode Island Fair Employment Practice Commission which began operation on July 1 has assisted hundreds of firms and establishments in revising their application forms to have them in compliance with the law. Plans are contemplated for an education program in industry and in the schools.

To date, two official complaints have been brought to the attention of the commission. One case was dismissed by reason of lack of jurisdiction as the date of the alleged act of discrimination was prior to the effective date of the act, July 1, 1949.

The second case is under investigation. Members of the commission expressed belief that other cases will come to light as affected persons understand more clearly the effectiveness of the law.

The following are members of the Commission: George E. Conley, former State Senator, Chairman; Joseph M. Finkle, John L. Lopez, Negro member of the Commission and a Providence mortician; John H. Nolen of Newport, former State's Attorney - General; and R. Franklin Weller.

THIRD NATIONAL CONFERENCE
ON
INTERGROUP RELATIONS
November 3, 4, 5, 1949
Shoreland Hotel, 5454 South Shore Dr.
Chicago, Illinois
Sponsored By:
American Council on Race Relations
and
National Association of Intergroup Relations Officials

The Third National Conference on Intergroup Relations has been called for November 3-5, 1949, to meet at the Hotel Shoreland (55th Street and South Shore Drive) in Chicago. The Conference, which will take place under the joint sponsorship of the American Council on Race Relations and the National Association of Intergroup Relations Officials, annually brings together executives and staff members of public and private agencies as well as citizen leadership in all organized efforts to improve intergroup relations throughout the United States and Canada. It is felt that this year's Conference will be a particularly important one: significant developments in intergroup relations during the past twelve months have created new problems and given rise to new techniques, and the need for a comprehensive discussion of these and related matters is urgently needed. In addition, NAIRO, an association of personnel in national, regional, state, and local agencies — both public and private — dealing with the improvement of race relations and the solution of minority group problems, has reached a stage of development where a discussion of its future program and services is indicated.

The Conference on Intergroup Relations will focus its attention on three broad areas of discussion: "problem fields" (Civil Rights, Employment, Community Organization, Education, and Housing), agency problems (Financing, Personnel, Organization, etc.), and the further development of NAIRO. These areas will be covered in general sessions, round tables, and agency meetings, with an emphasis on discussion rather than on formal speeches. In addition, one luncheon meeting is planned. Executive, professional and technical personnel, board members and community leaders concerned with the problems are invited to attend.

The preliminary program, which has been drawn up on the basis of returns of a qestionnaire sent out to NAIRO members and others in the field of intergroup relations, includes the following topics:

General Sessions:

"Where Do We Stand in Intergroup Relations?"

"Program and Services of NAIRO" (Presentation of reports of the following NAIRO committees: Legislation, Federal Personnel Practices, Professional Standards, and Professional Services. To be followed by discussion.)

"Toward An Integrated Intergroup Relations Program for the United States." Panel discussions led by representatives of the various types of agencies.)

Concurrent Round Tables (The first topic on the agenda of each is quoted):

Civil Rights, Legislation, and Litigation ("Enforcing State Fair Employment Laws")

Employment ("Equal Job Opportunities in a Changing Economy".)

Community Organization ("The Role of Community-Wide Councils".)

Education "Intercultural Education: Objectives and Techniques".)

Agency Meetings:

Representatives of local private, local public, state private, state public, and national agencies will meet in separate (concurrent) sessions for a discusson of: Program Evaluation, Relationships with Other Agencies and the Public, Financing, Personnel, and related matters.

EDUCATION

NEW JERSEY

John H. Bossart, New Jersey Commissioner of Education, gave a formal opinion to public school officials that it would be illegal to send New Jersey classes on trips to Washington, D. C. or elsewhere if any members were subjected to segregation.

Since the state adopted its new Constitution in 1947 it has been the fundamental law that racial, religious and color discrimination illegal.

Commissioner Bosshart's announcement of policy to all public school superintendents and principals said, "It is my opinion that it is illegal for the Board of Education or the school administration to take members of the senior class or any other class on any trip, or trips within or without New Jersey, if pupils are segregated on such trip, or trips, because of religious principles, race, color, ancestry, or national origin.

"This opinion applies to senior class trips to Washington, D.C."

WEST POINT

Cadet Emory Sekaquaptewa, a Hopi Indian from Oraibi, Arizona, is the first Indian to receive appointment to West Point. Representative John R. Murdock appointed Cadet Sekaquaptewa, who plans to specialize in engineering.

ILLINOIS

Attorney General Ivan A. Elliott has issued an order for county school superintendents to stop payment of state aid to any community segregating Negro students in public schools. His ruling, made in reference to a section of the new appropriation bill for state aid to schools, dealt with the question of whether enforcement of the anti-segregation provision should rest with the Illinois Superintendent of Public Instruction or the county superintendents. A number of southern Illinois cities which at present have a policy of separate classes for Negro and white pupils will be affected by the measure.

MASS COMMUNICATION

NEW BULLETIN OF ACHR

The American Council on Human Rights, a cooperative organization of seven national sororities and fraternities working to secure civil rights, has issued an eight page bulletin entitled *Congress and Equality* which features information on important legislation in the field of civil rights.

The affiliates of ACHR are the following: Alpha Kappa Alpha, Alpha Phi Alpha, Delta Sigma Theta, Kappa Alpha Psi, Phi Beta Sigma, Sigma Gamma Rho and Zeta Phi Beta. The office is located at 1130 6th St., N.W., Washington 1, D.C. and Elmer W. Henderson, former Executive Secretary of the National Council for a Permanent FEPC, is Director.

NBC PROHIBITS RACE EPITHETS

The National Broadcasting Company has prohibited the use of the word "darky" and similar objectionable race epithets on its air waves. This action followed negotiations with the National Negro Press Association, which had challenged the use of such expressions in programs of NBC, the American Broadcasting Company, and the Mutual Broadcasting Company. The latter companies are continuing to permit use of stereotyped epithets in established works, but not in recently published songs. The Columbia Broadcasting System had previously prohibited expressions of this kind.

CHICAGO COUNCIL ON THE AIR

The Chicago Council Against Racial and Religious Discrimination, under the leadership of Waitstill H. Sharp, initiated on August 21 a regular half-hour discussion program over station WAAF. This program, "Listen, Chicago!", will be heard on the third Sunday of each month. It is dedicated to the improvement of intergroup relations.

LEGISLATION

STATES CIVIL RIGHTS LEGISLATION

NOTE: A complete tabular summary of federal civil rights legislation during 1949 will appear as a supplement to REPORT when Congress adjourns.

The legislatures of four states, Florida, Alabama, Missouri, and Wisconsin have been in session during September. The Alabama legislature has acted on two measures affecting civil rights. A bill "to establish inviolable boundaries for white and Negro residential areas in the state" (HB 1084, SB 628), introduced by C. J. Owens and Pugh Haynes, was indefinitely postponed when the Senate wiped its slate clean of all pending legislation which had not been acted upon. A second measure authrizing the state to participate in the regional education program (HJR 42) was enacted.

In Massachusetts, the Senate has joined the House in approving a bill to secure fair education practices (HB 2692). This measure declares it to be a policy of the state that students be admitted without regard to race, color, creed or national origin to primary and secondary schools, institutions of higher learning, and specialized vocational schools, providing the institution accepts applications for admission from the public generally and is not in its nature distinctly private. The state department of education will administer the act.

A correction must be made with regard to our previous report of the disposition of the bill to authorize the state of Texas to participate in the program of regional education (SJR No. 15). This bill passed the Senate, but did not reach a vote in the House and therefore failed.

RECREATION

LOUISVILLE RECREATION FACILITIES

Dr. P. O. Sweeney, James W. Muir, and Mona Carroll have filed a suit in federal court asking that the court rule on the rights of Negroes to share Louisvillt, Kentucky city parks, playgrounds, and the Iroquois Park amphitheater; and that a permanent order be issued forbidding city officials from denying Negroes the privileges enjoyed by white persons in those places. The suit, based on the Fourteenth Amendment, states that the city maintains for Negroes "five alleged parks with a total acreage of 153.81 and limits plaintiffs . . . because of their race or color, to the use of these inadequate, unsanitary, and incomplete facilities." On the other hand, the suit contends, the city has 23 parks of 2,267.5 acres for white persons.

AWARDS

BERNAYS AWARD

The Edward L. Bernays Intergroup Relations Award was presented by Gordon W. Allport, Chairman of the Judges Committee, to the Commission on Community Interrelations of the American Jewish Congress, headed by Research Director Dr. Stuart W. Cook, for the best "original action-related plan for improving intergroup relations in the United States," at the Convention of the American Psychological Association held September 5-9, 1949 at Denver, Colorado.

The Award was sponsored by the Society for the Psychological Study of Social Issues, a subdivision of the American Psychological Association.

The Commission won the Bernays Award on the basis of two papers it submitted in a nation-wide competition amony leading social scentists. The winning papers are: "Community Self Surveys of Discriminatory Practice," by Clair Selltiz and Margot Haas Wormser; and "Incident Control Studies in Effective Answers to Common Prejudiced Remarks," by Abraham Citron and John Harding.

The Award, a $1000 U. S. Government Bond was made by the Edward L. Bernays Foundation to encourage better group relations in America.

The Committee also cited another entry for special Honorable Mention Award of $100 to Dr. Joseph D. Lohman, Executive Secretary of the National Committee on Segregation in the Nation's Capital for his work on the report on *Segregation in the Nation's Capital,* which dealt with Negro-white relations in their numerous ramifications in the city of Washington.

JAMES J. HOEY AWARDS

The James J. Hoey Awards were presented to one white and one Negro leader in the field of race relations. They are M. C. Clarke, Catholic layman and President of Dunbar Life Insurance Company, Cleveland, Ohio, and John J. O'Connor of Washington, D.C., a writer, educator and Secretary of the Catholic Interracial Council of Washington.

The awards were established in 1942 by the family of the late James J. Hoey, one of the founders and first President of the Catholic Interracial Council.

HOME OF THE BRAVE

"Home of the Brave," a movie exposing the effects of segregation and discrimination on American Negroes, received two awards at the Belgian World Film and Fine Arts Festival where delegates from twenty-four nations were gathered. The award for "exceptional qualities", as well as the International Catholic Film Committee Award, went to this production which has been banned by the South African board of censors because "it might disturb the peace."

PUBLIC POLICY

U. S. COURT UPHOLDS SEGREGATION

United States District Judge Albert V. Bryan has ruled that race segregation does not violate the Constitution or acts of Congress.

Bryan made clear his stand on race segregation in an opinion dismissing five counts of a $58,000 damage suit brought by Mrs. Helen Nash of Washington, D.C. who had charged that she was refused service at the Washington National airport dining room and coffee shop February 17, 1947. Judge Bryan held that all five counts were based on contentions that segregation is unconstitutional.

He left standing one count asking $10,000 damages from Air Terminal Services, Inc. In this count Mrs. Nash accused the restaurant of failing to provide her with eating facilities equal to those provided white persons.

The Civil Aeronautics Administration last December issued a regulation ending segregation at the airport.

GOVERNMENT CAFETERIA

The Board of Directors of the Government Printing Office Cafeteria's Recreation and Welfare Association has announced the discontinuance of the practice of segregation in seating and serving arrangements. This announcement, which established fair policy in one of the few remaining discriminatory eating places operated by the federal government, climaxed a long campaign by civil rights organizations.

COMMUNITY ORGANIZATION

AMVETS OPPOSE SEGREGATION

Six hundred delegates who attended the fifth national convention of the American Veterans of World War II, held in Des Moines, Iowa, passed a resolution calling for an end to racial segregation over the opposition of Southern delegates. The delegation also opposed a merger with the American Veterans Committee. Harold Russel of Watertown, Massachusetts, motion picture actor, was elected National Commander.

AAUW

The Washington Branch of the American Association of University Women reinstated Mrs. Mary Church Terrell, Miss Otelia Cromwell and Miss Mary E. Cromwell at the national headquarters.

At the same meeting a new president was elected to head up the completely reorganized branch, which is composed only of those members who did not withdraw from the organization when the AAUW convention voted to make "educational qualifications the sole requirement for membership." (See June issue of REPORT)

The members of the local group who refused to comply with the national organization decision, withdrew from the group and established what they call a University Women's club which operates only as a local organization.

Another national group, the American Federation of Teachers during their 32nd convention held in September in Milwaukee, Wisconsin, reaffirmed their national policy against racial or religious segregation.

Accepted resolutions also included plans to join the prosecution of the H. Sweatt and W. McLaurin cases now before the U. S. Supreme Court.

HOUSING

BIRMINGHAM ZONING ORDINANCE

The city of Birmingham, Alabama, recently passed an ordinance which makes it a misdemeanor for Negroes or whites "to move into, for the purpose of establishing a permanent residence, or, having moved into, to continue to reside in an area in the City of Birmingham generally and historically recognized at the time as an area for occupancy by members" of the other race.

City Attorney J. H. Willis warned the city that if a colored person filed a suit in the U. S. District Court opposing the ordinance the ordinance would be declared unconstitutional. In view of the 1917 decision of the United States Supreme Court in *Buchanan* v. *Warley,* which held the Fourteenth Amendment to be violated by an ordinance of the City of Louisville, Kentucky, forbidding occupancy of a lot by a colored person in a block where the greater number of residences are occupied by white persons, the opinion of Attorney Willis would appear legally sound. The Buchanan decision represents firmly established doctrine.

That there may be anticipated an early challenge of the Birmingham ordinance is suggested by the fact that while Negroes comprise 43% of the city's population, the zoning ordinance only allots to them 16% of the city's 52 square mile living space.

Housing (Cont'd from P. 3)

STUYVESANT TOWN

A young Negro couple, Hardine and Raphael Hendrix, have moved into Stuyvesant Town as guests of Jesse Kessler, a resident of the housing project. They are the first Negroes to make their home in Stuyvesant Town, whose discriminatory policy has for several years been a center of controversy between civil rights advocates and the Metropolitan Life Insurance Company. Recently the New York Court of Appeals ruled in a 4 to 3 decision that Metropolitan has the right to exclude Negroes. The plaintiffs in the case, the American Jewish Congress, the NAACP, and the American Civil Liberties Union, have announced their intention to apply to the United States Supreme Court for a review of the decision of the Court of Appeals (See REPORT, July, 1949, p. 1).

Paul L. Ross, a former secretary to Mayor O'Dwyer and Chairman of the New York Tenant Council and a group opposing discrimination in Stuyvesant Town and Peter Cooper Village, said: "The fact that a Negro family now lives in Stuyvesant Town and has been received as a respected neighbor will lend encouragement and inspiration to the campaign, which we will continue."

ADMINISTRATION

CAMBRIDGE

According to an announcement from the office of City Manager Atkinson of Cambridge, Massachusetts, Carlton P. Fuller, Financial Executive of the Polaroid Corporation is the new Chairman of the Cambridge Civic Unity Committee for the coming year. The Civic Unity Committee, an official agency, is starting its fifth year of operation. Mrs. Muriel Snowden is the Executive Director.

CURRENT MATERIAL

RELEASE NO. 44

SUBJECT: Recent Developments in Regional Education

The establishment of regional facilities for higher, technical and professional education is a promising development in the light of the high cost of specialized training and the limited supply of personnel and facilities. Largely because the proposal has so much to recommend it for the improvement of higher, technical, and professional education in the United States as a whole and particularly in some regions of the nation, such as the Rocky Mountain area and the South, the consideration of regional educational institutions and/or other region-wide planning and utilization of educational facilities should proceed on the basis of the merits of the proposals themselves and the promise they give of the wiser use of public and private educational resources to provide greater educational opportunities for American youth. Such a consideration of the problem, however, has been complicated by the fact that in the application of the regional plan to the South, the question of racial segregation and discrimination has repeatedly arisen, and has not yet been satisfactorily answered.[1]

As the southern governors, the Regional Council for Education, and now the Board of Control for Southern Regional Education have discussed various plans for the establishment of or extended cooperative use of educational facilities and services within the region, four methods of providing for professional and technical education have been considered:

1. Establish new educational institutions jointly owned and operated by several states as regional enterprises.

2. Contract on an inter-state basis for existing services, or for services which could be developed by already existing public and private institutions.

3. Arrange inter-state cooperative curricula for graduate and professional training whereby students may attend several institutions in the process of completing their training.

---

[1] The American Council on Race Relations has issued two earlier statements: Memorandum on Racial Segregation in Higher Education, March, 1948; and Release No. 40, Proposals to Extend Educational Opportunities, August, 1948. Both are available upon request to the American Council on Race Relations, 4901 South Ellis Avenue, Chicago 15, Illinois.

4. Arrange graduate programs so that a group of students in a given state can study under an exchange of faculty or by instructors brought in from various institutions in the region for intensive work in their specialties.

Early proposals incorporated in a regional compact[2] between the southern states largely emphasized the first method. Present activities and programs being developed in the southern region indicate that at least for the time being the second, third and fourth methods are more immediately under consideration with emphasis upon the second: contracts on an inter-state basis, for the present in the fields of medical, dental and veterinary education.[3]

There is a continuing interest in and challenge of each of these four proposals as evidenced by study of the problem by southern educators and others, by discussion in professional journals, and by wide news and editorial coverage in the nation's newspapers. The American Council on Race Relations has, therefore, gathered together and summarized available material on the subject, submitted it for critical examination to a number of educators and social scientists, and presents it chronologically in this release to the agencies concerned.

---

[2] See appendix for the text of The Regional Compact, February 8, 1948.

[3] "The establishment of regional universities, which would be operated by the Board, is authorized in the compact. For a time such a possibility was emphasized in discussions of the regional program. That has changed, however, as the program took shape. All activities have been directed toward the 'contracts for services' arrangements. Under this plan, the states contract for services from both public and private institutions which agree to accept a certain number of students from a state at an annual amount, with the Board acting as agent." Regional Cooperation in Higher Education, A Progress Report published by the Board of Control for Southern Regional Education, Atlanta, Georgia, July 1949, p. 4.

A CHRONOLOGICAL REVIEW OF DEVELOPMENTS

December 7, 1945. The Southern Governors' Conference meeting at New Orleans received a comprehensive report entitled, Concerning Regional Education,[4] submitted by the Committee on Regional Education composed of three governors: Chauncey Sparks of Alabama; Thomas L. Bailey of Mississippi; and Colgate W. Darden, Jr. of Virginia,

The report recognized the "disparity of higher education offerings to whites and Negroes" in the conference states, referred to the common "practice of segregation" among them, offered regional education as one solution but acknowledged that:

> "The Supreme Court of the United States has ruled unequivocally that every state must maintain equal educational facilities within its borders, if demanded, to all citizens who are similarly qualified. The Negro's need and eligibility for higher education are steadily growing, and we desire and must meet that need and that eligibility."

October 19-21, 1947. The Southern Governors' Conference, meeting in Asheville, North Carolina, came to formal agreement upon "... the provision, either within the several states or without, of adequate facilities for higher education for both whites and Negroes, and ... the appointment of the committee to study this particular question." [5]

February 7-8, 1948. The committee appointed in October, 1947 by the Conference of Southern Governors presented a regional compact for the consideration of the governors' meeting in Tallahassee, Florida. The compact was designed to: provide "greater educational advantages and facilities for the citizens" of the region; provide for "the planning and establishment of regional educational facilities"; and implement the proposal of Meharry Medical College located in

---

[4] A summary of this report is available in the 1947 issue of the Negro Year Book published by the Department of Records and Research of Tuskegee Institute, Alabama, pp. 100-101.
As of September, 1949, the Southern Governors' Conference consisted of governors of the following states (Kentucky, Maryland and West Virginia having been added since the 1945 meeting, according to the Council of State Governments, Chicago, Illinois):

Alabama	Georgia	Maryland	Oklahoma	Texas
Arkansas	Kentucky	Mississippi	South Carolina	Virginia
Florida	Louisiana	North Carolina	Tennessee	West Virginia

[5] Regional Cooperation in Higher Education, A Summary of the Development of The Regional Council for Education, Tallahassee, Florida, 1948, p. 3.

Nashville, Tennessee for Negro students,[6] that:

> "... its lands, building, equipment, and the net income from its endowment be turned over to the Southern States, or to an agency acting in their behalf, to be operated as a regional institution for medical, dental and nursing education upon terms and conditions to be hereafter agreed upon between the Southern States and Meharry Medical College, which proposal, because of the present financial condition of the institution, has been approved by the said States who are parties hereto ..." [7]

The governors agreed to the compact and to the proposal to present it to Congress for approval and to their respective state legislatures, the regional plan to become operative under a Board of Control for Southern Regional Education as soon as the compact should be approved by any six legislatures in the region and in the interim to be operated by a regional council for education. Within a week, the governors of fourteen of the fifteen interested states signed the compact which was then immediately submitted to Congress. [8]

February 16, 1948. House Joint Resolution 334 on the regional compact was reported favorably by the House Committee on the Judiciary without preliminary public hearings.[9] On February 25, Senate Joint Resolution 191 was presented in the Senate and referred to the Committee on the Judiciary.

During February, 1948. The Regional Council for Education was established by the Southern Governors' Conference "... to consist of the governor and two designees from each of the states signing this compact."[10] The following persons were named by the governors as members of the Council, the announcement receiving nation-wide comment that all of the members were white and no Negro leader had been appointed by any state:

Alabama	John T. Caldwell, President of Alabama College A. R. Meadows, Superintendent of Education
Arkansas	T. S. Staples, Dean of Hendrix College Lewis Webster Jones, President, University of Arkansas

Texas	T. S. Painter, President, University of Texas Craig Cullinan, Chairman, Board of Directors, Texas State University for Negroes
Virginia	Justice Abram P. Staples, Virginia Supreme Court of Appeals G. Tyler Miller, State Superintendent of Public Instruction
West Virginia	Joseph Rosier, Member, State Board of Education William G. Thompson, Member, University Board of Governors

The Council was instructed by the Southern Governors' Conference:

"... to make a thoroughgoing survey of higher education in the signatory states, using such staff and such Foundation funds as may be available; that within the overall survey the Council be instructed to direct immediate attention to the necessity for the early establishment of regional schools or institutions covering the fields which have been indicated by the subcommittee as being urgent, including the Meharry institution, and that the Council meet in its first session on March 4, at Gainesville, Florida." [11]

---

[11] Ibid., p. 5.

March 4, 1948. The Council convened some 350 to 400 leading educators from various parts of the nation at Gainesville, Florida to consider regional education in detail. Minutes of the meeting show agreement to:

"... improve the economic and cultural status of the Southern States we need the best possible educational opportunities for whites and Negroes. In areas of higher and professional education in which objective studies show there is not now enough demand to justify establishing schools in each state, plans for regionally sponsored schools should be developed.

"Endorse attempts already made to get congressional approval of the Interstate Compact.

"... bring into the discussion representatives of the various groups: all planning for education of Negroes should not be done by whites only."

Following the participation of three of the Negro educators present, President Clement of Atlanta University, President Patterson of Tuskegee Institute, and President Trenholm of Alabama State Teachers College at Montgomery, a motion was unanimously carried "requesting the governor of each state to appoint an outstanding Negro educator from his state to compose a consultant group to work with the Council." [12]

Minutes further show that at this meeting -

"In order that the Council might proceed with the necessary study of higher education, a Study Committee of the Council, to be composed of one member from each state, was authorized and the Executive Committee empowered to make the appointments ... the membership of the Study Committee was agreed upon and they were formally appointed."

March 8, 1948. Articles of incorporation were filed and a charter of incorporation was secured in Florida for the Regional Council for Education, Inc.

March 12-13, 1948. The Committee on the Judiciary of the United States Senate held hearings on Senate Joint Resolution 191 requesting the consent of Congress to the regional compact.[13] An impressive number of southern governors, congressmen, and educators appeared before the Senate Committee to speak in favor of the compact, including:

Millard F. Caldwell, Governor of the State of Florida; Chairman of the Regional Council for Education
M. Don Clawson, President, Meharry Medical College

[12] This action did not at that time give any Negro the status of membership on the Council but only the status of consultant. The action was subsequently modified at the December 13, 1948 meeting of the Regional Council for Education to provide for possible Negro membership but did not stipulate that membership must include a Negro or Negroes from each state.

[13] Hearings before a Subcommittee of the Committee on the Judiciary, United States Senate, on the Regional Education Interstate Compact, March 12-13, 1948, Government Printing Office, Washington, 1948, pp. 1-158.

Joe L. Evins, Representative in Congress from the State of Tennessee
Spessard L. Holland, United States Senator from the State of Florida
Burnet R. Maybank, United States Senator from the State of South Carolina
James Nance McCord, Governor of the State of Tennessee (Written statement read by Hon. Percy J. Priest, Representative from the State of Tennessee)
A. S. M. Monroney, Representative to Congress from the State of Oklahoma -- appearing for Governor Roy J. Turner
Raymond R. Paty, Chancellor, University System of Georgia
Claude Pepper, United States Senator from the State of Florida
J. Hardin Peterson, Representative in Congress from the State of Florida
Thomas G. Pullen, State Superintendent of Schools, Maryland
Daniel Thomas Rolfe, Professor of Physiology, Meharry Medical College, and Executive Secretary of the Meharry Alumni Association
John J. Sparkman, United States Senator from the State of Alabama

Among the agencies and organizations whose representatives appeared in opposition to the compact were the following:

Civil Rights Division of the Congress of Industrial Organizations
Conference of Presidents of Negro Land Grant Colleges
National Alliance of Postal Employees
National Association for the Advancement of Colored People
National Association of Colored Graduate Nurses
National Constitutional Liberties Committee of the National Lawyers' Guild
National Dental Association
National Medical Association
National Negro Insurance Association
Negro Newspaper Publishers' Association
Washington Bureau National Fraternal Council of Negro Churches of America

Mr. Thurgood Marshall, witness for the National Association for the Advancement of Colored People, reaffirmed that "there is only one sure way of equality, and that is that the two people may get the same thing at the same place at the same time," and advocated either admitting Negroes to the existing white facilities, or setting up regional schools on a non-segregated basis. [14]

In a prepared joint statement, Mr. George M. Johnson and Mr. James M. Nabrit, Jr., representing the Conference of Presidents of Negro Land Grant Colleges, urged that the resolution not be approved, or if approved, with amendments:

> "... to the effect that no regional school shall be established for Negroes except where one already exists for whites or where simultaneously one is created for whites; and providing further that the establishment of a regional school for Negroes shall in no wise be deemed to deny Negroes the right to be educated in the State of their residence in a State school of each type established and maintained in the State for whites; and, providing further that this consent of Congress shall not be interpreted or construed to constitute an approval by Congress in any manner whatsoever of the policy of segregation in education.

---

[14] Ibid., p. 75.

"We wish to make it clear to the committee that these college presidents are opposed absolutely to segregation in all forms, and certainly in education. They believe absolutely in the findings of the President's Commission on Education. They are presidents of institutions in a segregated system, and necessarily are working to make these institutions as efficient as possible, but in line with all other thoughtful members of the Negro people urge this Government not to lend its aid and support to segregation, either in the perpetuation of it or in the extension of it, and, therefore, urge that this resolution be not approved." [15]

Two representatives of United States Governmental agencies, Dr. John Dale Russell, Director of the Division of Higher Education, United States Office of Education, Federal Security Agency, and Frank Chambers, Attorney, Department of Justice, gave statements neither directly supporting nor directly opposing the compact as it stood but supporting the concept of regional education. Dr. Russell said in part:

"I am aware of the fact that there are a number of implications associated with Senate Joint Resolution 191 which is before your committee today. Some persons have charged that the resolution will tend to imbed the practice of educational segregation of the races more firmly than ever in our society. Others have pointed to the urgent need for additional trained personnel in the professions and have argued that these needs outweigh in importance any effect that such action would have on the principle or practice of segregation. I am, of course, not here to discuss that issue. My testimony will be confined to the question of the educational desirability of providing for the establishment and maintenance of regional institutions, in the support of which two or more States join in order to obtain improved and extended educational services for their citizens, with the least cost to their taxpayers.

"The need for regional developments in higher education has been apparent to educators for many years.

"... I myself have directed three State-wide surveys of higher education in the past 4 years - Alabama, published in 1945; Idaho, published in 1946; and Maryland, published in 1947. In each of these survey reports, attention was called to the needs of that State for arrangements with nearby States for the development and maintenance of regional facilities for higher education ...

"To some extent a regional pattern of specialized programs in higher education already exists ... A more formal recognition of the support of specialized programs of instruction on a regional basis therefore seems to me to be highly desirable.

"... In the interests of the most effective management of the institutions that will serve regional needs, the Congress should do everything possible to insure the stability of the arrangement. It is perhaps appropriate to point out that the plan for the control of an institution, under the compact to which Senate Joint Resolution 191 refers, does not give

---

[15] Ibid., p. 152.

assurance of a stable group for the regulation of educational policy and operation ... To work out the necessary safeguards for stable control and operation of an institution established for regional service will require long and careful study by educators who are thoroughly versed in the intricacies of State university management." 16

When asked by the chairman whether he recommended a general statute, Dr. Russell replied "That was my idea. In that legislation, I would hope that the question of the constitutionality and the protection of rights of individuals would be amply safeguarded."

When asked by the chairman whether it would be an appropriate act of Congress to approve the compact, he replied, "I should like to see it extended even beyond the 14 States to the 48 States, because I think it is needed." 17

Following the hearings of March 12-13, the Committee on the Judiciary of the United States Senate amended the compact before reporting it out for consideration by the Senate:

"PROVIDED, That the consent of Congress to this compact shall not in any way be construed as an endorsement of segregation in education:

"PROVIDED FURTHER, That the planning, establishment, acquisition, and operation of educational institutions be not in conflict with the Constitution of the United States under the said compact entered into February 8, 1948." 18

May 4, 1948. House Joint Resolution 334 was amended in the House by adding: "This consent of the Congress of the United States of America shall not constitute nor be construed to constitute an endorsement of the principle of segregation in education" and was then approved by the House by a vote of 236 to 45. 19 Before the vote those members of Congress who spoke in opposition to the compact called attention to the fact that many educators and citizen groups were suspicious of it and were convinced that it would reinforce segregation and would be used as a powerful device for making segregation seem appropriate and legal on a regional scale; they described it as contrary to recent unequivocal statements of national public policy against racial segregation. 20

19 The Congressional Record, Vol. 94, No. 80, May 4, 1948, p. 5405. For the full report, see The Congressional Record, May 4, 1948, pp. 5400-5408.

20 Report of the President's Committee on Civil Rights, To Secure These Rights, Washington 25, D. C., Superintendent of Documents, U. S. Government Printing Office, 1947; and Report of the President's Commission on Higher Education, Higher Education for American Democracy, Washington 25, D. C., 6 Vols., U. S. Government Printing Office, 1947.

May 13, 1948. The Senate by a margin of only one vote (38 to 37) recommitted the Resolution to the Judiciary Committee. The reasons given for recommittal (as summarized from the Congressional Record, May 13, 1948, pp. 5903-5922) include:

Congress should not approve or condone or in any way reinforce the segregation patterns of the South;

The plan would be unconstitutional if separate facilities prove unequal;

Regional schools do not meet requirements that facilities offered within the state be immediately available to one race if available to the other;

If the Supreme Court declares segregation unconstitutional and/or state laws requiring it are voided or repealed, the need for and the scope of regional facilities will be substantially changed; and

Approval by Congress may not be necessary.

August 1, 1948. Dr. John Ivey, Jr. of the University of North Carolina was appointed as Director of the Regional Council for Education. During September he secured staff and set up a central office in Atlanta, Georgia, to operate on a budget anticipating a $3,000 contribution from each participating state.

October 11, 1948. The Regional Council for Education met in Atlanta, Georgia and approved a number of policies for the guidance of the Board and staff. Policies 4, 5, and 6 taken from the minutes appear to be goals of primary relevance in this discussion:

"4. Adequate educational services are made available for all citizens.

5. Insofar as possible, needed regional educational services are provided through special arrangements among existing institutions. Regional facilities are established and directed by the Board only when no existing institution can satisfactorily provide needed services under a system of regional collaboration, or when because of statutory or constitutional limitations, states cannot collaborate in supporting existing institutions.

6. Regional services, whether developed at existing institutions or directed by the Board, are subject to applicable State and Federal laws and court decisions."

At this meeting it was agreed that subsequent program developments were dependent upon studies of the region's needs and was announced that the General Education Board had made a grant for such studies.[21]

---

[21] The Annual Report of the General Education Board, 1947-1948, states on page 226, "It is therefore important that the council study the needs, resources and problems of higher education with care and, in doing so, that it have the advice needed for the consideration of appropriate lines of educational development. Toward the cost of such studies and consultants the General Education Board contributed $30,000 for one year."

November, 1948. The Regional Council for Education, Atlanta, Georgia, published a pamphlet entitled, Regional Council for Education, in which it describes the steps taken to initiate the Council program and its approach as one of defining the problem before taking action. It reported the appointment of several commissions to study and survey the needs in special areas such as medicine and related services. The pamphlet includes no discussion of segregation.

December 13, 1948. The Regional Council for Education met at Savannah, Georgia, and agreed that the matter of seeking congressional approval of the compact be left to the discretion of the chairman and staff. It made several amendments to the interstate compact on regional education, the second of which was:

> "Increase in membership of the Board to include the Governor and three additional citizens of each state, instead of 'two additional citizens of each State' as presently provided. Mr. Sims [Cecil Sims, attorney, Nashville, Tennessee] explained that this amendment was recommended in order to enable those governors who wished to do so to appoint a Negro to the policy-making board without making it necessary for any present member to resign." [22]

January 10, 1949. The Atlanta Constitution commented that although this action permitted each state to add a Negro representative if it so desired, the Governor of Georgia had appointed a third white member.

Later in correspondence with the American Council on Race Relations, the Regional Council for Education stated it was continuing its efforts to secure the wholehearted collaboration of Negro educators in the South and was hopeful that some of those who had refused appointment might reconsider. [23]

June 11, 1949. At a meeting at Daytona Beach, Florida, the Regional Council for Education was superceded by the Board of Control for Southern Regional Education and the staff of the Council became the staff of the Board.

July, 1949. The Board of Control for Southern Regional Education published a pamphlet, Regional Cooperation in Higher Education, A Progress Report.

In correspondence with the American Council on Race Relations, the Director of the Board of Control for Southern Regional Education stated that Virginia

[23] The appointment of five Negroes to the Council (and its successor, the Board of Control) was announced by the Director in July, 1949.

Alabama - Dr. J. F. Drake, President, State A. & M. Institute, Normal, Alabama;
Florida - Dr. William H. Gray, Jr., President, Florida A. & M. College, Tallahassee, Florida;
Louisiana - Dr. Ralph W. E. Jones, President, Grambling College, Grambling, Louisiana;
Oklahoma - Dr. G. L. Harrison, President, Langston University, Langston, Oklahoma;
Tennessee - Dr. Hollis F. Price, President, LeMoyne College, Memphis, Tennessee.

is participating in the program under special arrangements, pending the removal of legal impediments to her approving the compact; and that the following state legislatures had approved the compact:

Alabama	Georgia	Mississippi	South Carolina
Arkansas	Louisiana	North Carolina	Tennessee
Florida	Maryland	Oklahoma	

The Director of the Board of Control commenting on an earlier draft of the present statement wrote the American Council on Race Relations:

"The Board has never enunciated a policy which is for or against segregation. Because the program has operated wholly through existing institutions, it has considered segregation a matter which is controlled by the laws under which the institutions operate and the admission policies which they establish. The Board does not consider that its primary function is to force the modification of those policies, whether they relate to segregation or to academic prerequisites.

"Arrangements made by the Board do not crystallize segregation patterns. Contracts with institutions do not designate the kind of students to be admitted. The state of Oklahoma, for example, has approved the Compact, and at the same time, has relaxed its statutes dealing with segregation in graduate and professional schools. The decision is a state matter.

"Within its own operations, the Board has moved ahead of customary practice in the Southern States by consistently following a policy of biracial participation in its affairs and deliberations."

AREAS IN WHICH QUESTIONS HAVE BEEN RAISED

The Issue of Segregated Higher Education

Recognizing that regional programs may have great potential significance for improvement in higher education throughout the nation and particularly the South, one of the basic questions from the standpoint of a democratic America is the prospect which the proposals hold for equalization of educational opportunity and for the eventual elimination of segregation. Do the present proposals tend to equalize educational opportunities by actually bringing the opportunities offered Negroes up to par with opportunities offered the white applicant, or do they permit the dual system to remain unequalized and yet enhance the opportunities offered the Negroes?

Neither the Regional Council for Education nor the Board of Control has announced a position on the broad issue of segregation in the South's schools, colleges and universities.[24] In the face of widespread public comment on the

[24] To date any formal statement of policy is limited to the one that: "Regional services, whether developed at existing institutions or directed by the Board, are subject to applicable State and Federal laws and court decisions" as outlined in the minutes of the October 11, 1948 meeting of the Council.

issue of racial segregation which some have found implicit in the regional program proposals, this failure to announce a position on the controversial issue has led many to believe that the Board of Control is tacitly accepting the segregated pattern. The opposite position taken by some is that the Board may be operating on the assumption that it would be better to avoid controversy and that greater good may come out of focusing attention on the increased and improved services to be offered rather than on the separation of the races.

Testimony before the Senate Judiciary Committee and before both Houses of Congress, and collateral material inserted in the Congressional Record by scores of witnesses for and against the compact, reveals that the bulk of all discussion centered around the issue of segregation in the South. The testimony presented the variety and extent of known disparities between the opportunities for education afforded separately for each group. Some witnesses supported segregation; others condemned segregation; still others defended compromise positions on the subject.

To date, the Board of Control has revealed its plans only in broad terms without explicitly mentioning racial considerations:

> "Students will leave their home states in September, 1949, and go to colleges in other Southern states to take courses in medicine, dentistry, and veterinary medicine. They will be accepted on the same basis and given the same status as residents of the states where these regional centers are located. Their home states will be helping to support financially colleges offering professional courses not available to them 'at home'". [25]

> "The 'contracts for services' arrangement provides an opportunity for recognizing financially the service rendered by various colleges and universities without disturbing the traditional structure of the institution ..." [26]

The state commissions are designed "to assure that all fields of urgent demand are identified, so that the Council's work will be directed by adequate understanding of the present situation." [27]

The important facts pertinent to an evaluation of the regional education proposals as they relate to segregation are the following:

1. Facts showing the extent to which the traditional pattern of segregation in institutions of higher education is already in process of modification in the South.

There are many indications of a trend toward integration on the graduate level. Integration has started and progress has been made in spite of segregation laws and traditional policies. Illustrations of efforts to move in this direction

[25] Regional Cooperation in Higher Education, A Progress Report published by the Board of Control For Southern Regional Education, Atlanta, Georgia, July, 1949, p. 1.

[26] Ibid., p. 14.

[27] Minutes of the October 11, 1948 meeting of the Regional Council for Education, Atlanta, Georgia, p. 8.

during 1948-49 are found in:

Arkansas	admitted Negroes to medical and law schools.
Delaware	admitted Negroes to graduate and professional schools.
Florida	six Negro students denied admission to the University of Florida have appealed to the State Supreme Court.
Kentucky	added an exception to the Day law[28] in 1948. On March 30, 1949 a Federal Court ruled at Lexington, Kentucky, "Until the State of Kentucky shall establish a /Negro/ graduate school substantially equal in facilities to the graduate school of the University of Kentucky this plaintiff /Lyman T. Johnson/ and other qualified colored students must be admitted /to the University's graduate school/ on equal basis with white students." Twenty-nine Negroes have enrolled in law, pharmacy and engineering.
Maryland	has admitted Negroes to the University Branch Law School in Baltimore since 1936. Six Negroes denied admission to other schools in the University of Maryland, (Nursing, Dentistry, Engineering, Pharmacy and Home Economics) have filed suits to gain admission. St. John's College, Annapolis, Maryland, has admitted Negroes.
Missouri	admitted Negroes to the schools of Social Work, Medicine, Arts and Sciences at Washington University. St. Louis University has appointed its first three Negro faculty members in the School of Medicine where Negroes are also admitted.
Oklahoma	enacted legislation to admit Negro students to institutions of higher education (retaining segregation in the classrooms, however), when courses leading to a specific degree are not offered in a state-supported Negro institution. Negroes have enrolled in Education and Law Schools.
Texas	a Negro student, Herman Sweatt, denied admission to the University of Texas Law Sxhool has refused to enroll in the Law School established for Negroes at Houston, and has asked the U. S. Supreme Court to issue a writ of certiorari for the purpose of ruling on the specific question of whether segregated education can be equal education. In addition thirty-five other Negroes denied admission to the University of Texas have petitioned the governor "to ask what is rightfully ours."
West Virginia	Wesleyan College admitted Negroes for study toward degrees.

---

[28] "... the Day law shall not be construed to prohibit the giving of instruction in nursing, medicine, surgery, or other related courses of graduate grade or on a professional level, within any hospital, if the governing body of the hospital, by a majority vote of its members, so elects." The Day law provides "no person shall operate or maintain any college, school or institution where persons of both the white and colored races are received as pupils /nor teach nor attend/ excepting any penal institution or house of reform." (Kentucky Statutes Section 158.020 KRS as amended, 1948 in Section 158.025)

2. Facts showing the extent to which public opinion is changing in the South.

The trend toward integration appears to be supported by responsible spokesmen for the South. Public opinion is increasingly articulate especially in the acceptance of non-segregation in education of students on the graduate level, and in a willingness to see public and private institutions experiment in offering non-segregated training in selected fields including law, medicine, and education.

An editorial in the Christian Science Monitor of December 8, 1948 stated that no impartial observer of the southern scene could dispute that the commonly held attitudes toward segregation of Negroes are breaking down. It concluded:

> "... it is logical to assume that the first breakdown in the South's attitude on segregation would be in respect to graduate education, for obvious reasons, one being that the Negro graduate students would be a hardly noticeable minority at first, and another being that students who have reached the graduate level should certainly be less given to racial prejudice."

The Southern Conference Educational Fund questionnaire to the entire faculties of eleven southern state universities asking for an expression of attitudes on the best ways to provide higher education reported: "Of the 371 replies received, 255, or 69 per cent, favored admitting Negroes to white institutions where such courses were not otherwise available ..." [29]

At Monticello, Virginia, November 20, 1948, a group of forty southern men and women, civic leaders of both races, after full discussion of its implications for the communities in which they were living and working, adopted a declaration which was subsequently signed by over 200 educational, professional, and civic leaders in southern states. It said in part:

> "...Truth and justice are not bounded or divided by parallels of latitude -- this is one country and one people, governed under one constitution; ...
>
> "We still believe all men are created equal, and are endowed as men with certain rights which each must respect and guard to the other.
>
> "We take these rights to include equality before the law, and freedom from any discrimination bolstered by law; ... an unrestricted access to all institutions supported by taxes for the public welfare, schools and hospitals not excepted;
>
> "... We understand the historic conditions that gave rise to our present plight. However, those conditions long ago ceased to exist, although their effects endure." [30]

They recommended repeal of all laws that force public distinctions based on color, religion, or national origin.

---

[29] The Southern Patriot, Vol. 7, No. 1, January, 1949, Southern Conference Educational Fund, Inc., New Orleans, Louisiana, p. 3.

[30] A Declaration of Civil Rights, distributed by the Southern Conference Educational Fund, Inc., 808 Perdido Street, New Orleans, Louisiana.

At a meeting attended by civic leaders from eleven southern states, February 27, 1948, the Workshop on "Right to Equality of Opportunity" made the following statement:

> "We recommend that segregation be eliminated in all graduate and professional schools, both state and private, and we actively oppose the Southern Governors' plan for regional schools, realizing that the Governors' plan is designed to perpetuate the present pattern of segregation." [31]

Recently, Dr. Howard Odum proposed a 21-point goal for the South and the nation, including these significant proposals:

> "6. To provide professional and higher graduate instruction for qualified individuals of both races in the same institutions."
>
> "15. Again, to undertake a comprehensive and scientific inventory of the South and the nation so as to provide specifications for the future, in which the promise and costs of conversion from general segregation to attainable programs of non-segregation may be examined, revised, and adopted."
>
> "20. To stop being afraid of democracy. Thousands and hundreds of thousands of southerners are saying in substance, 'Let's try some of these things out; maybe they will work, but if not we will keep on trying'." [32]

The Texas Council of Negro Organizations presented to the Governor of the State on February 18, 1949 these comments on regional education:

> "The Council looks with favor on the establishment of Regional University Centers in the South, with the possibility of state-owned participating institutions qualifying for Federal aid; provided, those centers plan and develop unique and superior services, supplementing rather than duplicating, or substituting for university offerings normally provided within the states; and provided, a state's participation is justifiable, in the light of its full constitutional obligations in education, to all racial elements alike, within the state; and provided further, that the standards of faculty membership and student admission in such institutions shall not be qualified by racial considerations of any kind or description." [33]

In the February issue of The Woman's Press, a number of authors cite the progress being made in civil rights in the South. Mrs. Dorothy Tilly describes

---

[31] Mimeographed Release, "Findings and Action Program of Southwide Meeting on Human and Civil Rights, Atlanta, Georgia, February 27, 1948," sponsored by the Southern Regional Council, Atlanta, Georgia, and a number of civic organizations located in the South as co-sponsors.

[33] Mimeographed Release of the Texas Council of Negro Organizations, Marshall, Texas, February 18, 1949.

South into a more harmonious position with the rest of the nation with respect to its basically democratic beliefs and goals.

The Board of Control itself makes two significant statements to show how effective the proposals may be in shaping the South's future:

> "... As an agency of the entire region, its purpose is to aid in developing a region-wide view of needs, opportunities and resources. By stimulating effort in the direction of the greatest need, it seeks to raise the social and economic life of the region to higher levels than those yet attained. Its effectiveness will be judged, finally, by the extent to which life in the South is improved as knowledge advances." 41

> "As the South moves toward a higher level of development in the graduate and professional fields, there is now an opportunity to plan before rather than after the patterns within the region have crystallized. The graduate and professional fields are yet to be fully developed, and planning at this stage can lead to a maximum benefit from the funds available." 42

CONCLUSIONS

The southern states, as evidenced by discussions, activities and proposals of their educators, governors, and responsible civic leaders in many capacities, are generally aware that their present facilities for higher education, although straining to do so, cannot possibly meet even the most immediate and the most urgent requirements for trained personnel in many important professional and technical fields. They recognize that the program of higher education which each state now offers its qualified young men and women suffers from serious omissions, an uneven or poor quality, and a wide disparity between the opportunities available to the two races. They have begun to express concern over the shortcomings of the higher and professional educational systems maintained by each state, which offer too little to both races and which have been far from fair to the Negro. In the North as well as the South educators and statesmen have been forced to concede the high cost of specialized training. The cost becomes prohibitive where the demand in a given field does not warrant independent provision for study in each state.

Regional educational facilities for higher education (including any that might be owned and operated by a number of states jointly, contracts among states for services and any other agreements to share faculty, equipment or other resources) loom as a logical, economical and workable solution. Their potentialities on an unsegregated basis demand sympathetic consideration. The concept of regional education *per se* appears to have received wholehearted and unanimous endorsement. Reservations focus upon the retention of segregation in all of the present arrangements, and the absence of any policy statement accepting integration on the graduate level as an immediate possibility in those situations where legal adjustments are not required and as a goal which includes concerted effort to change the laws.

PAGE (s) MISSING

The President's Commission on Higher Education was aware of the laws related to segregation when it reported that "Another expedient which has received consideration is the establishment of regional centers of study, attached to strong colleges and open to both white and Negro students, with broad curricular offerings and high standards of scholarship and research."[43] It pointed out that such a plan would "be conducive to a more nonsegregated approach to regional educational problems", the assumption being that on a regional base full integration would be permissible and would be one immediately available way of lessening segregation in higher learning while the state legal structures undergo change. The Report assumes that laws requiring segregated schools are as subject to change if and when an enlightened citizenry wishes to change them as any other laws.

The machinery exists for amendment of state constitutions and laws and for the repeal of existing legislation when the public conscience declares any provision to be contrary to public policy. There is no reason to accept the segregation laws as beyond the reach of enlightened public opinion and beyond the hope of change. Moreover, there is much that can be done in institutions of higher education within the existing laws while every appropriate voice is raised in behalf of changing them. Several border states have already departed from the old pattern.

Until the present segregated system is made equal or abolished, the South appears to have four ways of "meeting" its problem in the field of higher education (assuming that any further extension of duplication at the technical and professional level is excluded):

1. Admit Negroes to existing white institutions and whites to existing Negro institutions within each state in specific fields that are not provided in duplicate;

2. Continue to violate the provisions both of the Constitution of the United States and of the several states which require equality of opportunity, by offering less within each state to one group than to another (or the obviously ridiculous extreme, seldom seriously considered, of closing those white institutions which offer opportunities not provided elsewhere in the state for Negroes);

3. Provide regional facilities and services conforming to the existing segregated pattern and thus failing to provide equality of opportunity; and

4. Provide regional facilities and services to all qualified applicants without discrimination or segregation.

Critics of choice three -- the one presently in question -- maintain that to accept segregation on the regional level is not only wrong, because it is un-American and unconstitutional, but that it is an unnecessary compromise. They contend that in fields where graduates are as urgently needed as in medicine, education, law, social work, and many other professional and technical areas, the time is ripe for reform and that the fourth choice -- integrated regional educational facilities--is a practical one for this generation and not a far off Utopian goal. They maintain that a region-wide program involving public expenditures for

---

[43] (Underscoring is ours.) op. cit., Vol. 2, p. 36.

out-of-state contracts for training hundreds of students cannot fail to have a profound effect upon segregation. To the extent that these facilities and services make separate provision for the races, they directly or indirectly, extend or strengthen the dual system. To the extent that these facilities and services make common provision for both races in the same institution, they move in the direction of integration and equality of opportunity.

The plan of the Board of Control for Southern Regional Education subject to applicable state and federal laws and court decisions does not purport to take the place of state university programs. Persons retain the right to an equal opportunity within their state of residence. As the plan of the Board stands, white applicants will continue to have far more choice at home and on the regional level. For example, in medicine and dentistry Negroes will have no choice except Meharry while white students may still apply to twenty-five medical schools in the region and to a number offering dentistry. The injustices of segregation are further intrenched to the extent that the Negroes' field of choice remains narrow while the white applicants' field of choice is widened.

Negro and white candidates for higher education, and leaders of both races who express reservations after weighing and examining the recent developments in regional education, distinguish between those characteristics of the program of the Board of Control for Southern Regional Education which appear constructive and in harmony with public policy and those which appear short-sighted and in disharmony. They urge the Board to recognize and deal with the problem of segregation in making its studies and in formulating its program. The chronological account of regional developments to date shows some willingness upon the part of the Board and the staff to modify and change its emphasis, method and constituency. After further consideration and experience in dealing with the problem they may see their way clear to adopt a forthright policy against segregation in higher education and to focus their resources and efforts upon integration at the graduate level. Such a step would create confidence in the regional plan as a sound combination of public and private effort to improve educational opportunities in the South. Public funds insuring continuing operation, supplemented by private resources for research, provide the Board of Control with the means for studying the needs of the South and for exploring ways to meet these needs. In doing so it will be unrealistic to avoid consideration of or to remain detached from the larger public issues which center around the question of segregation and which involve every school's admissions policy.

There is wide agreement that unsegregated regional centers anywhere in the nation, if they live up to their promise, should offer the all-important inducements of a higher quality of education at the least cost to the public. Open to all qualified applicants they should attract a large segment of the white as well as the Negro youth of any state, as it is most likely that they, if they had a choice, would press for participation in good unsegregated schools rather than in inferior segregated ones. There is considerable evidence that many university students, teachers, and administrators in the South are ready to accept unsegregated graduate and, for that matter, undergraduate schools. Further delay and compromise in opening institutions of higher education to all qualified applicants no longer seems necessary or expedient.

APPENDIX

THE REGIONAL COMPACT

WHEREAS, the States who are parties hereto have during the past several years conducted careful investigation looking towards the establishment and maintenance of jointly owned and operated regional educational institutions in the Southern States in the professional, technological, scientific, literary and other fields, so as to provide greater educational advantages and facilities for the citizens of the several States who reside within such region, and

WHEREAS, Meharry Medical College of Nashville, Tennessee, has proposed that its lands, building, equipment, and the net income from its endowment be turned over to the Southern States, or to an agency acting in their behalf, to be operated as a regional institution for medical, dental and nursing education upon terms and conditions to be hereafter agreed upon between the Southern States and Meharry Medical College, which proposal, because of the present financial condition of the institution, has been approved by the said States who are parties hereto, and

WHEREAS, the said States desire to enter into a compact with each other providing for the planning and establishment of regional educational facilities:

NOW THEREFORE, in consideration of the mutual agreements, covenants and obligations assumed by the respective States who are parties hereto (hereinafter referred to as "States"), the said several States do hereby form a geographical district or region consisting of the areas lying within the boundaries of the contracting States which, for the purposes of this Compact, shall constitute an area for regional education supported by public funds derived from taxation by the constituent States and derived from other sources for the establishment, acquisition, operation and maintenance of regional educational schools and institutions for the benefit of citizens of the respective States residing within the region so established as may be determined from time to time in accordance with the terms and provisions of this Compact.

The States do further hereby establish and create a joint agency which shall be known as the Board of Control for Southern Regional Education (hereinafter referred to as the "Board"), the members of which Board shall consist of the Governor of each State, ex officio, and two[1] additional citizens of each State to be appointed by the Governor thereof, at least one of whom shall be selected from the field of education. The Governor shall continue as a member of the Board during his tenure of office as Governor of the State but the members of the Board appointed by the Governor shall hold office for a period of five[2] years except that in the original appointment one Board member so appointed by the Governor shall be designated at the time of his appointment to serve an initial term of three years,[3] but thereafter his successor shall serve the full term of five years. Vacancies on the Board caused by death, resignation, refusal or inability to serve,

---

[1] Amended to read three.

[2] Amended to read four.

[3] Amended to read two years. Substituted for the rest of the sentence: ... one Board member to serve an initial term of three years, and the remaining Board member to serve the full term of four years, but thereafter the successor of each appointed Board member shall serve the full term of four years.

shall be filled by appointment by the Governor for the unexpired portion of the term. The officers of the Board shall be a Chairman, a Vice Chairman, a Secretary, a Treasurer, and such additional officers as may be created by the Board from time to time. The Board shall meet annually and officers shall be elected to hold office until the next annual meeting. The Board shall have the right to formulate and establish by-laws not inconsistent with the provisions of this Compact to govern its own actions in the performance of the duties delegated to it including the right to create and appoint an Executive Committee and Finance Committee with such powers and authority as the Board may delegate to them from time to time. [4]

It shall be the duty of the Board to submit plans and recommendations to the States from time to time for their approval and adoption by appropriate legislative action for the development, establishment, acquisition, operation and maintenance of educational schools and institutions within the geographical limits of the regional area of the States, of such character and type and for such educational purposes, professional, technological, scientific, literary, or otherwise, as they may deem and determine to be proper, necessary or advisable. Title to all such educational institutions when so established by appropriate legislative actions of the States and to all properties and facilities used in connection therewith shall be vested in said Board as the agency of and for the use and benefit of the said States and the citizens thereof, and all such educational institutions shall be operated, maintained and financed in the manner herein set out, subject to any provisions or limitations which may be contained in the legislative acts of the States authorizing the creation, establishment and operation of such educational institutions.

[5]The Board shall have such additional and general power and authority as may be vested in it by the States from time to time by legislative enactments of the said States.

Any two or more States who are parties of this Compact shall have the right to enter into supplemental agreements providing for the establishment, financing and operation of regional educational institutions for the benefit of citizens residing within an area which constitutes a portion of the general region herein created, such institutions to be financed exclusively by such States and to be controlled exclusively by the members of the Board representing such States provided such agreement is submitted to and approved by the Board prior to the establishment of such institutions.

Each State agrees that, when authorized by the Legislature, it will from time to time make available and pay over to said Board such funds as may be required

---

[4] Amended to add: The Board may, within its discretion, elect as its Chairman a person who is not a member of the Board, provided such person resides within a signatory State, and upon such election such person shall become a member of the Board with all the rights and privileges of such membership.

[5] For this paragraph is substituted the following paragraph: In addition to the power and authority heretofore granted, the Board shall have the power to enter into such agreements or arrangements with any of the States and with educational institutions or agencies, as may be required in the judgment of the Board, to provide adequate services and facilities for the graduate, professional, and technical education for the benefit of the citizens of the respective States residing within the region, and such additional and general power and authority as may be vested in the Board from time to time by legislative enactment of the said States.

for the establishment, acquisition, operation and maintenance of such regional educational institutions as may be authorized by the States under the terms of this Compact, the contribution of each State at all times to be in the proportion that its population bears to the total combined population of the States who are parties hereto as shown from time to time by the most recent official published report of the Bureau of Census of the United States of America or upon such other basis as may be agreed upon.

This Compact shall not take effect or be binding upon any State unless and until it shall be approved by proper legislative action of as many as six or more of the States whose governors have subscribed hereto within a period of eighteen months from the date hereof. When and if six or more States shall have given legislative approval to this Compact within said eighteen months period, it shall be and become binding upon such six or more States 60 days after the date of legislative approval by the sixth State and the Governors of such six or more States shall forthwith name the members of the Board from their States as hereinabove set out, and the Board shall then meet on call of the Governor of any State approving this Compact, at which time the Board shall elect officers, adopt by-laws, appoint committees and otherwise fully organize. Other States whose names are subscribed hereto shall thereafter become parties hereto upon approval of this Compact by legislative action within two years from the date hereof, upon such conditions as may be agreed upon at the time.[6]

After becoming effective this Compact shall thereafter continue without limitation of time provided, however, that it may be terminated at any time by unanimous action of the States and provided further that any State may withdraw from this Compact if such withdrawal is approved by its legislature, such withdrawal to become effective two years after written notice thereof to the Board accompanied by a certified copy of the requisite legislative action, but such withdrawal shall not relieve the withdrawing State from its obligations hereunder accruing up to the effective date of such withdrawal. Any State so withdrawing shall ipso facto cease to have any claim to or ownership of any of the property held or vested in the Board or to any of the funds of the Board held under the terms of this Compact.

If any State shall at any time become in default in the performance of any of its obligations assumed herein or with respect to any obligations imposed upon said State as authorized by and in compliance with the terms and provisions of this Compact, all rights, privileges and benefits of such defaulting State, its members on the Board and its citizens shall ipso facto be and become suspended from and after the date of such default. Unless such default shall be remedied and made good within a period of one year immediately following the date of such default this Compact may be terminated with respect to such defaulting State by an affirmative vote of three-fourths of the members of the Board (exclusive of the members representing the State in default), from and after which time such State shall cease to be a party of this Compact and shall have no further claim to or ownership of any of the property held by or vested in the Board or to any

---

[6] Amended to add: Provided, however, that with respect to any State whose constitution may require amendment in order to permit legislative approval of the Compact, such State or States shall become parties hereto upon approval of this Compact by legislative action within seven years from the date hereof, upon such conditions as may be agreed upon at the time.

of the funds of the Board held under the terms of this Compact, but such termination shall in no manner release such defaulting State from any accrued obligation or otherwise affect this Compact or the rights, duties, privileges or obligations of the remaining States thereunder.

IN WITNESS WHEREOF this Compact has been approved and signed by the Governors of the several States, subject to the approval of their respective legislatures in the manner hereinabove set out, as of the 8th day of February, 1948.

1- Amer. Council on Race Relations

NATIONAL CONFERENCE PROGRAM ANNOUNCED

AMERICAN COUNCIL
Report
ON RACE RELATIONS

OCTOBER, 1949 VOL. 4, NO. 10

PUBLIC POLICY

ARMY PLAN APPROVED

The Army's new plan to "give greater assurance of equality of treatment and opportunity" for Negroes was recently approved by the Defense Secretary Louis Johnson. The plan continues segregation at the company level and below, but gives Negro soldiers a better chance to attend Army schools and acquire specialists' qualifications and promotions.

The approved program makes the following changes:

1. Abolition of the present Negro quotas for attendance at Army schools, selections to be made hereafter "from the best qualified personnel without regard to race or color."

2. A new promotion system in which all promotions will be by open competition on Army-wide examinations, "against a single standard and without regard to race or color."

3. A new policy for the reserve officer training corps in which students attending summer training camps as members of school units to which they are regularly assigned will be trained with those units "without regard to race or color."

4. Establishment of a board of senior Army officers periodically to review the program and to "re-examine and review the fundamental policies for the utilization of Negro manpower in the light of changing conditions and experiences."

Gordon Gray, Secretary of the Army, who submitted the plan to Mr. Johnson commented, "This program does not mean that existing Negro units will be broken up, or that Negro personnel of these units will be scattered throughout the Army.

"It does mean that qualified Negroes, including members of these existing units, will have the opportunity to learn those skills previously unavailable to them. Hereafter, Negroes who acquire skills will be assigned to positions where their specialties may be applied in the manner most useful to the Army."

The American Veterans Committee, American Council on Human Rights, Americans for Democratic Action, and the National Association for the Advancement of Colored People have raised objections to the Army plan.

PENNSYLVANIA RAILROAD

The New York State Commission Against Discrimination and the Pennsylvania Railroad jointly announced recently that effective immediately, coach seats on the through trains from New York to the South, which Pennsylvania operates to Washington, D. C., will be reserved for all passengers alike in any part of the train.

Charges of discrimination against the Pennsylvania Railroad in the sale of reserved coach accommodations to Negro passengers traveling to points south of Washington, D. C. were filed recently with the State Commission Against Discrimination by the New York Mayor's Committee on Unity. The officials of the Pennsylvania Railroad contended in their negotiations with the State Commission Against Discrimination, that it has never countenanced discrimination in accommodations afforded to its passengers and that the arrangement it has previously had for coach seat reservations on these trains to the South, were set up in good faith for the well-being of passengers traveling south of Washington on the lines of other railroads. Now, however, the Pennsylvania Railroad has agreed to make seats available immediately in any part of these trains to all passengers as they apply.

Roy Wilkins, Acting Secretary of the NAACP, expressed, "With the abolition of segregation by the Pennsylvania Railroad the practice of segregation on interstate carriers will just about come to an end. We are asking our branches in Illinois to urge the Illinois Central and other lines originating in that state to follow the example of the Pennsylvania Railroad and cease all Jim Crow practices."

More than 300 representatives of federal, national, state, and local agencies are expected to attend the Third National Conference on Intergroup Relations in Chicago on November 3-5. The three-day conference, which will be held at the Shoreland Hotel, is again being sponsored by the American Council on Race Relations and the National Association of Intergroup Relations Officials. Discussion will focus on three broad areas—minority group problems, agency administrative problems, and the further development of NAIRO; these will be covered in general sessions, round tables, and agency meetings, as follows:

General Sessions

Where Do We Stand In Intergroup Re-Relations?

(Report) Mrs. Irene B. Miller, Executive Secretary, Seattle Civic Unity Committee

Program and Services of NAIRO

(Reports of NAIRO Committees: Legislation, Federal Personnel Practices, Professional Standards, Professional Services, Membership)

Toward An Integrated Intergroup Relations Program (Panel Discussion)

Chairman: Harold A. Lett, Assistant Director, Division Against Discrimination, New Jersey Department of Education

Moderator: Charles S. Johnson, President, Fisk University

Participants: The Chairmen of the Agency Meetings

Report on the Findings and Recommendations of the Five Round Tables

Chairman: Thomas H. Wright, President, National Association of Intergroup Relations Officials

Reports by the Chairmen of the Round Tables

The National Agencies Answer Your Questions

Chairman: Louis Wirth, President, American Council on Race Relations

Participants: Representatives of national intergroup relations agencies who will answer questions of the policies and services of their respective organizations

Round Tables

Civil Rights, Legislation, and Litigation

Chairman: Will Maslow, Director, Commission on Law and Social Action, American Jewish Congress

Vice-Chairman: Mrs. Helen L. Peterson, Director Mayor's Committee on Human Relations (Denver)

Employment

Chairman: John Hope, II, Industrial

Relations Specialist, American Missionary Association
Vice-Chairman: Albert J. Weiss, Executive Director, Bureau on Jewish Employment Problems (Chicago)

Community Organization
Chairman: Mrs. M. E. Tilly, Executive Secretary, Georgia Committee on Interracial Cooperation
Vice-Chairman: Myron Schwartz, Executive Secretary, Jewish Community Relations Council of St. Louis

Education
Chairman: Arnold Rose, Professor of Sociology, University of Minnesota
Vice-Chairman: Jitsuichi Masuoka, Associate Professor of Sociology, Fisk

Housing
Chairman: Edward Howden, Executive Director, Council for Civic Unity of San Francisco
Vice-Chairman: George B. Nesbitt, Racial Relations Adviser, Public Housing Administration, HHFA

Agency Meetings
Local Private Agencies
Chairman: Charles Posner, Acting Director, Indianapolis Community Relations Council
Vice-Chairman: Maurice B. Fagan, Executive Director, Philadelphia Jewish Community Relations Council

Local Public Agencies
Chairman: Marshall Bragdon, Executive Secretary, Mayor's Friendly Relations Committee (Cincinnati)
Vice-Chairman: John G. Feild, Field Representative, City of Detroit Mayor's Interracial Committee

State Private Agencies
Chairman: Louis B. Greenberg, Executive Director, Indiana Jewish Community Relations Council
Vice-Chairman: George S. Mitchell, Executive Director, Southern Regional Council

State Public Agencies
Chairman: Frank T. Simpson, Executive Secretary, State of Connecticut Inter-racial Commission
Vice-Chairman: Mrs. Rebecca C. Barton, Director, Governor's Commission on Human Rights (Wisconsin)

COMMUNITY ORGANIZATION

WORKSHOP ON CIVIL RIGHTS

A Workshop on Civil Rights is being planned under the auspices of the Kansas Clearing House on Civil Rights to be held at Kansas State College in Manhattan. It is sponsored locally by the Kansas State College YMCA and YWCA, the Manhattan Civil Rights Committee, and the Social Action Committee of the Congregational Church. Mr. Gordon Jones of the Kansas Commission Against Employment Discrimination is scheduled to be the main speaker. The five-member Commission appointed by Governor Frank Carlson and authorized by the 1949 session of the legislature is now investigating discrimination in employment in Kansas.

The theme of the Workshop will be "concerned with methods of getting facts, and the techniques of getting efficient democratic action". It is expected that as a follow-up after the Workshop, local groups will poll their communities and the returns will be made available to the Kansas Clearing House on Civil Rights.

A Workshop projected for January is contemplated to deal with plans for action based on the results of the survey.

Among the topics for consideration at the business meeting will be the organization of the Clearing House, a constitution, a budget, the advantages of incorporation, possible affiliation with the American Civil Liberties Union, and enlargement of the publication staff. For further information on the results of the Workshop, write to Albert Eldridge, Executive Secretary of the Kansas Clearing House on Civil Rights, Box 707, Kansas State College, Manhattan, Kansas.

MASS COMMUNICATION

THE DETROIT FOCUS

A new four-page printed edition of *The Detroit Focus* published by the City of Detroit Mayor's Interracial Committee and The Coordinating Council for Research and Education on Human Relations has recently been issued. The September issue carried, as one of its items, a brief analysis of advances made in the states in 1949 in the implementation of the President's Report "To Secure These Rights". Subscriptions to the publication may be addressed to th City of Detroit Mayor's Interracial Committee, 720 Transportation Building, Detroit 26, Michigan.

NEW ACLU BULLETIN

The American Civil Liberties Union has recently published the first issue of its new printed monthly *Civil Liberties* a four-page publication. It is the combination of the monthly mimeographed bulletin with the *Civil Liberties Quarterly*. There is a column entitled "Civil Liberties 'round the Nation" reporting on significant development in the states. Subscriptions to this bulletin may be addressed to the ACLU, 170 Fifth Avenue, New York 10, New York.

EMPLOYMENT

FEPO HEARINGS CONTINUE IN SAN FRANCISCO

Hearings on the proposed FEP ordinance are continuing before the Supervisors' Sub-Committee in San Francisco. (See September issue REPORT.) After hearing the testimony of the Mayor's Committee on Human Relations and the reports of proponents of the measure, the Sub-Committee agreed that the hearings be held once every fortnight despite the attempt made by Alvin E. Roth of the San Francisco Employers Council for a delay. The next hearing was scheduled for November 1.

Facts and figures on the Minneapolis FEPC, on which information was requested by the San Francisco Superintendent of Education Dr. Herbert Clish, were read into the record demonstrating the benefits of FEPC in action.

EDUCATION

MARYLAND

Governor William P. Lane, Jr., of Maryland recently announced the appointment of a seven-man Commission to study the question of higher education for Negroes in Maryland. Those named are: Walter N. Kirkman, former state budget Director and now Director of the Medical Chirurgical faculty; E. Asbury Davis of Baltimore, an official of the United States Fidelity and Guarantee Company; Joseph P. Healy of Baltimore, Chairman of the Commission on Racial Relations and a retired businessman; James C. L. Anderson of Towson, lawyer; Dr. Dwight O. W. Holmes of Baltimore, retired President of Morgan State College; Dr. David E. Weglein of Baltimore, former Superintendent of Public Instruction for Baltimore; and Mrs. John W. Andrews of Crisfield, member of the School Board of Somerset County.

The resolution which called for the establishment of the Commission was enacted in the 1949 session of the General Assembly. It was designed to consider among other things, the relative merits of existing Negro colleges in the state.

At the organizational meeting, Dr. David E. Weglein was elected Chairman of the Commission and Walter N. Kirkman was elected Recording Secretary. The new Chairman stated that the committee planned to meet "as frequently as possible, and proposed to invite individuals and group to appear before it and give its members the benefit of their opinions and recommendations." He further stated that no time limit was considered for completion of the work. "We will prepare a report as rapidly as we can," he said.

SUMMARY REPORT ON CIVIL RIGHTS LEGISLATION, FIRST SESSION, 81st CONGRESS

Supplement to REPORT, October, 1949, Vol. 4, No. 10

REPORT, Monthly Publication of the American Council on Race Relations

Particularly in contrast to the significant state civil rights enactments during 1949, the civil rights record of the 81st Congress, from the early Senate "compromise" on cloture to the October 3rd decision of the Administration's congressional leaders to abandon efforts to pass the President's civil rights program during this session, has been discouraging. No major proposal introduced in furtherance of the recommendations of the President's Committee on Civil Rights has yet been enacted. Little progress has been made despite the fact that four important civil rights measures, an omnibus "Civil Rights Act of 1949" and bills to make lynching a federal crime, to abolish the poll tax, and to establish a fair employment practice commission, were sponsored by Senator McGrath, then Chairman of the Democratic National Committee.

It is reported that when Congress reconvenes in January top priority is to be given to the FEPC bill, which has been reported out favorably by the House Education and Labor Committee and has been placed on the Senate calendar for consideration in January, 1950. An early test of the new cloture rule, whose passage was effected by a coalition of conservative Republicans and southern Democrats, is expected. There is as yet little reason to believe that this significant measure can survive filibuster in the Senate.

The bill to abolish the poll tax has once again passed the House, but has not yet been reported out by the Senate Committee on Rules and Administration. Other measures which have received favorable House action are the bills to liberalize the Displaced Persons Act of 1948; to eliminate racial barriers to immigration and naturalization and to grant quotas to Asiatic groups heretofore excluded; and to eliminate racial barriers to naturalization. The first of these is to be submitted for full Senate consideration in January, the second has not yet been acted upon by the Senate Judiciary Committee, and the last has been reported out favorably by this committee.

Although the anti-lynch bill has been reported out favorably by the Senate Judiciary Committee, the corresponding House committee has failed to take action on this measure. The omnibus "Civil Rights Bill of 1949" has progressed even more slowly. Hearings have been held in the judiciary committees of both House and Senate, but no action has been taken.

These and other important civil rights measures introduced during the first session of the 81st Congress are reported on in the table which follows. Acknowledgment for aid in the compilation of this supplement is made to the Commission on Law and Social Action of the American Jewish Congress.

CIVIL RIGHTS LEGISLATION, FIRST SESSION, 81st CONGRESS

Compiled as of October 20, 1949

PURPOSE OF BILL	NO.	SPONSOR	PROGRESS
ALIENS AND FOREIGN BORN			
To liberalize the Displaced Persons Act of 1948.	S 311	McGrath (D., R.I.) Neely (D., W.Va.)	Hearings held in Judiciary Committee. No action taken.
	HR 4567	Celler (D., N.Y.)	Passed House. Reported out by Senate Judiciary Committee. Senate recommitted bill with instruction that Committee re-submit it in January, 1950.
To amend the Nationality Act to remove racial barriers to naturalization regarding spouses and children of United States citizens.	HR 3029	Cavalcante (D., Pa.)	Referred to Judiciary Committee. No action taken.
To eliminate racial barriers to immigration and naturalization and to grant quotas to Asiatic groups heretofore excluded.	HR 199	Judd (R., Minn.)	Passed House. Hearings held by sub-committee of Senate Judiciary Committee. No action taken.
To eliminate racial barriers to naturalization.	HJ Res. 238	Walter (D., Pa.)	Passed House. Reported out favorably by Senate Judiciary Committee.
To compensate aliens and persons of Japanese ancestry for loss or damage to property held in custody by the Attorney General's office.	S 29	McCarran (D., Nev.)	Enacted.
ANTI-DEFAMATION			
To bar from the mails and from interstate commerce defamatory material intended to cause race hatred.	HR 2269 HR 2270 HR 2271 HR 2272 HR 2273	Javits (R., N.Y.) Klein (D., N.Y.) Dawson (D., Ill.) Keating (R., N.Y.) Keogh (D., N.Y.)	Referred to Judiciary Committee. No action taken.
To bar from the mails and from interstate commerce anti-Semitic literature.	HR 3882	Davenport (R., Pa.)	Referred to Judiciary Committee. No action taken.
To bar from interstate commerce anti-Semitic and anti-Negro literature.	HR 3908	Barrett (R., Pa.)	Referred to Judiciary Committee. No action taken.
To withdraw mailing privileges from persons engaged in disseminating racist literature.	HR 255	Lynch (D., N.Y.)	Referred to Post Office and Civil Service Committee. No action taken.
CIVIL RIGHTS — COMPREHENSIVE			
To establish a Civil Rights Commission in the Executive Department, reorganize the Civil Rights Division of the Department of Justice, create a Joint Congressional Committee on Civil Rights; to strengthen civil rights statutes to protect individual's rights to liberty, security, and citizenship; to protect right of individual to vote; and to ban discrimination and segregation in interstate transportation.	S 1725	McGrath (D., R.I.)	Hearings held by sub-committee of Judiciary Committee. No action taken.
	HR 4682	Celler (D., N.Y.)	Hearings held by sub-committee of Judiciary Committee. No action taken.

PURPOSE OF BILL	NO.	SPONSOR	PROGRESS
CIVIL RIGHTS — PROTECTION OF THE PERSON			
To extend to the Federal government jurisdiction over lynching.	S 91	Ferguson (D., Mich.)	Reported out favorably by Senate Judiciary Committee.
	HR 4683	Celler (D., N.Y.)	Hearings held by sub-committee of House Judiciary Committee. No action taken.
CIVIL RIGHTS — PUBLIC ACCOMMODATIONS			
To ban segregation in interstate commerce.	S 852 HR 22 HR 831	Magnuson (D., Wash.) Powell (D., N.Y.) Dollinger (D., N.Y.)	Referred to House and Senate committees on Interstate and Foreign Commerce. No action taken.
DISTRICT OF COLUMBIA			
To provide home rule for District of Columbia.	S 1527	Kefauver (D., Tenn.)	Passed Senate. Failed in House District of Columbia Committee.
To ban segregation in public schools, health centers and recreation centers in District of Columbia.	Rider to an appropriations bill.	Powell (D., N.Y.)	Defeated.
To repeal all District of Columbia laws which may be construed as authorizing segregation in the public schools; to condition all license for places of public accommodation upon observance by the operators of policies and practices of racial non-segregation.	HR 3614	Klein (D., N.Y.)	Referred to District of Columbia Committee. No action taken.
To assure full and equal privileges to all persons in the District of Columbia.	HR 24 HR 382	Powell (D., N.Y.) Dawson (D., Ill.)	Referred to District of Columbia Committee. No action taken.
To provide for the establishment of a Commission on Human Rights in the government of the District of Columbia.	S 2595	Neely (D., W.Va.)	Referred to District of Columbia Committee. No action taken.
EDUCATION			
To withhold Federal aid from any school engaging in discrimination.	HR 1642	Dollinger (D., N.Y.)	Referred to Committee on Education and Labor. No action taken.
Non-segregation amendment to Federal aid to education bill, S. 246.		Amendment introduced by Lodge (R., Mass.)	Amendment defeated.
EMPLOYMENT			
To prohibit discrimination in employment because of race, religion, color, national origin, or ancestry.	S 1728	McGrath (D., R.I.)	Senate Labor and Public Welfare Committee reported bill October 17 with no recommendation. Measure placed on Senate calendar for consideration in January, 1950.
	HR 4453	Powell (D., N.Y.)	Reported out favorably by House Education and Labor Committee.
Amendment to HR 4290 making it an unfair labor practice for unions or employers to discriminate because of race, color, or creed.		Cavalcante (D., Pa.)	Amendment defeated.
MILITARY FORCES			
To ban segregation in the armed forces.	HR 23 HR 1353	Powell (D., N.Y.) Dollinger (D., N.Y.)	Referred to Committee on Armed Forces. No action taken.
Amendment to HR 1823 to eliminate segregation and discrimination in the proposed Women's Reserve of the Coast Guard.		Marcantonio (A.L.P., N.Y.)	Amendment passed House but bill returned to committee.
To withhold Federal aid from national guard organizations which practice discrimination or segregation on account of race, color, or creed.	HR 1403	Multer (D., N.Y.)	Referred to Committee on Armed Forces. No action taken.
HOUSING			
To withhold Federal aid from housing accommodations engaged in discrimination.	HR 1641	Dollinger (D., N.Y.)	Referred to Committee on Banking and Currency. No action taken.
Amendment to S 1070 to bar discrimination or segregation in any public housing unit.		Bricker (R., Ohio) Cain (R., Wash.)	Amendment defeated.
Amendment to S 1070 to bar discrimination in any public housing unit.		Bricker (R., Ohio)	Amendment defeated.
Amendment to mortgage insurance and direct loan bill to make it unlawful to segregate white and colored persons in housing aided by the legislation.		Marcantonio (A.L.P., N.Y.)	Amendment defeated.
RIGHT OF FRANCHISE			
To make illegal a tax in a primary or election for national officers.	S 1727 HR 3199	McGrath (D., R.I.) Norton (D., N.J.)	Passed House. Senate bill referred to sub-committee of Senate Committee on Rules and Administration. No action taken.

NATIONAL STUDENT ASSOCIATION

At the recent meeting held by the National Student Association with 1,000 delegates in attendance an appeal to colleges throughout the United States to prohibit new student groups which practice discrimination on grounds of religion, race or political belief was made. The Association recommended:

"Wherever feasible and where consonant with state laws students initiate through their student governments changes in school regulations which would prohibit recognizing new student groups which have discriminatory clauses in their constitutions and charters."

AWARDS

AMERICAN BROTHERHOOD AWARD

The 1949 American Brotherhood Award for Distinguished Civil Service was presented by the National Conference of Christians and Jews to the President of the General Cable Corporation, Dwight R. G. Palmer, for "his work in helping to solve intergroup problems in industry and the armed forces."

The presentation was in specific recognition of Mr. Palmer's efforts in establishing at his plant in Perth Amboy, New Jersey, a "pilot" experiment in the "study and cure of bias." Workers at the plant, representing various races and religions, have held weekly discussions to explore the underlying causes of tensions and misunderstandings.

In speaking of the experiment in the plant, Mr. Palmer stated that it was "no more than a beginning that needs to be duplicated north and south, east and west, clear across our land." He further stated "Now more than ever it is vital that we implement our own democracy and strive to eliminate any imperfections here that would serve to divide our people, weaken our nation, and dissipate our moral influence."

ADMINISTRATION

BROTHERHOOD WEEK

John L. Sullivan, former Secretary of the Navy, has been named General Chairman of Brotherhood Week to be observed nationally next February 19-26 under the sponsorship of the National Conference of Christians and Jews, it was announced by Dr. Everett R. Clinchy, NCCJ president.

Mr. Sullivan stated in accepting the post, "The big question today is whether the human spirit will remain free or whether it is to be enslaved by totalitarianism. The dignity of man is now on trial throughout the world and the fate of civilization may well depend upon the outcome. It will survive only if the ideal of man's inalienable rights is acknowledged, respected and strengthened."

RECREATION

AMERICAN BOWLING CONGRESS

The Governor's Commission on Human Rights of Wisconsin has authorized Dr. R. C. Williams of Whitewater State Teachers' College, newly elected Chairman, to appoint a committee to work with Mayor Zeidler's Commission on Human Relations and concern itself with discrimination within the American Bowling Congress which limits its membership to Caucasians. Both groups have asked the Milwaukee Auditorium to withdraw its invitation for the ABC to hold its 1952 tournament at Arena. The Auditorium board voted not to do so.

The Chairman of Mayor Ziegler's Commission, George R. Brawley of Milwaukee stated that his group was planning an anti-discrimination education program to reach Milwaukee bowlers. "I do not feel at this time it would be the proper procedure to force the ABC into anything," he stated.

In Seattle, the *Post-Intelligencer* declared that organized bowlers' prohibition against non-Caucasians has become a heated issue. The newspaper reported that a team of Japanese Americans in the Boeing Bowling Association, a league composed of employes at the Boeing Aircraft Plant, was notified by the ABC that it was ineligible for tournament play. Asked if the Boeing workers might fight the discrimination on some of their fellow employes, President Jack Bunsing of the Boeing League stated that it was likely. The matter was to be decided at a conference between the League board of directors and Bob Nelson, the ABC representative in the Seattle area.

In New Jersey, Joseph L. Bustard, Assistant State Commissioner of Education, had stated officially a few months ago, "As long as the ABC continues its policy of exclusion of Negroes from participation in its tournaments, the State Division Against Discrimination in New Jersey will resist every effort on the part of the organization to hold tournaments in this state." (See July 1949 issue REPORT.)

In Illinois State's Attorney John S. Boyle charged the ABC with inciting racial discrimination because it limits its membership to white males. Boyle's suit in the Superior Court asks that the ABC's Illinois charter be revoked or that it be fined up to $25,000 and directed to amend its by-laws. It was reported that he acted upon receipt of a letter from the CIO, which asserted the labor group would instigate a suit if Illinois officials did not.

Boyle's suit asks that "the ABC be directed to answer by what right it violates the state constitution and the Civil Rights Section of the state criminal code."

BRIDGE LEAGUE BARS NEGROES

The 28,000 members of the American Contract Bridge League have voted against admission of Negro members, it was announced by Russell J. Baldwin, Chairman of the membership committee and business manager for the league. He also stated that the findings would go to the board of directors for official action at the League's annual meeting to be held in December in Philadelphia. They are reported already in test votes to have balloted heavily for the exclusion of Negroes.

The bridge players of New York, New Jersey and the New England states voted heavily for admission and Wisconsin, Minnesota and State of Washington by smaller margins. The vote on admission of Negroes to membership showed 41.5% in favor, to 58.5% against with the breakdown as follows:

	Yes	*No*
Northeast	34.0%	36.0%
South	18.4	81.6
Mid-west	36.7	63.3
Far West	41.8	58.2
Total	41.5%	58.5%

The President of the League, Dr. Louis Mark of Columbus, Ohio stated: "The American Contract Bridge League is not a political organization but is primarily social in character. Social customs are based on public opinion and we do not seek either to perpetuate or to destroy them. Our members are mostly business and professional men and their wives, probably above the national average in education and intelligence and not limited to any age or income group. There is no reason to believe they would vote differently than any similar cross section of American life. The result is an expression of American public opinion.

"Our directors may decide that Negro participation is acceptable in some states and not in others. That would appear to follow the present national pattern."

Victor R. Daly, President of the Negro Bridge Association stated, "Analysis of the vote will show that without the lopsided vote of certain sectional units the country as a whole was overwhelmingly in favor of the elimination of racial discrimination. In bringing this issue to a vote liberal forces within the organization have scored a significant victory, for they have brought that opposition out into the open for all the world to see.

"The majority that was mustered was surprisingly small and insignificant. I do not believe that the liberal element within the league will permit such a small majority to compel the league to stand with the few remaining forces of intolerance that still retard the march of American democracy.

CONFERENCE URGES TOP PRIORITY FOR FEPC

AMERICAN COUNCIL Report ON RACE RELATIONS

NOVEMBER, 1949 VOL. 4, NO. 11

LITIGATION

SEGREGATION CASES BEFORE SUPREME COURT

Three cases now before the Supreme Court require that the highest tribunal of the land rule on the legality of segregation in education and transportation. Early in November, the Court announced its decision to rule on two segregation suits involving the University of Oklahoma and the University of Texas Law School. The former case involves a decision by a special three-judge federal court in Oklahoma City rejecting the plea that G. W. McLaurin be allowed to attend classes at the University of Oklahoma on a completely nonsegregated basis. Mr. McLaurin is challenging the rule that excludes him from the classroom where white students sit, and thus forces him to sit in an anteroom and take part in class work through an open door. In the latter case, Herman Marion Sweatt, who has unsuccessfully sought admission to the University of Texas Law School in Austin, is questioning the validity of the Texas Constitution and of Texas statutes which require segregation of races in public education.

In the third case, the United States Government, with Solicitor General Philip B. Perlman of the Department of Justice defending its position, is asking the Supreme Court to declare segregation of Negroes on the nation's railroads illegal. The suit is brought by Elmer W. Henderson, at present Director of the American Council on Human Rights, who was denied dining car service on the Southern Railway in May, 1942. Specifically, the Government asks that the high court reverse a decision of the U. S. District Court for Maryland, which sustained a ruling of the Interstate Commerce Commission sanctioning dining car segregation on railroad lines operating below Washington. In its brief, the Government challenges the "separate but equal" doctrine upon which a number of similar cases before the Supreme Court have been decided. Solicitor General Perlman declares that "both the Constitution and the Interstate Commerce Act give all persons traveling on interstate carriers the right to equal treatment, without being subject to governmentally-enforced discriminations based on race or color." He goes on to state that "the decisive factor here is that the segregation regulations bear the approval of an agency of the Government," and are thus more than legally deplorable, since "segregation as enforced by the regulations imports the inferiority of the Negro race."

If the "separate but equal" doctrine is invalidated by the decisions of the Court in these significant cases, patterns of segregation in many areas may be weakened.

PUBLIC POLICY

THE PRESIDENT SPEAKS

In an address presented before a meeting held recently in Washington of the National Conference of Christians and Jews, President Truman made the following statements: "If we look at ourselves in the true spirit of brotherhood, we must acknowledge that in the United States there are instances of discrimination and injustice because of difference in color, religion or national origin.

"But we are working diligently to overcome these violations of the fundamental faith which holds us together. It is encouraging to see that Americans all over the country are growing more and more aware of the importance of this problem.

"I have asked that our Federal Government take an active part in this effort to achieve greater justice. I have called for legislation to protect the rights of all its citizens and to assure their equal participation in national life, and to reduce discrimination based upon prejudice. In view of the fundamental faith of this country and the clear language of our Constitution, I do not see how we can do otherwise than adopt such legislation. . . ."

300 delegates representing 154 agencies and 14 universities in 25 states, the District of Columbia, and Canada met in Chicago for the Third National Conference on Intergroup Relations, November 3 - 5. Of the agencies represented 108 are engaged in intergroup relations, and include 10 federal agencies, 19 national agencies, 5 regional agencies, 13 state official agencies, 2 state private agencies, 16 local official agencies, and 43 local private agencies.

Among the recommendations presented to the Board of Directors of the National Association of Intergroup Relations Officials by the delegates present at the various round table sessions were the following: that the national fair employment practices bill be given top priority in the next session of Congress, that Federal Aid to education without any racial discrimination be supported, that agencies in the field develop action programs to help their respective communities achieve non-segregated public housing, and that there be developed a coordinated and integrated approach to the problem of minority group employment, utilizing the various facilities of all intergroup relations agencies—local, state, and national.

In a speech delivered at the closing session, Edwin R. Embree, Consultant to the Greenwood Foundation and former President of the Julius Rosenwald Fund declared: "Efforts in human relations are moving from the problems of special groups to concern for general democracy —the rights and opportunities of all the people and their free and effective participation in a common society. The task for the second half of the 20th Century is to work out the checks and balances that will protect the basic rights and provide the fullest opportunities for every individual everywhere, yet preserve the rights of various groups of men to develop their spiritual and material cultures in ways that will satisfy them and will ultimately enrich the world."

At the Conference, new officers and Board members were elected by NAIRO. Frank Baldau, Executive Director of the Cleveland Community Relations Board, was elected President. The new Vice Presidents are: Maurice Fagan, Executive Director of the Philadelphia Jewish Community Relations Council, and Edward Howden, Executive Director of the Council for Civic Unity of San Francisco, Helen L. Peterson, Mayor's Committee on Human Relations (Denver, Colorado). George Mitchell, Southern Regional Council, and Edward Howden were re-elected as members of the Board of Directors, and the following were elected for three-year terms: Joseph Coles, City of Detroit May-

or's Interracial Committee; Thomasina W. Norford, United States Employment Service; and Frank Loescher, Philadelphia Fair Employment Practices Commission.

The following continue to serve on the Board of Directors:
Mrs. Ruth Abernethy, St. Paul Council of Human Relations, Inc., St. Paul, Minnesota; Marshall Bragdon, Mayor's Friendly Relations Committee, Cincinnati, Ohio; Louis E. Hosch, American Council on Race Relations, Chicago, Illinois; Harold A. Lett, New Jersey Department of Education, Newark, New Jersey; Mike Masaoka, Japanese American Citizens League, Washington, D. C.; Mrs. Irene B. Miller, Seattle Civic Unity Committee, Seattle, Washington; George Schermer, City of Detroit Mayor's Interracial Committee, Detroit, Michigan; Frank T. Simpson, State of Connecticut Inter-Racial Commission, Hartford, Connecticut; John B. Sullivan, State Commission Against Discrimination, New York City; George L-P Weaver, National CIO Committee to Abolish Discrimination, Washington, D. C.; Thomas H. Wright, Commission on Human Relations, Chicago, Illinois.

The American Council on Race Relations will continue to serve as the Secretariat of NAIRO and Louis E. Hosch as the Executive Secretary.

RELIGION

HOME MISSIONS COUNCIL OF NORTH AMERICA

The Home Missions Council of North America is planning to sponsor a nationwide conference in January in Columbus, Ohio, to cover every phase of the domestic missionary work of the Protestant churches of the United States. This interdenominational planning conference of Protestant home mission leaders will plan a co-ordinated ten-year program to handle discrimination and prejudice issues based on religion and race.

Dr. Truman B. Douglass of New York, President of The Home Missions Council, predicts that much attention will center on the question of Christian-Jewish relations since "home missions need to develop a truly Christian answer to the questions raised by anti-Semitism in the church and the implications to its program of evangelism."

The leaders were also concerned with methods designed to evaluate their programs for American Indians who, according to Dr. Douglass, are treated by "an outdated system of paternalism and racial inequality."

Dr. Reinhold Niebuhr and Dr. Ralph B. Sockman are scheduled to address this special Home Missions Congress.

Public Policy (Cont'd from P. 1)

DISCRIMINATION IN THE PUBLIC SCHOOLS

In November, the United States District Court of Appeals for the Fourth Circuit ruled that racial discrimination exists in the high schools of Pulaski County, Virginia. The Court of Appeals recognized the fact that segregation is invalid where Negroes "are discriminated against and substantially equal educational facilities are denied to them by virtue of their race and color." Citing the fact that Negro children must travel out of Pulaski County to attend school, that they are not offered the same courses of study, auditoriums or gymnasiums, or opportunities for play and recreation as those offered white children, the Court stated: "Where, as here, a right guaranteed by the Fourteenth Amendment has been breached, we cannot concern ourselves with questions of either more expediency or the difficulties which school authorities may have in securing that constitutional right. Whenever the forbidden racial discrimination rears its head, a solemn duty to strike it down is imposed upon the Courts."

In another suit brought against the Waxahachie (Texas) school system by Negro parents who asked for a permanent injunction against "separate and unequal" schools, Federal Judge William H. Atwell has given the defendants thirty days in which to provide equal opportunities for Negro students to study courses now offered white students.

In South Carolina, NAACP attorneys have filed a petition before the School Board of Clarendon County, requesting the Board to "cease discriminating against colored children of public school age." After pointing out many ways in which the facilities now provided are inadequate, the petition asks for educational advantages and facilities equal in all respects to those which are provided for white persons.

MINNESOTA NATIONAL GUARD

An executive order permitting Negroes to enlist in the Minnesota National Guard has been signed by Governor Luther Youngdahl.

The order decreed: "There shall be equality of opportunity and treatment for all, including Negro citizens who shall serve in the military and naval forces of the state without segregation into separate units." Minnesota thus becomes the ninth state to abolish segregation in the National Guard. The others are New Jersey, Wisconsin, Connecticut, New York, California, Illinois, Pennsylvania and Massachusetts.

COMMUNITY ORGANIZATION

TOLEDO

The Board of Community Relations of Toledo, Ohio has issued its annual report for the year 1949 entitled, "Toward Better Community Understanding," which is a report of "a community organizing itself to meet the problems of living together." This 58-page document gives a detailed accounting of what has been accomplished in breaking down racial and religious prejudices. The work done by the Board during the last 18 months gives those accomplishments — there are 27 in all — which are specific steps toward better opportunities in education, in employment, in health, and recreation, and in housing toward equality in legislation and law enforcement and in other related areas. Listed among the accomplishments are the following:

1. Five nurse training schools now accept Negro trainees.
2. Practical nurse training programs are open to all applicants.
3. Toledo, Ohio Bell Telephone Company now employs Negro operators.
4. Red Cab Company now hires Negro drivers.
5. Toledo hotels will make accommodations available to all persons.
6. Segregated dressmaking classes were eliminated in the commercial school program.
7. The University of Toledo declined to recognize a social-professional fraternity that excluded certain groups from membership.
8. The National Association for the Advancement of Colored People participated fully in the Lucas County March of Dimes campaign.
9. The City Civil Service Commission modified application forms to eliminate questions of race and creed.
10. Negro veterans were accepted in the Federal housing project without incident.
11. City ordinances were passed prohibiting discrimination by operators of any municipal franchise.
12. Split bus service involving segregation of Negroes was eliminated.
13. The Board of Education is cooperating to eliminate discrimination from school programs.
14. An interracial program was initiated at East Toledo Neighborhood House.

Mayor Michael V. DiSalle commenting on the Report presented by the Executive Director, Felix Gentile, of the Board of Community Relations stated: "This shows what a comunity can do to reduce and

eventually to eliminate discrimination when it gets down to business. It represents fine progress toward making democracy work here but there is still work to be done." The Board of Community Relations was created by the City Council in 1946 and is composed of a citizen board of 25 members representing all facets of community life and an Executive Director and two office assistants.

OPEN LETTER TO CHICAGO'S MAYOR

Below is an open letter to the Honorable Mayor Martin H. Kennelly which appeared as a full page ad in the Chicago Sun Times on December 1, 1949.

Dear Mr Mayor:

We had five days of street rioting on South Peoria Street this month.

You, Mr. Mayor, have failed to take any forthright public position.

The situation is grave.

Peoria Street and Fernwood narrowly avoided growing into full-fledged race riots.

As long as anyone thinks violence is a useful tool in a racial or religious situation, every Chicagoan faces a real and personal danger.

Mr. Mayor, we implore you to take three straightforward actions:

1. State explicitly, firmly and publicly that the City will not countenance any interference with the right of any person regardless of his race, color or creed, to live or visit anywhere in Chicago, and that the police have been directed to disperse, arrest and take other vigorous police action against individuals or groups seeking to interfere with this right.
2. Create a Race Relations Detail in the police department of 200 men specially trained to recognize and deal with racial tensions situations. This Detail should be called in immediately to take over in tension situations, but its members may have other assignments from day to day. This measure is necessary to avoid the neighborhood ties of the local police district and to prevent repetition of recent police abuses.
3. Direct the police department to investigate the activities of those local 'improvement' associations which whip up racist prejudices so that they may be successfully prosecuted for incitement to riot."

Sincerely yours,
Rabbi Morton M. Berman, Pres.
American Jewish Congress
127 N. Dearborn St., Chicago 2, Ill.

(*Editor's Note*: A statement to preserve law and order was issued by Mayor Kennelly on Dec. 1, 1949.)

HOUSING

NEW POLICY OF FHA

The Truman Administration announced that financing by the Federal Housing Administration would be refused for any new houses or apartments where occupancy or use was restricted on the basis of race, creed or color.

Solicitor General Perlman, speaking at a meeting of the New York State Committee on Discrimination in Housing, stated: "President Truman has been working on this matter for some time, and is most happy over the result of his efforts." He said he spoke also for the Attorney General J. Howard McGrath, Home Finance Administrator Raymond M. Foley, and Commissioner Franklin D. Richards of the Federal Housing Administration.

It was explained that the regulations had been devised to bring FHA mortgage operations entirely into line with Supreme Court rulings in racial covenant cases. (See May, 1948 issue REPORT). FHA officials stated that the new regulations would not affect any present FHA financing, but would concern any to be used after a date yet to be specified.

Under the new policy, no property will be eligible for FHA mortgage insurance if, after the date to be specified, and before the mortgage is recorded, there has been put into effect a "covenant racially restricting the use of occupancy of the property."

FHA officers also stated that the change would affect individual financing of a single unit home if covered by a racial covenant; and, also, a builder erecting houses outside of covenanted territory, if it were known that he proposed to sell or rent on a restricted racial basis.

EDUCATION

CONFERENCE ON DISCRIMINATION IN COLLEGE ADMISSIONS

Over 100 delegates representing colleges and universities, public school systems, and government departments of education from twenty-four states and the District of Columbia met in Chicago on November 3 and 4 at a Conference on Discrimination in College Admissions sponsored by the American Council on Education and the Anti-Defamation League of B'nai B'rith.

Pointing out that the conference was the first national attempt by college and university officials themselves to "examine and eliminate in time the most anti-democratic aspect of higher education", Dr. A. C. Ivy, Vice-President of the University of Illinois, declared, in the keynote speech, that the leaders of the conference were agreed that colleges do "discriminate on grounds other than ability and character" and that such "discrimination was dangerous and unjustifiable."

Declaring that "the quota system cannot be justified on any grounds compatible with democratic principles," the educators, declared themselves in favor of the following three-point program.

"1. Development of a program by the colleges themselves that would eliminate such discrimination.
2. Enactment of legislative action, such as fair educational practices laws, wherever necessary.
3. Government financial aid to improve the quantity and quality of higher educational facilities so as to eliminate economic barriers facing many who seek college and professional school education."

Dr. George N. Rosenlof, Registrar of the University of Nebraska, reporting for the Committee on Admissions Procedures in Undergraduate Institutions, called for a long range educational program "to eliminate the use of discriminatory criteria" in the selection of students. The conference adopted the recommendation that every school publish "a clear and concrete statement of the procedures it follows in admitting students."

A report of the Committee on Professional Schools, presented by Dr. Carlyle Jacobsen, Dean of the Division of Health Sciences of the University of Iowa, urged further research into the barriers of a "social, economic, or educational character" which discouraged college graduates from seeking professional training. The conference adopted a resolution presented by Dr. Jacobsen, branding the quota system as "undesirable and undemocratic." and declaring "separate but equal schools for Negro and white as both uneconomic and undemocratic." The resolution urged that "beginning now these unjustifiable practices be discontinued and that students be selected for admission to all graduate and professional schools throughout the USA in terms of the common good and evaluation of the applicant as an individual."

Dr. Jacobsen's report also urged elimination of discriminatory questions from application blanks for professional schools, clear statement of admissions criteria, and expressed disapproval against over-emphasis of any single criterion for admissions such as assumed future placement possibilities.

Dr. Karl W. Bigelow of Teachers College, Columbia University, deplored the fact that "certain variables combine in certain regions of the country to affect particular groups of young Americans to special disadvantage." More group study and action were called for to "accelerate the progress being made in various re-

gions leading to equality of educational opportunity."

A system of grants-in-aid for tuition and subsistence to students who have both need and ability was recommended. It was suggested that the federal government should take the main responsibility for financing grants-in-aid. The report, presented by Dr. Seymour Harris, Professor of Economics at Harvard University, declared that the grants-in-aid allotted to a student should equal the difference between the full cost of higher education and the private resources available to meet those costs.

Presenting data gathered by the American Council on Education and other researchers on the nature and prevalence of discrimination in college admission, Dr. Floyd W. Reeves, Professor of Administration at the University of Chicago, declared that all students concerned with the problems agree in their findings of a definite pattern of discrimination even though they varied in their investigatory methods.

He cited the chief factors restricting equal opportunity for higher education:

"For many youths, restricted curriculums and inadequate educational facilities are serious barriers to education," likewise, large numbers of youth face economic and geographic barriers so serious that they cannot be overcome under present conditions.

"The desire for higher education is greater among Jewish youth than among youth of any other religious category. Many institutions, although by no means all, employ techniques in the admission of students that lend themselves to discriminatory practices, and furthermore, that appear to serve no purpose other than that of discriminating against youth of certain minority groups."

MASS COMMUNICATION

NEW YORK

Edward W. Edwards, Chairman of the New York State Commission Against Discrimination announced that a motion picture "An Equal Chance" recently produced for the Commission by the March of Time was now being shown throughout the state. The film depicts the commission's methods in enforcing the law against discrimination.

He indicated that the film might eventually be seen in more than 1000 theaters in the state.

He stated that distribution of 16-mm prints to schools, churches and civic organizations is planned after the completion of 35-mm run.

RECREATION

BOEING BOWLING ASSOCIATION DEFIES ABC

The Boeing Bowling Association in Seattle, Washington, voted 582 to 26 to admit Japanese American employees into full membership in the league in defiance of the American Bowling Congress' rule against "non-white males," it was disclosed by J. J. Bunsey, league President.

The five Japanese Americans were members of the Nisei Clippers' team in the Boeing Company league. A ruling from the ABC headquarters barring them from league play created much discussion which led to the recent balloting.

RACE RELATIONS IN A DEMOCRACY: By Ina Corinne Brown. An excellent statement of the history and ramifications of Negro-white relations in the United States. By pointing out the different treatment accorded Negroes at various times and in various countries, Dr. Brown emphasises the role of culture, history, and social and economic structure in "defining" the nature of race relations. This 194-page book is understanding in its treatment both of the North and South, and of the general problem of race relations and what can be done. Number 5 in the Bureau for Intercultural Education series, "Problems of Race and Culture in American Education". Published by Harper & Bros., 1949, at $3.00 per copy.

* * *

THE NEGRO'S MORALE: GROUP IDENTIFICATION AND PROTEST: By Arnold M. Rose. Professor Rose here presents a semi-popular description of the various factors which point up the lack or extent of the sense of group feeling, and its intensity. The book also deals with the relations of American Negroes with other minority groups in the United States and other parts of the world. Published by the University of Minnesota Press, 1949, at $2.50 per copy.

* * *

MISSOURI'S TWO STATE UNIVERSITIES: UNIVERSITY OF MISSOURI-LINCOLN UNIVERSITY: A COMPARATIVE STUDY OF EDUCATIONAL OFFERINGS by Elsa Wade Williamson. Compares the two on the basis of such factors as national recognition, degrees granted, curriculum and equipment. A 12-page pamphlet published by and available from The Human Rights Committee, Missouri Association for Social Welfare, 129½ East High Street, Jefferson City, Missouri, at 15c per copy; 10c each in lots of 100 or more.

DISCRIMINATION IN EMPLOYMENT

A SELECTED BIBLIOGRAPHY

BIBLIOGRAPHIC SERIES

NO. 2

1949

AMERICAN COUNCIL ON RACE RELATIONS

4901 ELLIS AVENUE CHICAGO 15, ILLINOIS

Preface

The American Council on Race Relations has available a series of selected current bibliographies covering the several important areas of major interest in the field of intercultural relations. They are:

1. Minorities and Intergroup Relations
   An introduction to the series listing materials which present authentic scientific backgrounds for the study of intercultural relations.

2. Discrimination in Employment
   Employment problems of minorities, their integration into the economic structure, including materials on industry, unions, business, government and FEPC legislation.

3. Legislation Affecting Minority Groups
   Legislation at the federal, state and local levels, including court decisions.

4. Discrimination in Housing
   Segregation in housing and racial restrictive covenants.

5. Discrimination in Education
   Materials on segregated and unsegregated school systems and quota limitations in higher education.

6. Community Organization for Intergroup Relations
   Techniques for organizing the community and directories of agencies working in the field of intergroup relations.

These bibliographies are revised regularly and are available at 10¢ each (with quantity rates upon request) from

AMERICAN COUNCIL ON RACE RELATIONS Report

RECEIVED APR 6 1950 Southern Regional Council

MARCH, 1950 VOL. 5, NO. 3

EMPLOYMENT PROBLEMS AND PROPOSED SOLUTIONS

ECONOMIC DISCRIMINATION The Bureau of the Census reported unemployment at a postwar peak during February, when 4.7 million persons were unemployed, about 1 million persons with full-time jobs were working part time, and an additional 1 million persons with regular part-time jobs both preferred and could have accepted full-time work. This increasingly serious unemployment affected non-white workers more critically than white persons. While 7.4 per cent of the white males in the labor force were without work, 13.1 per cent of non-white males were jobless. 6.5 per cent of white females in the labor force were unemployed, as compared with 11.1 per cent of non-white females.

Other figures recently released by the Census Bureau reveal a startling disparity between the 1948 total money incomes of whites and non-whites. Although 30.4 per cent of white families and individuals had an income of less than $2,000 during the year, 62.5 per cent of non-white families and individuals were in this category. 18.8 per cent of whites, but only 4.4 per cent of non-whites, had a total money income exceeding $5,000.

Such differences in the ability to earn a livelihood and support a family arise largely from the widespread practice of ethnic discrimination, which is felt by minority group members in their efforts to secure training, gain entrance in their chosen occupations, and advance in accordance with their merits. During periods of increasing unemployment like the present, racial, religious, and national discrimination manifests itself in situations like that described by Dr. Ralph A. Reynolds, president of the San Francisco Council for Civic Unity: "Currently 90 per cent of all San Francisco job orders received in the State Department of Employment discriminate against Negroes, and 75 per cent of them discriminate against Orientals."

PUBLIC REGULATION A solution most commonly advocated is fair employment practices legislation, which, well-administered in an economy of "full" employment, should lead to the establishment of equitable patterns. Although Congress has failed thus far to enact fair employment practices legislation safeguarding the rights of minority workers throughout the nation, President Truman created in 1948 a federal Fair Employment Board empowered to prevent discrimination in the Civil Service. Since 1943, all contracting agencies of the federal government have been required to include in all contracts a provision requiring the contractor not to discriminate against any employee or applicant because of race, creed, color, or national origin.

Ten states—Connecticut, Indiana, Massachusetts, New Jersey, New Mexico, New York, Oregon, Rhode Island, Washington, and Wisconsin—have established state fair employment practice commissions. Although their powers and accomplishments differ widely, the very existence of these commissions is testimony to the broad public interest in a vital social problem. In addition, at least thirty-four states have enacted legislation prohibiting discrimination in special areas, such as civil service, defense and war contracts, labor unions, public works, and the teaching profession. Several states, including California, Indiana, Louisiana, and Pennsylvania, have taken steps to improve their public employment services by clarifying non-discriminatory placement policies, appointing fair employment specialists, or establishing citizens' committees to advise on problems of minority discrimination.

Municipalities, too, have taken official action against discrimination. Philadelphia and Minneapolis have functioning FEP commissions, and Chicago, Milwaukee, Cincinnati, Phoenix,, and Richmond, California, have enacted ordinances prohibiting employment discrimination.

CITIZENS' ACTION Recently the American Council on Race Relations asked the 120 national private intergroup relations agencies in the United States to describe their activities in the area of employment and to list services which are available for utilization by state and local groups. Forty-three of these agencies replied that at present they neither carry on activities nor offer services to aid in the expansion of employment opportunities for minorities.

A few national agencies, however, provide services which are described in detail in an ACRR memorandum, "National Intergroup Agency Services in the Area of Employment." These include the development of legal and legislative activities to broaden employment opportunity for minorities; publication and distribution of popular pamphlet, film, and radio materials; handling of specific complaints of discrimination; development of research on employment problems; provision of counseling services for local community agencies; encouragement of non-discriminatory job training, vocational guidance, and placement facilities; and the development of workers' education program in the area of human relations.

A similar survey of local intergroup relations agency program in the area of employment revealed that, whether for lack of personnel, resources, or interest, the large majority of local agencies are failing to take definite, concrete steps to encourage fair employment practices in their own communities. (See ACRR memoradum, "The Work of Local Intergroup Agencies to Establish Fair Employment Practices.) Of the 174 agencies replying to our questionnaire, 127 report no program emphasis on employment problems. The 47 organizations which describe on-going activities are concentrated to a marked extent in highly urbanized areas (37 are in cities of more than 100,000 population) and are located in the main in three regions: the Pacific, East North Central, and Middle Atlantic.

It is to be hoped that the successes of the positively responding agencies, hard-won though they are, will point the way for development of rational inter-agency planning on all levels to achieve greater employment security for minorities.

CIVIL RIGHTS LEGISLATION IN CONGRESS

FEPC After a fifteen-hour session on February 22 and 23, the House of Representatives finally approved an emasculated "voluntary" FEPC bill (HR 4453). The measure passed was a weak substitute for the original bill approved by the House Education and Labor Committee. It was introduced by Samuel K. McConnell, Jr., (R., Pa.), and amended several times during the session.

The measure authorizes the creation of a five-member Fair Employment Practice Commission empowered to "bring about the removal of discrimination in regard to hire and tenure, terms or conditions of employment, or union membership, because of race, creed, or color" by methods of conference, conciliation, and persuasion. Interference with members of the Commission in the performance of their duties is punishable by a fine of $500. However, any person who is a member of an organization cited by the Attorney General or by the FBI as a Communist or Communist-front organization is excluded from the protection of the Act. In addition, it is provided "that the absence of individuals of a particular race, religion, color, national origin, or ancestry in the employ of any person shall not be evidence of discrimination against individuals of such race, religion, color, national origin, or ancestry."

The McConnell amendment was adopted by a vote of 221-178. 117 Democrats and 104 Republicans voted for the unsatisfactory measure, whereas 128 Democrats, 49 Republicans, and 1 American Laborite opposed its adoption.

With the passage of the McConnell bill by the House, there is a probability that FEPC may reach the floor of the Senate within the next few weeks. Although the Administration's McGrath bill (S. 1728) will be under consideration at that time, it is likely that an attempt will be made to substitute a weak bill such as that already introduced by Senator Taft (R. Ohio).

Both the National Emergency Civil Rights Mobilization and the National Council for a Permanent Fair Employment Practice Committee are emphasizing the necessity for civil rights advocates to urge their Senators to support S. 1728 and to oppose crippling amendments. Since the motion to take up the bill will undoubtedly meet a filibuster, these organizations are also advising immediate action to secure cloture, for which 64 votes are necessary.

IN THE STATES

Special sessions of the legislature are meeting in Arizona, California, Connecticut, and Michigan. The legislatures of Kentucky, Massachusetts, Mississippi, New Jersey, New York, Rhode Island, South Carolina, and Virginia are in regular session. Few civil rights measures of major significance have received consideration or made substantial progress.

Civil Rights The Boothe bill to create a Virginia Commission on Race Relations (HB 280) was defeated in committee by a vote of 10 to 6. This measure, which had considerable popular support, would have empowered the Commission to consider economic, educational, and other problems affecting race relations in Virginia.

Education In New York, the Flegenheimer bill (AI 556) which would deny tax exemption to any educational institution accepting bequests requiring racial, color, or religious discrimination, has been referred to the Committee on Taxation.

Employment The measure which would change the name of the Massachusetts FEPC to "State Commission Against Discrimination" and enlarge its competency to include administration of public accommodations laws (HB 1841) has not yet been scheduled for public hearing, but action is expected about the first of April. A Massachusetts resolution memorializing Congress to pass a federal fair employment practices act (HR 1152) is pending. In New York, the Fino-Drohan bill (SI 1101, AI 1395), which passed the Senate on February 28, forbids the granting of a license to an employment agency whose name expresses a limitation as to race, creed, color, or national origin.

Housing A bill to prohibit segregation in public housing projects and slum clearance areas (HB 1843) has been referred to the Committee on State Administration of the Massachusetts House, but has not been acted upon. Another Massachusetts measure to prevent color or race discrimination in housing accommodations (HB 850) met defeat in the House during January. In New Jersey, the Joint Council for Civil Rights has proposed amendments to eight state housing laws. Two of the measures (SB 178 and 185) amending housing laws to prohibit discrimination in public or quasi-public housing were expected to come up for a vote in the Senate during March. In New York, the State Committee on Discrimination in Housing is sponsoring the Austin-Wicks bill (SI 2068, AI 2810), which forbids discrimination and segregation in all publicly assisted housing. The bill, which has bi-partisan support, is still in committee.

Protection of the Person The South Carolina anti-mask bill (HB 1993) which passed the House by unanimous voice vote has not yet been acted upon by the Senate. Both branches of the Massachusetts legislature have adopted a resolution memorializing Congress to pass anti-lynching legislation (HR 1151).

Public Accommodations In Virginia, the Boothe bill to eliminate segregation on public carriers (HB 281) has been defeated in committee by a 9-7 vote.

Right of Franchise The Georgia measure to postpone to April 1952 the effective date of the discriminatory Voters' Re-registration Law (HB 820, SB 168) passed both houses of the legislature and was signed by Governor Talmadge.

TENSION IN DEROIT

Recent reports from Detroit indicate an increase in racial tensions stemming from conditions also found in many other cities throughout the country. In a statement released on March 12, George Schermer, Director of the Detroit Mayor's Interracial Committee, declared that for the first time since the major race riot in 1943 rising tensions, if unchecked, may result in a crisis period. Mr. Schermer pointed out a "mounting organized resistance" from neighborhood property improvement associations to the movement of Negroes into new areas, and scored a "strong tendency in our City government to act in relationship to group pressure rather than in terms of over-all good of the community or in terms of certain basic principles of justice."

In discussing the situation, which has come to public attention during Common Council hearings on the interracial Schoolcraft Gardens Housing Project. Schermer listed a number of factors which have contributed to the development of tension. (1) The Negro population of Detroit has more than doubled during the past decade. (2) During and since the war Negro buying power has been markedly increased, with the result that Negroes are able to buy housing out of the crowded segregated areas to which they were formerly restricted. (3) A considerable number of Negroes are seeking newer, better housing in outlying sections. where biased neighborhood property improvement associations are strong. (4) In resistance to the movement of Negroes. the associations are federating and acting in concerted fashion to preserve the present character of their neighborhoods. (5) The City administration is unduly influenced by these conservative pressure groups, and is failing to consider the general welfare of the community.

Field Notes

Arizona . . . On March 5 the Arizona Legislative League was established at a meeting attended by more than 500 delegates from labor unions, Townsend Clubs, minority group organizations, and others. Among the initiative measures endorsed by the delegates was a school desegregation measure presented by Phoenix NAACP, which would prohibit segregation and provide for the integration of Negro teachers into the total school system. The League also pledged full support of the Indians in their fight for full and equal rights under the law and called upon the state legislature to pass a state fair employment practices law.

California . . . The California State Employment Service, with which the Employment Committee of the Los Angeles County Conference on Community Relations has been negotiating for several months, has inaugurated a new policy to eliminate discriminatory job orders. The State Director of Employment has issued a directive affirming and clarifying a nondiscriminatory placement policy, full-time Fair Employment Specialists are to be appointed in the Los Angeles and San Francisco Area offices, and citizens advisory committees are being established to work with the specialists.

Connecticut . . . After a three-week public hearing, the first held by the Connecticut Inter-racial Commission, charges of entrapment, collusion and "improper" management were brought against the Commission on March 4. Filing the brief was John R. Thim, Speaker of the State House of Representatives and counsel for the dairy company whose policies were held to be in violation of the state fair employment practices law.

Georgia . . . Georgia officials of the NAACP have announced that at least nineteen school systems in Georgia have received petitions signed by Negro parents who charge discrimination in educational facilities. The presentation of these petitions is a prerequisite to legal action. It is expected that the educational situation in the state, where the recent General Assembly failed to provide adequate school funds, will be a major issue in this year's Democratic primary, in which Governor Talmadge is expected to seek reelection.

Illinois . . . In order to get the 1951 FEPC campaign underway early, the Continuations Committee of the Illinois State FEP Committee has scheduled a conference in Springfield for March 25. Governor Stevenson has been invited to address the body.

. . . Residents of the changing University of Chicago neighborhood formed the Hyde Park-Kenwood Community Conference in February. The 150 members adopted a six-point program to improve intergroup relations: (1) Maintenance of basic human rights for all; (2) Use of education to dispel fear; (3) Maintenance of community standards; (4) Adoption of a constructive youth program; (5) Encouragement of community integration; and (6) Cooperation with existing agencies in the field of human relations.

Michigan . . . In February, Governor G. Mennen Williams ordered the abolition of racial segregation in the Michigan National Guard. A similar policy has already been established in California, Connecticut, Illinois, Massachusetts, Minnesota, New Jersey, New York, Oregon, Pennsylvania, and Wisconsin.

New York . . . As a result of charges filed by the American Jewish Congress, the New York State Commission Against Discrimination is investigating the practices of about a hundred New York City private employment agencies. The investigation so far has revealed substantial basis for the complaints filed. In addition, a number of employment agencies are refusing to display a poster setting forth the provisions of the state's anti-discrimination law. Edward W. Edwards, chairman of the commission has stated that the commission is attempting to resolve the difficulties on a voluntary basis but that legal proceedings may be instituted against agencies which refuse to comply with the law.

. . . The American Civil Liberties Union has announced that it will investigate charges that the civil liberties of some individual union members are being violated within their own unions. A preliminary study of undemocratic disciplinary procedures will be initiated soon. At the same time, ACLU announced that it is maintaining pressures to force abandonment of discriminatory racial practices, notably the use of separate hiring halls, in the AFL Seafarers International Union.

. . . On February 20, delegates from seventeen northeastern colleges and universities, meeting at Cornell University in a conference sponsored by Watermargin, an intergroup student house, announced plans for a national organization to promote interracial and interfaith activities. The proposed organization will be formally established at a convention later this spring. It will function as a clearing house for the exchange of ideas and the promotion of cooperative programs. In addition, the new organization will afford the advantages of national affiliation to independent groups and to fraternities which may become dissociated from their parent organizations because of conflicting views.

. . . Dr. Harry J. Carman, chairman of the National Scholarship Service and Fund for Negro Students, has announced the establishment of a Supplementary Scholarship Fund. The new Fund is intended to supplement inadequate scholarships won by Negro students at interracial colleges and universities. The Fund plans in its first year to supplement at least twenty scholarships.

Oregon . . . After two hearings on a civil rights ordinance proposed and supported by the Mayor's Committee on Intergroup Relations and the United Committee for Civil Rights, representing more than fifty civic groups, the Portland City Council enacted the ordinance by unanimous vote. The ordinance, which amends the city's policy code, prohibits discrimination in public and quasi-public places and guarantees full and equal accommodation in hospital and mortuary facilities. The action was taken on the same day that Portland was honored by the National Conference of Christians and Jews as the Brotherhood City for 1949.

Pennsylvania . . . Maurice B. Fagan, executive director of the Philadelphia Jewish Community Relations Council and vice president of the National Association of Intergroup Relations Officials, has been elected to the chairmanship of the newly-formed Association of Jewish Community Relations Workers. Objectives of the Association include the establishment of high standards for those engaged professionally in the Jewish community relations field, provision of opportunities for the exchange of views and experiences, and encouragement of a full understanding of Jewish life and values.

Washington . . . The Seattle Civic Unity Committee is announcing plans for the Third Annual Northwest Institute on Race Relations, which will begin on April 20. Ethel Alpenfels, New York University anthropologist, will be guest speaker. One entire day of the meeting will be planned to enlist the interest of teen-agers.

Wisconsin . . . The Governor's Commission on Human Rights is conducting a leadership training workshop on human relations in Madison, March 24-25. Representatives of farm, labor, and civic groups and delegates from human rights councils will exchange experiences and discuss helpful procedures.

EDUCATION

INDIANA

On March 8, Governor Schricker of Indiana signed a measure establishing "a public policy in public education and abolishing and prohibiting separate schools organized on the basis of race, color or creed, and prohibiting racial or creed segregation, separation or discrimination in public schools, colleges and universities in the state of Indiana and prohibiting discrimination in the transportaton of public school pupils and students." The new law also provides that no school, college or university supported in whole or in part by public funds shall discriminate in any way in hiring, upgrading, tenure or placements of any teacher on the basis of race, creed or color.

To comply with this law which was sponsored by the Indiana Council for Civil and Human Rights and the Indiana State Conference of Branches of the National Association for the Advancement of Colored People, kindergarten and grade schools must complete their program of integration by September 1950; junior high schools, by September, 1951; and high schools, by September, 1954.

HOUSING

CONNECTICUT

In January at a meeting of the Court of Common Council of Hartford, Connecticut the following resolution was passed by unanimous roll call vote:

"RESOLVED, that whereas, it is a fundamental principle of our democracy that all men are created equal, and

WHEREAS, discrimination against any person because of his race, national origin, political or religious opinions or affiliations is a negation of this principle, and

WHEREAS, the City of Hartford, in the case of any public or private housing development within our City, in which it has a financial interest, as described below, has likewise a moral obligation to prevent such discrimination or segregation,

THEREFORE, BE IT RESOLVED, That no applicant for quarters in any such housing development, constructed with the aid of city funds, whether through tax waiver or abatement, land grant or land development, or through any other assistance from the City of Hartford, shall be subject to discrimination or segregation because of his race, national origin, political or religious opinions or affiliations, and

BE IT FURTHER RESOLVED, That a copy of this resolution be forwarded to Governor Chester Bowles with a recommendation that a similar resolution relating to such housing developments in the State of Connecticut be adopted by the General Assembly of the State of Connecticut."

Representative Alsop has introduced House Bill No. 414 "An Act Concerning the Amendment of the Housing Authority Act" (Chapter 33 of 1939 Supplement to the General Statutes). Section 1 of HB 414 which has been referred to the Committee on Judiciary states "For all purposes of this chapter, no person shall because of race, color, religious creed, national origin or ancestry, be subjected to any discrimination. Discrimination shall include segregation and separation."

This bill is identical with Senate Bill No. 296 introduced by Senator Monchum.

ADMINISTRATION

INDIAN AFFAIRS

President Truman nominated Dr. John R. Nichols, President of the New Mexico College of Agriculture and Mechanic Arts, to be Commissioner of Indian Affairs. The position has been vacant almost a year since Commissioner William A. Brophy resigned. Dr. Nichols has been granted a year's leave of absence from the Las Cruces, New Mexico college.

In three states, New Mexico, Washington and Oregon, campaigns to establish fair employment practices acts have been brought to a successful conclusion.

The New Mexico Act, which became law on March 17, establishes a five-member New Mexico Fair Employment Practice Commission. This Act is broader than other similar legislation in including employers of four or more, rather than the more usual classification of employers of six or more. Also new is the provision permitting complaints to be filed by associates or other persons on behalf of the aggrieved employee, as well as by the employee or his attorney. In addition, the Industrial Commission and the Attorney General may file complaints. The provision authorizing judicial enforcement permits the court to consider the matter solely upon the transcript of the Commission or to order a trial de novo.

The New Mexico Committee on Human Relations was largely responsible for passage of the bill.

The Washington Act, like that of New Mexico, is based on the New York Act; it became law on March 19. This Act also establishes a five-member Commission. It is, however, less broad than most of the existing acts in that it applies only to otherwise included employers of eight or more. Of special interest is the section which removes the state from judicial review when one of its political or civil subdivisions is the respondent. In such instance, enforcement of the Commission's orders is vested in the governor. A vigorous campaign was waged on behalf of this bill by the Washington State Committee Against Discrimination.

The Oregon measure, signed by the governor on March 25, differs from the foregoing acts in several details. Instead of an autonomous agency, it provides for administration of the Act by the Bureau of Labor. This Act classifies employers in the familiar six or more category. An advisory committee is provided for which includes among its functions the formulation of plans to end discrimination. Judicial review is provided for by a trial de novo on application of the aggrieved party and enforcement may be by mandamus, injunction, or a suit in equity to compel specific performance. The Oregon Committee for a Fair Employment Practices Act was instrumental in the passage of this measure.

The New Jersey Civil Rights Act (the Freeman Bill) includes Fair Employment Practices in that State. The sections on employment are almost without change those of Chapter 169 of the Laws of 1945.

PUBLIC POLICY

NATIONAL GUARD

Governor Chester Bowles recently signed a measure to eliminate discrimination and segregation in Connecticut military organizatons on account of race, creed or color. The bill was approved in the House of Representatives without a dissenting vote.

Section 1 of the Connecticut law states as follows: "No person, otherwise qualified, seeking admission to the organized militia, the national guard or the naval militia of this state shall be refused admission because of race, color, religious creed, national origin or ancestry. Nor shall any units in the organized militia, the national guard, or the naval militia be established or maintained which shall segregate or separate personnel because of race, color, religious creed, national origin or ancestry. Any rule, regulation or prior statute or section thereof inconsistent with this enactment, is hereby declared null and void."

Major General Frederick G. Reincke, the adjutant general, issued a statement stating that he is ordering all organization commanders to enlist men between the ages of 18 and 45, regardless of race, creed and color. "All commanders are enjoined to cooperate to the fullest extent in carrying out the spirit of this directive with respect to assignments and promotions," he said.

Governor Bowles had insisted on the measure as a major plank in his legislative program. Commenting on the law, he stated, "It should be a warning to them that decent Americans do not subscribe to the principle that it is right to deny the Negro his rightful place in our society." . . . "I am sure that every democratically-minded citizen in Connecticut must feel a real thrill of satisfaction." He praised the General Assembly for passing the bill and stated, "I believe that our action here will serve as an example which states all over the Union will follow."

Thus Connecticut becomes the second state to have legislation against segregation in the National Guard. New Jersey accomplished the same action with a constitutional amendment two years ago.

Article 1, section five of the New Jersey law states: "No person shall be denied the enjoyment of any civil or military right, nor be discriminated against in the exercise of any civil or military right, nor be segregated in the militia or in the public schools, because of religious principles, race, color, ancestry or national origin."

The New York State Senate on March 14, 1949 adopted unanimously the Panken Bill which would eliminate segregation in the New York National Guard dependent on adoption of a similar program in the United States Army, Navy and Air Force. The Senate has before it now the amended Assembly version of the bill which would eliminate segregation from the New York National Guard without any qualifications.

MISSOURI

Findings and pronouncements of wide significance were read into the House Journal of the State of Missouri in the report of the Missouri Equal Rights Committee on March 2. The Committee had been appointed by the Sixty-Fourth General Assembly to determine "what action should be taken to implement the new provision . . . of our Constitution to make our practice of democracy consistent with its pronouncement of equality."

The report states, "It is our conclusion that some minority groups are denied rights by statute, regulation and custom which are granted under the State and Federal Constitution." The report adds further that "we unanimously find that there is a sociological lag between the culture of the community, or its mores, on the subject of discrimination, and its laws."

The Committee presented evidence of violations of equal rights in the areas of elementary and high school education, vocational training, job placement, the National Guard, higher education, recreational facilities, medical facilities, unions, and public accommodations in the State capitol, itself.

The report oulined the baleful influences of such discrimination on the minority groups and on the community and the state.

The Committee of five: Howard L. Cline, Chairman; Wallace M. Pearson; Floyd L. Snyder, Sr.; Bruno Sendlien and Josiah Thomas recommended unanimously that "as the first step in the security of equal rights for all citizens, as guaranteed by the Constitution, that the State must repeal all statutes, regulations, and precedents which require or induce discrimination between citizens in the enjoyment of constitutional rghts."

It further recommended positive measures to correct the inequalities found, including the establishment of a permanent commission to further the work begun by the Committee. The work of the commission would be of permanent nature and would concern itself with:

"(a) Continuing the hearings at various points in the State,

"(b) Measuring the development of the mores, and recommending further legislation consistent with the community program to take up the cultural lag."

In conclusion the Committee stated, "It cannot be reasonably anticipated that the foregoing recommended adjustments will produce an ideal situation over night.

"Generations of mal-adjustment cannot be off-set by fiat. Early readjustments will produce initial excesses and abuses which will be discouraging. But the basic step must be taken some time in the interests of community welfare. With the rapid developments and progress taking place in every quarter of the land, the question as to why we, too, should not move vigorously forward presents itself forcibly and squarely at this time."

HONORS

ACRR BOARD MEMBERS

Dr. Ralph J. Bunche, acting United Nations mediator in the Middle East and a member of the Board of Directors of the American Council on Race Relations has been awarded the 34th Spingarn Medal, the National Association for the Advancement of Colored People announced.

Dr. Bunche has been cited "for his priceless contribution to the settlement of armed conflict in the Middle East and his enduring patience, industry, courage, and selflessness in attaining that goal," as well as for his work as director of the trusteeship of the United Nations.

The medal which is awarded by vote of a committee of nine was established in 1914 by the late J. E. Spingarn, an official of the NAACP, and is given annually to the American Negro deemed to have made "the highest achievement during the preceding year or years in any honorable field of human endeavor." The formal presentation of the award will be made on July 17 at the NAACP 40th annual conference in Los Angeles, California.

Channing H. Tobias, Director of the Phelps-Stokes fund and a member of the American Council on Race Relations Board was the recipient of the award last year.

Mrs. Mary McLeod Bethune, another member of the Board of Directors of the American Council on Race Relations recently received an Honorary Degree of Doctor of Humanities from Rollins College in Winter Park, Florida. This is one of the few times that a southern white college has so honored a Negro.

Walter White, also a member of the American Council on Race Relations Board, and Executive Secretary of the National Association for the Advancement of Colored People, was one of six men decorated with the Haitian National Order of Honor and Merit by Ambassa-

dor Joseph D. Charles of the Republic of Haiti. Ambassador Charles announced to Mr. White that his government was bestowing this honor on him "in witness of its high appreciation of your personal merits, of the magnificent work which you have accomplished for the rights of man, and the eminent services which you have been rendering over a long period of years to the Haitian Republic."

LEGISLATION

EQUALITY IN NATURALIZATION AND IMMIGRATION

On March 1, the House approved by voice vote HR 199 (Judd, R. Minn.), which would remove the last racial barriers to immigration and naturalization. The measure sets up quotas for Asiatic peoples who have previously been excluded from this country and permits naturalization of those already residing in America. The quotas established for this group of more than 250 million people would be deducted from the total quotas for all countries of the world.

The vote came after the House had rejected, 19-118, an amendment to eliminate the provision which would establish a colonial quota of one hundred for the West Indies and other colonies for which no separate quota has been previously established. By a roll call vote of 39-366, it rejected a motion to recommit for the same purpose by Vito Marcantonio (ALP N.Y.).

The E.N.I. bill, which has the support of the Japanese American Citizens League, the Committee for Equality in Naturalization and other organizations, is now in the Senate Judiciary Committee.

"COMPROMISE" ON FILIBUSTER

In spite of the opposition of many nation-wide organizations, which believe that the filibuster constitutes a threat to their entire civil rights program, a coalition of Southern Democrats and Republicans succeeded on March 17 in effecting a "compromise" on an anti-filibuster resolution (S. Res. 15) offered February 28 by Majority Leader Lucas (D. Ill.). The "compromise," sponsored by Minority Leader Wherry (R. Neb.), requires approval of two-thirds of the entire Senate to invoke cloture and prevents application of cloture to any motion or resolution to amend Senate rules. The rule previously in effect limited debate by two-thirds of those voting on "pending measures."

During the course of the filibuster, which lasted for eighteen days, the Senate repudiated a ruling by Vice-President Barkley that cloture could be applied to motions, and rejected amendments which would have invoked cloture by two-thirds of those voting on all matters except rules changes, invoked cloture by a majority of those voting, guaranteed that cloture would be applied to motions to amend the Journal, or invoked cloture by a constitutional majority of the Senate.

The "compromise" plan, which was accepted by Republicans and Southern Democrats on March 14, was rejected by Administration forces. The next day a petition calling for the "compromise" was circulated by Knowland (R. Calif.), Russell, (D. Ga.), and Tydings (D. Md.). It was signed by 52 Senators: 22 Republicans, 18 Southern Democrats, and 12 Democrats from boarder states and the North and West. When the "compromise" came to the floor, in the form of an amendment to S. Res. 15, the vote was 63-23.

This final action, climaxing weeks of debate, was taken without regard to the statements of many organizations which have supported cloture by majority vote to apply to both measures and motions. These organizations include the new Joint Committee on Civil Rights, composed of representatives of twenty-one national agencies; Civil Liberties Clearing House, representing sixty-six national agencies; Civil Rights Congress; National Catholic Welfare Conference; American Jewish Committee; Americans for Democratic Action; National Council of Jewish Women; Women's International League for Peace and Freedom; National Association for the Advancement of Colored People; Unitarian Fellowship for Social Justice; Congress of Industrial Organizations; American Federation of Labor; National Medical Association; and Negro Newspaper Publishers Association.

MASS COMMUNICATION

CLEVELAND

Cleveland's three daily newspapers agreed to drop designations of race, religion, color, nationality or ancestry in their help wanted ad columns. Only ads excluded from this regulation are those for domestic help in private homes or private personal services.

The joint resolutions of the papers, the Cleveland *Press*, *News*, and *Plain Dealer* read:

"Member publishers agree that they will not accept male or female help or situation wanted advertising which contains references to race, religion, creed, color and ancestry. This includes employment bureau advertising, but does not include help or situation wanted advertising for domestic help in private homes or advertising for private personal services."

COMMUNITY ORGANIZATION

AMERICAN JEWISH COMMITTEE

Presented herewith is a statement of views adopted by the American Jewish Committee at its annual meeting in January. "We of the American Jewish Committee are associated under the mandate of our Charter, adopted in 1906, to prevent the infraction of the civil and religious rights of Jews in any part of the world and to secure equality of economic, social and educational opportunity.

"We join with all other Americans, of whatever creed or color, who devote themselves to the continued fight against those who through bigotry and prejudice endeavor to imperil the rights of any group in this land and thus divide our country and undermine the foundations of American liberty.

"We join with men of good will everywhere in the effort to obtain for all mankind the essential human rights, as set out in America's basic documents of freedom. We hail the historic Report of the President's Committee on Civil Rights and the Declaration of Human Rights, adopted by the General Assembly of the United Nations.

"We call upon our own nation and the nations of the world to protect and enforce these rights by every appropriate means, domestic and international. We urge upon our own and all other countries the adoption of liberal, just and non-discriminatory immigration laws. . . .

"We hold the establishment of the State of Israel to be an event of historic significance. We applaud its recognition by our own and other governments. We look forward to Israel's assumption of its full place among the family of nations as a government guaranteeing complete equality to all its inhabitants, without regard to race, creed or national origin, and as an advocate of liberty and peace in the Near East and throughout the world. Citizens of the United States are Americans and citizens of Israel are Israelis; this we affirm with all its implications; and just as our own government speaks only for its citizens, so Israel speaks only for its citizens. Within the framework of American interests, we shall aid in the upbuilding of Israel as a vital spiritual and cultural center and in the development of its capacity to provide a free and dignified life for those who desire to make it their home.

"In these critical times, when totalitarian forces and ideas again threaten the liberties of the world, we re-dedicate ourselves to the struggle for the maintenance and advancement of individual dignity and freedom."

AMERICAN COUNCIL ON RACE RELATIONS Report

JUNE, 1950 VOL. 5, NO. 6

ENFORCEMENT: FAIR EDUCATION PRACTICES LAWS

Recognizing the inadequacy of civil rights laws which prohibit educational discrimination without providing administrative machinery for enforcement, the citizens of three states have secured enactment of fair educational practices legislation: New York (April 1948), New Jersey (April 1949), and Massachusetts (August 1949). This type of legislation, which was recommended by the President's Committee on Civil Rights, is modeled on the more widely-known fair employment practices laws. In New York, the act is administered by the Education Practices Administration, a division of the state Education Department; in New Jersey, by the Division Against Discrimination, the agency within the Department of Education which is empowered to administer the fair employment and other public accommodations legislation as well; and in Massachusetts, by the Office of Director for Fair Education Practices, which is within the Department of Education and subject to the direction of the Commissioner of Education.

The laws prohibit exclusion, limitation, or discrimination in admissions on account of race, religion, creed, color, or national origin, and in Massachusetts, discriminatory questions on application forms are specifically designated as an unfair practice. Although the New York law applies only to public institutions of post-secondary grade, each of the other acts includes all non-private schools from primary through university levels. Religious and denominational schools are exempted from the provision of each of the acts insofar as the ban against selection on the basis of religion is concerned.

Machinery for administration of the fair education practices acts follows closely the pattern which has been established in the area of employment. After the filing of complaints by aggrieved persons, the agencies are empowered to conduct thorough investigations. In each state, use of the methods of persuasion, conciliation, and mediation is emphasized. If these methods are unsuccessful, public hearings are to be held and cease and desist orders may be issued by the appropriate agency. Provisions are made in each state for judicial review and enforcement of orders. In New Jersey alone, specific penal sanctions exist; violations are punishable by imprisonment for not more than one year, or by a fine of not more than five hundred dollars, or by both.

During the relatively short period that these laws have been in effect, a limited number of complaints have been received. One complaint, involving a business school, has been received in New York; a "few" in New Jersey; and none in Massachusetts. A real service might be performed by private civil rights organizations in encouraging and aiding aggrieved persons in the presentation of complaints. One agency, the American Jewish Congress, has recently urged careful investigation of the admissions practices of the nine medical schools in New York State on the basis of its own findings of discrimination against Jewish applicants. Such action, guiding the attention of the official fair education practices agencies to areas in which present procedures are highly questionable, is much needed.

Public agency activities have thus far been mainly confined to the dissemination of information about the laws to the educational institutions concerned and the collection of facts about the present practices of the institutions. In Massachusetts, where the law has been in effect since November, 1949, the Director has spoken before forty or more organizations and has held conferences with representatives of 124 of the 1,000 institutions affected by the act. Plans have been made for a public hearing about administrative rules and regulations to be adopted.

The New Jersey Division Against Discrimination has assumed responsibility for interpreting to school boards the Constitutional provision against segregation in public schools, an activity which is closely related to its more formally authorized fair education practices functions. As a result of its work, the Division reports that 35 communities are on record for the complete elimination of segregation, four have taken partial steps, and four others which originally opposed "de-segregation" are now initiating plans for integration of students and teaching staffs.

In New York, the Administrator of the fair education practices act has participated in two annual meetings of the Association of Colleges and Universities of the State of New York; a meeting of admissions officers; and a joint conference of the Board of Regents, representatives of colleges and universities, and representatives of interested civic organizations. Information about the law has been distributed to all educational institutions, and many field visits made. Two studies are now under way, one a survey of admissions practices of undergraduate colleges, the other a study of the experience of premedical seniors in New York state colleges in their efforts to secure admission to New York state medical schools during

(*Continued on Page* 3)

SUPREME COURT DECISIONS

On June 5, the Supreme Court handed down unanimous decisions in the *Henderson*, *Sweatt*, and *McLaurin* cases, involving segregation in transportation and in higher education. Although the plaintiffs had urged that the Court invalidate the "separate but equal" doctrine which was established in 1896 in *Plessy* v. *Ferguson* and has since served as the main legal prop of the South's bi-racial social system, the Court failed to reconsider this doctrine. Instead it based its decisions in favor of the plaintiffs on the grounds that the facilities actually involved in the three cases were not, in fact, equal and that as a result the Constitution had been violated. (For a full description of the cases and their significance, write to the American Jewish Congress, Commission on Law and Social Action, 1834 Broadway, New York 23, N. Y.)

LOCAL HOUSING ACTIVITIES

On June 15, representatives of local community groups interested in the establishment of safeguards against discrimination and segregation in housing met in New York in a Conference on Democratic Housing. Since their efforts may lead to the development of a continuing national program in this area, a brief report on recent local housing activities is in order.

During the past six months, ordinances have been enacted in Cleveland, New York, Philadelphia, and San Francisco, four of the largest cities in the country. Somewhat earlier the Boston and Hartford City Councils passed anti-discrimination resolutions, and on March 29, 1950, the St. Paul Housing and Redevelopment Authority adopted a resolution prohibiting segregation in two housing projects to be constructed.

Cleveland The Cleveland amendment, which provides that there shall be "no discrimination or segregation in the selection of tenants, the fixing of rentals, or in the construction, maintenance and operation of any such project", was prepared by the Cleveland Community Relations Board. Opponents of public housing, including the executive secretary of the Apartment House Owners Association, led bitter argument against the legislation. Nevertheless, the City Council enacted the housing ordinance and its anti-segregation amendment by a unanimous vote in December, 1949.

New York On December 16, 1949, the City Council and Board of Estimate enacted an ordinance barring discrimination in any publicly-aided housing. The campaign for this ordinance was led by the New York State Committee on Discrimination in Housing, which in March, 1950, succeeded in securing passage of a state law prohibiting discrimination and segregation in housing accommodations acquired, constructed, repaired, or maintained, in whole or in part, with public assistance. Thus a repetition of the Stuyvesant Town pattern of discriminatory occupancy in an urban redevelopment project is precluded.

Philadelphia The Committee on Democracy in Housing urged the inclusion of a non-discrimination clause in the Co-operation Agreement set forth in the housing ordinance introduced on January 5, 1950. After a month's heated argument, during which the anti-segregation clause was a major point of controversy between the reluctant City Council and the Philadelphia Housing Authority, the Council approved an ordinance retaining the clause intact on May 19, 1950. The clause, which is identical with the Cleveland amendment except for the addition of a proviso against discrimination in "conditions of occupancy", affects 10,000 low-rent homes to be erected.

San Francisco For ten years, the San Francisco Housing authority followed a "neighborhood pattern" occupancy policy which resulted in segregation throughout public housing projects. During the fall of 1949, the San Francisco Council for Civic Unity prepared non-segregation amendments to the cooperation agreement authorizing construction of 3,000 new units. Over the outspoken opposition of the Housing Authority, the San Francisco Board of Supervisors on November 21, 1949, adopted a housing resolution amended (a) to require non-segregation in the new program and (b) to urge gradual application of the same policy to all existing and war-deferred dwellings under the Authority's administration. The Housing Authority refused for a period of three months to sign the contract as amended, but after heated civic controversy finally agreed. Nevertheless, there is evidence at the present time that the Housing Authority may not take steps toward "gradual application" of the non-discrimination policy — which is rigid only with regard to the 3,000 new units — in 6,000 temporary war dwellings, 1,741 low-rent units, and 1,100 war-deferred homes under its management. The San Francisco Council for Civic Unity is continuing its effort to extend non-discriminatory patterns in these projects.

Boston The Boston City Council approved on June 28, 1948, a resolution requesting the Boston Housing Authority to include an anti-discrimination provision in all its contracts with the State Housing Board. As in Hartford, this municipal resolution has since been strengthened by adoption of a state law extending the jurisdiction of the Fair Employment Practice Commission to public accommodations, including public housing. This new law, which was signed on May 23, 1950, was enacted by both Houses with little opposition except for that of the Boston Housing Authority. It is not yet possible to determine what specific effects these measures will have.

Hartford On January 24, 1949, the Hartford Court of Common Council adopted a resolution forbidding discrimination in public or publicly-assisted housing which was later re-enforced by enactment of a Connecticut statute bringing public housing under the jurisdiction of the state Interracial Commission. Although previously the Hartford Housing Authority had followed a policy of racial segregation, four projects are at present in process of integrating white and Negro tenants and three projects currently under construction will follow a policy of complete integration from the beginning.

Other Cities Activities to assure equality of treatment in the field of housing are currently under way in several other cities, including Detroit, Phoenix, Los Angeles, Buffalo, Bridgeport, Pittsburgh, Chicago, and Milwaukee. In Detroit, the Mayor's Interracial Committee, the unions, and other public interest groups are engaging in an extended effort to expedite the city administration's housing program — under which at least 20,000 units may be erected — by encouraging integrated housing. Up to now, the City of Detroit has maintained strict racial segregation in all projects including those bordering on racially mixed areas. The Phoenix Council for Civic Unity is planning for negotiations with the Housing Authority in an attempt to guarantee a fair housing policy in all new units to be erected under the Housing Act.

In Buffalo, where for twelve years segregation has been the practice in public housing — except for 511 units of non-discriminatory state-financed veterans housing — a local committee has been organized to bring about conformity with the New York State housing law and to assure the development of fair practices in the 830 units currently under construction and 5,000 publicly-aided units planned for the immediate future. The Bridgeport Housing Committee, temporarily stymied in efforts to pass an ordinance prohibiting segregation and discrimination by the city's lack of adequate police powers, is investigating other ways of establishing safeguards.

In Milwaukee, where the Housing Authority is committed to a non-discrimination and non-segregation policy, the Mayor's Commission on Human Rights is chiefly concerned with the inadequate supply of middle income housing. Negroes are seriously affected by this lack. However, it is expected that the redevelopment program now planned will alleviate the shortage somewhat.

The public housing and urban redevelopment program in Chicago, where construction of 40,000 units during a six-year period has been approved, is not yet under way. Despite the pressure of civil rights and housing organizations, the City Council has failed thus far to approve adequate sites for the new housing. The defeat of the Carey ordinance, which would have prohibited discrimination and segregation in publicly-aided housing, has contributed to the develop-

(*Continued on Page* 4)

Field Notes

Atlantic City . . . At the fifth constitutional convention of the United Steelworkers of America, CIO, President Philip Murray announced that the CIO has instructed its legal staff to bring suit to force the American Automobile Association to rescind prohibitions against Negro membership.

. . . The National Community Relations Advisory Council, the coordinating and consultative body of six major national Jewish organizations and 28 regional, state, and local community councils, met in its eighth annual convention during the last week of May. The Council concentrated on measures for safeguarding civil liberties, pointing out that the security of American Jews is linked directly with the preservation of the fundamental rights of individuals.

Austin, Texas . . . On May 4, Governor Shivers announced the creation of a "Council for the Study of Human Relations" empowered to determine "ways and means of improving the relationship between the English-speaking and Spanish-speaking peoples of Texas." The Council is to serve in an advisory capacity to the Executive Department and the Good Neighbor Commission. In his official memorandum, the Governor urged that all heads of departments of the state give equal consideration to applications for employment of persons of Spanish-Mexican descent, that members of boards of education take cognizance of the fact that school segregation of Spanish-speaking children is in violation of the state constitution, and that owners of public establishments be "conscientiously careful" not to discriminate against persons of Spanish-Mexican descent.

Baltimore . . . The Maryland Court of Appeals ruled in April that the University of Maryland must admit a Negro applicant, Esther McCready, to its School of Nursing. In so doing, the Court maintained that the State could not insist that its offer of an out-of-state nursing education — to be arranged under the terms of the Regional Education Compact — was an adequate substitute for an education available within the state of Maryland. The Board of Control for Southern Regional Education itself had intervened in the case, stating that "it is not the purpose of the Board that the regional compact and the contracts for educational services thereunder shall serve any State as a legal defense for avoiding responsibilities established or defined under the existing State and Federal laws and court decisions." The decision not only undermines the discriminatory admissions policies of the University of Maryland's graduate and professional schools, but also helps to clarify the role which the Southern Regional Education program will play in the development of racial policy in southern institutions of higher education.

Boston . . . The forty-first annual convention of the National Association for the Advancement of Colored People will meet in Boston, June 20-25. Among the speakers will be Arthur M. Schlesinger, Jr., Robert C. Weaver, and Frank Horne.

Los Angeles . . . At the recent Los Angeles County Conference on Employment facts were presented showing that the percentage of unemployment among minorities is far greater than among the general populace. Conference delegates recommended that all city councils within the county proceed immediately to enact fair employment practices legislation, that the County Board of Supervisors institute a non-discriminatory employment policy to apply to all agencies of county government, that employers and trade unions be encouraged to include anti-discrimination clauses in all contracts, and that present training and apprenticeship programs be expanded and supplemented.

Manhattan, Kansas . . . At the annual meeting of the Kansas Clearing House on Civil Rights, held June 2-3, representatives of local and state groups decided that the passage of FEPC legislation shall be the main objective of KCHCR during 1950-51. Plans were made for conducting local community public opinion polls, and for expanding the work of the Clearing House to include emphasis on freedom of speech and press.

New York . . . On June 6, officials of the "Town and Village Tenants Committee to End Discrimination in Stuyvesant Town" announced that they will take to the courts the cases of 30 of the Committee's active members whose leases are not being renewed by the Stuyvesant Town Corporation. This announcement was made one day after the Supreme Court refused to review the cases of three Negro war veterans who charge that the discriminatory occupancy policies of the Corporation "corrupt a legitimate device for sound community planning into an instrument for enforcing racial segregation" and violate the equal protection guarantee of the Federal Constitution.

New York . . . On May 19, the American Jewish Congress filed a complaint against the American Medical Association with the New York State Commission Against Discrimination, charging that situations-wanted ads published in the AMA's monthly Journal often carry designations of race, creed and color. New York SCAD and the AMA came to an agreement on June 5 whereby the Association will discontinue all such discriminatory advertising matter from its publication.

. . . Taking similar action, the New York branch of NAACP has filed a complaint with SCAD alleging discriminatory hiring practices in four television networks, WOR, WCBS, WABC, and WNBC. The NAACP charges that WABC employs no Negroes, and that each of the other stations employs very few in comparison with its total workforce. Investigation is also to be made of the practices of the unions holding contracts with the stations cited.

Salt Lake City . . . Representatives of 15 western states convened in May to establish the Governors' Interstate Council on Indian Affairs. The agreed objective of the Council is assimilation of the 400,000 Indians in the country. Members of the Council propose to get Indians off the reservations in an effort to further self-support and to deal cooperatively with the federal government in securing educational and economic opportunities for Indians.

Seattle . . . After conferences with the Seattle Civic Unity Committee, Brigadier General Lilburn H. Stevens issued on May 15 an order stating that there shall be "complete equality of treatment and opportunity regardless of race or color" in the Washington National Guard. Negotiations for a similar purpose are now taking place in Arizona, where the Arizona Council for Civic Unity is requesting that Governor Garvey issue an Executive Order opening the Guard to all citizens without segreation or discrimination.

Washington, D. C. . . . The District's six swimming pools, long the center of controversy, opened in June on an integrated basis. The pools are now being operated by the Department of the Interior. The opposite policy is being followed in St. Louis, where recreational facilities were also the scene of rioting last summer. In that city all but two pools are opening on a segregated basis.

FAIR EDUCATION PRACTICES LAWS

(*Continued from Page* 1)

1950. The agency reports that only two of the 197 administrative units of the institutions of higher learning in the state continue to ask direct questions about religion on application blanks, and one about nationality. None ask direct questions about race, color, or parents' nationality. However, 70 units still ask for photograph or place of birth.

Local Housing Activities

(*Continued from Page 2*)

ment of the stalemate over site-selection.

Since all public funds in aid are accompanied by anti-discrimination provisos, no special ordinance in the area of housing is being sought by civil rights organizations in Pittsburgh, where 6,000 new units are scheduled for construction by the municipal authority. However, the Civic Unity Council has developed a housing committee to study population shifts which have led to the growth of Negro ghettoes and to suggest remedial action to the municipal corporation, Pittsburgh Housing Authority, local offices of the Housing and Home Loan Agency, and real estate interests.

The Los Angeles County Committee on Human Relations reports that an Urban League-sponsored ordinance forbidding discrimination in community redevelopment has been referred by the City Council to the Community Redevelopment Agency's Commission. All of the local intergroup relations agencies are exerting influence to secure immediate consideration of the ordinance. In this city, where 120,000 VA-approved homes have been constructed, another 32,000 are now being built, and the City Housing Authority is engaged in a program for 10,000 new units, civil rights agencies are finding County Housing Authority developments the major problem. These are almost completely segregated, although the city-operated projects are entirely integrated, the FHA is adhering to its policy of refusing federal loan guarantees for property placed under recorded restrictive covenants, and the Veterans Administration looks with approval upon the inclusion of anti-discrimination clauses in agreements between builders and developers and the individual buyers.

INTRODUCTION

In 1945, the American Council of Race Relations and The Haynes Foundation, concerned over the many signs of race tension in the City of Los Angeles asked Dr. Joseph Weckler, now of the University of Southern California, to conduct an inquiry. There was general apprehension on the part of many who had seen the evidences of friction increasing and apparently cumulating, who had lived through the "zoot-suit" riots and who feared that post-war Los Angeles with its restricted employment opportunities for Negroes and Mexicans, its wretchedly inadequate housing facilities and its greatly increased population would become a battle ground on which Americans battled each other. It was not reassuring to discover that Gerald L. K. Smith held the same view.

In launching this inquiry, its sponsors had neither the facilities nor the necessity for an exhaustive study of the anatomy of race conflict. The fundamental causes are not different in Los Angeles then elsewhere, nor are the contributing causes. For the Negro and Mexican, inequality in income, employment opportunity, educational opportunity and housing, for the white, ignorance, prejudice, insecurity and a thousand and one personal frustrations. Add to these an irresponsible press, the policies of real estate agencies and mortgage companies, and a prejudiced police force and you have a recipe which, whenever it is compounded, does not vary in essentials but only in degree.

The Council and the Foundation did not seek research and analysis so much as guidance, a way of thinking about the problem which offered some hope of genuinely useful application. Three neighborhoods within Los Angeles were chosen for observation—Hollenbeck, Watts, and West Jefferson, all areas of racial tension, yet differing significantly from one another in the form of their conflicts. These three neighborhoods obviously do not comprise a universe nor even a scale. Nothing more is claimed for the neighborhoods selected than that important problems reside there. The report that follows is a discussion of those problems together with several hypotheses for the guidance of those of us who seek an approach to their solution.

I

THE NEIGHBORHOODS

Hollenbeck lies across the river not far east of the main business section of Los Angeles, from which it is separated by an industrial area paralleling the Los Angeles River. Hollenbeck is part of the old city and is one of its longest settled sections. The neighborhood is one of small, frame houses, some neat and well maintained, more old and dilapidated, with occasional ancient mansions now turned to institutional use.

Within Hollenbeck is a section known as Boyle Heights which prior to 1900 was one of the fashionable residential areas of the early city, but was soon abandoned by wealthy families for locations west of the river. Since 1900 Hollenbeck has become the veritable East Side of Los Angeles, housing large groups of the foreign born as they arrived in Los Angeles.

Although many national groups inhabit the area, the Mexican and the Russian-born Jew are predominant among the foreign born. Of the fifteen census tracts which comprise Hollenbeck, in ten the predominant foreign born group is Mexican, in five Russian. In none of the census tracts were the foreign born less than 15 per cent of the population, and the proportion rises to virtually 45 per cent in the areas of heavy concentration of the Russian born.

During the war years, there has been a substantial movement of Negroes into the area. The Negro population, however, is still heavily concentrated in the public housing projects and is not widely distributed through the area.

The area known as Watts is located in the low, flat plain which characterizes much of southeastern Los Angeles. Watts, from its very beginning, has been an enclave sheltering low-income groups, bisected by railroad property and dominated by industrial development across the tracks. The character of Watts as a segregated community is evident in the fact that even today it is a jog of the city of Los Angeles, surrounded by county territory on three sides that serves to isolate it from municipalities of the industrial fringe.

Although Watts, as Hollenbeck, is a working class community, it derives its ethnic character from the Negro rather than the foreign-born white. In contrast with Hollenbeck, scarcely 10 per cent of the population was foreign born. Since 1940 the porportion has become even smaller.

Prior to the war, the population of Watts was evenly divided among Anglo-American, Mexican, and Negro. During the past five years, there has been a very heavy migration of Negroes into Watts and concurrently some exodus of Mexican and Anglo-American population. These shifts have left Watts a heavily concentrated Negro area. Estimates by residents place the present Negro population at about 80 per cent of the whole. Much of the newly arrived Negro population has been housed in public housing projects, all interracial by design, but occupied almost exclusively by Negroes. Although not entirely Negro, Watts is nevertheless a segregated community straining at its boundaries and meeting resistance in all directions from surrounding white communities.

Three or four miles southwest of the Civic Center is the area known as West Jefferson. Once housing many of the old wealthy families of Los Angeles, West Jefferson is becoming increasingly an area of middle and upper class Negro residents. The Negro population is still largely confined to four of the seven census tracts comprising the area, but there is little doubt that the future of the area lies with the Negro rather than the white.

Directly adjoining West Jefferson is the famous Sugar Hill or West Adams Heights area. Here live the famous Negro personalities of the entertainment world —the motion picture and radio stars, the band leaders as well as many of the leading business and professional families of Los Angeles. In the main, however, the area known as West Jefferson is solidly middle class. This characterization holds not only for its Negro residents but for its Anglo-white, Mexican, Korean and Japanese population as well. In none of the seven census tracts of West Jefferson are industrial wage earners the predominant occupational group.

Conflict, tension and interracial combat are well marked characteristics of the life of all three communities—Hollenbeck, Watts, and West Jefferson—but the pattern of the conflict varies markedly. The manifestations vary from acts of direct physical aggression to the most sophisticated form of legal struggle. If it is race which determines the adversaries, it is class which determines the weapons.

II

WEST JEFFERSON

West Jefferson is an example of non-violent conflict in an area of mixed Negro and white middle class occupancy, but it is such an example only by virtue of the point in time from which we view it. At this moment whites and Negroes are interspersed throughout the area—as far as could be learned there is not a single block in which all the residents are colored—but not so many years back the area had no colored residents, and in the foreseeable future it may well have no white residents, barring a basic change in real estate law such as the outlawing of racially restrictive covenants.

In West Jefferson the conflict between Negro and white is over segregation. It is a special, modern, legal form of the long-time Negro struggle for mobility and freedom from caste restrictions. The Negroes of West Jefferson are struggling for the right to live where they please—the whites to develop residential enclaves from which Negroes are barred.

The covenant, which is the principal weapon in the conflict, is an attempt to do by private contract what may not be done by ordinance or law. That segregation can not be imposed by ordinance was settled by the courts many years ago. Ordinances directed against the Chinese in San Francisco and later against Negroes in several southern cities all failed to meet the test of constitutionality, although it is clear that the constitutional rights which the courts were interested in protecting were those of white property owners to sell or rent as they might choose. Following the same reasoning, attempts to offset segregation by invoking the police power of the State have also failed. When segregation is effected by the banding together of individual property owners, however, the courts have so far given it their blessing, subject to certain limitations which have only become clearly defined in the course of long and technical legal battles. The West Jefferson area furnishes excellent data with which to illuminate this struggle.

It was not until the first world war and the accompanying mass migration of Negroes from the South, that any significant pressure of Negro population was felt in Los Angeles. It was at this time that Negroes first penetrated the West Jefferson area. Once in, they expanded rapidly, and this expansion was countered with a restrictive covenant campaign.

These early covenants, when put to court test, proved to be rather ineffective documents. Many were drawn to run no more than five or six years, and these were

simply waited out. These the courts found unreasonable, and voided. One of the early covenants attempted to forbid sale of property to non-Caucasians under penalty of a $200 fine. Property sold to Negroes brought such handsome premiums, however, that owners could not be restrained by so small a penalty. When these covenants were tested, the courts held that it was unconstitutional to restrict the original owners' rights to sell. At the same time the courts upheld that part of the covenant which forbade occupancy by non-Caucasians, apparently seeing no absurdity in depriving people of the right to live in certain houses which they were nevertheless permitted to purchase.

As the rules of this legal contest were gradually clarified, organizations sprang up on both sides to manipulate the situation through the medium of the courts. In this battle several factors have worked to the advantage of the Negroes. For one thing, a covenant to be valid must be free from technical flaws. There must be no error in the description of the property. Signatures on the covenant must be identical with signatures on the deed. Further, the covenant must be capable of fulfilling its purported function of protecting the covenanters' neighborhood from non-Caucasian infiltration. The courts regularly viod an ineffective covenant. In fact the usual reasoning behind the breaking of a covenant is that "the character of the neighborhood has changed."

It is also important to note that the whites have been by no means solidly in favor of restrictive covenants. Some have no objection to Negro neighbors. Others planned to move soon in any case to more modern neighborhoods, and are not averse to receiving the premium prices the Negroes are willing to pay for their property.

The West Jefferson area was already built up when Negro pressure was first felt, and consequently it was necessary to canvass door to door for signatures in order to put the area under covenant. In one tract only about sixty per cent signed up originally, and although about ninety per cent are now signed up, it took eight separate covenants to cover the tract. Another tract required six covenants, and still has twenty to twenty-five per cent of the property owners unsigned.

There are a number of Negro organizations active in the West Jefferson area in upholding the right of Negroes to live within the area. For the most part there are local associations of property owners who concern themselves principally with the defense of covenant cases arising within their own neighborhoods. A few of these organizations also play an aggressive role directed toward the breakdown of restrictive covenants. It should be emphasized, however, that the actual work of covenant breaking falls on a few. The great bulk of the members are passive dues-paying beneficiaries who are reluctant to come into court personally even when their own cases are being heard. Both white and Negro residents and prospective residents of the West Jefferson area share middle-class aversion to face hostility. In addition, the upper class Negro typically sets great value on his acceptability to whites, and deeply suppresses all aggressive attitudes toward them. It is probable that many Negro professional persons have been willing to participate even passively in these covenant-breaking activities solely because the only alternative was really wretched housing.

However that may be, these anti-covenant organizations have an enviable record of successes, based on an admirably efficient technique. The following procedure has been developed for beaking down the barriers put up by restrictive covenants. Initially Negro real estate dealers which are not covered by the covenant, and where possible place Negroes on them. Next they search for lots where technical flaws exist in the covenant. If the tract is one which has been covered by a series of covenants, the next step is to try to purchase a lot covered by one of the minor

covenants with only a few signatories. Since each separate covenant is a private contract participated in only by its own signatories, only the co-signers of that particular covenant have a right to sue if a member breaks the contract. The chances are that they will not exercise that right if they are few and scattered. There is not only the matter of expense, which can be prohibitive with few to share it, but the likelihood of successful outcome of such a suit would be negligible. Los Angeles judges commonly dismiss such suits, since a few scattered persons are unable to demonstrate that their covenant is an effective instrument for protecting the character of their immediate neighborhood. Once several of the minor covenants have been successfuly broken, the time is then ripe to move against the main covenant with a good chance of breaking it on the ground that the character of the neighborhood has changed.

Each successive Negro advance has become the occasion for a new flurry of covenant signing. Whenever old covenants receive an adverse court ruling, new covenants are drawn up and a fresh campaign for signatures is begun. Techniques have thus been perfected on both sides. Contemporary restrictive covenants are drawn up to run for a ninety-nine-year period, and are so worded that new signatures can be added at any time during the life of the document. In areas covered by such covenants, successive campaigns for signatures will strengthen rather than weaken the original document. Thus the struggle, so far bitter and unremitting, promises soon to reach an impasse unless fought out on new lines. There remains only a fresh frontal attack on the constitutionality of the restrictive covenant. Already there are signs that the courts are ready to take a less narrow view of the social situation created by these covenants. Various law journals are currently speculating on possible fresh avenues of attack.

The Negro anti-covenant associations of West Jefferson represent Negro organization at its most rational. The ends are clear, specific and agreed upon; the methods and techniques employed are appropriate. Members and agents of these associations are the Negro elite, the group from which the leadership of the Negro community today must come. There are, however, strong reasons for believing that the mass of Negroes will secure only an indirect and qualified kind of leadership from West Jefferson. For the consciousness of class is strong in middle and upper class Negro society. The anti-covenant organizations themselves have as their aim an increase in the living space of a very small minority of the Negro population. The benefits to the majority of the Negroes of Los Angeles will be of an incidental character, a by-product of the circumstance that Negroes, though of different classes, are all members of a single caste.

III

WATTS AND HOLLENBECK

In working class sections of Los Angeles the competition for housing is carried on in a less genteel fashion. In Watts, violence is close to the surface and physical aggression, which is wholly absent from even the thinking of West Jefferson and Adams Heights, is an ever present threat. There are no strong class inhibitions against violence in these working class neighborhoods, and such restraints as operate are more closely related to law enforcement agencies than to class morality. Threats of violence are common and have been made equally by Mexicans and whites against the expanding Negro population.

In 1940 "Anglos," Mexicans and Negroes were represented in about equal pro-

portion in the population of Watts. Today five-sixths of the population is Negro, much of it inhabiting the war inspired public housing projects which are so heavily concentrated in this community. There is some evidence that Watts has been selected by powerful interests as an area of Negro segregation and that the sites for the public housing projects were not uninfluenced by this consideration. There has as yet been little actual displacement of "Anglos" and Mexicans by Negroes and some areas still remain open for further expansion. Notwithstanding this, both Mexicans and "Anglos" have felt threatened and have reacted with marked hostility.

The tension between the incoming Negroes and the Mexicans occurs principally in the older, more settled sections of Watts. It is in these sections that returning Mexican veterans, resentful over the striking changes which have occurred during their absence, have in some cases threatened to band together to expel the Negro invaders from the community.

Friction between Negro and white occurs largely in that section where the new Negro housing projects approach the sparsely settled outlying white districts. The chief trouble spot is just south of Watts proper, in unincorporated county territory known as Willowbrook. Here the backyards of the Negro housing projects abut directly on the backyards of recent small housing developments restricted to white occupancy by covenant.

While the Negro housing existed in plan only, some of the earlier white residents of Willowbrook protested vehemently against Negro occupancy, threatening to burn any Negro housing which might be established and to mob any Negroes who might attempt to move in. Their representatives declared before the Los Angeles city council that Willowbrook would either stay lily-white or would run red with blood. But the threat collapsed before a warning from the mayor that violence would be met by criminal prosecution.

There is reason for believing that hostility to the Negro had neither so wide nor so deep a hold on the white community of Willowbrook as its representatives alleged. Had a public opinion poll been taken to test sentiment it would undoubtedly have shown very widespread objection to Negroes. But confronted with real life choices the sentiment proved not so deep as it wide. In another attempt to exclude Negroes, an election was held on a proposal to annex Willowbrook to Compton, an independent "lily white" community just to the South. In support of annexation was the promise that Negroes would be kept out of the composite area as they had been prevented from settling in Compton. Against the proposal was an undoubted increase in the tax rate. The proposal was defeated at the polls.

While conflict of interest has led to threats of violence on the part of adults, the actual occurrence of violence has been almost wholly confined to adolescents. Both Hollenbeck and Watts in recent months have been the scene of protracted violence. Notwithstanding important differences between the two communities in the nature of their major tensions, the case histories of the outbreaks exhibit important common charactertistics.

In Hollenbeck many minority groups live somewhat uneasily side by side. The basic tension causing concern to the various social agencies in the community is that occurring between middle class Jews and working class Mexicans. Yet when rioting broke out it developed from an altercation between two Junior High School girls, one Mexican and the other Negro, who had formerly been close friends. When the conflict between them reached the point where only a resort to force could resolve it, spectators were quickly embroiled and a wild series of violent Negro-Mexican disorders occurred.

Although some Negro-Mexican and Mexican-white conflict exists in Watts, the

major tensions occur between predominantly Negro Watts and the surrounding "lily-white" communities which fear and resist Negro infiltration. But the large scale disorders in Watts began with an exchange of insult and epithet between white youths from the neighboring community of Lynwood and Mexican youths of Watts and ended as a gang attack on the Mexican residents of Watts. All accounts agree that the Negroes were not involved in the affair.

It is worth asking why the Mexicans and Negroes of Hollenbeck should riot if the major discord is between the Mexican and the Jew and why the "Anglos" of Lynwood should attack the Mexican of Watts if the grievance is held against the Negro, and why the outbreaks should occur among adolescents when the conflict is between the adults. A full answer to these questions, if it could be given, would take us deep into the heart of the problem.

Unfortunately no full answer is yet possible. The data are still deficient. And yet even the deficiencies of data are significant. We are dealing with irrational phenomena and the irrational always appears in some measure accidental. This is true even when irrational behavior is the rule. In Hollenbeck and Watts a state of tension exists. It is compounded of many individual frustrations and deprivations and may be served as well by oblique objects as direct ones. It is a psychological commonplace that frustration breeds aggression and aggression may and often is vented on objects which are remote from any real responsibility.

It is one of the important characteristics of unorganized behavior that it is irrational and this lack of organization when exhibited in situations of race tension may have almost any consequence. It becomes simply unpredictable because prediction is based on an assumption of means and ends which are rational at least to the person or group involved. We may suspect that what are called causes in fact are only symptoms but until organization develops to give rational order to the individual act and impulse, we shall never really know when we have hold of the root and when the branch.

The citizens of Watts and Hollenbeck are to an even greater extent than most working class groups without rational organization. Middle and upper class groups have relatively free access to the impersonal rules of conduct, advancement, and of law that define the permissible relationships between individuals. It is one of the unfortunate paradoxes of American society that the middle and upper classes, having less need for organization, organize readily and well whereas the working class whose main chance of rational and purposive behavior depends upon organization has been unable to carry organization beyond trade union activity.

In Hollenbeck and Watts the need is not only for organization but for organization inclusive enough to bring the agents of conflict together into a common council. The Hollenbeck outburst was between groups living side by side. The disturbances in Watts took place between segregated groups. The period of disorder in Hollenbeck was even more protracted than that in Watts, but in Hollenbeck there were community facilities for healing the breach. Joint meetings were held and difficulties thoroughly aired. Between the rioters of Lynwood and Watts a gulf exists, the gulf of segregation. The youth of Lynwood and Watts can communicate with one another only through outside intermediaries.

IV

THE ROLE OF THE AGENCIES

The basic problems which create the major community tensions are those of adults, but the spectacular quality of adolescent explosions has led the various com-

munity agencies to concentrate on so-called adolescent problems. It is true that many adult problems are of a size and gravity which place them beyond the scope of a single local agency, however well it might understand them. Whatever the cause, however, the practical result of the present concentration on adolescent violence has been that each agency tends to confine itself to a small and peripheral segment of the total problem. In the confusion of objectives which is thus bound to arise between the various agencies, their efforts sometimes end by contributing as much to the increase as to the elimination of community tension.

Of the various agencies and institutions which are capable of an effective role in community integration, the one with the widest scope is the public school. Whether the great potentialities of the school will be realized, however, depends not only on the caliber of individual teachers, but even more on the policy decisions of school authorities. Unwise policies can not only nullify the efforts of potentially constructive teachers, but can make of the school system an instrument for increasing rather than decreasing community tension.

In Watts, for example, the grade schools are inter-racial both in their teaching staffs and student bodies, morale is high, and the school system can be rated as one of the few positive factors looking toward community integration. On the other hand, the only high school in Watts has been given over virtually exclusively to commercial courses, and until very recently white youths of high school age have been actively encouraged to go elsewhere to school. This in turn has added to the pressure in neighboring Compton for the exclusion of graduates of the Watts school from Compton Junior College. In this way the high school has been an instrument for increasing social distance between groups within the community, and exacerbating tension between Watts and the surrounding communities. In Willowbrook an open policy of segregation prevails in the grade schools, and the inferior school opportunities afforded their children constitute one of the major dissatisfactions of the Negro residents.

Within Hollenbeck the school system plays a heavily negative role. The great barrier to the acceptance of Mexican children by Jewish children is the middle-class bias of the Jewish parents, expressed in excessive concern over dirt and disease. The opportunity exists for decreasing this bias in the schools. Instead, the usual naive prejudices of the teacher find such open expression that the Mexican child early learns in the schools of his inferior status, and the Jewish child has his middle-class prejudices confirmed. In the Hollenbeck Junior High School many of the teachers are outspokenly anti-Semitic as well as anti-Mexican. Here the Jewish adolescent discovers that his middle-class status gives him no immunity. Under these conditions this school suffers from an apparently insurmountable disciplinary problem. Fighting is common on the school grounds, in the halls, and even in the class rooms, and the school is rated by Los Angeles school authorities as one of four major tinder boxes in the city school system.

Next to the schools the police are the most nearly universal agency within the community, although they have a lesser potentiality for either disruptive or integrating effect. Unfortunately there is little evidence that they contribute anything positive to community integration. At best their contribution consists in the prevention where possible of outbreaks of violence, and the quelling of those disturbances that could not be prevented. Preventive activities could be highly constructive but the acutal role of the police can not be so described.

In the Watts area, police administration is almost incredibly cumbersome, with jurisdiction divided among various independent police forces and the county sheriff's office. An even more important barrier to the efficient policing of the area,

however, is the lack of confidence of the Negro and Mexican residents in the police, expressed in an unwillingness to report incidents to them. The major conflicts in this area lie between Watts and the surrounding "lily-white" communities, where antipathy to Negroes and Mexicans is strong enough to lead merchants to discourage any Negro or Mexican trade. The police of these communities reputedly cooperate by harassing Negroes and Mexicans with trumped-up charges whenever opportunity offers.

In Hollenbeck, likewise, police action contributes to the increase of community tension between middle-class Jews and lower-class Mexicans. The feeling that the police are always against them is so strong that a group of Mexican adolescents absolutely refused to permit a speaker from the Hollenbeck police force to address their club. In concentrating on the repression of violence, the police have employed methods which can only breed increasingly violent attitudes among the Mexicans, as instance follows instance of brutality, intimidation, and complete disregard of civil rights. Many well-authenticated episodes could be detailed if proof were needed.

The working class Mexican who bears the brunt of police brutality can not look for assistance to the self-styled Mexican leaders. Few of these middle-class Mexicans are able to face squarely the fact of police dereliction. In the face of incontrovertible evidence of police injustice, refuge is commonly found in the presumed incorrigibility of the Mexican lower class. The middle-class Mexican, aspiring to leadership of the Mexican people, still feels so basically insecure in status that his primary concern is to demonstrate his own superiority to the Mexican masses.

The drive of the middle-class Mexican for status and acceptability is evidenced in other contexts. The Pan American Optimist Club, an association of young business and professional people of Latin American extraction, in sponsoring a club for Mexican adolescents takes pride in the fact that these are boys of the "higher type."

The Mexican Affairs Committee, another middle-class organization, opposes cooperation with Negro groups, believing that the Mexican caste advantage would be compromised by any identification with Negroes. The committee, competing with middle-class Jews for social prestige, is outspokenly anti-Semitic as well.

It is a mark of the waning spiritual force of the church in American life, that adherence to the same creed has no longer the power to heal breaches caused by differences in color, race, and national origin. Such power as organized religion exerts in the communities under observation has been to weaken rather than to strengthen community integration. This result is to be expected when major differences in creed exist. It is also to be found within the confines of a single creed.

In Watts, there exists no inter-racial church. The largest of the Protestant churches is a Methodist Church for Mexicans. Its pastor allows Negro social clubs to use certain of the church rooms for meetings, but he does so over the protest of his parishioners. Negro Methodists and Mexican Methodists do not participate in each other's activities.

Originally there was a single Catholic Church in Watts. When the number of Mexican residents grew large, a special church was built for them. Linguistic difficulties were advanced to justify the action. With the appearance of Negro Catholics in Watts, still another church was erected for their use. This time it does not appear that any reason was given. In other ways, as in the location of new parochial schools, the Catholic Church has increased the degree of segregation of Mexicans and Negroes. Catholic welfare organizations have made it clear that this is no accident, but the result of deliberate policy.

The Catholic Youth Organization is one of the most important welfare agencies dealing with young people in the Los Angeles area. By deliberate choice this or-

ganization works only with Mexicans and actively cultivates Mexican exclusiveness. It finds justification for this course in its belief that virtually all other community agencies including the schools, the police and all non-Mexican welfare agencies, tend to make Mexicans ashamed of their language and their cultural heritage. CYO strives to give the Mexicans pride in their cultural heritage. They further assert that leadership can best be developed among Mexicans if they are in competition only with one another, and that not until such leadership has been developed can participation in inter-group activities be fruitful for the Mexicans. In actual practice this policy has been carried to such lengths that CYO ball teams are not allowed to play against teams which are composed of both Mexicans and Negroes. It has even been charged that CYO officials were much exercised about the eligibility of a member of one of their own teams when it was discovered that one of his parents was an "Anglo."

Another welfare agency in Hollenbeck which contributes to segregation by the inflexibility of its policies is the International Institute. This is a community center built many years ago when Hollenbeck was largely occupied by people of foreign birth, and it was dedicated to the exclusive use of immigrants and their children. With the passing of time immigrants have been largely replaced by the native-born, but the Board of Trustees continues to stand by the original policy. Thus its services are not open to Negroes or to the increasing proportion of native-born Mexican inhabitants of Hollenbeck.

At least two organizations of some importance exist which are completely inter-racial in policy, but each of these has a limited effectiveness. The 'teen Agers' Club is an adolescent social group, recently organized. The inter-racial character of its Watts branch, however, has been virtually destroyed by the purposeful competition of the CYO and the consequent withdrawal of Mexican youths.

The efforts of the YMCA are also consciously inter-racial, but this organization has been unable to reach at all deeply into the lower class community.

Perhaps the best commentary on these various welfare organizations with their conflicting and often none too clearly defined aims is to be found in the fate of the Hollenbeck Council for Youth. This council was composed of representatives from the various agencies engaged in youth work in the district. Since the various agencies could not agree on any program the Council has been unable to take any decisive action, and has apparently drifted into complete inanition.

V

PROGNOSIS

The major significance of race in modern society is that it commonly involves caste position. In its turn caste and the variety of disadvantages which define low caste status becomes the major determinant of class. It is not essentially inaccurate to speak of caste as a set of hereditary disadvantages which sharply limit the opportunities of a group to gain wealth, power and equal access to the privileges of citizenship. These are the consequences equally of class and caste. The essential difference is that these disadvantages are the hereditary consequences of caste, whereas the American class structure permits considerable uncertainty as to what individuals shall occupy particular class positions even though the number of such individuals may be largely determined.

Although caste and class share many common problems, they have each their own sets of problems as well. There is quite as clear a class structure within the Negro caste as there is outside. Although the economic distance between the Negro upper

and lower class may not be so great as the corresponding distance among whites, the differences in outlook, education, conduct and aspiration are even greater. It is a fair generalization that class mobility is the concern of the Negro as an individual and caste mobility concerns him as a race. It follows from this that once middle or upper class status has been achieved the emphasis shifts to caste problems.

It is rather difficult to test this generalization since virtually all Negro organizations are upper and middle class and it is impossible, therefore, to describe the emphasis of a lower-class Negro organization and difficult to guess what its character might be. Yet it is not difficult to describe the differences which would obtain in the rational objectives of such organizations. The most pressing problem of the mass of Negroes is decent jobs, decent housing and decent schools. For the middle and upper-class Negro these problems have diminished in importance and emphasis is on caste equality in its more abstract forms. Thus the energies of these organizations are more likely to be directed toward elimination of segregation, opposition to miscegenation statutes, and the securing of civil rights acts.

There thus develops a separation in the ranks of the Negro based on the distinction between the caste problem and the class problem despite the broad common ground they share. The Negro of West Jefferson and Sugar Hill wages his fight along caste lines. He contributes to the support of the NAACP, the Urban League, Anti-covenant organizations and Negro professional societies. Through his organization he asserts the rights of Negroes to equality of opportunity and equality of treatment. But his organizations have no mass following and reach scarcely at all into the Negro population of Watts and Hollenbeck.

It is to the Negro of West Jefferson and Sugar Hill, the Mexican lawyer, business man or newspaper editor that the interracial organization turns for its Negro and Mexican membership. Thus, a council for civic unity or a Mayor's committee relies heavily upon upper class groups for its minority spokesmen with much the same result. The upper class Negro or Mexican can represent his race only in the universal caste sense and not in the specific class sense. So here too the predominant emphasis must fall on the problems of the caste—equality of opportunity and nondiscrimination.

Interracial organizations are almost always of white inspiration and commonly of white middle and upper class origin. In part the selection of minority group representatives is to a class pattern which cuts across race. In part it is the inevitable outcome of the lack of lower-class Mexican or Negro organization and the lack of paritcipation of the mass of Negroes or Mexicans in any organizational activity. It is probable, however, that there are other factors at work as well. Even to the enlightened white group the Negro and Mexican mass is a problem—subconsciously a problem in management. However sympathetic and however sophisticated it may be about causes and guilt, the Negro and Mexican is still capable of violence and violence directed at the white community. A substantial objective of most interracial committees is the sublimation of this violence. The Negro and Mexican upper class have substantially similar objectives.

Myrdal and others before him have noted that the Negro upper class draws many of its motivations from its drive to be dissociated from the masses of Negroes. There are many evidences of this and there is also much in the dealings by whites with Negroes in Northern cities to support and reinforce this drive. The upper-class Negro is one of the few of his color to have made good a personal escape and he underlines this in the various ways open to him. He lives in a different part of town, places a high value on convention, law and moral behavior, seeks out the respectable church and shuns the evangelical and is at some pains to protect his children from contact with lower-class Negro children.

This is not done from any desire to merge with the white group and to become inconspicious in all respects but color. As things stand this is obviously out of the question. It stems rather from the highly developed race consciousness of those who have surmounted all obstacles but color and the consequent need to assert the fact that the qualities of ignorance, boorishness, aggressiveness and sexual laxity which are commonly charged against the Negro are clearly not characteristics of color or race. It is, therefore, exceedingly difficult for the upper class of Negro society to provide leadership for the mass of Negroes.

The Negro of Adams Heights and Sugar Hill is probably not as much as a generation away from neighborhoods like Central Avenue and Watts. He might have played a conspicuously important role in making articulate and rational the energies and aspirations of the lower-class Negro. But the upper-class Negro tends to seek his security in maintaining the distinction between Sugar Hill and Watts.

The characteristic reform activities of the upper-class Negro are those which are of a race wide rather than of a particular community character. They speak and act as representatives of their race and emphasize those problems which are common to all Negroes, those problems which beset the Negro as Negro and embrace all Negroes irrespective of class. The struggle is against the caste disadvantages. This struggle, however, inevitably encompasses the problems of Negros of all classes since all Negroes are of the one caste.

These activities of middle and upper-class Negro organizations are of real significance and importance to the working class Negro of Hollenbeck and Watts. But they fail to provide the specific leadership so badly needed. The successful breach of a covenant in West Jefferson will not be without some effect on the housing problem in Watts. Overthrow of a miscegenation statute could assist in protecting a Negro working girl in Hollenbeck. A successful struggle against a quota system in professional schools will make its contribution to equality of educational opportunity. Yet there remains the problem of specific leadership for the Negroes of Watts and Hollenbeck, who, had they the means of conscious choice, might defer the problem of discrimination in institutions of higher learning and concentrate on the problem of a specific Junior High School or the brutality of the local police. To such problems as these, the Negro leadership of Los Angeles has had relatively little to offer.

Whatever it is we mean by the solution to the "Negro Problem" or the "Mexican Problem" these concerns lie very close to its heart. An essential condition of their solution is the development in the Negro and Mexican masses of social energy and a rational means-ends apparatus—an organizational mechanism capable of directing the fear, suspicion and discontent into positive, purposeful and effective channels and of leavening the mass as it does so. Neither the Negro protest organizations nor their interracial counterparts promise any substantial achievement in this direction.

Most organizations have a core of hostility. Organization for defense is much the easiest form to achieve. Even those organizations which are clearly aggressive in design are commonly advertised as protective or defensive in purpose. What is generally true of other organizations is absolutely true of minority group organizations.

Depending upon the character of the membership and the purpose, hostility may be explicit or implicit. Depending upon the class status, social position and education of the members hostility will be generalized or personalized. Middle and upper-class organizations, white or colored, will ordinarily proscribe violence. Lower-class organizations, white or colored, may depend upon either the promise or the threat of violence for their existence.

Most of those concerned professionally with race conflict have fallen into the

habit of judging situations according to their potentialities for violence. In this rating scale the race riot is the problem at its worst. Although the riot is the most spectacular manifestation of conflict it is not necessarily the most dangerous. No rational person condones a riot; it poisons the atmosphere for months, it crystallizes fear and distrust and arms antagonism. Yet there is a case to be made for a riot as opposed to a lynching.

The race riots of Detroit and Harlem, the zoot-suit disturbances of Los Angeles, would probably not have occurred in the South or at the very least would have required circumstances more compelling than appear to have been present in Detroit, Harlem or Los Angeles. But we must not be misled and think of a riot only as a high point in disorganization, an advanced degree of disintegration. For the Negro, Mexican or other oppressed minority it can symbolize resistance. As resistance, it frequently develops unanticipated organization and common action, a briefly realized capacity for collective expression.

It may be that such organization is irrational. It is almost certainly illegal or soon becomes so. It is the particular problem of lower-class groups and especially of Mexican and Negro lower-class groups, that organization has seemed to be almost impossible without real or imagined threats to physical safety. Nevertheless the possibility of even such organization as this is a fact of no small importance. The increased capacity for resistance represents a significant part of the gain from the Northward migration.

Most of what has gone before has had particular reference to the Negro and only general applicability to the Mexican. Much less is known about the Mexican and the present inquiry does not add significantly to this knowledge. The generalizations made for the Negro are applied more uncertainly to the Mexican. Despite the undoubted similarity in the broad character of the problem there are distinctive elements as well.

The Mexican has a nationality problem which is not present for the Negro. A substantial proportion of the several hundred thousand Mexicans in Southern California are citizens of Mexico and even for those of American birth or naturalization there is a kind of spiritual refuge in the existence of a sovereign nation just across the border where their color, language and culture is a matter of pride rather than ridicule. The Mexican government maintains a consulate in Los Angeles to look after the interests of Mexican nationals and few of the American citizens of Mexican origin have as powerful a representative as their alien neighbors. The agricultural laborer imported from Mexico to work on California farms works under a contract negotiated for him by the Mexican government in which his rights and privileges are defined. There is no similar protection for the American citizen of Mexican origin.

The second distinctive feature in the Mexican environment is the Catholic Church, which is perhaps the most important institutional influence in the life of the Mexican. The church makes its contribution to the Mexican dilemma by a policy of religious nationalism and exclusiveness which further isolates the Mexican from the general community to which he must some day make his adjustment.

A third element which tends to distinguish the Mexican is his status competition with the Negro. Where as the Negro, particularly the upper and middle-class Negro, asserts the principle of equality to the white, the Mexican is often motivated by a drive for caste superiority to the Negro. In this competition he finds support from the Mexican State and the policies of the Catholic Church as well as from the lighter color of his skin.

It is often said of the Mexican people, that of all minority groups, this is the most difficult to organize. It is difficult to be sure of this generalization but there are im-

portant reasons why it should be so. For the Mexican there is a more complex set of alternatives than for the Negro. His caste disadvantages are not so great and the temptation to seek individual escape is therefore greater. Even if he makes a clear personal identification with the Mexican group he still confronts the alternative of identification with the Mexican State or with the Catholic Church. These are certainly not genuine alternatives and many Mexicans undoubtedly make all three choices. The organizational lethargy ascribed to the Mexican is not an unreasonable result.

It has been one of the theses of this report that the central problem of the Mexican and Negro is paralysis of social will and the central requirement is rational self organization. The need is for an organization in which the lower-class Negro and Mexican can participate and in which he will not be submerged. The need is for an organization which will develop not only leadership but a following for that leadership because through it the vast inchoate majority can become articulate and rational.

Obviously, this is a large order. But the magnitude of the task in no way decreases the need for its successful accomplishment. Much organizational energy and effort is spent on minority groups in Los Angeles. Some consistent direction or redirection of these activities would take us at least part of the way.

It may be that a finding of this character carries with it an obligation to prescribe a course of action in concrete and definite terms. If there is such an obligation we shall have failed to meet it. It would be foolish and idle to claim the specific insights into the nebulous structure of Hollenbeck and Watts that such a blueprint would demand. As much as may be safely attempted are the following hypotheses which must be left for rigorous testing to those whose business it is to work in the community and with the resources that the community actually affords:

1. What is to be built must be an organization of the people rather than of colored and white spokesmen for the people. Every precaution should be taken to minimize ready made leadership and at the risk of a long period of ineptness and ineffectiveness develop the participation of the membership.

2. It needs to be organized around the principle of rational hostility rather than amity and good will. The organization will have a far greater chance of success if it is fully equipped with a set of hostile outside objects and symbols to which its energies may be directed. These should correspond closely to the most widely felt needs of the community—housing, recreation, sewage, schools—and the hostility should be directed to those in whose jurisdiction correction lies. The fault to be found with hostility is not that it engenders conflict but rather the effectiveness of hostility is commonly wasted on irrational ends. In Hollenbeck, the gang which is built almost exclusively on hostility, is one of the more efficient social organizations in the community. There is leadership and equally important, followership, some capacity for self-discipline and an ability to plan and act for goals which are somewhat distant.

3. The organization should be, initially at least, confined to single neighborhoods. An even more important principle follows from this—the initial concentration on concrete neighborhood problems of a highly specific and material character.

4. Emphasis should be placed upon the adult rather than the adolescent. There has been an astonishingly disproportionate amount of energy spent upon the adolescent to the virtual neglect of the adult. Responsibility for the evident lack of balance appears to stem from the class motivated fear of violence on the part of those who allocate the municipal, social work and philanthropic funds of the community. The adolescent has been the principle source of violence in the past and is presumed to be in the present.

5. The organization must be interracial. The Mexican and Negro contend not only with white hostility but with hostility to one another. Although in its initial phases separate organization of Negro and Mexican could be more readily accomplished and with less friction, the interracial organization provides an opportunity for resolving conflict which is totally absent in the exclusive organization.

An organization such as this will not grow by itself. It must have a great deal of sympathetic and inobtrusive assistance. During the period when it lacks leadership it must have guidance until this leadership develops. But strong direction will inhibit the growth of leadership and it will be the development of leadership from unsuspected sources that will prove the yeast its working.

It is by no means clear that such organization offers any greater certainty of accomplishment in the area of objective reform—housing, employment and education. It may be that existing organizations such as the NAACP, the Urban League or the Council for Civic Unity are more rational means to these ends. But there will be no conflict between such an organization and the existing interracial and protest groups. It is the function of the Councils of Civic Unity, the NAACP and the Urban League to educate and play upon the conscience of the white. It is the organization, education and development of the Negro, and Mexican that is proposed here.

WHAT ABOUT OUR SCHOOLS?

BULLETIN OF THE
VOL. XIX
Bureau of School Service
NO. 1
COLLEGE OF EDUCATION, UNIVERSITY OF KENTUCKY

WHAT ABOUT OUR *HEALTH?*

IN HENDERSON

CITY AND COUNTY

PREPARED BY THE

COMMITTEE FOR THE CITY AND COUNTY OF HENDERSON

HENDERSON, KENTUCKY

RECEIVED
JUN 10 1949
Southern Regional Council

HENDERSON COUNTY HEALTH CENTER
FIFTH AND INGRAM STREETS
HENDERSON, KY.

To the People of the City and County of Henderson:

This report is an honest effort to present the facts concerning our unsolved health problems. The report has been written for constructive purposes, and nothing in the report has any other purpose. It should serve as an index by which we may measure future progress.

Many of the problems are not peculiar to the city and county of Henderson alone, but are closely related to the unsolved health problems of the state and nation. A plan of action has been included for meeting the problems that have been presented.

We have one of the finest health centers in the state. We have a new hospital which adequately meets our present requirements for hospital facilities. In the last quarter of a century the tuberculosis death rate has been cut in half; the deaths of mothers and infants, and deaths from diarrhea have likewise been cut in half; diphtheria and typhoid fever have almost been eliminated; and small pox has become a medical curiosity.

There are many other accomplishments which could be given, but this has not been our purpose. We have attempted to present the facts concerning our unsolved health problems, which should be cause for concern to all of us. We believe the people of the city and county of Henderson will rise to meet the challange.

COMMITTEE ON HEALTH FOR THE
CITY AND COUNTY OF HENDERSON

September 1, 1946

HERE ARE THE FACTS ON HEALTH

TUBERCULOSIS

There are approximately 140 persons in the city and county of Henderson with active tuberculosis. There are an average of 14 deaths per year from this disease. Three-fourths of the active cases of tuberculosis in the city and county are not isolated and are constantly spreading their infection to their families, friends and other associates.

Not all tuberculosis has been found. Of the 140 estimated cases in the city and county, only 45 are known to the health department. In at least 50% of the cases, the first report the health department gets is the death certificate. A mobile X-ray unit was in Henderson in September 1945 and open to the public for more than two weeks, but fewer than 1,000 adults took advantage of the opportunity to get a free chest X-ray examination. However, in July, 1946, 1896 were X-rayed in one week's time. There are at least 70 persons in the city and county with tuberculosis who do not know it.

Provisions for treatment are inadequate. We have no facilities for pneumothorax which could give air refills and thus maintain lung collapse for a large number of early cases. The only facilities available to the people of this community ar those in a tuberculosis hospital in Evansville, Indiana, at a cost of approximately $3.00 per day. The State of Kentucky maintains only 10 free beds to take care of more than 10,000 cases of tuberculosis which are not cared for by their own county. A new 100-bed tuberculosis hospital is now under construction at Madisonville, Ky., but it is being built to care for all the tuberculosis cases in 22 counties of this district. The health department does not have sufficient staff for adequate case finding and follow-up procedures. Arrested cases of tuberculosis are not provided with a follow-up program to help them remain free from active tuberculosis.

Tuberculosis cases are not being isolated. There are no adequate laws to provide for the quarantine and isolation of tuberculosis cases. Facilities for isolation in a sanitorium are not available for most cases. There is insufficient health personnel to isolate and quarantine. Families do not recognize the need for the isolation and quarantine of tuberculosis cases. Many people who have tuberculosis cannot go to a sanitorium, be treated at home, or be quarantined, because there are no funds to provide for their dependents.

Tuberculosis is costly. Most cases occur in low income families. The victims are usually in the most productive period of life. When the disease strikes the wage earner in a low income family, not only must care be provided for the patient, but financial assistance may be needed for his dependents. The indirect costs in terms of reduced earning power, broken homes, orphaned children and relief burdens are great.

SANITATION

Filth-borne diseases kill 8 persons in the city and county each year and cause the illness of at least 140 other persons. Diarrhea, or "summer complaint," is a leading cause of infant deaths. Food poisoning causes many serious illnesses each year. Many insanitary conditions exist in the city and county. Few people realize that environmental sanitation is one of the most important factors affecting health.

85% of all rural water supplies are contaminated and potentially unsafe for human consumption. Not only do most rural families have a potentially unsafe water supply, but many do not have an adequate supply for proper health and sanitation. The rural schools do not have a safe drinking water supply.

Corydon has one of the two public water systems in Henderson county. But the water is dangerous for human consumption because of improper maintenance and operation.

The Henderson city water supply is reasonably safe, but could easily become dangerous. The city water comes from the heavily polluted Ohio River, and if for any reason a breakdown occurred in the purification process, serious results could follow. Improper plumbing and cross connections are widespread throughout both Henderson and Corydon. They constitute a serious threat to a safe water supply. There is no plumbing inspector to insure that the proper plumbing installations are made.

The sewer system of the city of Henderson is not adequate. It is a storm and sanitary combined type of sewer. There is no provision to prevent the breeding of roaches, flies, and other insects. There is no provision for preventing the escape of odors and sewer gas. During heavy rains the raw sewage backs up into many basements and some yards. There are more than 262 homes in the city which do not have sewerage facilities available. The system is obsolete in many sections and does

not extend to all portions of the city. The raw sewage is simply emptied, without any treatment, into the Ohio River at numerous points up and down the river front. The Ohio River, itself, is practically an open sewer carrying the pollution and filth from the cities along its course. Engineering plans have been made for the improvement of the sewage system and the building of a disposal plant. The city administration is attempting to obtain federal funds for this purpose. They are now extending the system to most of the city and are attempting to do all they can to correct these conditions.

Three-fourths of the population outside the city of Henderson do not have proper sewage disposal. They are served by open privies or none at all. Few rural homes have flush toilets or bathrooms. Many that have running water simply allow the sewage to empty into open ditches, and do not have properly installed septic tanks and drainfields. There are more than 186 homes and establishments contiguous to the city of Henderson, where city water is available, but where there is no public sewerage system. The city of Corydon has a water system, but no public sewerage system.

Two-thirds of the milk consumed in the city and county of Henderson is not pasteurized. In the city of Henderson approximately 80% of the milk supply is pasteurized. Pasteurization of milk offers safeguards which cannot be obtained in any other way. The war years have forced considerable relaxation of milk standards which are now on the way toward correction. A survey of every dairy in the city and county was made in July 1946. It revealed a 60 percent compliance with the U. S. Public Health service milk code.

The average sanitation grade for food establishments in the city is 87%, and in the county it is 66%. This compares to a state average of 50%. There are 276 food establishments in the county, 181 of which are in the city. Progress has been made in their sanitation, but there is much yet to be done.

There is inadequate veterinary meat inspection. There is a federal inspection in one plant, but no other meat slaughtered in the county has veterinary inspection. Much of it is slaughtered under insanitary conditions without proper facilities.

Almost all garbage fed to hogs is uncooked. This leads to trichinosis, a parasitic disease, transmitted to man by means of incompletely cooked pork.

There is inadequate protection from flies and mosquitoes for three-fourths of the rural and farm population. Many homes in urban areas are not properly protected.

There is no organized community effort to control rodents. Rats are prevalent in the city and county. It is estimated that one rat will consume $22.00 worth of food each year. Rats cause more than $2,000,000 property damage in the United States each year. Rats spread filth and disease.

Stray dogs are prevalent in the city and county. These dogs constitute a serious hazard not only to the people, but also to livestock. There is insufficient control of dogs running at large.

The jails in the city and county need improvement. The city jails of Henderson and Corydon lack both adequate maintenance and proper facilities. They need improved toilet facilities, hand washing basins, bathing facilities, lighting, ventilation, drinking fountains and the other basic items of sanitation. The county jail is in a reasonably satisfactory condition, but should have additional quarters and sanitary facilities. These are essential for properly separating the sexes and in caring for juvenile delinquents that must be detained.

The County Poor Farm's sanitation facilities are shamefully inadequate. The water supply for 33 inmates is provided by only one pump located in the front yard. There is no running water inside the building. The sewage disposal system is composed of two outside privies. There are no inside toilets, showers, nor bathrooms. These facilities are especially inadequate for the aged and infirmed inmates. The building itself is not of safe construction and is a serious fire menace. There is no central heating. There is no nursing service provided except that which the caretaker, his wife, and the inmates can give.

At least one-third of the people of the city and county are ill housed. Many houses in the city of Henderson are neither safe nor fit for human habitation. Many have inadequate plumbing and dangerous cross connections. Many do not have proper sanitation and are not of proper construction. There are no slum clearance projects nor rural housing programs.

There is no housing and zoning commission for the city. There is no commission to control the type of construction, location, sanitation, plumbing, and other similar items that concern housing, trailer camps, tempor-

ary housing, industrial plants, food handling establishments and other construction that has an effect on the safety, housing, and health of the community. A full and complete report on this subject will be made later by the Committee on Housing.

Proper sanitation can be achieved and filth-borne diseases can be controlled only when the people of the city and county realize that sanitation is more a matter of recognition and demand than of legislation and law enforcement.

ACUTE COMMUNICABLE DISEASE

The people of the city and county are not adequately immunized. Immunizations are available to everyone both from private physicians and the health department. Smallpox vaccination is compulsory for school children and is the only immunization program that has been fully carried out.

The following chart is self explanatory:

Type of Immunization	Age Group	Percentage Immunized
Smallpox vaccination	School children	100%
Smallpox vaccination	Birth to 5 yrs.	18%
Diphetheria immunization	Age 9 mo. to 5 yrs.	49%
Whooping cough immunization	Age 3 mo. to 5 yrs.	24%
Typhoid immunization	School children	67%
Typhoid immunization	Adults	20%

Every child should be vaccinated against smallpox at birth or soon thereafter. Whooping cough immunization should be given at three months of age and Diphtheria immunization at 9 months of age. Typhoid inoculation should be started at one or 2 years of age and continued at regular intervals for life.

The quarantine of communicable disease cases is not adequate. The inadequate reporting of diseases, the lack of public information and concern, are the major reasons for failure to quarantine all the cases of communicable disease.

The reporting of communicable disease is not adequate. Serious communicable diseases are reported fairly well, but the less serious ones are not being reported. The health department does not receive sufficient information to prevent the spread of these diseases. This problem is not peculiar to Henderson County alone, but nevertheless it is a fact that communicable diseases are not fully reported. Parents have the responsibility to report cases of communicable diseases which are not seen by a physician, but this is not done.

The public is not informed sufficiently concerning measures to prevent the spread of disease. The majority of people cooperate with the health department when specific quarantine measures are invoked. However, many people do not hesitate to mix in crowds and public gatherings even though they have colds, influenza, whooping cough, chickenpox and many other communicable diseases. Too many people fail to cover coughs and sneezes. Too many people expectorate wherever they please and cause much disease spread. Too many people have attitudes as expressed in the following statement which a mother recently made to the health officer about a school child who had recovered from scarlet fever, but who was still infectious to others: "I don't see why I shouldn't send him back to school . . . that's where he got it."

VENEREAL DISEASES

More than 100 persons in the city and county of Henderson contract syphilis each year. More than three-fourths of these persons are under 25 years of age. Syphilis is a great disabler and killer. One of every eight persons committed to Western State Hospital from the city and county of Henderson is there because of syphilis. More than one-tenth of all deaths due to diseases of the heart and blood vessels have this infection as their basic cause.

More than 600 persons in the city and county of Henderson contract gonorrhea each year. Gonorrhea is the most common venereal disease. It is exceeded in prevalence only by measles and the common cold. This disease causes crippling arthritis and many other conditions such as sterility in women and blindness in children.

Venereal diseases are spread chiefly through promiscuity. Their control will be achieved when all cases in a communicable stage can be found and brought promptly under treatment, and when the city and county of Henderson take a dynamic role in the correction of social conditions which encourage promiscuity.

DISEASES OF LATER LIFE

Heart diseases, cancer, cerebral hemorrhage, and nephritis are the leading causes of death in the city and county of Henderson. Combined, they account for more than sixty per cent of the total deaths from all causes. Nearly three-fourths of these deaths occur in persons

over 60 years of age. These diseases have become leading causes of death in comparitively recent years, and the trend of their death rates is upward.

The control of diseases of later life depends upon their early recognition so that the individual may be informed of his handicaps and can learn to live with them. These handicaps may be found through periodic health examinations. Few persons receive such examinations.

CANCER

One of every 300 persons in the city and county of Henderson has cancer. An average of 28 persons die from cancer each year.

Cancer is deceptive. Of the approximately 100 persons in the city and county of Henderson who have cancer, not more than 40 know they have it. The other 60 do not know they have cancer, and most of them will seek medical care too late for cure to be effected.

Early diagnosis is important. A high percentage of cases can be cured if they are found early and receive prompt, modern and scientific treatment. The diagnosis and treatment of cancer requires highly specialized techniques which are too expensive for many of the victims.

Facilities for treatment are inadequate. Arrangements have been made for a cancer clinic at the New Henderson Hospital. The clinic has diagnostic and therapeutic facilities. However, there has been no general educational campaign to get the people to come in for early diagnosis. Facilities, such as hospital beds for the treatment of medically indigent cancer cases, are very limited. We have only begun to meet the need for the early diagnosis and treatment of cancer.

MENTAL HEALTH

There are no mental hygiene clinic facilities. Facilities for the guidance of both children and adults are very limited. Teachers receive very little mental hygiene training. Many minor mental problems could be corrected if treated early.

There is only limited child guidance and welfare work. Many cases of tuberculosis and venereal disease infections could be prevented by proper welfare work. Many other children are being neglected, maltreated, undernourished, ill housed, and exposed to disease because of an inadequate welfare program. Many adults, especially older people, are not being adequately cared for in the city and county. The lack of proper public welfare service is greatly affecting the health of many of our people. A complete report on welfare conditions will be given when the Welfare Committee makes its report for the city and county.

102 persons were committed to state mental institutions in the last five years from the city and county of Henderson. They are not receiving either adequate medical treatment or general care because of insufficient funds. (Approximately 78c is spent per day for all their medical treatment, food, housing, laundry, and other needs.)

Mental illness is officially considerd a crime. Most admissions to a mental institution are through trial and commitment by criminal courts. Only a few are voluntary. Too many people consider mental illness a disgrace rather than a disease.

At least 400 people in the city and county of Henderson are so mentally deficient as to need supervision. Approximately 40 of these require care in an institution. At present, about 20 of these defectives are in the custody of relatives or friends. Even if we assume these 20 are well cared for, there still remain 20 who need institutional care.

Kentucky has only 25% of the facilities that are needed to care for the feebleminded. Many cases could become self-supporting with proper care and training.

MATERNAL AND CHILD HEALTH

For every 1,000 babies born alive in the city and county of Henderson, three mothers die in childbirth. Of these 1,000 babies, 50 die before their first birthday. Of these 50, approximately half die in the first month of life. Although the death rates for mothers, infants. and preschool children are decreasing, and although they are better than the state average, they are still not up to the national average.

Regular health supervision of infants and preschool children is important. It is effective in reducing the number of deaths and the number of illnesses. The majority of the babies in the city and county do not receive regular supervision from either a private physician or the health department. While some child health conferences are held, there is not sufficient health personnel for holding an adequate number of them throughout the city and county. Much progress has been made, but still the great majority of parents do not seek regular health supervision for themselves or their children.

Regular health supervision of all expectant mothers is important. It will almost eliminate toxemia of pregnancy and other similar conditions. It will prevent at least one-half of all maternal deaths. The majority of expectant mothers do not get adequate prenatal care. Here again additional health personnel could provide regular prenatal supervision to a greater extent if there were more demand for it. Every expectant mother should have proper prenatal care from either the health department or her private physician. Not only would the maternal death rate be reduced, but many conditions could be avoided which cause ill health and sickness.

SCHOOL HEALTH

The school health service can be improved. While there is a fairly adequate school health service, there are many ways in which it could be improved. There is not a proper coordination of effort between the school, the health department, and all other agencies concerned with school health. There is no complete school health record which can be used jointly by the school, health department, and other agencies. Additional health department and school health personnel are needed. School teachers need more courses in health education and should have a greater participation in the school health program. The school curriculum does not include sex hygiene instruction or adequately cover many other phases of personal health and hygiene. Many other items need attention such as first aid kits for all schools, more adequate school lunch programs, and correction of physical defects.

Seven of ten school children need some kind of dental care. A dental survey in the city and county of Henderson in 1945 revealed 70% of the school children in need of routine dental care, 8% in need of emergency dental care, and only 22% completely free of dental defects. A dental clinic is needed. Plans are well under way for its establishment. The clinic will be for indigent children only. An educational campaign to secure more regular dental supervision is needed for the city and county.

One of every three school children has some defect in vision. This was determined by a Snellen vision test survey of the school children of every school in the city and county during th 1945-46 school term. Of the 4,000 examinations made, 1507 revealed a slight defect. Glasses have been provided for about 30 of these cases by a local organization, but this does not adequately meet the need.

There are many other physical defects. Seven out of ten school children have poor posture, and one of ten has an ear, nose or throat defect. Obtaining corrections for many of these defects is very difficult. Special educational facilities, or special classes for those with physical defects are limited.

School sanitation is woefully inadequate, especially in the county system. Only two schools in the city or county have a safe drinking water. In the city schools the water supply is safe, but the drinking fountains are not of a sanitary type. In many of the county schools the water itself is not safe for human consumption. There is no school in the city or county with proper toilet facilities. The defects run all the way from failure to meet the State Plumbing Code to insanitary privies.

There is no school in the city or county with screens, and only four have adequate handwashing facilities. Many defects exist in the city and county school as determined by a complete school sanitation survey made in July, 1946. A copy of the survey is on file at the Health Center and available for public inspection.

FIRST AID AND SAFETY

There are more deaths each year from accidental causes than from any other preventable cause of death, or any infectious disease. The main causes of accidental deaths are falls, motor car accidents, and burns. There is an average of 27 deaths each year from accidental causes.

There is no coordinated effort toward accident prevention. The various agencies concerned are not working together to prevent this unnecessary loss of life and the great number of painful and crippling accidents. There is no general overall plan for education as concerns safety, fire prevention, first aid and accident prevention.

NUTRITION

At least one-third of the people in the city and county of Henderson are undernourished. At least 70% of our people do not get all of the elements of the diet that are needed for good nutrition. Good food habits are important in the development of healthy babies, the prevention of certain physical defects, and the main-

tenance of good health for everyone. At least 50% of our people do not know what constitutes all the essentials of a good diet. Many other do not practice the good food habits they do know.

A city-county nutrition survey is needed. The few surveys that have been made do not provide comprehensive up-to-date information as to the extent and degree of malnutrition. With the specific facts made available by a survey, it would be possible to plan a coordinated program of action.

There is no coordinated plan of action for good nutrition. Various attempts have been made along this line with a varying degree of success. Nevertheless there is little coordination of effort among the several agencies concerned with the problems of nutrition.

INDUSTRIAL HEALTH

Henderson is becoming increasingly industrialized. There are approximately 2,500 industrial employes in the city and county working in some 25 plants. The average industrial worker loses from seven to ten working days per year, less than ten per cent of which, however, is due to industrial injury or occupational diseases. The remaining time lost is due to ordinary illnesses or to other non-industrial causes, a large part of which could be averted by adequate medical and nursing service.

The industrial plants in the city or county of Henderson have extremely limited in-plant medical and nursing service. There is only slight inspection of the working conditions in most of the plants. Many occupational and industrial health hazards exist. There is inadequate medical and nursing service as well as inadequate supervision of sanitation and other conditions, such as lighting, ventilation, first aid and safety.

MEDICAL CARE

We do not have enough physicians. We should have a minimum of 1 for each 1,000 persons, which would be 30 for the city and county. We actually have 19 white physicians and 2 colored physicians, a total of 21 who are in active medical practice. Many of our physicians are getting old.

Physicians under 50 years of age	6
Physicians between 50 and 70 years of age	11
Physicians over 70 years of age	4

We do not have enough dentists. We should have 15 dentists to meet the minimum standard of 1 for each 2,000 persons. We actually have 8 dentists, seven of whom are located in Henderson with one at Corydon. They are no colored dentists in the city or county.

There are less than 30 active registered nurses in the city and county. Two-thirds of this number are employed at the New Henderson Hospital and at the Health Center, which leaves less than 10 active registered nurses for the entire city and county.

Our indigent people are not receiving adequate medical care. Private physicians do a great deal of charity work. The city and county provide for some indigent medical care, and some care in provided by various agencies and individuals. However, our indigent people find it very difficult to secure even the most urgent medical services, and the vast majority are not getting adequate medical care at all because they have little or no money.

Paying for medical care is a problem. Persons with moderate to low incomes have little, if any difficulty, in meeting the expenses of relatively minor illnesses, but find it difficult or impossible to meet the expenses incurred for serious illnesses. For this group, some form of prepayment plan is indicated. An improvement in the manner of paying for medical care is essential to its proper distribution. Whether the costs of medical care should be best borne by taxation, by payroll deduction, or by some similar method, is a matter that needs to be determined.

Patent medicines and self-treatment are prevalent. Great quantities of home remedies are also used without the advice of a physician. Non-qualified persons are prescribing medicine. The health of our people is being endangered by such practices. The money that is spent would yield far greater value if used for scientific drugs prescribed by qualified physicians.

Not many persons get an annual physical examination. Many defects and diseases could be discovered early by a routine annual physical examination and routine laboratory tests. More than 25% of the boys examined by Selective Service in World War II were turned down for physical defects alone. Few people of the city and county get an annual physical examination.

PUBLIC HEALTH ORGANIZATION

Funds are inadequate. Public health authorities state that $1.00 per person is the minimum annual expenditure necessary to maintain a local health department. They recommend an annual expenditure of $2.00 per person. Normally, we spend 53c per person per year, or approximately 25% of the amount we should have for local health service. As a result we do not have the money to have sufficient personnel, nor enough money to pay adequately the personnel we do have. During the years 1940-1946 we have received some extra funds because we were in an extra cantonment war zone. This extra money will not be available in the years to come, and we will have to have more local funds or curtail our program.

We do not have sufficient personnel. A full time health officer is needed for the city and county. The Kentucky constitutional limit on salaries makes it difficult to secure a well qualified competent full-time Health Director. We need additional public health nurses, sanitary inspectors, an X-ray technician, a health educator, a public health dentist, a plumbing inspector, a veterinarian, and several additional clerks.

We do not own our present facilities. The health center and most of its equipment is the property of the Federal Government as represented by the Federal Works Agency. We are using the facilities without charge other than the cost of maintenance items. Some day, the city and county will be expected to buy the health center from the Federal Agency.

COORDINATION

There is no coordinating agency, or group, for health. Many different groups and agencies are at work on many different phases of health work. There is considerable duplication of effort and overlapping of activities. There is no group nor agency to coordinate all of these efforts toward better health in the city and county.

CONCLUSION

While we may be justifiably proud of our health accomplishments, we most certainly must view with alarm our many serious, unsolved health problems, which are cause for concern to everyone of us. We must recognize that we, the people, are the greatest resource of the city and county, and that the promotion of good health is fundamental to the conservation of that resource. We cannot afford to ignore nor neglect the problems that have been presented.

PLAN OF ACTION . . .

If we are to solve our health problems, we, the people of the city and county must recognize these problems and take appropriate action. The following plan of action is suggested. It is necessarily broad and general in scope.

1. Give the widest possible distribution of this information to the people of the city and county.
2. Use every possible means to help the people recognize the problems and to take the necessary action.
3. Use existing agencies wherever possible, helping to develop the popular support necessary in solving many of the problems.

TUBERCULOSIS

1. Establish sufficient hospital beds and treatment facilities for every case of tuberculosis.
2. Provide sufficient free beds and treatment facilities for indigent cases.
3. Provide funds for the dependents of cases of tuberculosis.
4. Encourage chest X-ray examination for every adult over 15 years of age.
5. Establish a tuberculosis clinic with facilities for giving pneumothorax.
6. Develop public opinion to demand the isolation and quarantine of every case of tuberculosis, and to provide the necessary support and laws for this purpose.

SANITATION

1. Provide a safe and adequate water supply for every person.
2. Provide a safe and proper sewage disposal for every person.
3. Pasteurize all milk sold to the public and encourage the proper handling of all milk consumed.
4. Demand cleanliness and sanitation by patronizing Grade "A" food establishments.
5. Provide local veterinary inspection for all meat slaughtered for public consumption.
6. Cook all garbage fed to hogs.
7. Provide adequate protection against flies and mosquitoes for every person.
8. Make a continuous and concerted effort to control rodents and other infestation.
9. Control stray dogs and dogs running at large.
10. Establish adequate santiary and fireproof facilities for all jail and county poor farm inmates.
11. Provide adequate housing for all the people of the city and county.
12. Provide for a plumbing inspector and a housing and zoning commission.
13. Eliminate the pollution of streams.
14. Encourage all phases of environmental sanitation.

ACUTE COMMUNICABLE DISEASE

1. Encourage proper immunizations for every man, woman and child.
2. Secure the reporting of all communicable diseases.
3. Secure the proper isolation and quarantine of communicable diseases.
4. Provide information for the public on the prevention of the spread of disease.

VENEREAL DISEASE

1. Endeavor to find all infected persons and bring them promptly under treatment.
2. Enforce the law against prostitution and control promiscuity.
3. Correct the social conditions which encourage promiscuity.

DISEASES OF LATER LIFE

1. Provide a physical fitness program to encompass mental hygiene, recreation, moderation, and the intelligent use of leisure.
2. Establish facilities for periodic health examination and encourage their use.

CANCER

1. Expand greatly the clinics and other facilities for finding cancer early.
2. Make provision for the prompt treatment of all cancer cases.
3. Provide nursing homes for incurable cancer cases.

MENTAL HEALTH

1. Establish mental hygiene clinics and foster mental hygiene.
2. Provide adequate support for our state institutions for the mentally ill and defective.
3. Review and modernize our laws pertaining to the mentally ill and defective.
4. Provide adequate welfare service for children, aged, and indigent persons.

MATERNAL AND CHILD HEALTH

1. Encourage and provide for regular health supervision of all infants and preschool children.
2. Encourage and provide for regular health supervision of all expectant mothers.

SCHOOL HEALTH

1. Provide an adequate school health service for every child.
2. Secure the correction of all correctable physical defects.
3. Establish proper buildings, equipment and sanitary facilities for each child.

FIRST AID AND SAFETY

1. Coordinate the efforts of all groups interested in first aid, safety, accident and fire prevention.
2. Encourage those procedures that will prevent accidents and disseminate such information to the people.

NUTRITION

1. Conduct a survey of nutrition and its problems in the city and county.
2. Disseminate information concerning good nutrition to all the people.
3. Coordinate all the efforts various agencies are making which are concerned with nutrition.

INDUSTRIAL HEALTH

1. Provide industrial hygiene inspection service and eliminate all conditions contributing to ill health.
2. Provide adequate medical and nursing service.
3. Encourage periodic health examinations of all employees.

MEDICAL CARE

1. Train more physicians, dentists, nurses, and other professional persons for medical and dental care.
2. Provide for adequate indigent medical and dental care.
3. Provide some form of prepayment of medical care to secure its proper distribution.
4. Discourage the use of patent medicine, the prescribing of medicine by non-qualified persons, and the use of home remedies.
5. Encourage periodic health examinations.

PUBLIC HEALTH ORGANIZATION

1. Provide adequate financial support.

COORDINATION

1. Establish some agency or group to coordinate all the activities of the various agencies doing any type of health work.

CITIZEN ACTION IN KENTUCKY

by

JAMES W. ARMSTRONG

DIRECTOR OF COMMUNITY ORGANIZATION
COMMITTEE FOR KENTUCKY

(Delivered before the Third Annual Conference of the Georgia Citizens Council, Atlanta, Georgia, on October 14, 1946.)

Ladies and Gentlemen:

It is with a feeling of pleasure, honor and responsibility that I appear before you this morning to represent the people of my commonwealth, through the citizens Committee for Kentucky. It is a pleasure to meet in conference and workshop with men and women from our sisterhood of southern states, leaders who are laboring to revitalize American life at its foundations. It is an honor to appear as one of your speakers. It is a responsibility to act as the voice for a great movement in which many and varied groups of citizens in Kentucky have joined in the common cause of the Commonwealth.

I come here as no calumnist of southern life and conditions. I believe inthe southern heritage. I believe that many of the people of the South and many sections of the South have achieved a charm and grace of living in which the spiritual and material factors have arrived at fine balance. I believe that the South's traditional emphasis on grace of living, the importance of people, the value of family and home, the love of countryside--the fields, the hills, the sunny skies--the courage, the pride, the deep religious faiths of our people has created a heritage that places human personality above material wealth, makes full living more important than insensate activity, and offers the Nation valuable counterbalance in an age of frustration.

Lieutenant-Governor elect Thompson has painted an inviting picture of the future of the South. It excites the imagination, moves us to set our hands to this ennobling task. I subscribe to the belief that, barring international catastrophe, the forward march of the South is inevitable. It is inevitable because for year after year important foundations for that progress have been laid. It is inevitable because gathering social and economic forces, now converging, have the necessary power and leadership to bring this vision into reality.

Sixty years ago one of Georgia's most noted sons and Atlanta's beloved citizen, Henry W. Grady, spoke these prophetic words before the New England Society of New York:

> "There is a new South," he said, "not through protest against the old, but because of new conditions, and, if you please, new ideas and aspirations."

More prophetic than true, perhaps, in 1886, but new conditions, those of which he spoke, and those unforeseen by his generation, have produced economic and social developments that give to the South an undergirding strength upon which new ideas and aspirations can now be solidly founded. In the slow march of time we are likely to overlook the basic developments which have taken place within the lifetime of adults present here today. It is my belief that although there are immediate causes which have given birth to the popular movements which we represent, there are more fundamental causes from which they spring. Our own organizations may fail.. It may happen; we do not know. The opposition of reactionary forces may engulf them. That is conceivable. But the fertile womb of the new South will produce new organizations to take their place in ever increasing number. The South will not be denied its future. Opposition may momentarily check, but it can not permanently block our forward march.

Now what are the developments so pregnant with meaning to the new South? We all know about, but do we fully appreciate, the social and economic developments which modern transportation has brought, is bringing, and will bring to the South? Within our times modern transportation is transforming it. Henry Grady could not foresee that.

Nor could Henry Grady foresee popularization of higher education which is swelling the enrollment of our colleges and universities, making possible to young men and women of all walks of life opportunities available only to students of financial means a generation ago.

He could not look into the future to see the developments of a scientific age in which chemistry has unlocked the mysteries of the soil to develop scientific farming, in which scientific breeding has produced quality lifestock that did not walk the earth a half century ago, in which invention and mass production is producing the means by which man has learned to make a slave of the machine in order to abolish the slavery of man.

Nor could Grady have foretold the developments of the social sciences in which psychology, economics, sociology, and political science have produced a knowledge of the workings of the human mind, and the relationships of human beings, from which thousands of applications are daily being made in business, in the home, and in the community--as well as in our regional and national life.

And what about the development of the modern newspaper with all of its departments of service, the radio with its educational and cultural influences?

What about the influence of two world wars which have taken men and women from the last cabin on the remotest ridge to give them world knowledge? They have seen the Taj Mahal in India, serviced B 29's in the Philippines, and slept in Baronial castles in Bavaria. They are bringing back riches beyond compare.

What about the practical demonstrations in slum clearance, the experimental and demonstration farms, the influence of county farm agents and home demonstrations, the rural library services, the creation of great waterway projects, the development of small income homes with the modern conveniences of heating, cooling, and electrical appliances?

Mr. Thompson has mentioned the great flow of industry toward the South. He also could have mentioned the great flow of visitors during the winter months because of the South's favorable climate. But the scenic beauty of the South is also attracting a year-around tourist trade. Incidentally, since the subject has been mentioned, may I say that in Kentucky we are pushing the development of our parks, not only because of their recreational value to our people, but because they also offer an economic resource to which the South is awakening.

The very fact that we are here today, representing, so I am informed, 12 southern states, is made possible by the social and economic developments which I have mentioned. It is easier for us to assemble here from this great Southern region than it would have been to assemble representatives from any one of our states 25 years ago. The social organization of masses of people on a regional, and even on a national, basis is a distinctly modern phenomenon. It is possible in America today, on a large scale, as in no other country in the world.

Now the point that I am making is that from these developments there has come an awakening to the vast opportunities which the South now affords. Our business leadership is aware of these developments. During the past quarter century the masses of our Southern people have had experiences beyond our borders that give them comparisons and contrasts from which are arising a demand for the refinements of living. There is arising a voice of protest at social and economic inequalities. There is a growing recognition that full living for the people who toil can be secured only by adequate cash income, and there is a growing knowledge on the part of all of us that we must have a broader economic base in order to sustain by taxation the benefits of education, health, and social welfare. There is developing in the South, as in all regions in the Nation, a growing consciousness that through organization the people can make themselves felt. Furthermore, our returning veterans, and others who served in the war, have a deep feeling that if the American way of life is worth fighting for, then it must be found in evidence in the communities and the regions in which we live. All of these developments are creating a dynamic social force which will not be denied. They are forming the matrix from which citizen movements are being born.

II

There are the fundamental causes behind our organizations, but there are also immediate causes, the incidents which give rise to their birth.

In our Commonwealth, the incident which gave rise to the Committee for Kentucky was the 1943 state election in which the Republican party elected their candidate for governor, but the legislature remained under Democratic control. Kentucky had had a bitter experience when this situation developed under a previous administration a few years before. In a long, running conflict between the legislature and the governor, the power of the governor had been reduced until his only remaining prerogative was the appointment of notaries public. This degrading conflict had produced a stalemate for constructive legislation. It was the people of Kentucky who suffered.

Fearing the repetition of such a stalemate, the Kentucky Merchants Association, meeting in Louisville shortly after the election, adopted a resolutionto be sent to both the governor and the legislators, calling their attention to what had previously happened and petitioning them to work together

for the welfare of the Commonwealth. Believing that a stronger effect would be produced if other organizations took similar action, this association sponsored a meeting to which representatives from other state-wide organizations were invited, and the outcome of this meeting was a unanimous agreement to the proposal. With its business transacted, this representative group was about to adjourn. From the back of the room Joe Betts, representative of the Kentucky Farm Bureau Federation, asked for the floor. "If this action which we have taken for a specific purpose is beneficial to Kentucky, "he said, "why wouldn't it be well to form a permanent organization working for the welfare of Kentucky?" This was the incident which gave birth to the Committee for Kentucky.

Now note its characteristics. It was born in a spirit of cooperation. It was created by powerful state organizations, thinking of self interest, yes, but for the first time envisioning the welfare of all of Kentucky and all of the people of Kentucky, and all of the interests of Kentucky, and sensing, that together they could accomplish that which was separately unattainable. It was putting the power of the people behind a non-partisan, non-sectarian, non-profit, inter-organization, dedicated to the welfare of the Commonwealth. It was the evidence of a modern technique of democracy--inter-organization--the outgrowth of social organization, made possible by the basic developments of which I have spoken.

Note also that, although it was independent of government, in its action was an implied influence on government and the excresences of party politics. It was demonstrating the steadying influence of the mass of citizens. There was the voice of protest there, but also the voice of opportunity, and the desire for constructive programs of legislation, and the love of the state in which we live. Today in America we are seeing vital democratic movements arise that represent the social and economic protest of the underpriviledged. But here is a movement born not on the other side of the tracks, but of well established, successfully operating organizations and top-flight executives. It is an indication that democracy can operate from both directions, that we do have devoted and broadgauged leaders who are interested in the general welfare and the common good.

A board of directors was formed. Here again we have evidence of the democratic process at work. An attempt was made to get a cross section of the vital interests which make up the social and economic life of the state. Business and industry were represented; so was labor; so were the farmers, the doctors, the druggists, the Negroes, the editors, radio, the teachers, the women's clubs. Brought together for the first time in the history of our Commonwealth were representatives of groups which had often found themselves in opposition, now seeking to find areas of agreement for the welfare of Kentucky. No one of them represented Kentucky. No one of them could speak for the Committee. But together they represented a great cross section of the Commonwealth, and together they could speak for the Committee and rather well for the people of the state. Is not such action the crying need of our times? Is not the great obstacle to social and economic progress the conflict between groups and sections? Is not the solution for our ills to sit down together to work out our mutual destiny in America? Do we not all gain individually by the process? Such was the thinking of the Committee.

The Committee made a modest beginning. Harry Schacter, president of the Kentucky Merchants Association, was elected president. He gave the Committee an office adjoining his in the Kaufman-Straus Department Store, of

which he is also the president. He hired a secretary and started to work.

How much depends upon the initial leadership of a movement! Harry Schacter is a man of great spiritual stature. He is a man of vision, a tireless worker, a man with an exhuberant passion for the democratic process. Add to that his financial ability--how important that is in a movement that is standing on its own legs financially. He gave lavishly of his time to the Committee--without charge; he made it his consuming passion without regard to its physical demands, which at times have been terrifically heavy. He conferred; he spoke; he worked.

Slowly the activities of the Committee expanded. The central project upon which the Committee concentrated was the projection of ten fact-finding studies on general problems confronting the state. The problems selected were agriculture, health, education, the state constitution, welfare, housing, industry, labor, natural resources, and taxation.

Note here again the thinking of the Committee. It was considered essential that a broad approach should be made to the problems of the Commonwealth. Many of them are interlocking. Progress in one can not be made without progress in another. Furthermore, the reports were designed for the people in general. Much attention has been given to their brevity, their format, the ease with which they can be read and understood, the thinking which they will stimulate. It was believed that people in general do not know the facts about their states; they do not know the problems whose solutions must be worked out in order to develop progress. It was believed that giving the people the facts was the first step in the solution of our problems, that the facts would arouse thinking and discussion, and that out of this discussion come common understanding and action.

You will understand from what I have just said that the Committee considers its primary function to be educational. It recommends certain broad soluations in its reports but sponsors no bills before the legislature, nor does it engage in lobbying.

The studies are conducted by experts in each particular field, are brought to the board of directors for the criticism and suggestions of all of the directors, and then are presented to a meeting of representatives of the member organizations for similar review, before being released to the general public. They are then used by the schools and universities, by civic groups, in fact, by any group in which discussion can be promoted. Four studies have been completed--agriculture, health, education, the state constitution. The reports on welfare and housing will soon be printed. Other studies are in various stages of preparation. We have been forced to run reprints on our first studies because of the public demand for them.

Other activities were added. The powerful radio station WHAS, in Louisville, offered to run a radio program for the Committee under the slogan, WAKE UP KENTUCKY. Their offer was accepted. We have with us here in our Kentucky delegation Miss Dorcas Ruthenburg, the present writer and producer of this program. I would like to have you meet her. Her competence is attested by the fact that WHAS received the Peabody Award for public service last year for her WAKE UP KENTUCKY Program. She is doing a great job for Kentucky. Other radio stations over the state have cooperated by rebroadcasting this program. This year the program will bear the title, KENTUCKY ON THE MARCH. So you see that we believe that we are making progress.

The Louisville Courier Journal, the largest newspaper in the state, has given our reports widespread publicity by publishing most of them in full in its Sunday edition. Other newspapers in the state are likewise giving cooperation. The Kentucky Press Association is represented on our Board of Directors. Lee Coulson, manager of WHAS, is also a director. A syndicated column for the Committee written by Ewing Galloway, a prominent Kentuckian, appears in over 85 Kentucky papers. First appearing under the heading WAKE UP KENTUCKY, it now follows our new slogan, KENTUCKY ON THE MARCH.

An executive director for the Committee has taken over much of the administrative work first carried by Mr. Schacter. He is an able administrator, an excellent speaker, a native Kentuckian thoroughly acquainted with the problems of our state. His balanced judgment, his winning personality, have furnished solid direction to our work and made many friends for the Committee. I would like for you to meet him too.-Mr. Maurice D. Bement.

Some of the influence of our work can be judged when I tell you that our state legislature held a special joint session for the sole purpose of hearing the story of the Committee for Kentucky and the facts revealed in the first four studies made by the Committee.

III

Now from the inception of the Committee's work it was intended that the program should be carried to Kentucky communities. Community--what a word that is! The life we have in common--the place where we live. It is the home--our families, our children, our parents. It is our friends, our neighbors, our fellow townsmen. It is the place of our work, where we spend our days, where we spend our lives. It is the only real world we know, the place in which we come face to face with other people, work out our human destinies, the place in which we count, if we are to count at all. Out of the mass of millions, in community we have special identity, are called by our name, are a sight gladdening to someone's eyes--some woman, some man, some boy or girl. How important--how important-how important if it is only a dog that wags her tail when we come into the drive, and sticks her muzzle in our hand.

Community--here is the dynamo of human life. If it weren't for community influence, life would run down. It would exhaust itself like a storage battery. Somewhere to mark forever in your mind as the place in which you were born--somewhere to have your home--somewhere to marry--somewhere to have your children--somewhere to have them grow up into useful men and women--somewhere to join at long last the procession that leads to your father and your father's father. Community!

How many millions of men fighting in the mud on the far-flung battle fronts remained there faithful to mission and duty because they held in their mind a picture, a picture of home and loved ones, the old familiar scenes their community, a picture of the daily way of life in which they had placed all of their faith to the last ounce of their energy and to their last breath. it was a picture of America, but it wasn't an abstract map which they held in mind. It was the one tangible, vivid, meaningful image of the ones and place they loved best--home and home town--community.

If we do not find the democratic way of life in our communities then we will not find it at all. If our communities do not find it, then America can not find it. As our communities go, so goes America. Let's make no mistake

about that. The spiritual flow of life begins at the bottom of the spring--the community. Choke it off there, and you have choked the Nation. Pollute it there, and you pollute the Nation. Maintain it there--clear, fresh, abundant--and the Nation will be ever sustained.

So after the work of the Committee had been set up on the state level, it installed the Department of Community Service, of which I am the director.

Now our point of view in our community work operates on three levels: first, the individual; second, the organization; third, inter-organization.

We are conscious that the individual must be awakened in any program that seeks to reinforce the American way of life at its foundations. The individual is the one who has been so largely lost in the American scene. By the individual I mean the man who is sometimes referred to as a member of the rank and file. He has lost his feeling of importance in the operation of community life and all that goes beyond it. He has lost his sense of participation in political life. He has taken a terrible beating in an age of regulation. He has received innumerable orders passed down from the top. In war and in depression his ideas have been little heard. In our cities we have thousands of people who have been so often uprooted that they have lost all feeling of identity with their community. With this weakened mental outlook they have often permitted themselves to fall into a condition of cynicism, apathy, and defeat. They have their job, perhaps their family, but take little interest in anything else. It doesn't occur to them that the multiplication of this condition permits corrupt political machines to take over local government. It was this condition that permitted dictatorship to ride rampant over the democracies of Europe.

We must restore to the ind vidual his sense of importance. We must make him know that one way or another he not only counts but is counted. There is no one so lowly, so humble in his position in the community that he can not represent a vital force in its life. I have in mind a recent experience in one of Kentucky's smaller cities. I was there alone. After I had completed a speaking engagement I went back to my hotel. I went into the dining room to order a meal. It was a colored waiter who served me. There was something about his attitude that attracted me. I could tell immediately that he was interested in rendering a service, that he wanted to give me the best which the hotel cuisine had to offer. He wasn't obsequious, he waan't overly attendant. It was merely the kindness of one human being to another--and in this case, to a stranger in his town. When I had finished the mean he walked to the door of the dining room, held it open as I departed and said, "Come again." Without knowing it, he was an ambassador of good will for his community. He was selling his town. The tourist doesn't see the mayor, the high officials of the town. He meets the waiters, the clerks in the stores, the people on the street, the gasoline attendants. It is their attitude, their friendliness, their helpfulness, their courtesy that gives him an impression of the people of the city. I repeat, in some way we must make the individual feel his importance. We must re-establish his sense of participation in community life.

The second level of our community approach deals with the organization. Nearly every organization is capable of making a valuable contribution to its community--if and when it catches the vision of larger service. It is naturally expected that an organization will render a service to its members, but when it begins to study its community's needs and the possible part which it can play in meeting them, it enters into a dynamic relationship with the community.

Furthermore, in the organization, the individual takes on collective strength. He no longer is alone. He absorbs the resources and prestige of his organization. A democratic organization--one in which the voice of the individual is heard--offers a channel through which the individual's ideas, wants, and proposals receive outlet. Through organization he takes on larger size and range.

Another aspect of the organization is important to our work--the statewide and national connections of the local group. These connections form a channel through which influence flows in both directions. This channel is a modern social resource of great significance.

So much for the point of view.

Now how do we work with the organization to stimulate community interest and action?

First, by means of the Committee's statewide member organizations we have been able to push community development. An increasingly large number of state organizations are adopting community themes and developing community projects through the local organization. I have had the pleasure of appearing before the state board of one organization, to work with it in four regional meetings, and with several local groups from which community programs were launched. It has given the Committee definite proof that a state theme for community building can be brought down to the local level and put into action.

Second, our member organizations are opening their state publications to us for articles and materials on community. This is developing into an extensive project in itself.

Third, we are giving assistance to local organizations in which community service is an established policy, furnishing them speakers on general or special community subjects, and providing them with newspaper articles to be run in their local press.

The third level of our community approach deals with inter-organization. The point of view here is that a town may have a few active organizations, but until these organizations have learned to work together and pull together the community can not hope to move forward with unity and strength.

A community may be divided, torn by dissension, the projects of one group may be blocked by another. A good cause may fail for want of general support. How often the vital work of one organization in a town goes unappreciated by the general community. How often one group, charged with great responsibility, is not understood, is not supported by others. It may be the agencies dealing with youth. It may be the schools, the YMCA, the Scouts. It may be some pastor laboring to bring spiritual life to his community. It may be the Farm Bureau attempting to raise the productivity of the region on which community purchasing power depends. It may be the Board of Trade attempting to bring new industries into the town in order to give employment to people who need jobs. It may be the laboring men who need better homes, places of recreation, something to make life more than a job. It may be--anyone.

Regardless--one of the community's greatest needs is for groups to cooperate in order that together they can produce a rich and full community life.

Everyone is needed in a community. Every group has a part to play. We are interdependent. We need competent and happy workmen. We need intelligent merchants to furnish goods. We need skilled tradesmen. We need doctors and lawyers; we need teachers and preachers. We need a healthy and well-trained youth to renew the human resource. We need prosperous farms to produce the basic wealth from which our cities spring. We need wise and devoted town officials. We need everyone. We depend upon one another. We cannot go forward except as we go forward together. The ills of one are the ills of all.

What a town--the town that has sensed its interdependence and has produced a community spirit that promotes working together. What a town--the one where the interests of one are the interests of all. What a town--the one that has produced the mutual helpfulness from which community progress springs. There is a town that people like to visit, where people want to live. There is the town in which human aspirations can be fulfilled. There is the town that can plan, can shape itself into a thing of beauty. There is the town that can produce leaders for the state and leaders for the nation. There is the town that is making America great, and democracy a force in the world.

No group can do a vital job in a community-alone. We are seeing that. It can't be done. The school teachers and the school administrators cannot deliver a powerful program of education without community support. It takes the cooperation and understanding of the parents. It takes the understanding and financial support of the whole town. The teachers cannot do it alone. They can't. The pitiful plight of education today, the scarcity of teachers, the inadequate physical plants--what is the cause? Where is the blame? It is ours--the whole people. We haven't been interested enough. We haven't cared enough. We haven't worked enough--together. And what will solve the problem? Common effort. And only that.

That is but one of the many examples.

The Committee has sponsored a project in community cooperation in Kentucky. I am happy to say that it is in my home town of Henderson. I am equally happy to say that I have had a hand in it. Henderson is a town of about 20,000 people that lies on the broad winding Ohio, more than midway down the state. It is an old town, strong in pride and tradition, and filled with fine people. There is energy there, and resourcefulness. We have worked out many things--there is a state park, a splendid new hospital, a modern health center, new industries for the post-war world. Nevertheless it was a good place in which to put to work the gospel of community cooperation, in order to observe its fruits and to furnish the Committee a practical testing ground for its community program.

Can a community be moved by the gospel of working together, studying its full community needs, finding the facts about its problems, and devising programs which will make it a better place in which to live? I am here to attest that it can be done. Can the people of the urban community join with the people of the surrounding rural area for the purpose of working out their inter-relationship? I am here to attest that it is being done. I have seen the project created. I have watched the exhilarating process of its development. In a Town Hall meeting more than 2,500 people filled our high school gymnasium, while others were turned away from the doors. Five fact-finding projects were set up, taken over by competent community leaders, aided by professors from the state university. Two of these reports have now been completed and reviewed in fashion similar to the procedures of the Committee for

Kentucky. One of them has been given to the public in a second Town Hall meeting. It can be done. It is being done. We are witnessing it. I will not take time here to enlarge upon the project since it can be brought before your workshop groups, but I wish to say here in this general assembly that it is a heartening example of what people in communities, by their own efforts, can accomplish.

We have with us in our delegation the publicity director for our organization, which has been named the Committee for the City and County of Henderson. May I introduce her, too. I am pleased to inform you that she is my wife. Francele Harris Armstrong, a journalist in Henderson.

Well, this is the story of citizen action in our Commonwealth. I have outlined something of its philosophy, some of its methods as developed by the Committee for Kentucky. Our faiths are simple. They rest in the dynamic processes of democracy and are blessed by religious doctrines that declare the brotherhood of man--all men. They rest in the belief that human personality thrives best under free institutions, that the spiritual force flows from the base of life, that free people aspiring together, planning together, working together can produce for the world a pattern for better living. We believe that we have the skills, the knowledge, the resources in this land of ours to give shelter, food, clothing, and enlightenment to our people--all of them. We believe that the South has a great destiny, that all of us in this beloved region are working in the same cause. We believe that we have work to do and are happy doing it.

But the press of our modern age is upon us. The sand streams through the hour glass with accelerated speed. In an atomic age the race between human values and human destruction will come to its crisis within our times. What shall be the outcome? We must take it in our hands to determine. We must win the victory for humanity, that the outlook of life will be increasingly bright for our children and our children's children.

REPORT OF PROGRESS

FROM THE
Committee for Kentucky
427 S. Fourth St., Louisville 2, Ky.

OFFICE OF THE
PRESIDENT

Number 13 March 20, 1948

This is the 13th Progress Report we have sent you. Not being superstitious in the slightest, we would cheerfully like to report to you what has happened since December 20, when the last Report of Progress was sent to you. During these three months some fateful decisions have been made by your Board of Directors. A number of interesting and important things have happened. Here are some of the high lights:

Item - Revisions of Reports on Agriculture, Education, Health, and Public Welfare are now in printed form. They tell a heartening story of the progress Kentucky has made in these fields in the last few years. We want to emphasize and reemphasize that the Committee for Kentucky, even though it publishes these revisions, does not take the credit for the progress that has been made. The spirit of the times has definitely been on the side of progress. However, no informed person will deny that the Committee has made a not inconsiderable contribution to this progress. We shall be glad to send you copies of these revisions upon request.

Item - Labor Report. The Labor Report is now in printed form and is fully worthy both in form and in content of taking its place beside the other seven printed reports. We shall be glad to send you a copy at your request.

Item - Report on Taxation. Dr. James W. Martin is now at work on this all important task. We had hoped to have it ready sometime this spring, and there is still an outside chance that it may be ready before summer starts. However, the demands on Dr. Martin's time, especially with the Legislature in session, have been so great that the report may well have to be postponed until fall. Whenever it is ready, it will be well worth waiting for, for Dr. Martin enjoys the reputation of being one of the foremost tax experts, not only in Kentucky but in all America. This was recognized when he was chosen President of the Tax Institute, a national organization.

Item - Galloway's Column. Ewing Galloway's column, "Kentucky on the March" continues to gain more attention and recognition. Starting two years ago with less than 40 newspapers using it, the column has continued to gain and is now being run in 119 newspapers out of a total of 200 in the State. This is a tribute, not only to Mr. Galloway, but to our Kentucky newspapers for the keen interest they show in the progress of our State.

Item - Radio. Radio continues to play a dynamic role in the Committee for Kentucky program in creating a better understanding among our people and in

spotlighting Kentucky's progress. The new radio series, "The Kentucky People's Platform", produced by Radio Station WHAS and written by Dorcas Ruthenburg of that station, went on the air Sunday, December 21, 1947, as scheduled. This feature is also carried by other stations over the State such as WVJS, Owensboro; WIHN, Louisville, WLAP, Lexington; and WKYB of Paducah. Yes, radio continues to keep Kentucky on the March.

Item - Legislative Hearing. A joint hearing before important Committees of the Senate and House was held on February 17 for the purpose of presenting the People's Legislative Program for Kentucky, which was developed under the auspices of the Committee for Kentucky.

Radio Station WHAS transcribed the total proceedings which were broadcast that night for a full hour, 9 to 10 P.M. A copy of the Program is attached at the end of this report.

Item - Natural Resources Report. Since our last Progress Report the Committee on Natural Resources, chairmaned by Dr. Arthur C. McFarlan, Head of the Department of Geology, University of Kentucky, reported to Representatives of Member Organizations of the Committee for Kentucky on January 8. You no doubt saw the review of this report in Kentucky's newspapers. We feel that Dr. McFarlan and his Committee have done a superb job and that this report, when published, will be worthy of taking its place along with the others.

Item - The Virginia Publication. Jean and Jess Ogden, Community Specialists of Virginia, after their visit to Kentucky, wrote and had published a University of Virginia Extension Division Bulletin titled "Facts to Folks to Action". This twelve-page printed pamphlet is devoted in its entirety to the organization and program of the Committee for Kentucky. This publication enjoys a national distribution. We are naturally quite proud that our Virginia friends--the Ogdens--thought enough of the Committee to devote one entire bulletin to our program.

Item - Community Service. James W. Armstrong, our Director of Community Service has been appointed Chairman of the Community Participation Section of the National Conference on Family Life to be held in the White House on May 6, 7 and 8. His Committee is preparing material on the Community and Family Life for the National Conference. It consists of the following members:

James W. Armstrong - Chairman - Director of Community Service, Committee for Kentucky
Jess Ogden, Extension Division, University of Virginia
Wayland J. Hayes, Head of Department of Sociology, Vanderbilt University
Howard W. Beers, Head of Department of Rural Sociology, University of Kentucky
Irwin T. Sanders, Head of Department of Sociology, University of Kentucky
Francele H. Armstrong, Editor, "Your Community Reporter," Committee for Kentucky
Lon Sullivan, Director, Georgia Citizens Council
John W. Herring, Secretary, New York State Bureau of Adult Education

Harold S. Buttenheim, Editor, The American City
Robert A. Luke, Executive Secretary, Adult Education Council of Metropolitan Cincinnati
Jean Ogden, Extension Division, University of Virginia
Jack C. Grieg, Executive Director, Henry County Council on Intergovernmental Relations, Newcastle, Indiana
Mrs. Frederick A. Kuser, Secretary, New Jersey Citizens' Conference
William Pearson Tolley, Chancellor, Syracuse University
Coolie Verner, Extension Division, University of Virginia
Margaret Snyder, Extension Division, University of Virginia
Vlad Sullivan, Georgia Citizens Council

Item - International Recognition. The following is a letter from Mr. Henri Francois Tecoz, from the province of Utrecht, in the Netherlands:

"Dear Sirs:

We are taking steps to begin in the province of Utrecht, as a first experiment in the Netherlands, a Provincial Development Committee to some extent analogical to what your Association is doing in your country.

We should therefore be very glad to come into contact with your organization in order to exchange experiences and suggestions and to receive publications.

We feel that, in the beginning, we shall probably be your dobtor, but hope to develop our action quick enough to be able to send you also interesting material.

We shall be pleased to hear from you soon, and are meanwhile,

Truly yours,

/s/ H. F. Tecoz
Henri Francois Tecoz

Utrecht, February 2, 1948"

We haven't the remotest idea of how Mr. Tecoz read about the Committee for Kentucky, but you well know that ideas have a fascinating habit of falling in strange places and producing interesting results.

Item - Emulation. Mr. George W. Bearie, Secretary and Treasurer of the Colonial Building and Loan Association of Charleston West Virginia, heard the broadcast of the Legislative Program and wrote that he wanted to start a similar Committee in West Virginia. We have sent him all of our reports and other materials with our best wishes.

Item - Evaluation. Your President has written to a number of leaders in Kentucky for a statement evaluating the work of the Committee. This is to be used in the book on the story of the Committee which Harper and Bros.

is going to publish. The statement by Dr. H. L. Donovan, President of the University of Kentucky, is so splendid that it is reproduced herewith in full:

"The work of the Committee for Kentucky has challenged every thinking citizen in this Commonwealth. It has made some people angry, others have taken a vow to improve our conditions, and but few have been indifferent to its report. I would say that it has done more to arouse us from our lethargy than any other report that has ever been made to the people of this State.

You have given us facts, many of them ugly facts that cannot be disputed. You have been constructive in making recommendations and your Committee has not neglected to make the people acquainted with these facts. While the report has taken some glamour from Kentucky, nevertheless, it has dealt with realities that our people must face if we are to play our part among the states of the nation and make our contribution to society.

The good work of the Committee for Kentucky has already produced many excellent results. It will take a decade or more to give it a proper evaluation. However, I have seen enough progress come in the State as a result of the work already done that I do not hesitate to predict that over a period of years the work of the Committee for Kentucky will result in profoundly influencing the trend of affairs in this Commonwealth. Your report will eventually become one of Kentucky's treasured historical documents.

H. L. DONOVAN, President
University of Kentucky

January 2, 1948"

Item - Finance Campaign. The finance campaign to raise $100,000 for the next two years for the Committee for Kentucky has now been launched. Substantial progress has been made, both in Louisville as well as out in the State. It is too early at this time to give any concrete results. Because the raising of this money was of paramount importance, Mr. Bement and Mr. Armstrong have been temporarily relieved of their duties to devote their full time to the campaign. We hope that the campaign will be concluded by May 1, at which time they will resume their tasks. In the next Report of Progress full details of the finance campaign will be sent to you.

Item - Help! You can help in the campaign. The task of raising $100,000 for anything in Kentucky is pretty back-breaking, as you can imagine. Unfortunately, the burden falls on a comparatively few of us. You can help! We are enclosing a Brochure together with a Pledge Card. Won't you obey that impulse and fill the Pledge Card to the maximum of your ability and send it in to the office? Any contribution will be gratefully received, but we need real "folding money".

Item - Of the Utmost Importance. The Committee for Kentucky, in accordance with a resolution unanimously approved by its Board of Directors on December 30, 1947, will suspend operations on March 1, 1950. Here was the reasoning of

the Directors:

1. We do not believe in self-perpetuating committees.

2. It is our feeling that by March 1, 1950, the major part of our job will have been finished, because:

   a. All of our reports will have been made and presented to the people of Kentucky,

   b. All revisions of old reports will have been brought up-to-date,

   c. The college leadership program will have been launched,

   d. The leadership education among all organized groups in Kentucky will have been well underway,

   e. The Community Organization Program will have spread throughout the State.

3. It was the feeling of the Board that by March 1, 1950, the moral climate for progress which we had set out to create in Kentucky will truly have been established.

The Directors felt that the only phase of the work of the Committee that could and should be carried out in the future was Community Service and Organization. Accordingly, your President made arrangements with Dr. Donovan, whereby, at the termination of the work of the Committee, everything of value would be turned over to the University of Kentucky. Dr. Donovan, with the approval of his Trustees, agreed to set up under the Department of Sociology a separate division of Community Service and Organization to carry on the work in this field where we leave off. The date for this takeover has not been established, but there will be no gap. Thus, one of the most important functions of the Committee for Kentucky will be carried on into the future by our great State University.

Your President has carried a great part of the burden of the finance campaign in these last few months. Won't you help lighten that burden by pitching in not only with a contribution of your own, but by trying to secure contributions from others? We are determined to see this Program through until March 1, 1950. We are confident that the money to do this job will be forthcoming for the response to date has been more heartening than even we had imagined.

The last four years have been memorable ones for the Committee. We are confident that the next and final two years will be even more so.

Respectfully submitted,

Harry W. Schacter

Number 14 June 26, 1948

RECEIVED
JUN 28 1948
RECEIVED
Southern Regional Council

It has been our custom, in the past three years, to send you a Report of Progress just before the summer sets in. This serves as a review of the months preceding, and as a preview of the fall and winter months to come. A number of interesting things have happened since our last Report of Progress on March 20, 1948. Here are some of the highlights:

Item - Of Real Importance! We announce with pride that the General Education Board, which is endowed by the Rockefeller Foundation, has made a grant of $20,000 to the University of Kentucky for the purpose of carrying on the Community Service work started by the Committee for Kentucky. This sum is to supplement an equal amount which has already been voted by the Trustees of the University of Kentucky. The $40,000 thus provided will enable the University to establish a Community Service program on a continuing basis.

The University will develop, under the Department of Sociology, in the College of Arts and Sciences, a separate program for Community Service. For this purpose, the personnel of the Department will be expanded by the addition of specially trained staff members.

James W. Armstrong, who has been the Director of Community Service for the Committee for Kentucky since May, 1946, will continue with the Committee and will be in charge of the Leadership Education program of the Committee. Maurice D. Bement will, of course, continue as Executive Director.

In an informal way, and just as we have done in the past, we will work closely with the University on community problems, as well as on all other problems for the good of Kentucky that are of mutual interest.

Southern Regional Council

Dr. Irwin T. Sanders, head of the Department of Sociology of the University of Kentucky, under whom the new proposed Community Service program will be carried out, made the following statement: "This new development has been made possible by the careful planning, the intensive work, and the interest stimulated by the Committee for Kentucky. The Committee assisted us in obtaining the grant from the General Education Board. The work of the Committee for Kentucky has been widely

acclaimed, not only in Kentucky and throughout America, but in a number of countries abroad. This grant by the General Education Board is a further recognition of the significance of this work."

This is the first phase of the Committee's program to become established on a permanent basis under the sponsorship of an educational institution. It spells a brighter day for Kentucky, and is another evidence that Kentucky is truly on the march.

Item - Finance Campaign. We are pleased to inform you that our financial campaign is now in the home stretch. It has been successful beyond our expectation. Two years ago, with the help of a professional money raiser, we were able to raise only $45,000. Of this sum, the money raiser got a little over $11,000. This time, without any professional help whatever, and with practically no expense, we raised, in cash and in pledges, well over $60,000. This, together with the $20,000 grant to the University of Kentucky, puts us close to our financial objective. It is reasonably certain now that, with the number of prospects still to be canvassed, we should be able to raise enough money to finish our job with flying colors.

Item - State Fair Exhibit. The General Superintendent of the Kentucky State Fair has asked the Committee for Kentucky to return with its booth and has asked that this booth serve as information headquarters for the public. We have been given a choice spot in the Merchants and Manufacturers Building. The Fair Board plans to hold drawings for merchandise at the Committee for Kentucky booth five times a day, starting Monday, September 13, through Saturday, September 18. These developments came to us without any solicitation and, in fact, were listed in a State Fair Bulletin previously distributed throughout Kentucky.

Item - Your President's Speaking Engagements. Early in April, on two successive days, your president addressed, first, the New Jersey Citizens Conference in Newark, New Jersey, and then the New York State Citizens Council at the Princeton Club in New York. In each address he told the story of the Committee for Kentucky. A distinguished audience of leading citizens in each of the states was present.

Miss Rhea M. Eckel, Executive Secretary of the New York Citizens Council, wrote to your president, in part as follows: "Our information from many of those who attended leads us to believe that you have put us a long way ahead in our steps toward working with the business section of the life of Manhattan, and I am certain that one of these days it will be possible for you to look with pride on our work, to which you have so generously contributed."

Your president had a busy day in Knoxville, Tennessee, on May 11. At noon he spoke before the Rotary Club of Knoxville. In the afternoon he spoke at TVA headquarters to the department heads of the entire TVA system. In the evening he addressed the annual meeting of the Tennessee Conference of Social Welfare. At all three meetings, the story of the Committee for Kentucky was enthusiastically received.

On May 24, your president addressed the National Conference on Community Improvement in Washington, D. C. The audience present came from all over America and seemed to be deeply impressed by what we are doing in Kentucky.

Early in June your president addressed an evening meeting of the Campbell County Chamber of Commerce. The meeting was attended by a group of important business men. Their reaction to the story of the Committee for Kentucky was most favorable.

Item - Foreign Recognition. Recently we received a letter from Honolulu asking for copies of our reports. We were particularly pleased to receive, in the same mail, a request for our materials from UNESCO--United Nations Educational, Scientific, and Cultural Organization--from Paris, France. UNESCO is going to hold a seminar in Paris this summer to prepare materials for use in the schools of many countries. They requested a complete packet of our materials to use in the seminar. The recognition of the Committee is progressing steadily from state to nation to foreign countries, and now to the United Nations.

Item - Program for the Committee for Kentucky. The following are the highlights of the program of the Committee for Kentucky from now until March 1, 1950:

1. Community Service and Organization. This has been discussed as the first Item of this Report.

2. Future Reports. There are five reports remaining to be completed. The following is the tentative schedule for these reports:

   Taxation, by Dr. James W. Martin, University of Kentucky - October 29, November 19, 1948
   Transportation, by Dr. Rodman Sullivan, University of Kentucky - January 21, February 18, 1949
   Community Life, by Dr. Irwin T. Sanders, University of Kentucky - May, June, 1949
   Government, by Dr. J. E. Reeves, University of Kentucky - September, October, 1949
   Blueprint for a Great Kentucky, by Harry W. Schacter and the Experts - November, December, 1949

3. Leadership Education Program. Messrs. Armstrong and Bement are to begin plans immediately to inaugurate the Leadership Education program among the organized adult groups in the State, beginning September 1, 1948.

4. College Leadership Education Program. Messrs. Armstrong and Bement will, in the summer months, lay the plans for contacting all of the colleges in the State to carry on a College Leadership Education program along the lines as developed at Kentucky State College, Transylvania, and the University of Kentucky.

5. Bringing Reports Up to Date. Mr. Schacter is to consult with Messrs. James Pope and Cary Robertson, of the Courier-Journal, with a view to a series of articles over the next few months on bringing the previous reports up to date.

6. Galloway Column. Mr. Ewing Galloway's column now appears in 119 of the 190 newspapers of the State--a tremendous coverage. We are about to embark on a program of having Mr. Galloway use his column in part to interpret the programs of the Committee for Kentucky more directly to the people of Kentucky.

7. Reports of Progress. A Report of Progress will be sent to the membership approximately every three months.

8. Directors' Information Service. In view of the difficulty of holding meetings of Directors since they are scattered all over the State, it seems advisable to send a monthly letter to the Directors to keep them informed of current happenings. This, of course, is to be supplemented by quarterly meetings of the Directors.

As your president reviews the past four years of intensive activity of the Committee for Kentucky, he cannot help but feel that it has made a truly important contribution to the welfare of our State. We feel particularly confident that between now and March 1, 1950, when we terminate our activities, we will have put the finishing touches on the job we set out to do. We are particularly comforted by the knowledge that the Community Service program will be carried on into the future by the University of Kentucky.

Your president wishes all of you a very happy and restful summer.

Sincerely yours,

Harry W. Schacter

Fourth Annual Conference Proceedings Issue

Georgia's Human Resources

A BULLETIN FOR COMMUNITY LEADERS : DISTRIBUTED BY GEORGIA CITIZENS COUNCIL

SPECIAL EDITION PRINTED JULY, 1948 SPECIAL EDITION

RECEIVED SEP 2 1948

Citizens' Responsibility Stressed As Chief Executive Opens Conference

Acting Governor Thompson said:

On behalf of more than three and one-quarter million Georgia people, whom it is my privilege to serve as chief executive, I want to thank each and every one of you, both citizens in Georgia as well as those from beyond our borders, for your attendance at this Conference. It is most appropriate, especially when people like you who occupy positions of leadership put aside your daily tasks, your responsibilities, and come to a conference to devote three days of the best that is in you towards the development of the human resources of our state and the Southeast and our country as a whole. I am sure that I express the sincere heartfelt appreciation of all the people of Georgia, when I welcome you and

(Continued on page 13)

673 Attend 3 Day Session

The fourth annual citizen's conference was held in Atlanta in November 1947. 673 community leaders representing thirteen states and 113 Georgia counties attended the three day session. Social workers, educators, youth leaders, civic leaders, ministers and church workers heard speeches and took an active part in the workshops, forums and discussion groups. Out of the exchange of ideas and pooling of knowledge came ideas for action which each participant took back to his or her own community.

The persons who attended left the conference with this purpose and belief more clearly defined; that if democracy is to survive, we in local communities must find a way to provide greater opportunities for.. physical, ..mental, ..emotional and moral development of our human resources.

The conference program covered a broad range of subjects, presenting the challenge and responsibility of community leaders, the problems facing us today, and the ways in which individuals, groups, and whole communities can find solutions to these problems and meet their needs constructively.

See Index on back for list of participating speakers, consultants and discussion leaders.

5th Annual Conference Nov. 17, 18, 19-'48

Georgia's Fifth Annual Citizens Conference will be held in Atlanta November 17, 18 and 19, W. Elliott Dunwody, Jr., President of the Georgia Citizens Council has announced.

Dr. Allan D. Albert, head of the sociology department at Emory University, was designated by the other 20 members of the Citizens Council to serve as Chairman of the 1948 Program Committee. Assisting him will be Mrs. Ralph Butler, Dallas, former Council Vice-President; Parks Huntt, Atlanta, who served as chairman for the 1947 Conference; Julian Boehm, Atlanta, and Dr. Josiah Crudup, President of Brenau College, Gainesville.

"We expect to make the fifth citizens conference the biggest and most valuable yet held," Dr. Albert said. "It will probably be presented in the form of an 'Inventory of Georgia's Services and Needs.'"

Outstanding national and state authorities on practically every phase of community life have been invited to take part on the three-day program.

Citizens desiring to attend should send their name, address and an indication of their particular interest to the Georgia Citizens Council, 20 Ivy St., S. E., Atlanta. Invitations will probably be mailed in September.

Annual Citizens' Conference Dinner

The West End Elementary Band plays the National Anthem for the guests at the Annual Dinner.

Committee for Kentucky to Draw A Blueprint for a Better State

By PAUL HUGHES, Courier-Journal Staff Writer

THE drafting of a long-range "Blueprint for a Greater Kentucky" has been aid of research staffs, should give the people of Kentucky a reasonably accurate dollar-mark picture of the total needs.

to prepare a rough summation of all 13 reports. About October 1, Schacter plans to

Grouped around the Committee for Kentucky's conference table, with President Harry W. Schacter presiding (he's also a Louisville department-store president), are the other Kentuckians who accepted assignments to help draft a master plan for the state's future. Courier-Journal Artist George Joseph has provided places at the table for the chairman of the 13 subcommittees, and ranged about them the other experts in fields into which the explorations reach.

The drawing includes these, listed by committee assignments:

AGRICULTURE: Dean Thomas P. Cooper, University of Kentucky College of Agriculture and Home Economics; J. E. Stanford, executive secretary, Kentucky Farm Bureau

and Clarence C. Hieatt, Louisville, former president, National Association of Real Estate Boards.

MANUFACTURING: H. Fred Willkie, executive vice-president, Joseph E. Seagram & Sons, Louisville, and W. Scott Hall, department of economics, Transylvania University, Lexington.

LABOR: Ernest Greene Trimble, U. K. professor of political science; Edward H. Weyler, Louisville, secretary-treasurer, Kentucky Federation of Labor (A.F.L.), and Al Whitehouse, Covington, president, Kentucky State C.I.O. Council.

NATURAL RESOURCES: Tom Wallace, editor emeri-

Committee for Kentucky to Draw A Blueprint for a Better State

By PAUL HUGHES, Courier-Journal Staff Writer

THE drafting of a long-range "Blueprint for a Greater Kentucky" has been launched by a group of 45 top-flight experts and leaders representing a broad cross-section of the state's activities, interests and institutions.

The general committee, made up of 13 groups, includes a tremendous wealth of experience, prestige and versatility. Probably no such galaxy has ever before been drawn into a single effort of so great a magnitude and significance in Kentucky. It met in Louisville Friday night at the instance of the Committee for Kentucky to shape preliminary plans that will, it hopes, result in an epoch-making, eye-opening guidebook to steer the state into a high level of health, welfare, education and prosperity.

President Harry W. Schacter, looking to the Blueprint as the Committee's final and crowning achievement, asked the subcommittees to spend the major part of this year in research and planning for the goal—the raising of Kentucky's social services to the national average. The response was heartening, in that every one of the committees agreed to the program.

Long Study Made

"Our achievements need be limited only by the scope of our imaginations," Schacter said, adding that "if we think in piddling terms we will get piddling results, but if our plans are bold and courageous, the results will be the tremendous success the people of Kentucky deserve."

The committees are agriculture, farm housing, education, health, welfare, urban housing, manufacturing, labor, natural resources, taxation, transportation, community life and government. They were chosen by Committee directors after weeks of study of the available brains in the various fields, and as each chairman and the various members stated their views at the organization dinner it was made clear that, in their opinion, the people of Kentucky could raise their standards of living if they willed to do so. The new committees' jobs were to show how.

Al Whitehouse, Covington, member of the labor committee, summed up the problem and its solution this way: "We ourselves, sitting here tonight, are getting an education in democracy. If we can get this message to the people, I know they will accept this challenge. What it will cost, and nobody yet knows, will be a dividend-paying investment, because our plan will consider only the increased ability to pay and the resultant raising of the entire level of our State's economy—the people's economy."

Project Outlined

The thinking behind the project stemmed from a determination to get at the very core of Kentucky's basic problems and was based fundamentally, on these salient points:

1. Kentucky is not providing adequate social services for its people, a fact that has helped to make it a backward state.
2. It is important that the people know what it would take in capital expenditures and in annual budgets to provide such services on a par with the progressive states of the Union.
3. It is important that the people, once they know the total needs, be given a plan for raising the capital and developing the annual budgets to meet the needs.
4. Since the inadequacy of the social services is for the greater part due to lack of sufficient tax money, it is important that the people know the various possibilities for increasing the revenues of the State.

Determination of what it would cost in capital improvements and annual budget outlays to provide social services to meet the national averages would probably be the responsibility of the experts who have developed the original reports on such services. These estimates, arrived at with the aid of research staffs, should give the people of Kentucky a reasonably accurate dollar-mark picture of the total needs.

Once that important and significant figure is arrived at, taxation and revenue experts could go to work on the task of finding out where the funds should come from. These may suggest and discuss various methods, a long-term bond issue, a tax revision procedure, a program of improved administrative efficiency as a means to economy, reassessment of property for an equitable distribution of the burden or (perhaps and/or) even as hot a potato as consolidation of counties.

But whatever the ultimate recommendation, the study would be expected to go a step further and develop a plan by which the Legislature could, over a 10 or 15-year period, progressively build up the State's annual budget to care for increased social services in tune with a gradually increased ability to pay.

Kentucky R.F.C.

What may emerge as the keystone of the entire plan, in the light of later planning, is the suggestion for a corporation tentatively referred to as the Kentucky Development Company with paid-in capital of $10,000,000 subscribed by private individuals and business concerns and administered by a board comprising "the ablest businessmen in the state." It would, in effect, function as a Kentucky Reconstruction Finance Corporation and not unlike the Louisville Industrial Foundation.

There would be four divisions of effort—finance, research and engineering, industrial development, and sales promotion and distribution.

The first task of the company would be to determine the location of the most important of Kentucky's natural resources and what industries might best be established near these resources. For instance, in the Paducah region are found some of the best clay deposits in the country. At present, these clays are shipped to other states for processing. It could be that the proposed company's research might show that it would best serve Kentucky's interests to set up a pottery plant near the clay deposits. Also, there is a market in Kentucky for glass products to meet the needs of bottlers, dairies and food packers, as well as the building industry. Yet there is no glass industry in the state, although Kentucky has sands suitable for such a project.

How It Would Work

Once the research has been done, the division of industrial development would take over, calling, for example, a meeting of Paducah area citizens to suggest to them the establishment of a pottery and presenting them a carefully prepared plan for the building, equipment, personnel and operation. Next step would be for the finance division to present its cost estimates and plans for raising the necessary capital. The sales and distribution people would, in turn, work out the sales potential of the products contemplated and, with all phases of the problem thus packaged, the company would invite the citizens to subscribe to the necessary capital stock. If the subscriptions fell short of requirements, the Kentucky Development Company could step in and subscribe to the balance.

In explaining the proposal, Schacter stressed that activities would be carried forward in close co-operation with existing agencies, both public and private. Not only would the co-operation and facilities of the new Kentucky Chamber of Commerce, a nonofficial group, and of the state's own Agricultural and Industrial Development Board be solicited and utilized, but local chambers and civic organizations would be invited to assist.

Beginning tomorrow, each of the 13 committees will set to work preparing its portion of the comprehensive report.

By next July 1, each committee chairman is expected to submit to Schacter the draft of his report and Schacter then will begin to prepare a rough summation of all 13 reports. About October 1, Schacter plans to meet with each chairman to read to them his portion of the report and then hold a thorough critical discussion. Shortly thereafter, he plans a meeting of Committee for Kentucky directors and all the experts for a final reading and discussion of the entire findings, which will contain the 13 reports and the Schacter composite. Later a meeting of all members of all committees will be held for reading and a vote of approval.

The accepted final draft then will be printed as speedily as possible for presentation to the members of the 1950 Legislature.

The fullest possible publicity will be given the Blueprint, meanwhile, by local and district meetings attended not only by the public but by their own elected legislative representatives. And it will be distributed in pamphlet form to thousands of high school and college students, to Parent-Teacher groups, to civic and luncheon clubs and to as many individuals as can be reached. Radio stations are expected to present dramatizations of the reports and newspapers will be offered serializations.

Schacter, anticipating that the Committee for Kentucky will wind up its work in 1950, said that "it is fitting that the Committee, the essence of whose spirit is co-operation, should have as its last report the result of the co-operative effort of some 45 persons, plus their staffs and associates."

Grouped around the Committee for Kentucky's conference table, with President Harry W. Schacter presiding (he's also a Louisville department-store president), are the other Kentuckians who accepted assignments to help draft a master plan for the state's future. Courier-Journal Artist George Joseph has provided places at the table for the chairman of the 13 subcommittees, and ranged about them the other experts in fields into which the explorations reach.

The drawing includes these, listed by committee assignments:

AGRICULTURE: Dean Thomas P. Cooper, University of Kentucky College of Agriculture and Home Economics; J. E. Stanford, executive secretary, Kentucky Farm Bureau Federation, and J. W. Jones, North Middletown, president, Burley Tobacco Growers Co-operative Association.

FARM HOUSING: J. Allan Smith, publications editor, College of Agriculture; J. B. Kelley, agricultural engineering section, College of Agriculture, and Miss Myrtle Weldon, state leader of home demonstration agents, College of Agriculture.

EDUCATION: John W. Brooker, executive secretary, Kentucky Education Association; President Rufus B. Atwood, Kentucky State College, Frankfort, and Dean Maurice F. Seay, U. of K.

HEALTH: Dr. Bruce Underwood, State Health Commissioner; Dr. Emmet F. Horine, Louisville heart specialist and author, and Dr. Charles A. Vance, Lexington, president, Kentucky Medical Association.

TAXATION: Wilson W. Wyatt, former Louisville Mayor; Clyde Reeves, State Commissioner of Revenue; Paul G. Blazer, board chairman, Ashland Oil & Refining Co., and James W. Martin, director, bureau of business research, U. K.

HOUSING: Nicholas H. Dosker, administrator, Louisville Municipal Housing Commission; Robert I. Kutak, head of University of Louisville department of sociology, and Clarence C. Hieatt, Louisville, former president, National Association of Real Estate Boards.

MANUFACTURING: H. Fred Willkie, executive vice-president, Joseph E. Seagram & Sons, Louisville, and W. Scott Hall, department of economics, Transylvania University, Lexington.

LABOR: Ernest Greene Trimble, U. K. professor of political science; Edward H. Weyler, Louisville, secretary-treasurer, Kentucky Federation of Labor (A.F.L.), and Al Whitehouse, Covington, president, Kentucky State C.I.O. Council.

NATURAL RESOURCES: Tom Wallace, editor emeritus, Louisville Times; Arthur C. McFarlan, head, U. K. department of geology, and Henry Ward, State Conservation Commissioner.

WELFARE: Howard W. Beers, head, department of rural sociology, U.K.; Miss Oscie Sanders, president, Sue Bennett Junior College, London, and Miss Louise Diecks, Louisville welfare director.

TRANSPORTATION: Guy A. Huguelet, Lexington, president of Southeastern Greyhound Lines; Rodman Sullivan, U. K. College of Commerce; P. G. Vondersmith, Covington, president, Cincinnati, Newport & Covington Street Railway Company; E. J. Buhner, Louisville, Silver Fleet Truck Lines; Al Near, director, Louisville & Jefferson County Airports; John E. Tilford, executive vice-president, Louisville & Nashville Railroad; Patrick J. Calhoun, Jr., Louisville, president, American Barge Lines, and J. Lyter Donaldson, Carrollton, former State Highway Commissioner.

COMMUNITY LIFE: Irwin T. Sanders, head, U. K. sociology department; Ralph H. Woods, president, Murray State College, and Merton D. Oyler, Berea College sociology department.

GOVERNMENT: Philip Ardery, Frankfort attorney; J. E. Reeves, U. K. political science department, and Eli H. Brown III, Louisville, former U. S. district attorney.

Now It's the Streetcars That Wait for People

By LEE HEIMAN, Courier-Journal Staff Writer

IN KEEPING with the changing times, now it's the streetcars that are waiting for people.

Thirty of them—30 that rumbled and clanged their way along Fourth Street up through last Derby Day—are waiting for people to come and take them away from their next-to-last resting place.

But these streetcars aren't named Desire. The Louisville Railway Company has run across nothing resembling desire on the part of the prospective purchasers. Seems nobody wants them—enough to pay what the railway firm wants for them. And thereby hangs a problem.

These trolley cars are the last vestige of Louisville's public-transportation-by-rail era. They completed their tour of duty on Derby Day, 1948. But the indications then were that they might be needed for emergency duty, so they were shunted to short stretches of track at Fourth and F Streets to await developments. Their parking lot was at the site of the railway company's new trolley-coach repair shop.

John Bickley, Louisville Railway Company president, recalls that the Government had requested the transportation industry to hold onto its old streetcars because of the worsening situation in Europe. It seemed like a mighty good idea here, for there prevailed a shortage in the materials used in motor-bus manufacture, and the L.R.C. was waiting something like 18 months for its orders to be filled.

So, with the future clouded up a bit, the old streetcars were put on reserve status, subject to call. There was an agreement with the City that the Fourth Street tracks would remain uncovered for the time being.

All year the streetcars waited, gathering dust but escaping any real harm other than a broken window or two.

Came December, and it was evident that the L.R.C. had enough rolling equipment to assure adequate service without ever having to resort to use of the old trolley cars. The score was 431 gasoline and Diesel busses and 60 trolley coaches; total 491.

Forgotten but not quite gone, these 30 streetcars, all that are left of 400, wait in the 4th and F lot for buyers to take them away from it all.

Real Buyers' Market

It was time for the L.R.C. to start thinking how it might dispose of the forlorn relics of a now completely dead era. Russell Mayhall, secretary of the company, inserted advertisements in trade journals offering the streetcars for sale. He made calls to local parties who might be interested in buying the things en masse. There were no takers.

"We're forced to face the fact," says Bickley, "that we've got a herd of white elephants rather than a batch of streetcars. The second-hand trolley-car market is just plain dead."

In the first place, he points out, the cities which still use streetcars in their public-transportation systems have no desire to invest in anything but the latest type of streamlined, noiseless cars.

In the second place, even if the L.R.C. could locate a market of that sort, its cars probably wouldn't fit the tracks.

Standard gauge for tracks, Mayhall says, is 4 feet 8½ inches. Louisville streetcars ran on 5-foot tracks. Gauge figures vary from city to city. That harks back, Mayhall recalls, to the days of intracity competition in trolley lines. The competing firms built their tracks in a variety of widths to keep each other's trams off.

While the L.R.C. has pondered the fate of the streetcars, the City has gone ahead with the resurfacing of Fourth Street, covering the car tracks in the process. That leaves the cars marooned at Fourth and F.

The railway company still hopes to locate a purchaser, or purchasers. It would be the buyer's job to find a way of moving the cars.

In 1946 and 1947, a North Side trucking firm came through with a trailer truck big enough to haul some streetcars away, and that probably would be the answer today, Bickley says.

The cars involved in 1946 and 1947 were the trailers that used to be coupled on behind the powered streetcars during rush hours. The company got rid of about 28 of them. The chassis and wheels were removed from the bodies and salvaged. Some of the bodies were sold at $1,000 apiece. The others were burned.

Mayhall remembers that two of them went to Sixth and Broadway and were combined to make a restaurant. Another was sold for the same purpose, ending up somewhere around New Albany.

These trailers had a seating capacity of 40 to 62. They were more adaptable to use as lunch rooms than the present batch of trolley cars, for their doors were in the center rather than at each end.

May Be Scrapped

The cars the L.R.C. is trying to get rid of now are of three vintages. There are 12 cars of 1911 style, three sample cars which were purchased in 1928, and 15 54-seaters of 1924.

The company is willing to sell them one by one if a purchaser for the entire lot can't be found. Bickley believes they may find some use as emergency housing. Or perhaps as children's playhouses. Or maybe there's still somebody, somewhere, interested in turning one into a diner.

The price? Well, Bickley is reluctant to name a definite price, but somewhere along the line $750 was mentioned—and later, $500. The L.R.C. probably would do a bit of dickering if interested parties walked in.

If there's no sale within a reasonable length of time, the streetcars will be dismantled and sold as scrap.

These 30 streetcars that nobody wants are all that remain of more than 400 that the L.R.C. had during the 1920's, the heyday of rail transportation. When the trolleys stopped running last Derby Day, the city was without street railways for the first time since 1844, when horse cars began operating. Electric cars took over in 1889.

Motor busses date back to 1923 in Louisville. That's when the first 12 were purchased to run on feeder lines. In October and November of 1940, motor busses went into operation on main lines—Broadway and Bardstown Road. In the meantime, in 1936, trolley coaches had made their bow on Walnut Street.

6-Committee for Kentucky

REPORT OF PROGRESS

FROM THE
Committee for Kentucky
506 S. Third St., Louisville 2, Ky.
OFFICE OF THE PRESIDENT

Number 16 April 8, 1949

Since the progress report sent you last December, the Committee for Kentucky has embarked on what may be considered the culminating phases of its work. It has accomplished much--with more still to come. Here are some of the highlights.

Item - We helped to launch "Community Week" in Somerset, Kentucky--to our knowledge the first event of its kind ever held in our State. This was the subject of a page one story in the "Passing Show" section of the Sunday Courier-Journal. It created widespread interest and comment throughout the State.

Item - Messrs. Bement and Armstrong developed a plan to reach some 70 Kentucky communities within a period of a year. The plan was thoroughly discussed at a board meeting on February 4, 1949, and unanimously approved by the Board. It is attached herewith in full.

Item - The Bowling Green area was the first region visited under the abovementioned plan. The Committee for Kentucky Community Caravan trailer was set up in Bowling Green, and for an entire month Messrs. Bement and Armstrong and Francele H. Armstrong contacted many of the leading citizens in most of the communities in that area. Out of this effort came an awareness of the meaning of community life and an understanding of the work of the Committee for Kentucky that will in time be helpful and significant. As a result of this effort, under the leadership of the Junior Chamber of Commerce in cooperation with other clubs and organizations in the community, "Community Week" is being planned in Bowling Green in conjunction with their Strawberry Festival, for the first week in May, 1949.

Item - Messrs. Bement and Armstrong, with the Community Caravan trailer, are now in the Paducah-Mayfield area and plan to proceed from there to the Pineville area, and so on until the entire State has been covered.

Item - On January 4, 1949, representatives of the Kentucky Chamber of Commerce, the Agricultural and Industrial Development Board, the Bureau of Community Service of the University of Kentucky, the Murray State College - TVA Community Service Department, and the Committee for Kentucky met at a dinner meeting in Louisville to discuss the plans and programs of these

various organizations actively interested in community life in our State, in order to achieve a better understanding and a better working relationship. Much good was accomplished. At the invitation of Dr. Ralph H. Woods, president of Murray State College, the group agreed to meet again in Murray in July, 1949.

Item - On Friday, February 4, 1949, there was assembled in Louisville as significant a group of Kentuckians as has ever been gathered together for a public purpose in our State. They met to discuss and launch "Blueprint for a Great Kentucky," the final report of the Committee for Kentucky. So important did the Courier-Journal think this meeting, that it gave practically the entire page one of the "Passing Show" section to the story, with caricatures of the 45 participants. There is attached herewith a list of the personnel of the twelve committees working on this great project.

Item - Mr. Boswell B. Hodgkin, State Superintendent of Public Instruction, sent a memorandum to all superintendents, principals, and school administrators, calling attention to the reports of the Committee for Kentucky. As a result, we received requests from 40 communities for copies of these reports.

Item - A project is now under discussion which will have for its purpose the printing of the reports of the Committee in book form and the distribution of a copy to each of the 20,000 seniors in the high-school system of Kentucky. If sufficient funds can be secured to print these books, the State Department of Education will make them part of the curriculum and distribute them this fall. A dinner meeting is being held on Tuesday, April 26, under the chairmanship of Seton Huff, president of the Farson and Huff Advertising Agency, Louisville, with Barry Bingham, Fred Willkie, and Gordon Miller as co-chairmen. A group of interested citizens has been invited to consider this project. The guests of honor will be Mr. Boswell B. Hodgkin, Superintendent of Public Instruction; Father Felix N. Pitt, Secretary, Catholic School Board, Mr. Omer Carmichael, Superintendent of Schools, Louisville; Dr. H. L. Donovan, President, Kentucky Education Association, and President, University of Kentucky.

Item - The Taxation Report is now complete and is in the hands of the printer.

Item - The Report on Community Life, by Dr. Irwin T. Sanders, will be ready for a meeting of the Directors and Exports of the Committee on Friday, May 27, 1949.

* * * * * *

Interest in the work of the Committee for Kentucky, both in America and abroad, is at a high pitch, as is evidenced by the following items:

Item - Mr. Karl Detzer, a roving editor of Reader's Digest, spent a week in Kentucky getting a story on the Committee for Kentucky. This is expected to appear in the Reader's Digest next September.

Item - Vice President Alben W. Barkley; Marquis Childs, the eminent columnist; and Gordon Clapp, chairman of the Tennessee Valley Authority, have agreed to write a paragraph or two for the jacket of the book, "Kentucky on the March," which Harper and Brothers will publish in September.

Item - Mark Ethridge, publisher of the Courier-Journal, and now chairman of the United Nations Mission to Palestine, has written a brilliant foreword, which has made a significant contribution to the book.

Item - Art Ulbrand, who has done the art work for our reports, designed a delightful jacket for the book.

Item - Your president had an interesting visit in Washington with Mr. Herbert T. Edwards, Chief, International Motion Pictures Division, Department of State, and with Mr. Hamilton MacFadden, his associate in New York, to discuss the possibility of a documentary film, by the State Department, on the Committee for Kentucky for use abroad. Mr. MacFadden is considering a trip to Louisville in the near future to discuss this project with the directors of the Committee for Kentucky.

Item - Very important! The Columbia Broadcasting System has decided to do a full-hour documentary broadcast on their coast to coast network of 170 stations, on the Committee for Kentucky, in conjunction with Station WHAS next September. Mr. Werner Michel, Director of Production, Public Affairs, Columbia Broadcasting System, will make a trip to Louisville with members of the research staff of CBS in the near future to plan for the broadcast.

Item - Your president attended a meeting at which was launched a new organization--the American Council for the Community. The purpose of this organization will be to bring the experience of the Committee for Kentucky and other state citizens organizations working in the field of community service, to some 10,000 American communities. A dinner to which there will be invited 100 of America's leading citizens will be held in New York on May 17. Your president will address the group. If sufficient interest is aroused in this group, the organization will be firmly launched. It may well have far-reaching consequences.

There are many other items your president could report, but these are the highlights. We are indeed on the threshold of great accomplishment.

Respectfully submitted,

Harry W. Schacter

COMMITTEE FOR KENTUCKY

PLAN FOR A LEADERSHIP EDUCATION AND COMMUNITY SERVICE PROGRAM TO STIMULATE CITIZEN ACTION IN THE LOCAL COMMUNITIES OF KENTUCKY

PREFACE

It has become the deep conviction of many people that the hope of democracy lies in the local community; that the battle for democracy will be won or lost in the local community; that as our local communities are strong, so will our America be strong.

We believe that the local community is the training ground for the leaders of America. We believe that more and more problems must be attacked and solved at home--in the local community--rather than at some distant headquarters in the state or in the nation. We believe that it is of the utmost importance that the people of any community understand the total problems and opportunities of their community. We believe that there is a definite need for a connecting link between our communities and our State. Finally, we believe that if all groups in every American community can get together to discuss, work, and plan to solve their local problems, our democracy will become so strong that it will not only be able to meet every challenge, but it will actually grow stronger with each challenge.

Because of these beliefs, we offer the following plan to stimulate citizen action in the local communities of Kentucky:

OBJECTIVE

1. To make Committee for Kentucky reports and other materials available to clubs, organizations, and civic leaders, and to urge their use for programs within the community.

2. To promote a better understanding of the nature of the community and of community development through programs and speeches before local clubs and organizations.

3. To encourage community leaders, organizations, and citizens to think about the importance of their own community and to promote an active, cooperative interest in its over-all development.

4. To encourage citizens to come together to discuss their local problems and to plan effective programs of action for their solution through community studies and cooperative action.

5. To list local leadership; to appraise leadership availability and interest in the formation of local and state citizens councils. To list major local problems and opportunities.

6. To promote a better understanding between the local community and the State so that our citizens can better understand how the local community fits into state development.

PLAN

1. We propose to divide the State into nine areas, each with one town which will serve as a center of operations for all the towns in that area. These nine areas are listed at the end of this report and on the map attached.

2. In order to establish effective contacts in a particular area we will ask the heads of various state organizations for a list of their local representatives in all the towns in that area. The state leaders will also be asked to write directly to these representatives, urging their cooperation.

   These state groups will include the Kentucky Farm Bureau Federation, the Kentucky Education Association, the State Health Department, the Kentucky Press Association, the Kentucky Congress of Parents and Teachers, the Kentucky Federation of Women's Clubs, the Kentucky Federation of Business and Professional Women's Clubs, the Kentucky Junior Chamber of Commerce, the Kentucky Federation of Labor, and the Kentucky State C. I. O. Council. It is interesting to note that everyone of the above organizations is a member of the Committee for Kentucky.

3. In the initial contact in the community, we will call on the heads of clubs, organizations, and college presidents, make available to them a set of the reports of the Committee for Kentucky, and urge their use as program material for their meetings.

4. During the initial visit, we will also present to these leaders a suggested outline for a community program, including a prospectus for "Community Week," as developed in Somerset. We will offer the services of the Committee's personnel for speaking engagements, providing a sufficient number can be scheduled within a concentrated period.

5. If the community desires assistance on surveys of specific problems, we will refer these requests to the Bureau of Community Service of the University of Kentucky or of Murray State College, to the Kentucky Chamber of Commerce, to the Agricultural and Industrial Development Board, or to any other established agency set up and competent to advise on the particular subject.

6. If a sufficient interest has been engendered through the initial contact, we will return later to the community for specific club and organization programs.

7. If the community visited is sufficiently considered an area of influence, and if sufficient interest develops, we will offer our services to that community to work with leaders on planning of a community conference, workshop, or a "Community Week," such as was held in Somerset the week of January 24.

8. If the various groups in a community are sufficiently interested in a joint meeting of the members of all the groups, the president of the Committee for Kentucky will be available for a limited number of such engagements, to address such meetings and to discuss ways and means of joining the total forces of the leadership of the community for the total betterment of the entire community.

9. When we have finished in any one area, we will invite the leaders of all the communities in that area to a meeting, for an exchange of ideas and to discuss a plan for cooperative regional activity.

10. We will prepare a report on each community, listing the civic leaders and the major problems and opportunities of the community, for use by other agencies in the State.

11. We will begin operation under this plan in the Bowling Green-Glasgow area during the week of February 6, 1949, using as headquarters the Committee for Kentucky Community Caravan. This is a 33-foot trailer, specially equipped for community service purposes, with a loud speaker system, a moving picture projector, a library on community, a small meeting room, and living quarters for the staff.

12. On or about March 10, we will proceed to the Paducah-Mayfield area. At that time we will set up schedules for the remaining areas to be visited. Through the state leaders who have local connections, we will notify the people in each area in advance as to when the Community Caravan may be expected.

13. Since there are nine major areas and only about nine months in which to work, the staff cannot spend more than one month in each area to do justice to the entire State. However, that span of time will be either more or less, depending on the number of communities in each area.

14. In this way it is hoped that the entire State may be covered and that sufficient interest may be aroused among the citizens of each of the nine areas to carry on this work.

This is the major task to which the Committee for Kentucky has dedicated itself for 1949.

SCHEDULE

On the basis of our experience in the first area, we will schedule visits to the following area centers. In each is underscored the community which will be used as a center of operation:

1. Paducah - Mayfield Area

   A. Fulton
   B. Hickman
   C. Mayfield
   D. Murray
   E. Paducah

2. Henderson - Owensboro Area

   A. Dawson Springs
   B. Earlington
   C. Henderson
   D. Hopkinsville
   E. Madisonville
   F. Marion
   G. Morganfield
   H. Owensboro
   I. Princeton
   J. Providence
   K. Sturgis

3. Bowling Green - Glasgow Area

   A. Bowling Green
   B. Central City
   C. Franklin
   D. Glasgow
   E. Greenville
   F. Russellville
   G. Scottsville

4. Bardstown - Elizabethtown Area

   A. Bardstown
   B. Campbellsville
   C. Elizabethtown
   D. Lebanon
   E. Shelbyville

5. Lexington - Bluegrass Area

   A. Carrollton
   B. Cynthiana
   C. Danville

5. Lexington - Bluegrass Area (Continued)

D. Frankfort
E. Georgetown
F. Harrodsburg
G. Irvine
H. Lawrenceburg
I. Lexington
J. Mount Sterling
K. Nicholasville
L. Paris
M. Richmond
N. Versailles
O. Winchester

6. Covington - Northern Kentucky Area

A. Bellevue
B. Covington
C. Dayton
E. Fort Thomas
F. Newport
G. Ludlow
H. South Fort Mitchell

7. Ashland - Morehead Area

A. Ashland
B. Cattlettsburg
C. Maysville
D. Morehead
E. Olive Hill
F. Russell

8. Prestonsburg - Hazard Area

A. Hazard
B. Jackson
C. Jenkins
D. Paintsville
E. Pikeville
F. Prestonsburg

9. Corbin - Harlan Area

A. Barbourville
B. Corbin
C. Cumberland
D. Harlan
E. Lynch
F. London
G. Middlesboro
H. Pineville
I. Somerset
J. Williamsburg

A BLUEPRINT FOR A GREAT KENTUCKY

Committees

The following is a list of committees, each of which is to prepare a special section of the final report of the Committee for Kentucky, tentatively to be called "A Blueprint for a Great Kentucky":

1. AGRICULTURE

Chairman, Thomas P. Cooper, Dean, College of Agriculture and Home Economics; Director, Agricultural Experiment Station, University of Kentucky; author, Committee for Kentucky's Report on Agriculture.
J. E. Stanford, Executive Secretary, Kentucky Farm Bureau Federation.
J. W. Jones, President, Burley Tobacco Growers Cooperative Association.

Agriculture Sub-Committee on Farm Housing

Chairman, J. Allan Smith, Publications Editor, College of Agriculture and Home Economics, University of Kentucky; author, Farm Housing Section, Committee for Kentucky's Report on Housing.
Professor J. B. Kelley, Head, Agricultural Engineering Section, College of Agriculture and Home Economics, University of Kentucky.
Miss Myrtle Weldon, State Leader, Home Demonstration Agents, College of Agriculture and Home Economics, University of Kentucky.

2. EDUCATION

Chairman, Dr. John W. Brooker, Executive Secretary, Kentucky Education Association; former Superintendent of Public Instruction, State of Kentucky.
Dr. R. B. Atwood, President, Kentucky State College.
Dr. Maurice F. Seay, Dean, University of Kentucky; author, Committee for Kentucky's Report on Education.

3. HEALTH

Chairman, Dr. Bruce Underwood, State Health Commissioner. (Succeeding Dr. Philip E. Blackerby, deceased, author of the Committee for Kentucky's Report on Health.)
Dr. Emmet F. Horine, eminent heart specialist, author of Pioneer Life in Kentucky.
Dr. Charles A. Vance, President, Kentucky State Medical Association.

4. WELFARE

Chairman, Dr. Howard W. Beers, Head, Department of Rural Sociology, University of Kentucky; President, Kentucky Welfare Association; author, Committee for Kentucky's Report on Welfare.
Miss Oscie Sanders, President, Sue Bennett Junior College.
Miss Louise Diecks, Director of Welfare, City of Louisville.

5. HOUSING

Chairman, Nicholas H. Dosker, Administrator, Louisville Municipal Housing Commission.
Robert I. Kutak, Head, Department of Sociology, University of Louisville.

5. HOUSING (Continued)

Clarence C. Hieatt, Realtor; former President, National Association of Real Estate Boards.

6. MANUFACTURING

Chairman, H. Fred Willkie, Vice President, Joseph E. Seagram and Sons; Chairman, Governor Willis' Post-War Advisory Commission.
Dr. W. Scott Hall, Department of Economics and Sociology, Transylvania College; author, Committee for Kentucky's Report on Manufacturing.
A third member to be added later.

7. LABOR

Chairman, Ernest Greene Trimble, Professor of Political Science, University of Kentucky; author, Committee for Kentucky's Report on Labor.
Edward H. Weyler, Secretary-Treasurer, Kentucky State Federation of Labor (AFofL)
Al Whitehouse, President, Kentucky State CIO Council.

8. NATURAL RESOURCES

Chairman, Tom Wallace, Editor Emeritus, Louisville Times; former President, Kentucky Conservation Council; former President, Izaak Walton League of America.
Dr. Arthur C. McFarlan, Head, Department of Geology, University of Kentucky; Chairman of committee preparing Committee for Kentucky's Report on Natural Resources.
Henry Ward, Commissioner of Conservation, State of Kentucky.

9. TAXATION

Chairman, Wilson W. Wyatt, former Mayor of Louisville; former National Housing Administrator and Expeditor.
Clyde Reeves, Commissioner of Revenue, State of Kentucky.
Paul G. Blazer, Chairman of the Board, Ashland Oil and Refining Company.
Dr. James W. Martin, Director, Bureau of Business Research, University of Kentucky; author, Committee for Kentucky's Report on Taxation.

10. TRANSPORTATION

Chairman, Guy A. Huguelet, President, Southeastern Greyhound Lines, representing Bus Transportation.
P. G. Vondersmith, President, Cincinnati, Newport and Covington Railway Company, representing Street Transportation.
E. G. Buhner, Chairman of the Board, Silver Fleet Motor Express, representing Trucking Systems.
Al Near, Director of Airports, Louisville and Jefferson County, representing Air Transportation.
Patrick Calhoun, Jr., President, American Barge Line Company, representing Waterway Transportation.
John E. Tilford, Executive Vice-President, Louisville and Nashville Railroad Company, representing Railways.

10. TRANSPORTATION (Continued)

Dr. Rodman Sullivan, College of Commerce, University of Kentucky; author, Committee for Kentucky's Report on Transportation.
J. Lyter Donaldson, Former State Highway Commissioner, State of Kentucky.

11. COMMUNITY LIFE

Chairman, Dr. Irwin T. Sanders, Head, Department of Sociology, University of Kentucky; author, Committee for Kentucky's Report on Community Life.
Dr. Ralph H. Woods, President, Murray State College.
Dr. Merton D. Cyler, Department of Sociology, Berea College.

12. GOVERNMENT

Chairman, Philip Ardery, Commander, Kentucky National Guard; prominent Attorney.
J. E. Reeves, Department of Political Science, University of Kentucky; author, Committee for Kentucky's Report on Government.
Eli H. Brown, III, Attorney, Former U. S. District Attorney; author, Committee for Kentucky's Report on The Constitution.

YOUR TITLE_____

CONTRIBUTIONS ARE DEDUCTIBLE FROM STATE AND FEDERAL INCOME TAXES.

Make check payable to "Committee for Kentucky" or Merle E. Robertson, Treasurer of the Finance Campaign.

Kentucky needs YOUR help!

YOUR help now will assure the completion of the job now in progress by the COMMITTEE FOR KENTUCKY!

The "Committee for Kentucky" is a non-partisan, non-political, fact-finding organization whose **only** aim is the welfare of **all** of Kentucky. Its objective is to raise the level of Education, of Health and of Economic Opportunity for **all** of our people.

It has as active members some 88 organizations, most of them statewide. These organizations have a membership in excess of 450,000 people. The leaders of these 88 organizations are thoroughly aware of the job that the "Committee for Kentucky" has done, and they have given the "Committee" their wholehearted support. The 21 Directors of the "Committee", whose names are listed on the back, represent a cross section of Kentucky Life.

The "Committee" has been hard at work in these past four years creating the moral climate necessary for Kentucky's progress. With its searching Reports it has helped bring about so much progress that Kentucky is now ready to go forward more rapidly. You can help keep Kentucky on the March to a better day for all of our people.

WHAT has the COMMITTEE FOR KENTUCKY already accomplished?

SEE WHAT HAS BEEN DONE DURING THE LAST FOUR YEARS!

THE OUTSTANDING ACCOMPLISHMENTS OF THE "COMMITTEE" DURING THESE PAST FOUR YEARS ARE AS FOLLOWS:

1. It has published 7 important Reports by leading Kentucky Experts in their field — Reports on AGRICULTURE, EDUCATION, HEALTH, THE CONSTITUTION, WELFARE, HOUSING, and MANUFACTURING.

2. It has created in the minds of the people of Kentucky, through these Reports, an awareness of the needs of our State, and has stimulated a desire to do something about them.

3. It has helped start community organization in Henderson, and in a number of other communities in the State. It has set up a helpful service for all communities. Community improvement is the basis for a great Kentucky.

4. It has brought about better understanding among important groups in the State, through their active cooperation in the "Committee". Better understanding leads to working together for progress.

5. Through a joint session of the Kentucky Legislature on January 22, 1946, it has helped to create in the minds of our Legislators the need for a non-partisan progressive approach to Legislation.

Speaking of this Joint Session, State Senator Stanley Hoffman said: "The Committee broke party lines and showed the Legislators how to work for the good of Kentucky, rather than for their respective parties alone."

6. It has developed a People's Legislative Program, worked out by important groups in the State co-operatively, rather than in competion as heretofore. This should insure a better Legislative Program.

7. It has laid the ground work for progress in the years to come. A plan to incorporate the "WAKE UP KENTUCKY" Program in the curriculum of every High School and College in the State was adopted by the Council on Higher Education. Thousands of copies of the "Committee's" Reports are being used in Colleges and High Schools.

8. It has set an example for other States to follow. In fact, it has made a strong impression throughout America, on such men of National reputation as John Gunther, Marquis Childs, Elmo Roper, Marshall Field and Dr. George Gallup.

THE "COMMITTEE FOR KENTUCKY" HAS THE FOLLOWING PROGRAM PLANNED FOR THE NEXT TWO YEARS:

1. Finish publication of the remaining three of the original ten reports — LABOR, NATURAL RESOURCES and TAXATION.

2. Finish and present to the people of Kentucky its four final reports — COMMUNITY LIFE, TRANSPORTATION, GOVERNMENT and BLUEPRINT FOR A GREAT KENTUCKY.

3. Bring previously published Reports up to date and keep Kentucky constantly aware of the progress that is being made.

4. Develop a program of leadership education in the communities of the State by means of a series of discussion meetings on the "Committee's" Reports, sponsored by Service Clubs, Luncheon Clubs, and other organized groups.

5. Inform the students in Kentucky's Colleges and Universities of the needs and opportunities of our State, so that they may work for Kentucky's progress when they get back into their own communities after graduation. Such a program is now under way experimentally at Transylvania, Kentucky State College and the University of Kentucky.

6. Spread the work of Community Improvement so far as is possible to every community in the State. A great State is but a composite of great communities.

7. Develop a People's Legislative Program for the 1950 Session of the Legislature. Such a program, developed through the co-operation of many groups should insure Legislation from which all the people of Kentucky may benefit.

8. Co-operate with every important group seeing the betterment of our State.

9. Make the story of the "Committee for Kentucky" known throughout America as an example of Democracy in action. We are Americans as well as Kentuckians.

10. Help preserve our way of life against the challenges that face it today, by demonstrating that we can make Democracy work in Kentucky.

For the above ten purposes the "Committee for Kentucky" needs $50,000 a year for **each** of the two years ahead. We seek your help to raise this money. The purposes of the money are set forth herein in the form of a budget. It is our earnest hope that we may have your generous support.

It is the considered opinion of the Directors that when this two-year program is finished, the major task of the "Committee for Kentucky" will have been done. We are determined that this will not be a self-perpetuating Committee. Accordingly, it is our plan to suspend the "Committee" on March 1, 1950. With your help we can make fully effective the above ten point program. Won't you please make your contribution as generous as possible and help us keep Kentucky on the March!

COMMITTEE FOR KENTUCKY BUDGET

March 1, 1948 - March 1, 1950

The Committee for Kentucky needs $50,000 a year for **each** of the two years beginning March 1, 1948, for the following purposes:

ANNUAL REPORT

1. Salaries $20,000

(This includes an Executive Director and an Assistant, a Director of Community Organization and an Assistant, and a Clerical helper).

2. Reports 10,000

(This covers the planning, preparation and printing of 15,000 copies of each report. For the first year it covers the reports on MANUFACTURING, LABOR, NATURAL RESOURCES and TAXATION. For the second year it covers the reports on COMMUNITY LIFE, TRANSPORTATION, GOVERNMENT and BLUEPRINT FOR A GREAT KENTUCKY).

3. Community Service and Organization 10,000

(This includes the expansion of the staff to stimulate community organization and to service these organizations for every Kentucky community above 5,000 population as is possible).

4. Office Expenses 2,500

(This includes rent, light, janitor service and other office incidentals).

5. Travel Expenses 2,500

(This includes extensive travel throughout the State by both the Executive Director and the Director of Community Organization and Service. There is much territory to cover).

6. Postage and Supplies 5,000

(Ours is primarily a correspondence organization, with a mailing list of close to 20,000 people. It requires heavy expense to contact them).

TOTAL - Year beginning March 1, 1948 $50,000

TOTAL REQUIREMENTS FOR TWO YEAR PERIOD . . . $100,000

WON'T YOU PLEASE HELP US KEEP KENTUCKY "ON THE MARCH"?

PLEASE MAIL YOUR CONTRIBUTION TO THE COMMITTEE FOR KENTUCKY. MAKE CHECKS PAYABLE to the COMMITTEE OR MERLE E. ROBERTSON, Treas., Finance Campaign

EXECUTIVE DIRECTOR — MAURICE D. BEMENT

DIRECTOR, DEPARTMENT OF COMMUNITY SERVICE — JAMES W. ARMSTRONG

MAILING ADDRESS: 506 South Third Street, Louisville 2, Kentucky

IS IT YOUR TOWN?

By James W. Armstrong

To be sure, you live in it, perhaps you have lived in it for years, but is it your town? Do you feel that you belong to it, and that it belongs to you? Do you swell with pride and say, "This is my home town?" Some time ago I met a man who confided in me that he had lived in a community for fifteen years, but that he still felt like a stranger there.

There are thousands of Americans, yes even millions, who feel that they are no part of the community in which they live. They don't belong. They are disconnected, distant, estranged in their feelings toward their home town, lacking in any vital connection with its activities. Their city, their town, their rural neighborhood is where they spend their days, but community life moves around them. You remember Goethe's poem in which the soldier expressed his close feelings for his fallen comrade-at-arms with these simple words: "He was a part of me"? Well, these people have no such relationship with their community; it is no part of them.

Do any of these conditions describe your personal situation?

Have you moved about, and in some way in which you can't quite put your finger on, lost your community roots? We Americans are a moving population, especially in these times. Between 1940 and 1945 nearly a fifth of our people moved from the counties in which they lived. Perhaps you grew up in one community; then you went away to school; then you married or took a job in another place; and finally became so absorbed in your own activities that you never took hold in your new home town and became active in community activities. If pressed for your reactions, you would say, "This town doesn't mean anything to me; I just live here."

Or, perhaps in search of greater opportunity, you have moved from a small town to the city, found city life too complex for you to participate in community activity. Aside from holding down your job, having a few friends scattered here and there, going to church on Sunday, and using the city for amusement and recreation you have not involved yourself in community life. You have lost your function as a citizen. You don't count. You have become one of the voiceless millions.

Perhaps you sum up your failure to become a community worker in three words -- "I'm too busy." You are involved in your work, day in and day out; you haven't time. You have always intended to become more active in civic life but the days are just a repeated routine -- up to work in the morning, a hurried lunch, home at night tired out, a moment or two with the newspaper and with the family, and then to bed. Yes, you say, "If I just had the time ...."

If I had the time to find a place
And sit me down full face to face
With my better self that cannot show
In my daily life that rushes so...

But you don't find time for either your better self or your larger self. You have become a cog in a wheel- the economic wheel. Life rushes you around like a squirrel in a cage.

II.

Now for a moment let's skip the collective cost of this failure of individuals to take an active part in community affairs to see what it may be costing you. The town in which you live is the one real world with which you have direct contact. You view the universe from that home town. What happens there affects you. It hits you where you live.

Take the milk bottle which comes to your back door, for instance. What is in it - pure milk - or contaminated? Is it up to standard in freshness and quality? Does it sour quickly even in the refrigerator, or is it watered down until it is just bluejohn? What happens to that milk happens to you.

Take the water that comes into your house, for instance. You drink it; so does your family. Do you know whether it is being inspected regularly in order to insure its purity? What kind of reports are coming back concerning it from the State Health Department? Do you know? What happens to that water happens to you.

You have, you have had, or you will have some one very close to you trudging off down the street to school. What kind of school? What is the teacher like? How competent is she? Under what kind of school room conditions of health and sanitation is this one so dear living? What kind of behavior is being tolerated; what kind of training maintained? What are the school's needs? Do you know, and what are you doing about it? What happens to that school happens to you.

The place where you live - your home - what about it? Can you lock it, go away, come back and find it unmolested? Can you leave it unlocked? Does your garbage accumulate in the alley? Does the sewer back up in your basement? Will the fire department or police arrive in a hurry and take over competently in case of an emergency? Indeed you are interested in that. What happens to that home happens to you.

Maybe you are having a hard time finding a place - a house, an apartment - in which to live. Perhaps there is a housing shortage in your town. Perhaps you have children and/or dogs - and the landlords don't want children and/or dogs. If so - you know that what happens in your community happens to you and that you pay the cost.

And speaking of costs, what about living costs in your com-

munity? What kind of wages are paid? How much does it cost to live? Is it a good town in which to do business? By the time you have paid off the butcher and the baker, do you have anything left for the rainy day? What about the parks and playgrounds, the churches, the theatres, the public library? Is the air that you breathe clean? Do the stars shine clear at night?

Yes, you have a stake in your community. The stake is the kind of life you can live, the aspirations, the hopes you can realize, as a resident. Each of us bears the responsibility of citizenship. Each of us pays the cost of conditions. It is as Bernard Smith says in Town Building: "The townsman walks the streets he voted to build ...; uses the water and sanitary conveniences he inherited and is content to use; and builds under building ordinances he has permitted to stay within the legal structure of the city.. If these things are not satisfactory, then his, in the last analysis, is the blame." What happens to you in your community is your business, and its up to you to tend to your own business. Not some one else, YOU. You pay the cost.

III

And what about the cost of all of this individual citizen neglect to our communities? Collective neglect is merely the total of individual neglect. It is your neglect of your community, and my neglect, and the other fellow's neglect. It is your inaction, and my inaction and the other fellows inaction - all rolled into one. And what a cost to our communities!

Take the financial plight of our communities, for instance. Milked of funds by both federal and state taxing, much of their own business mismanaged and in arrears, supported by a makeshift assessment system filled with the grossest inequalities, manned by underpaid public officials, beset by increasing demands for public services, they present - but for few shining examples to the contrary - the sorry picture of citizen neglect. How many know the financial condition of their community? How many know whether its bonded indebtedness is being retired? How many do any more individually than to scream at their own tax bill?

Some time ago I talked with Doctor James Martin, the eminent taxation and municipal finance authority of the University of Kentucky. "Doctor Martin," I asked, "what is the solution to the increasing demands of citizens for better schools, parks, public buildings and services on the one hand, and the dismal financial plight of local governments on the other?"

One of the most fundamental solutions," came his quick reply, "and a solution which will bring citizens much of what they want, is a sound and business-like administration of local financial affairs - good bookkeeping, intelligent budgeting, comprehensive planning so that everything doesn't arise as an emergency."

"Well, is such a condition just a dream?" I pursued to get his

answer. "Not at all," he continued, "any community can have it, when the citizens demand it."

Yes, when citizens demand it. But when citizens sleep, when you and I regard community business as anybody's business but not our business, community business goes to ruin. Ours is the blame and the shame.

Take the political plight of our communities, for instance. Who supports the political bosses who hold in their hands the affairs of so many of our great cities? Who supports the tradition of the Bill Thompsons, Crumps, Hagues, Tammany Halls, Pendegrasts? Not the ward politicians, the party henchmen, the seekers of favors, the dealers in illicit and illegal enterprises, the men here and there who will sell their civic soul for a business contract. No. These City-Caesars are kept in power by the thousands, by the millions of so-called good Americans who go about their business but never go by the polls. And why is it that in our smaller communities, too, so many political incompetents, men without civic training, with nothing but grasping personal desires, get into office? It is because so many competent local leaders shun politics as a dread disease, and because the rank and file of good citizens, the majority, do not get together and rally behind candidates who will insure good government. We will gripe and groan through two, three or four years of inept municipal administration and then not take a few hours to change it all at the polls. Ours is the blame and the shame.

Take the story of housing in our communities, as another typical example. Everyone knows the direct connection between housing and neighborhood conditions on the one hand, and the character and quality of life and living on the other. If you are a city dweller then you need only to drive through the vast areas - block after block, mile after mile - of overcrowded tenements and squalid dwelling places, where human relations become degraded, where crime and juvenile delinquency thrive, and marital relations break down from the strain of living, to know how little of public interest and human concern have been injected in either their construction or operation. No fresh air, no glimpse of sky, no ground to put their feet on, no privacy - just heat, noise, grime, hard pavements, dim light, stairways to climb and too many people, everywhere too many people. It is hard to think well of the human race with three or four people in a bed, or with your neighbor able to hear every sound you make, and complain about it.

But squalid and overcrowded dwelling places are not confined to big cities, nor the problems that they create. If you have worked in some of our industrial towns, squatting in their grime and their filth, you know that. There are few communities indeed where someone is not taking rent from rows of miserable little dilapidated unpainted houses that spawn their human problems upon the community.

Nor do we need to dwell only with slum areas and housing unfit

for human dwelling. From Doctor Coleman Woodbury's report on housing to the National Conference on Family Life in May 1948 I take this significant statement:

> The nation's total housing supply falls farther short of meeting even minimum needs than it did in 1940. Doubling up has increased sharply. It is now estimated at about 2.75 million - i.e., it directly affects 5.5 million families..... The housing consumer may or may not be the forgotten man; he certainly is the leading candidate for the dubious title of the All-American goat. And in his present unorganized state he is all but helpless.

The situation is clear. Adequate housing, housing designed for better living, slum clearance and low rent dwelling places, zoning laws, intelligent building codes do not automatically appear. Someone must care, someone must be active in public interest. You must care. I must care. If we desire better communities in which to live, and we do desire that fervently, then we must get out and develop that kind of community. We must put the work behind the wish.

IV.

Yes, the citizen must put work behind the wishes in community development. And that is taking place. There are unmistakable signs that there is a resurgence of citizens interest in improving life and living in our American communities. I was recently visited at our Committee for Kentucky office in Louisville by Professor Paul Essert, head of the Department of Adult Education in Columbia University. He had been on an extensive trip through the East, through the Mid-West, and through the Deep South. "I have taken this trip," he explained, "to see whether evidences of increased citizen activity in community affairs in the East was merely a small regional manifestation, or occuring also in other regions."

"And what do you find?" I asked.

"This think is springing up here and there over the country," he continued. "There is clear evidence that the citizen is beginning to reassert his power in community life. It is a definite trend and it is going on even stronger in the South than in the East."

"What are you finding here in Kentucky communities," he asked, "and where is its drive coming from?"

I'd like to tell you what I told him, because it is at the bottom of our citizen faiths in Kentucky.

We Americans have received some severe shocks in the last quarter century -- two world wars and two depressions. The attacks

of the Nazis, the Facists, and the conflict in ideas with the Communists, have driven us out of our complacencies; the depressions have forced us really to ask ourselves what makes our economic system tick. We have had a house cleaning in our minds and have come up with a few answers.

One of the answers deals with our belief in democracy and where it should begin its manifestations. I started out in my community work with a citizens council in my home town in Henderson. We wrote down our citizen faiths in democracy and this is part of what we said in our Credo:

> The Committee for the City and County of Henderson is more than an organization. It is a faith. It is a faith in the ideology of democracy. It is the physical embodiment of the belief that men and women - citizens of the same community - can assemble from different interests and occupations, from different racial stocks and religions, from different political affiliations, from different social positions, and, by subordinating special interests to general interests, can thereby achieve a richer, fuller community life than is otherwise obtainable. It is a belief that the areas of agreement and unity in community life are more important than the areas of disagreement and disunity. It is the belief that our biggest problems are held in common; that we hold the problems of disease and health in common, that we hold the problem of ignorance and enlightenment in common; that the problems of poverty and prosperity, of bad government and good government, of bad citizenship and good citizenship, of the relations of industry, the conditions of housing, the availability of recreational facilities, the adequacy of public buildings, the development of needed civic enterprises, all of these are problems and projects in which all citizens hold a common responsibility and for which solutions can come only through community cooperation... We believe that the instrumentality of government is made effective and a widespread program of community development made possible only through an interested, informed citizenry, organized to work together.. This is the statement of our faith, resting in the ancient ideals which gave birth to the United States of America. It is the credo of our democracy.

So part of the citizen drive comes from our belief in the dynamic role which the citizen plays in making democracy effective.

But there is another answer implied in that credo. It is our belief that the community is the foundation of the American structure. The home towns are the foundations of the economic, social, political, cultural and religious life of America. The state, the nation is but a network of communities. We believe that the mad rush to Washington during the depression years has stressed a wrong procedure. We believe in Federal, state and national agency assistance but we also believe the first action and the final action should come from the citizens within the communities. In our community movement we are reversing this process and it is giving local citizens a reborn sense of their power, rekindling their initiative, and calling upon the ingenuity and resourcefulness that has spelled the greatness of America.

Yes, we recognize in the community a force for freemen's actions. We have expressed this in different ways but here is one of them:

> Community - what a word that is. The life that we have in common - the place where we live. It is the home - our families, our children, our parents. It is our friends, our neighbors, our fellow townsmen. It is the place of our work, where we spend our days, where we spend our lives. It is the only real world we know, the place in which we come face to face with other people, work out our human destinies, the place in which we count.... If we do not find the democratic way of life in our communities then we will not find it at all. If our communities do not find it, then America cannot find it. As our communities go, so goes America. Let's make no mistake about that. The spiritual flow of life begins at the bottom of the spring - the community. Choke it off there, and you have choked the nation. Pollute it there, and you pollute the nation. Maintain it there - clear, fresh, abundant - and the nation will ever be sustained.

When your community begins to mean something to you then you have found a real force in your life. And it means something to you when you work for it.

There is a third source of citizen power that merges with the others. Let me get at it this way. We are in Lincoln country down our way. He was born near Hodgenville, where there is a shrine. You will recall that he later moved with his parents over the river into Indiana, near Gentryville, and there his mother, Nancy Hanks Lincoln, died. It's about fifty miles up the river from my home town of Henderson. Her grave is on a little knoll in the woods and remains just as it was placed there years ago. A path leads down from the knoll to the site of the cabin in which the Lincoln

family lived. Nothing stands but the fireplace which has been carefully restored. Nearby is a bronze plaque bearing this inscription:

> For countless generations mankind has held the hearthstone as the altar of his home, a place of joy in the times of prosperity, a refuge in adversity, a spot made sacred by the lives of those spent around it. This is the hearthstone set here to mark the place where Lincoln, at his mother's knee, learned the integrity and strength, the kindness and love of beauty, which has made the memory of his life and work a priceless heritage to all the world.

Let the hearthstone stand as the symbol of the home, the physical and spiritual center from which we draw strength, and determination to make our communities better places for our families and other families to live in. The ho , the community, the way of life we love - those are powerful action factors in our citizenship.

There is a fourth answer behind citizen action. It is the product of our religious beliefs. I refer to religion in a very fundamental way. Perhaps some of us didn't get the full force of the difference in what we believe until we came face to face with the beliefs of the Nazis and the Shintoism of the Japanese. We are beginning to realize how deeply the tenets of our religion have entered into the government we created, the democratic way we seek to follow, the idea of community we embrace, and the concept of family life we seek to develop. These tenets influence our acts, even the acts of those who do not formally affiliate themselves with religious denominations.

What an unique government we set up! From the work of my former fellow-townsman, Clarence Manion, Dean of the Law School at Notre Dame University, I take this statement. It appears in his book, Lessons in Liberty:-

> This was the first time in the history of the world that a civil government was to be overthrown for the positive and officially declared reason that it had violated the God-given rights of man. It was proposed now that a new government should be constructed by direction and consent of the governed as a special agency for the protection of individual rights.

Yes, behind our common beliefs is the bulwark of our religious tenets, the belief in the sacredness of every person, that men shall not be treated as cattle or chattels; that they are citizens not subject; and that they stand as individuals before their Creator.

And when our community relationships are discussed, how better could we express ideal relationship, than through this paraphrase of Paul's message to the Corinthians:

For the community is not one member, but many. If the teacher shall say, because I am not a parent, I am not a part of the community; is he therefore not a part of the community?

And if the farmer shall say, I am not a part of the community; is he therefore not a part of the community?

If the whole community were merchants, where would our food come from? If the whole community were farmers, how would we build our houses?

But now are we all citizens, each with his own function, but one community; and the plumber cannot say to the druggist, I have no need of you; nor the parent of the politician, I have no need of you.

Indeed, even those members of the community who seem least capable are necessary; and those who are disadvantaged deserve the greater opportunities, lest their handicaps be perpetuated.

For God has established us as social beings and has recognized that there should be neighborliness throughout our community, members showing the same care for one another, sharing both suffering and prosperity.

Are all salesmen? Are all ministers? Are all politicians? Are all clerks? Are all mechanics, engineers, doctors?

Covet earnestly the best for both your neighbor and yourself; and a more excellent way lies before you.

Yes, there is a drive behind the citizen who is working for his community; he has something to work for and faiths to spur him on. The better community movement is on the march. The effective program of the Georgia Citizens Council, the Citizens Conference of New York and that of New Jersey, the wide spread community work going on in North Carolina, the work going on in Virginia through the inspiration of the Ogdens of the University of Virginia Extension Service are but a few examples of the resurgence of citizen action in community building.

-V-

This is an appeal and a challenge to citizens everywhere to join the cause of better communities. It is a call to become a community worker, to become a part of your community by becoming a participant in its affairs. It is an appeal and challenge to the leadership of organizations to become community minded in your activities. It is an appeal and challenge to organization members to carry on community work expected of them. Your community worth is measured by your community service. It is an appeal and challenge to community organizations to band yourselves together to tackle community wide problems that can be solved by cooperation. This is an appeal and challenge to agencies, state, Federal, national - to become aware of the community programs which each of you is conducting, to learn the same lesson of coordination and cooperation and to use and develop local leadership for strengthening community life at its foundations.

What cooperation will do! I like what Bernard Smith says about it in his Town Building: "Free men in a free town, with average brains and true cooperation, can remake any town that has an economic justification for existence...True cooperation springs from the deep-seated realization that the good of the individual is bound to come if all benefit, and that selfish gains at the expense of the community end in individual loss as well. True cooperation once started, has no bounds. No one at the time of its first beginning has vision enough to see the end."

Where do we begin? We begin where we are. You remember the story of the shipwrecked men, adrift in a small boat, famishing of thirst; how they sighted a ship and managed to attract attention. When it came within hailing distance they called: "Water, give us water." And the call came back from the ship: "Put down your bucket where you are." Failing to understand, the shipwrecked men called again: "Water, water, give us water." And the reply came back again: "Put down your bucket where you are." Finally complying with the instruction they put down their bucket into the sea, and drawing it up and putting it to their parched lips they tasted not salt water but fresh water. It was only then that they found that they were off the mouth of the great Amazon River that was sending fresh water out to sea.

That is good instruction for all of us. "Put down your bucket where you are." Everywhere in the community are tasks and projects that will yield to effort. How the physical community needs us - where we are. Clean up the alleys. Drive out the rats. Clear out the weed patches. How many store fronts need a face lifting. How we need parks and playgrounds all over town. How the economic town needs us - better business by better mthods, new business, new industry, bigger payrolls, better conditions for workmen, more training for higher skills. How the governmental town needs us - citizens to take an interest in good government, help for worthy civic projects, interest in law enforcement, trafic control, health maintenance, sanitation. How the cultural and spiritual town needs us,

the educational community, the club and organizational community. How all of this works back to promote better conditions for our families and a better life for all of us.

How many citizens do we need with whom to make a start? Only one. You start with yourself. We believe in the power of the individual. Work must start with an individual. What one person can do when he quits passing the buck, quits looking for other people to do things! The power of one person is tremendous - in action. And action, not asking for action, is contagious. Start with yourself.

And the next step is working with like-minded people-people who also want action and will act for community building. It doesn't take many and it may be people in groups of which you are already a member. As George B. deHuzar points out in his valuable little book, Applications of Democracy: "We are not really members of society, rather we are members of groups; our family, profession, club and church. Since the health of the whole is determined by the health of the parts, what you do in your immediate environment will help the total situation in your community." And he goes on to show what a small group can do and how it can go about it.

And when groups in a community are ready for cooperation, then by community-wide action larger projects can be developed. Under those conditions joint councils can be formed to direct and coordinate the work. That is the reason why in so many places today we are finding community councils helping, by citizen cooperation and organizational coordination, to work for community progress.

Finally this is a challenge and appeal for intelligence in community work. One of the reason for the success of many of the modern citizen programs is that they do not represent a sudden rash of excitement and hasty and ill-advised action; rather they are prefaced by careful fact-finding, thorough consideration and planning, intelligent timing and an effective community selling job. There is a need for the community worker to understand his community, to understand its ways, and go about his work with competence. There are agencies set up to assist the worker to gain a better knowledge of methods. Materials are available. Many of our organizations are working on a state-wide and regional basis to give help along these lines to communities. Citizens themselves have organized these conferences and workshops in order that citizens of one town may learn from citizens from other communities. To these conferences and workshops are brought leaders of outstanding achievements. Help is yours for the asking.

Here then is our answer to world confusion and conflict. Let us, as Americans, put real meaning in our citizenship, begin where we are in our communities, with the problems close at hand, and find integration of mind and spirit by acting on things that we understand and are our size, knowing full well that as we go forward together we will gain collective strength to climb the greater summits of our times.

TECHNIQUES FOR COMMUNITY ACTION

Man has lived in communities for a long, long time but has given little attention to recording what he learns about community life. Some of this experience of living together finds its way into proverbs such as "God help those who have bad neighbors," and is passed from father to son. Most people, however, who know anything about improving community life have had to learn it the hard way -- by individual experience. This relatively small number of people who make it their concern to know the community--political leaders, business men, sometimes school administrators--may pass on the information they have acquired to those whom they are training to take their places, but they usually do this orally and seldom write down their observations.

Within recent years social scientists have attempted to put in writing some of the principles which many successful community leaders follow as a matter of course. They have also made comparative studies of the methods employed in different communities to see which methods or techniques worked in one situation and not in another, and have sought to explain the reasons for the varying degrees of success. The purpose behind such study is to put in the hands of the community leader some of the basic information which, if followed, would help him avoid many of the pitfalls he would likely encounter were he to rely only upon his own experience without trying to profit from the experiences of others.

This section on Techniques for Community Action will contain quite a few points which many leaders will consider obvious and others about which they had not thought previously. It is interesting to observe that what one leader considers obvious seems new to

another leader for each has had different life experiences, a different preparation for the task which he has undertaken. Many leaders, too, in going over such a list of techniques will find that they would have avoided some of their previous difficulties had they taken into account some of the cautions contained in the list.

In using such a set of suggested techniques one must remember that rules for community organization are not definite like rules for a card game. General suggestions can be offered; they will help, but the cloth will have to be cut to fit a particular situation.

Most programs calling for community action pass through five rather well-defined stages:

A. Getting started.
B. Getting facts.
C. Planning action.
D. Taking action.
E. Checking results.

The following techniques will be presented in connection with one of the above stages, although some of the techniques apply equally well to two or more stages.

A. Getting Started

Many community programs start with an individual who has an idea which he cannot put into effect alone. If he is an officer in a group he tells his fellow members about it; if he is a member of an informal group of important leaders in the community he discusses it with them. He senses a need, shares his idea about the need, and receives enough encouragement from others to make him think that something can be done.

Other community programs start because groups are set to do something for their community and are searching for an idea. They actively enlist suggestions and choose projects from many which are proposed. In such a case, the project from the beginning is group-

sponsored and grows as the original group enlarges the circle of those engaging in the enterprise.

Oftentimes, it is hard to trace the beginning. Something dramatic in community life such as the arrest of a juvenile delinquent, the burning down of a tavern, the withdrawal of a factory from the town, or a strike may cause many individuals to decide almost simultaneously upon the need for a particular line of action.

But no matter where the idea comes from, whether individual reflection or group decision, community action only occurs when the community--as reflected in the participation of many people--begins to act.

1. Community action can be initiated by any citizen.

Those individuals in whom the most have the most confidence are probably the best ones to approach first. Try to think of influential persons who might be indifferent or opposed; see them in advance. Many of them will help actively if they understand.

e.g., Joe Jones, a fireman, gets an idea that there ought to be a Fire Prevention Day on which school children would be given rides in fire trucks and then sent home to look from attic to cellar for fire hazards. He talks it over with his captain or the Fire Chief. They in turn go to the editor of the local paper and ask his opinion. He tells them that the idea will "go over big" if they can get Mr. Hamilton Stuyvesant, local bank president, to sponsor it and appoint the necessary committees. They do; it does.

2. Use photos of attractive communities.

A basic asset in community action is community pride. Photographs of community bad spots as well as comparisons with other communities help tell the story when enlisting the support of influential people at the very beginning.

e.g., A highway beautification project, calling for improvement of approaches to a town, had little support among the business leaders and club women until they were shown what the approaches looked like (actual photographs) and an artist's sketch of what they could look like.

3. Put down in writing just what is desired.

This clarifies thinking, enables an individual to talk more clearly when presenting the matter to anyone who is at first unreceptive. The chances are that this early memorandum will be changed considerably, maybe altogether, but it does serve as a starting-point.

e.g., The president of a civic club is struck by the many fund-raising campaigns engaged in by the various organizations for charitable purposes, quite apart from the regular Community Chest agencies. These campaigns centered around events ranging from a Turtle Derby to a Plug Horse Derby, a rodeo to a horse show, carnival to children's theatricals, recital by Phil Spitalny's All-Girl orchestra to a wrestling match between Bobev, the Bulgarian Bruiser, and Tarzan, the Terrible Turk. Business organizations all over town are expected to buy a big block of tickets for each performance. The president writes down the types of programs in which clubs could co-ordinate their efforts, he figures out ways of selling tickets so as to avoid going to the same business firms for each occasion. Now he is ready to discuss the matter realistically with other club presidents.

4. Where possible begin with a need which the people already feel.

The community will go along more readily if the proposed program is obvious from the start.

e.g., A community greatly perturbed about the amount and cleanliness of its water supply is much more ready to support a program remedying this problem than one calling for the erection of a public swimming pool in the park.

5. Find out what other communities have done.

Call in experts in community organization from the very beginning and get their advice on ways in which the community can solve its own problems by local leadership. Ask these experts for names of citizens in other communities who have tackled similar problems and write or visit these citizens.

e.g., Five years ago Community A started out to improve the flow of traffic and parking facilities in the downtown area. Now Community B is tackling the same problem. It could avoid many mistakes and be perhaps years ahead if it closely studied and profited from the experiences of Community A.

6.

7.

B. Getting Facts

Once sufficient interest has been created in a given program the indispensable stage which follows is one of getting together all related facts. The fact-finding stage is useful in several ways. It is a direct aid to the planning which precedes action; it is a period of orientation for all of those given some responsibilities in the collection of facts; they, as well as those whom they consult, become more conscious of community needs; the joint efforts of those participating promotes the spirit of team-work necessary to see the program through the succeeding stages.

1. Know the community.

This calls for a study of the social structure and leadership patterns as well as community resources. One must find out what groups work with each other; what groups are antagonistic toward each other; what kind of appeals best enlist community support. Statistical information should be obtained with relation to the particular problem being attacked; a gauge of public opinion is oftentimes a necessary part of knowing the community.

> e.g., Several community leaders wished to put through a zoning law. They first made a study of the properties which would be affected, the way zoning laws had been written up in other communities, and then they analyzed the type of leadership they would need in order to put the idea across. Their analysis was rounded out by a public opinion poll to see what segments of the population were already favorably disposed and which opposed. With these facts in mind they were ready for the planning stage.

2. Let surveys be group sponsored, not individually done.

Responsible local committees or organizations with high, established prestige should undertake the surveys for they are in position to solicit public support. They are also able to give such surveys adequate financial backing. However, no survey should be undertaken unless the sponsors clearly have in mind the purpose to be served and are convinced of the need.

e.g., A wealthy man thought it would be a splendid idea if the school children all had hot lunches at the school. He set out with a few helpers, whom he paid, to find out what parents thought of this plan. He asked rather intimate questions about diet and food budgets. In about three cases out of five his interviewers got inadequate information. The chances are that a group of PTA's or women's clubs could have gotten a much better response from the people who were supposed to benefit and probably would have worked out a more practical approach.

3.

4.

C. Planning Action

One of the most crucial steps is that which moves from fact-finding to planning. Ultimate success of a program depends not only upon the plan itself but upon the personnel selected to help with the planning. Planning involves the choice of a few objectives from a large number indicated by the facts assembled; it calls for the development of strategy in the approach toward those objectives. Careful consideration must be given to resources available, ways of "selling" the program to the public, as well as an evaluation of possibilities of success.

1. Those who are to be benefited by a program should usually have some part in outlining the program.

This not only makes it easier to "sell" the program but it means that it is more apt to be adapted to the needs of the group concerned. Thus, success is more likely.

> e.g., If a service club is considering the installation of lights to encourage community soft-ball games, representative groups of citizens should be in on the discussions of costs, supervision, etc. The finished job should not be handed to the community ready-made "on a silver platter."

2. Take as the initial step in the plan some small task that can be accomplished easily.

Generally this will set the stage for more extensive projects. The community leader has as his chief job that of persuading people of differing points of view to work together. They learn to work together best on simple, non-controversial issues.

> e.g., Persuade the churches to co-operate occasionally in a jointly-sponsored community service; this may lead to jointly-sponsored vacation church schools or a summer recreation program.

3. If certain groups to be involved in the program have not been included in the planning, be sure to get their informal support

before the program is publicly launched.

This means that the leaders of these groups must be well-informed about the plans. Any objections they raise must be carefully considered and some compromise sought if this is possible.

e.g., A group actively seeking city-county consolidation of schools or health departments should be sure that their facts are made known to school or health officials before a publicity campaign is launched in the press or over the radio. Farm leaders should be consulted in advance so that they can see the benefits to be gained by rural people. If such informal agreement is not obtained the consolidation could easily be defeated on the basis of rural-urban conflict. There might be little relation between the voting and the merits or demerits of the plan. No group wants to feel that another group is "putting something over" on it.

4. The explanation of the plan should give the people of the community "pocketbook pains."

That is, they should be shown that financially the program is necessary;

e.g., Study after study shows that slum areas of cities require more in public funds (police and fire protection, health and welfare services, etc.) than these same areas contribute in taxes. In other words, it would be cheaper in the long run in many communities to turn a block of substandard housing into a playground than to let it drain off more than its share of city revenues year in and year out.

5.

6.

7.

D. Taking Action

The fact-finding and the planning stages should both contribute greatly to the preparation for action. By the time the plan is ready, most of the influential people in the community will have already been informed unofficially of what is afoot, many others will also know that there is "something in the wind." The action stage should be approached in a spirit of willingness to change the plan whenever circumstances seem to indicate it desirable.

1. Consider communication to the public as a part of taking action.

Methods of reaching the public are:

a. press and radio.

b. illustrated lectures, chalk talks, effective cartoons.

c. use the gossip chains to create bandwagon effect.

e.g., Select several informal gossiping groups (barber shop, grain store, sheriff's office, beauty parlor) as centers of spreading local news. Be sure that some of the usual discussants are thoroughly acquainted with the plan so they can tell all of the details to a man being shaved, a farmer waiting for his grain, or an individual hoping he'll get put on the jury.

2. Make the local citizens feel responsible.

Play down the expert. Give frequent pats on the back. Let it be known in the community who is responsible for a particular part of the program.

e.g., One community wishing to raise money for a city auditorium brought in a money-raising expert, who was to receive a percentage of the amount raised. He had great difficulty in putting the campaign across because local people whom he asked to help seemed to feel, "You're getting paid to do this, why bother me?"

3. Use organizations already existing in the community to carry out the program, where possible.

If existing groups are used most of the energy which would have to go into organizational work can be channeled into more productive

avenues. Organizations, like individuals, like to enhance their prestige; success in community action is one way they can gain prestige, particularly if they are reminded that they are working with and not for the community.

If you do set up an organization for the special purpose of carrying out the program do not expect it to do a lot of things and thrive indefinitely. The number of persons in your community who will give time and energy to voluntary leadership in community work will always be relatively small, and nobody will do it constantly. It will be only normal if quiet spells or periods of inactivity develop. Let the degree of activity depend on the need and the occasion.

> e.g., If the community lacks sufficient recreational facilities for young people, a guiding committee might be set up for the purpose of tapping every possible local organization for help. Too active or formal an organization for this specific purpose might make other organizations less willing to make the contribution of time and resources which they are in position to render.

4. Make more adequate use of existing community resources.

Schools, churches, libraries, lodge rooms and other buildings are frequently under-utilized. Before money is spent in erecting an additional building for community purposes investigate the possibility of using a building now existing and spending the available funds in suitable equipment and adequate supervision.

> e.g., Many communities make use of the school gymnasium for non-school youth when such use would not interfere with scheduled school activities. This makes possible a sound program of athletics, dramatics, and social life.

5.

6.

E. Checking Results

Few if any programs are actually accomplished in full. One, two, or three points of the program may be completed but a fourth or fifth point may not have succeeded as well as expected. In some cases, no one point of the program is carried out to the satisfaction of the leaders but, just the same, some progress may have been made in community action. At periodic intervals, therefore, the leaders of any project should assess the gains. Once this is done they can figure out the reasons why certain steps of the plan were easily effected and other steps seemingly rejected by the people.

1. Issue periodic progress reports.

These may be for use only in the sponsoring groups or they may be released to the newspapers for community-wide attention. Be sure proper credit is given to individuals and groups who have contributed to the success of the program.

> e.g., A community project on cancer control is really a continuing job. A periodic statement on number of new cases treated, consultations held, talks made to interested groups, and literature distributed will not only advertise the project, enlist future support but will make those who have already participated feel that their money or time has been well-spent.

2. Use a community check sheet.

If such sheets have been used in the beginning stages, they can be used after action has been underway to chart progress--the "before" and "after" technique. If check sheets were not available in the beginning, they can nevertheless be a means of showing what still lies ahead. That is, a running account of progress to date can be climaxed by a check sheet emphasizing the necessity of "keeping our shoulder to the wheel."

> e.g., A community-centered school may be interested in improving the diet, housing (screens, toilet facilities), street beautification, library facilities, etc. In the community a

score card quickly shows what the situation was at different dates, thus measuring the progress that has been made.

3. Watch for cases of increased co-operation, intensified community loyalty.

These usually come as by-products of community action but are important gains nevertheless. They should not be overlooked in a statement of progress.

e.g., As a result of some community program, such as the holding of a community fair, several organizations which had formerly kept to themselves begin to cooperate and work jointly on other matters. Letters to the newspaper editors, attitudes reflected in public and private gatherings may show a deepening pride in the community. These should be noted.

4.

5.

6.

A MANUAL FOR COMMUNITY ORGANIZATION

"Community organization is acting together to get something done about a common problem or a common opportunity."

COMMITTEE FOR KENTUCKY

Department of Community Service - James W. Armstrong, Director
506 South Third Street, Louisville 2, Kentucky

A PLAN FOR CITIZEN ACTION

IN

KENTUCKY COMMUNITIES

Progress in the Commonwealth and Kentucky's communities must go hand in hand.

This manual is for the use of Kentuckians who are interested in organizing community councils to promote the welfare of their communities--the places in which they live.

It tells--

I. The importance of our communities.

II. The needs from which community organization arises.

III. The kind of citizen organization necessary to meet the needs and develop the possibilities of a community.

IV. Suggestions for the work of a community council.

V. How to form a community council.

VI. General suggestions.

I. THE IMPORTANCE OF OUR COMMUNITIES:

1. Our communities are the places where we live; what happens there affects us WHERE WE LIVE.

"Town building is not a simple matter to be dealt with lightly. It is our life itself; it deserves our earnest study and our best energies."--Bernard Smith, "Town Building."

Community--what a word that is! The life we have in common--the place where we live. It is the home--our families, our children, our parents. It is our friends, our neighbors, our fellow townsmen. It is the place of our work, where we spend our days, where we spend our lives. It is the only real world we know, the place in which we come face to face with other people, work out our human destinies, the place in which we count, if we are to count at all.

2. Our communities are the foundations of our democracy.

"When a community is operating effectively, it is the sun, rain, and soil of democracy--and there is no other place for democracy to grow."--Howard Beers, "Kentucky Designs for Her Future."

If we don't find the democratic way of life there, we will not find it at all. If our communities do not find it, then America can not find it. As our communities go, so goes America. Our spiritual flow of life begins at the bottom of the spring--in the community. Choke it off there, and you have choked the Nation. Pollute it there, and you pollute the Nation. Maintain it there--clear, fresh, abundant--and you sustain the Nation."

3. Our communities are the starting point for general progress in the Commonwealth.

Improvement in Kentucky must work hand in hand with community development. Improved communities will produce an improved Commonwealth.

"In hundreds of Kentucky communities, there must be constructive action to improve the use of local resources by local effort and local leadership. The people and their leaders within the community must organize to study and plan for applying their own energy to their own problems."--Howard Beers, "Kentucky Designs for Her Future."

"The most effective planning in the long run is not always the deliberating and scheming of committees and commissions, helpful as they may be. It is the forethinking of all of the people in their several walks of life, as each mind views the present

and previews the future. Specialists in certain fields of knowledge will not alone control the direction of social change in a democracy. All of the people, including the experts, will take part in making the chief decisions."--Howard Beers, "Kentucky Designs for Her Future."

But no effective program of development for Kentucky can be contemplated without a direct approach at the local level. It is within our cities, our villages and the rural areas surrounding them that the real measure of Kentucky life is taken. No advancement that does not enrich community life is real advancement. No real state-wide advancement is possible without the aggressive support of Kentucky communities."

4. Our communities are the natural centers for regional progress.

Our communities are the focal points for the development of the regions surrounding them. When communities work together to understand their common problems and the opportunities which they share in common, the economic and social conditions within their region can be improved.

5. Our communities are the cradle for world attitudes.

World outlooks, world viewpoints are products of the mind. The attitude for world unity and cooperation is an expansion of the attitude for community unity and cooperation. When people learn, in their communities, to work for common prosperity, common progress for the varied interests and people of their community, they are establishing the foundation for a prosperous, progressive peaceful world.

II. THE NEEDS FROM WHICH COMMUNITY ORGANIZATION ARISES:

1. Kentucky has great needs for which she must look to our communities for help.

(a) Kentucky was next to lowest in industrial payrolls in the Southern states in 1940.

(b) Only one state of the 48 had a higher percentage of illiteracy in 1940.

(c) In 1940 we ranked 47th in percentage of persons 25 or over who completed high school.

(d) In 1943, 4,000 teachers earned less than $12 a week on a 52-week basis.

(e) Only 2 states had a higher death rate from tuberculosis in 1942.

(f) 42% of our farms were not reached by improved roads of any sort in 1942.

(g) 34% of our farms were valued at $300 or less in 1940.

(h) 2/3 of our schools do not have safe water.

--Committee for Kentucky Reports

2. There are undeveloped resources and opportunities in Kentucky that await the action of alert and progressive citizens.

Opportunities for increased business, manufacturing, improved agriculture await the action of energetic organized citizens and communities. Kentucky has the resources. She needs citizen action.

"Throughout Kentucky there is abundant evidence that we do not understand--do not even know--the principles which should guide us in our use of natural resources. Eroded hillsides, depleted forests, wasted minerals, worn-out fields, decimated wildlife, polluted streams, and unhealthy and uneducated people--all are evidence of misuse of resources...Even though misuse has depleted many of Kentucky's natural resources, there is still a generous supply in the state. Every citizen should know what these resources are, what part they play in the economy and culture of the state, and how they may best be used to advance the welfare of the state and its citizens."--Kentucky's Resources, Bureau of School Service Publication, University of Kentucky.

3. Thousands of our citizens have lost contact, knowledge, interest in the sense of responsibility for what is happening in their communities. Others have no knowledge of how to make their community interest effective.

"Democracy, as we know it, cannot long endure with large blocs of our citizenship kept ignorant and nonparticipants in the affairs of everyday business. Democracy depends on united participation; and because of this, we shall encourage the creation of organized towns. Only through definite organization can the energies and the talents of all our people be assembled and coordinated for the benefit of all. Town organization is the forerunner of town action, and intelligent town action is the safeguard of our democracy."--Bernard Smith, "Town Building."

The individual citizen too often has found that he can not make himself felt as a force in the community. A complex of causes has given rise to this condition. The individual has become disconnected from the processes of government. He often has had little choice in the selection of candidates for political office, little voice in the determination of platforms. He frequently has felt that decisions are reached far above him, and handed down to him, that he has nothing to do with making them. He has lost sight of the overall picture in his community, doesn't know the conditions existing, has lost contact with the opinions and the life of many other people and groups in his locality.

4. It is difficult to work alone. Individuals and groups working alone find it difficult to accomplish anything constructive for their community. Communities need to organize for combined strength in civic action.

Individuals and organizations must realize that they need each other in order to accomplish their separate programs and the larger community projects.

A good cause may fail for want of general support. How often the vital work of one organization in a town goes unappreciated by the general community. How often one group, charged with great responsibility, is not understood, is not supported by others. It may be the agencies dealing with youth. It may be the schools, the YMCA, the Scouts. It may be some pastor laboring to bring spiritual life to his community. It may be the Farm Bureau attempting to raise the productivity of the region on which community purchasing power depends. It may be the Board of Trade attempting to bring new industries into the town in order to give employment to people who need jobs. It may be the laboring man who need better homes, places of recreation, something to make life more than a job. It may be--anyone. Regardless--one of the community's greatest needs is for groups to cooperate in order that together they can produce a rich and full community life.

5. A divided and disorganized community becomes the prey to pressure groups and partisan politics.

Every community must decide for itself this issue: Shall we work together or shall we permit dissension and division to paralyze and disrupt community life? Unless a community works together, special interest groups take over control for the benefit of their own crowd. Political corruption is the outgrowth of a lack of interest and participation on the part of the individual citizen and a lack of organization to promote the public interest. A community run for special interest or public interest--

which shall it be? The city which is progressive, well-governed, and prosperous is an organized community in which people work together.

6. A general civic spirit and community cooperation can be developed only by effort and organization.

It takes more than wishing to produce a cooperative community. It demands work, leadership, and organization. An unorganized town or a disorganized town cannot be a good town. Community achievement demands planning, study, persistent and coordinated effort. The community which has learned to work together--to organize itself for specific goals--produces results. It is the town in which people take pride in their community, enjoy living, and maintain high living standards.

One measure of community organization is the degree to which organizations and interests are willing to cooperate in activities or objectives for the betterment of the common welfare, for which they are not primarily responsible and in which others will take the lead.

Community organization is an improvement or perfecting of the relationships which make a community. The very idea of community carries with it the correlative concept of organization.

III. WHAT KIND OF AN ORGANIZATION IS NECESSARY IN ORDER TO MEET THE NEEDS AND DEVELOP THE POSSIBILITIES OF A COMMUNITY?

1. An organization that is both representative of the community and well chosen in personnel so that it will command community respect and support.

2. An organization dedicated to the overall interests and needs of the community.

3. A non-political, non-sectarian, non-partisan, non-profit organization in which the entire community can participate.

4. An organization which, through its membership, has ready access to the organized groups of the community as well as the channels of publicity.

5. An organization whose efforts will be strong, continuous, and persistent.

6. An organization that can work through existing organizations as much as possible and form an inter-organizational group, working for community cooperation and coordination rather than to produce a duplication of effort.

7. An organization that does not constitute a partisan reform movement but a movement to bring community groups together to discover areas of common agreement, to develop an understanding of each other's problems, and to produce the cooperative effort necessary to successfully conducted community projects and programs.

8. An organization that can produce the impartial facts for the public on endorsed community problems, projects and programs.

9. An organization that can muster the support for action.

10. An organization that can cooperate with regional and statewide agencies for the development of a greater Commonwealth.

IV. SUGGESTIONS FOR THE WORK OF A COMMUNITY COUNCIL:

1. Study the community, its history, accomplishments, needs, and possibilities. In the Henderson project, studies have been launched on Education, Health, Welfare, Agriculture, Housing.

2. Include efforts for town and county cooperation.

3. Study and cooperate with the local government, to the end that local tax resources shall be budgeted and efficient and useful government shall be developed. Officials need support in their efforts to provide good local government.

4. Consider the possibilities of planning streets, sidewalks, parks, building sub-divisions, transportation facilities, zoning real estate, eliminating smoke smells and other industrial handicaps, planting shade trees, preserving natural beauty spots, removing roadside dumps and unsightly billboards, correcting dangerous road and street crossings, planning attractive signs on the business streets. All such activities come under the head of town planning.

5. Become familiar with problems of public safety, crime prevention, elimination of carelessness and destructiveness so as to encourage and support public and private efforts to these ends.

6. Give attention to problems of public health--water supply, milk supply, sewage disposal, keeping of animals in the town, the prevention and control of communicable diseases.

7. Study the economic life and welfare of the community and work to make the community a well-balanced economic unit, with reasonable economic opportunities for everyone and wholesome economic relations with other or larger units.

8. Plan and develop community recreation as a vital part of community life.

9. Study the educational program of the community which needs help, encouragement, guidance, and cooperation not only in the public schools but in adult education. Schools in which the public is not deeply interested cannot maintain very high quality.

10. Take into account the interests of young people. Provisions should be developed for treating youthful delinquents in such a way as to develop character and self-respect. A program of vocational guidance in close cooperation with local business men should help young people to appropriate callings.

11. Study the general cultural interests of the community and see that they are encouraged, planned, and promoted. These include a library, music, handicrafts, dramatics, a possible village institute containing museum, library, and community center and various other undertakings.

12. Give consideration to common community undertakings such as the development of a community calendar of meetings, with effort to arrange meetings to result in the least possible conflict. The coordination of relief and charity work, the support of a Community Chest, and other common community activities require study.

13. Give attention to that part of the population which is left out of community activities. Even in an over-organized community it generally will be found that a considerable number of people have little part in community affairs. A good community would be concerned with making life interesting and wholesome for such people as well as others.

(From Arthur E. Morgan - The Small Community.)

V. HOW TO FORM A COMMUNITY COUNCIL:

1. THE FIRST STEP. The first step is for some civic minded individual or group to take the initiative in advocating a community council. (a) If an individual is initiating the action he should talk to one or two well respected citizens and elicit their support and assistance. Sell the idea to three people who will devote their time and efforts and the job is begun. (b) If an organization is initiating the action, it should appoint a small committee to get the project in motion.

2. THE SECOND STEP. The second step is to secure endorsement of the idea and to develop it into a specific proposal for a community council. (a) Invite to an informal meeting for the presentation of the idea and its potential possibilities to the community and Commonwealth, a group of civic leaders, representative of the whole community and capable of giving the movement endorsement. Choose an experienced and well-qualified chairman. If possible have a well-informed guest speaker present to explain the community council plan and how it works in other communities. Ask for a decision on whether or not the

group favors the establishment of a council. (b) The approval of this sponsoring group having been received, elect a temporary chairman and secretary, appoint a committee or committees for drafting a specific proposal for a community council. Report the plan back to the sponsoring group for consideration and approval. This plan may include a proposed constitution and by-laws, a board of directors, executive committee, and a slate of proposed officers and directors.

3. THE THIRD STEP. The third step is formally to set up the community council at a meeting of representatives of the community's organizations. Each organization is asked to send a representative to this meeting to take action on the proposal. The entire project is explained. A motion is called for to form a community council, and acted upon. The suggested constitution is taken up, discussed and adopted. Nominations are presented for officers and directors and voted upon.

4. THE FOURTH STEP. The fourth step is to launch the program. The newly elected president issues a call for a meeting of the board of directors. At this meeting the work of the council is organized, committees set up and a program of procedure adopted.

5. THE FIFTH STEP. (Optional) The fifth step may be the calling of a general citizens' meeting, or town hall meeting, for the purpose of explaining the work of the organization and enlisting community interest and cooperation.

VI. GENERAL SUGGESTIONS:

1. Make sure that you invite to the sponsors' meeting the leaders who can give community-wide sponsorship to the movement. The sponsors will be chosen both for their prestige in the community and for the widely different groups which they are capable of reaching. This will include such groups as the following: the merchants, manufacturers, business men, laborers, educators and teachers, ministers, the press and radio, the city and county government, the women's clubs, service clubs, the health department, youth agencies, etc. It may include certain citizens noted for their public spirit and prominence rather than for their organizational affiliations. But in the meeting of sponsors, the group must be kept small enough for informal discussion.

2. For the organizational meeting in which formal action is taken to set up the council, carefully go over your community organizations to make sure you are not leaving out important groups, or are including groups that should not be included.

3. Take plenty of time to secure good representation from each member organization. Organizational representatives should be heads of member organizations or persons with authority to speak for the member group.

INTRODUCING---

HENDERSON, KENTUCKY

The county of Henderson, of which the city of Henderson is the county seat, is located at the north western boundary of Kentucky, on the Ohio River. During the war the urban population jumped from 13,000 to an estimated 22,000, or a total of more than 30,000 for city and county. Originally an agricultural center, with its chief product tobacco, and the chief manufactured products buggies and wagons, Henderson now claims a wide diversification both in agriculture and manufactured products.

Henderson leads the state in soy bean production, in corn production, and in pop corn, hogs, and fruit. For many years prior to 1948, it had the largest Farm Bureau in the state. It is one of the largest oil producing counties in the state. REA lines in the county were the first in the state to be energized.

Henderson's industries, now diversified, include plastics, furniture, cotton dresses, hosiery, soy bean oil and meal, radio tubes, boats, brushes, soap, fertilizer, tacks and allied products, concrete, frozen foods. Henderson leads the state in the production of furniture, soy bean oil and meal, and women's dresses.

Henderson's health center and hospital, built with federal assistance during the war, are unexcelled in the state. Both were purchased from the Federal Government in 1948. At Henderson, once the home of John James Audubon, is located the beautiful Audubon Memorial Museum. The city had the first municipal park in the state. Henderson ranks high nationally in per capita park acreage.

During the war, the county exceeded, in War Bond Sales, all quotas "by a greater percentage than any other county in the United States."

In Henderson was formed the first community organization under the parent organization, the Committee for Kentucky.

It is with this organization, the Committee for the City and County of Henderson, its origin, its aims, its structure, its progress and accomplishments that this pamphlet deals.

INTRODUCING---

THE COMMITTEE FOR THE CITY AND COUNTY OF HENDERSON

The Committee for the City and County of Henderson is an organization which combines more than 60 clubs and civic groups of the city and county into one organization to work for community and state betterment. It is affiliated with the Committee for Kentucky, of which the Henderson committee is the first local group to be formed.

The Committee for the City and County of Henderson brings together the active clubs and civic groups, church and religious groups, fraternal orders, educational political, professional, and rural organizations of the community into one, overall, united organization.

The Committee for the City and County of Henderson

WHAT ARE ITS AIMS?

The primary purpose of the Committee for the City and County of Henderson is to improve conditions in the community, and thereby, to raise the status of the State. Although the Committee is composed of member organizations, fundamental is the belief in the importance of the individual in the community, and of his cooperation with other individuals for the welfare of all.

As stated in the By-Laws, "the object and purpose of said Committee shall be solely and exclusively educational, and shall be accomplished and realized by activities directed to increasing the fund of information and knowledge of citizens of the City and County of Henderson with reference to economic and social conditions existing in the City and County." (The Directors voted to launch into an action program at the end of its third year.)

Individuals may join the committee through associate memberships. The voice of the individual is heard through the Town Hall meeting. However, it is through membership in already existing civic groups that the individual is enabled to express his opinion on civic matters through the vote. Each member organization has one vote in the Committee meetings.

THE CREDO OF THE COMMITTEE FOR THE CITY AND COUNTY OF HENDERSON

(Note: The "CREDO" of the Committee was written by James W. Armstrong, and submitted to the Board of Directors, who unanimously voted its adoption prior to the first Town Hall meeting. It was distributed in printed form on that occasion.)

At this time it is fitting and proper to take stock on the nature and mission of the organization which has been created. We are forming a local organization, but over it hovers a star of hope that makes its nativity significant not only to our community, but to all communities in which citizens may desire to band themselves together for community advancement. Because this organization has had a specially appointed place of birth and forms the first local organization of the Committee for Kentucky, a heavy responsibility falls upon us. Its success or failure may well determine the success or failure of a vaster enterprise of our commonwealth and democracy.

The Committee for the City and County of Henderson is more than an organization. It is a faith. It is a faith in the idealogy of democracy. It is a physical embodiment of the belief that men and women--citizens of the same community--can assemble from different racial stocks and religions, from different political affiliations, from different social and economic positions, and, by subordinating special interests to general interests, can thereby achieve a richer, fuller community life than is otherwise obtainable. It is a belief that the areas of agreement and unity in community life are more important than the areas of disagreement and disunity. It is the belief that our biggest problems are held in common; that we hold the problem of disease and health in common, that we hold the problem of ignorance and enlightenment in common; that the problems of poverty and prosperity, of bad government and good government, of bad citizenship and good citizenship, of the relations of labor and industry, the conditions of housing, the availability of recreational facilities, the adequacy of public buildings, the development of needed civic enterprises, all of these are problems

and projects in which all citizens hold a common responsibility and for which solutions can come only through community-wide cooperation. We believe that in the hands of the citizens of the City and County of Henderson, rests the future development of our community. We believe that the instrumentality of government is made effective and a widespread program of a community development made possible only through an interested, informed citizenry, organized to work together. We now have the organization in the citizens' committee for the City and County of Henderson. We propose now to get the facts about our community, to put together the blueprints for a greater city and county, and to work together to bring our visions and plans into reality. God helping us, we shall not fail. This is the statement of our faith, resting in the ancient ideals which gave birth to the United States of America. It is the credo of our democracy.

HOW IS IT ORGANIZED?

The organization of the Committee for the City and County of Henderson is patterned after the parent organization, the Committee for Kentucky.

There is a board of directors, selected from member organizations to represent, as equitably as possible, every phase of community life. The board is selected by vote of member organizations, one vote per organization. The original board consists of 15 officers and directors. Half of the board members are elected for a one-year term, half for a two-year term. In the future all directors will be elected for two-year terms. The present board is made up as follows: city superintendent of schools, county superintendent, health department head, farm agent, home demonstration agent, labor representative, radio and press representatives, leader in women's clubs, leader in homemakers' clubs, ministerial representative, business representative, board of trade representative, leader in men's civic groups.

In January, 1949, it was voted to expand the directorate to include presidents of "active civic clubs." (See appendix, By-Laws, Article V, Section 2.)

Officers include a president, two vice-presidents, first and second, executive secretary, recording secretary, and treasurer. There is also a publicity director and an historian.

A list of member organizations, a copy of the constitution and by-laws of the Committee, and other pertinent data will be found in the appendix at the back of this pamphlet.

HOW DOES IT FUNCTION?

Like the parent organization, the Committee for Kentucky, the Henderson Committee was at first a fact-finding body. Basic is the belief that in order to effect any fundamental improvement in a community, it is necessary to know, first, what are its problems. In each community, certain needs are self-evident, but there are other needs, perhaps even more basic, which can be arrived at only through painstaking study of the total community picture.

After a careful analysis of the over-all picture of Kentucky's needs, the Committee for Kentucky divided the state's problems into ten categories, and

The Committee for the City and County of Henderson

instituted ten fact-finding studies headed by experts in each of these fields. All work of experts was and is on a volunteer basis. Fields covered by fact-finding studies include health, education, agriculture, housing, state constitution, taxation, industry, labor, welfare, and natural resources. Reports on all ten of these studies have now been published, presented to organizational meetings, and made available to the public. Four additional studies have been added--on transportation, community life, government, and the final report, tentatively to be called "Blueprint for a Great Kentucky."

Following in the pattern of the state committee, the Henderson Committee selected five subjects for fact-finding studies. The president appointed five study groups, which are called sub-committees, on health, housing, education, agriculture, and welfare. Heading each study committee is a chairman, or co-chairmen, qualified for leadership in that field. For instance, the county and city superintendents head the education study group, and on the committee are three school principals, two teachers, a PTA leader, and two citizens-at-large who have children in school. In its third year, study groups on youth problems and government were added.

When reports are ready for public presentation, they are submitted first to the board of directors, then to a meeting of member organizations, and finally to the public at Town Hall meetings. At the directors' meeting, the report is taken up sentence by sentence, criticized and corrected, its contents and connotations carefully weighed and considered, before any of the material is made public.

At the organizational meeting, the report is presented in full, and corrections and criticisms are also in order, though the size of the assembly precludes the careful consideration given the report at the smaller meeting of the board.

Town Hall meetings are widely publicized, and attended by citizens of city and county. The reports are read by the chairman of the study-group presenting the report. At the conclusion of the presentation, the president or presiding officer calls for comments and questions from the floor.

Meetings of smaller groups are held in the county health building. Town Hall meetings are held in the high school gymnasium.

HOW IS IT FINANCED?

Funds used by the Committee are raised through dues of member organizations, through individual membership contributions, and through solicitation of funds in the community.

Dues of member organizations are $10.00 per organization, or multiples thereof Individual memberships may be for any amount from $1.00 up. They do not constitute voting memberships. Individual memberships, however, feature the special attraction of carrying, also, a membership to the Committee for Kentucky, which entitles the member to any publications of the state committee which he desires.

Further funds for the Committee's work are secured by an individual drive for contributions.

The Committee for the City and County of Henderson

All funds are used for the publication of the reports of fact-finding study committees, and for such expenses as postage, stationery, etc. There are no salaries, and the books are available for examination. They are audited once a year.

WHAT OF INTER-RACE RELATIONSHIPS?

There is a member of the Negro race on each study committee. The five Negroes who are on these committees are as follows: a high school principal, the editor of the Negro newspaper, a public health nurse, a minister, and a farmer.

Negro interests are further represented by the city and county superintendents of schools, by the health director, the farm agent, and the home demonstration agent, all of whom represent both white and colored population in the community.

News of Town Hall meetings is carried in the Negro newspaper, which has a circulation of 1,000. Town Hall meetings are attended by groups of colored people.

WHAT OF ITS ORIGIN?

Other communities want to know just what Henderson did when it set about to form the Henderson Committee. Other communities are asking, why was Henderson selected for the first local committee of the Committee for Kentucky?

The selection of Henderson was arrived at neither because of Henderson's outstanding progress in some fields (see page 1) nor because of outstanding needs in others. It came about in this manner---

In the fall of 1945, Mrs. Elizabeth Taylor, state president of the League of Women Voters, and Mrs. Jean Trigg, local president, joined with the Rotary Club in inviting the president of the Committee for Kentucky, Harry W. Schacter, and Dr. Maurice F. Seay, educational expert, to Henderson to give talks on the work of the state committee. There was already some interest in the community in the Committee for Kentucky. For instance, Ewing Galloway, who has a photographic business in New York and farms in Henderson County, was at that time making plans to write a syndicated column for the Committee for Kentucky, to be titled "Wake Up, Kentucky." This column, now called "Kentucky on the March," is carried in approximately 120 papers of the state.

One of the persons who attended the meetings at which Mr. Schacter and Dr. Seay spoke was James W. Armstrong, recently separated from the U. S. Navy, whose interest was so aroused that he wrote an article on the Committee for Kentucky. His article, published in the Henderson papers, was subsequently copied in the Louisville Courier-Journal and brought to the attention of Mr. Schacter. The Committee's president sent for Mr. Armstrong to enlist his further participation in the work of the Committee.

In late January, Mr. Schacter and Mr. Armstrong and his wife, Francele H. Armstrong, a newspaper columnist, met for lunch in Louisville, and while searching

about for a way in which Mr. Armstrong could assist in the Committee's work, Mr. Schacter hit upon the idea of forming a local committee in Henderson for the purpose of attacking Kentucky's problems from the local level. It was Mr. Schacter's idea that Henderson would serve as an experimental station for community organizations later to be established and encouraged on a state-wide basis.

The general plan outlined by Mr. Schacter at that meeting in January of 1946 was followed in activating the Henderson committee. First there was a meeting at which a small group of civic leaders discussed the possibility of bringing all of the community's organizations together in a single organization functioning for civic betterment. Next, the plan was presented to a meeting of organizational representatives, one for each club or organized group. Third, the citizens were told of the plans and program at a public meeting.

The presence of Mr. Schacter and Maurice D. Bement, executive director of the Committee for Kentucky, at each of these meetings, was of immeasurable benefit in giving stimulation, inspiration and direction to the Henderson project.

Decision as to the leaders invited to the first meeting was arrived at by consultation between the Armstrongs, Henry Taylor, who had led the county to its national leadership in War Bond quota sales, the editor, Leigh Harris, and other civic leaders. They included at Mr. Schacter's suggestion, the local heads of organizations already members of the state committee. The membership of the first group included representatives of business, labor, industry; heads of farm bureau, home demonstration work, health department; governmental heads--county judge, mayor, state representative, state senator, minority party leader; leader in women's club work (state president of League of Women Voters); head of Board of Trade, and representatives of press and radio. For a complete list of names in this sponsoring group, see Appendix.

At this first meeting, the enthusiasm for the project of a Committee for Henderson ran so high that a temporary organization was set up, and committees appointed to work toward the meeting of organizational representatives, to be held two weeks later.

During the intervening two weeks, a list of community organizations was drawn up, heads of these organizations called by phone and invited to the meeting at which a permanent organization of a Henderson united council of organizations would be voted into being, if such was the desire of the members present. The list of organizations numbered around 100, and it is included in the appendix as a guide to other communities desiring to make similar lists.

The attendance at the meeting of organizational representatives exceeded all expectations. One hundred twenty-five people attended, and sixteen members of press and radio of Henderson, Evansville, and Louisville, were there to spread the word of this new movement in Henderson.

Talks were made by the temporary chairman, Henry Taylor; the temporary executive secretary, James W. Armstrong; and by Harry W. Schacter, president of the state Committee. A proposed set of by-laws, and a slate of officers, was presented by Hecht Lackey and H. R. Jackson, members of the nominating committee. At that meeting, the representatives of Henderson's clubs and civic groups, school groups,

The Committee for the City and County of Henderson

church groups, fraternal orders, business and professional clubs, voted into permanent existence the Committee for the City and County of Henderson, its officers its directors; and adopted its by-laws.

The third meeting, called a "Town Hall Meeting," was extensively promoted through press and radio, through speeches and by word of mouth. A large town-school chorus and town-school band furnished music for the occasion. Mr. Schacter brought with him fifteen state leaders from other parts of the state--directors and experts of the Committee for Kentucky--five of whom spoke at the Town Hall meeting.

President Taylor presided, and explained to the record crowd of 2,500 citizens in attendance (an estimated 500 more were turned away at the door), the aims and plans for the Committee for the City and County of Henderson. At that meeting he appointed the five study groups, on health, education, agriculture, housing and welfare, which were to settle down to a serious study of Henderson's needs and problems.

Thus the Committee for the City and County of Henderson came into being as an active coordinating agency of Henderson's community organizations. The first meeting was held on February 8, 1946, a dinner meeting at the Glass House. The organizational meeting was held in the evening at the Health Center on February 22 The Town Hall Meeting at the high school gymnasium was on March 26.

The first study report was presented to a meeting of member organizations on September 6--that on health. On September 9 the group met again to hear the report on education. The latter report was presented to a Town Hall meeting on October 17. The health report was printed locally in pamphlet form. The education report was printed with illustrations by art director Martha Conway, in cooperation with Dr. Maurice Seay's Bureau of School Service, at the University of Kentucky, as a regular bulletin of that department. Additional copies, used in Henderson and by the state committee, were paid for by the local and state committees. A printed report on the Henderson Conference is also available.

Copies of the Henderson reports are available at a cost of 25¢ each by writing the Committee for the City and County of Henderson, Health Center, Henderson, Kentucky. All reports, state and local, can also be secured from the state committee, at a cost of 25¢ each, or, in lots of ten or more, 10¢ each, by writing the Committee for Kentucky, 506 South Third Street, Louisville 2, Kentucky.

WHAT ABOUT ACTION?

In Henderson, before the formation of the Committee, it was evident that the community was in need of a number of outstanding action projects. It had no united fund drive, it had no community center or auditorium for public meetings, it had no zoning law, no civil service law. Henderson needed new schools, an increased appropriation for teachers' salaries. It needed a child welfare worker to aid in the solution of juvenile problems.

Following the path mapped out by the parent organization, the Committee for Kentucky, the Henderson group started upon a slow, careful course of procedure involving the studying and ascertaining of facts as a first step toward community

betterment. As facts were brought out, action resulted. However, a state of inactivity during its third year, due in part to the illness and death of its president, caused the Directors to question a course of procedure which did not permit of direct action. By written vote, a majority of Directors indicated, late in 1948, a desire to adopt a more direct approach to action.

To the direct credit of the Committee are chalked up (1) the establishment of a Community Chest, which took the place of fourteen or more separate fund drives; (2) the passage of a zoning-planning ordinance, in a city which had not operated under a city-plan since it was laid out under a splendid master-plan in the early 1800's; (3) the extension of the city sewer system to newly developed outlying areas where the presence of running water without a sewer system had been a threat to the sanitation of the city; (4) material assistance in securing two child welfare workers for the area--one white, one Negro--to meet some of the mounting problems with juveniles; (5) assistance, through the establishment of the Community Chest, in placing the newly established city-county-school-YMCA recreation program on a permanent basis by the guarantee of Chest funds for operation.

(6) Through the publication of two reports--on health and education--the public was enabled to ascertain the actual facts about health and educational conditions, and to compare their own status with conditions in state and nation.

(7) As an offshoot of the educational study, a "sociological study group" was set up to work on problems of adult education and leadership training in the community. That committee, working quietly during 1947-48, 1948-49, secured three credit courses in adult education for the community. Two of these were offered in the local YMCA for college credit by Evansville (Ind.) College. The third course, also offered through the YMCA, was an innovation in community education. Bearing credit in Murray State College, it alternated classroom lectures with community-wide forums on current problem-topics. Civic organizations sponsored the open meetings, which were free to the whole community. Charge for tuition was made only for those desiring college credit from the course. (Lectures and subjects will be found in the appendix.)

(8) As a development of a suggestion made in a study-meeting of the welfare sub-committee, the state senator from Henderson, a member of the study group, took up with county judges of the Congressional district the proposition of joining several counties in the financing of a home for aged poor. The senator interested the local representative to the state legislature in the plan, and he in turn presented to the legislature last spring a bill, which was enacted, enabling several counties to join together in financing "poor farms." Thus the way is paved for improvement of conditions in county poor farms, now in great need of attention. The senator took over the chairmanship of the welfare committee in 1949. The county farm project is one of the "action" projects for this group.

(9) Many progressive moves have taken place in educational conditions in the community having direct or "chain-reaction" relationship to the publication and distribution of the report on education (published in cooperation with the University of Kentucky Bureau of School Service). Among these are a raise in county school tax assessment from 75¢ to $1.25; a raise in county teachers salaries by an average annual increase (1946-47) of $220; a raise in city teachers pay (1946-47) of $144; the purchase by the Board of Education of a new school

building site; an essay contest in all high schools, awarding prizes for the best plan of action for school improvement; a question poll on school improvement (instigated by the League of Women Voters); a detailed study of assessments and taxes (which have direct bearing on school funds).

The reports have been widely studied through such local clubs as Homemakers groups, League of Women Voters, Business and Professional Women, Woman's Club, and in school classes in civics and sociology.

As an evidence of the progressive movement in education having gotten into the youth-stream of the community, a Parents Night was held at the high school for the purpose of acquainting the parents with the critical need for a new school building and improved equipment. At its conclusion, the student leaders asked the parents to "help us in our efforts to obtain a new school." Later in the year the students, under the direction of the choral director who was also a member of the Committee's sociological study group, wrote, staged and produced a musical revue called "It's Henderson," in which the recurrent theme was the need for improvement in schools. The production emphasized the history, outstanding assets and colorful heritage of the community. One of the scenes depicted the founding of the Committee for Henderson.

The present forward impetus in the school situation is being carried on through the "Friends of Henderson Schools, Inc.," an organization of parents and interested citizens whose aim is to secure new schools and repair old ones. The Henderson Committee's education study group is cooperating with all agencies working for betterment of Henderson schools.

(10) Observing the first anniversary of the formation of the Committee for the City and County of Henderson (in conjunction with the celebration of the community's 150th birthday anniversary), the first Community Conference in Kentucky was staged in the spring of 1947 by the local committee, in cooperation with the Committee for Kentucky. The conference drew people from seven states and eleven Kentucky communities to a two-day meeting which started with a community-wide church service for 1,500 people, embracing all races and creeds, and in which the prayer was offered by a Negro minister. The program included speeches and round-table discussions on problems of health, welfare, zoning and planning, youth and education.

(a) The meeting brought to focus the groundwork laid by city officials on zoning and planning for the city. Within a week the Committee called a public meeting of citizens to further explore the need for a city plan. Leaders who had been present at the Community Conference returned for the session, which ended in the passage of a unanimous resolution requesting the city officials to proceed with the drafting of a zoning-planning ordinance.

This resolution was followed by a visit of a group of citizens to the meeting of mayor and commissioners. These citizens further requested that taxes be raised to cover costs of drafting the ordinance, and also to finance a child welfare worker for the city. The city officials acted upon the suggestion, raising the property levy 3¢ per hundred valuation to cover the zoning-planning costs, and 2¢ per hundred for the child welfare worker.

The Committee for the City and County of Henderson

The latter appropriation climaxed years of work led by the League of Women Voters in attempting to secure appropriations from city and county governments for the welfare worker. It was directly preceded by the circulating of a petition by several women's clubs, bearing the names of 1,500 citizens requesting an appropriation for the child welfare worker.

Due to a shortage of social workers, the appropriation was not used during the year 1947-48. In the spring of 1948, when the time came around for the money to be reappropriated, the county magistrates in Fiscal Court refused to make the appropriation, claiming a fund shortage. On that very day there came to Henderson on a return appearance, one of the main speakers of the Henderson Community Conference of the preceding year, Lon Sullivan, director of the Georgia Citizens Council. Upon learning of the failure of the welfare worker appropriation, he used this as an example in his talk before 104 citizens at the YMCA anniversary dinner, and followed it with a further plea for citizen support in his talk before the Lions Club next day. The county judge had been invited to attend, and meanwhile his magistrates had been visited by interested citizens.

Three days later the Fiscal Court reconvened and granted the appropriation. Henderson got its child welfare worker, and the state "threw in" the services of a well qualified Negro social worker to serve alongside the white worker.

Another direct result of the Community Conference occurred when the YMCA director, acting under the stimulus of the meeting, held a Youth Clinic which was widely attended. "We'd been intending to hold the clinic for a long time. The Community Conference brought us to the point," said the director.

(The Henderson Recreation program, now operating under funds from the Community Chest, and directed by the YMCA director, is one of the outstanding programs of its kind in the country and has been used as a model by many communities.)

(11) As a result of the successful venture in Henderson, the Committee for Kentucky added a director of community work to its staff, to extend this sort of community service to other localities in the state. With the opening of the fall quarter of 1948, two Kentucky colleges, the University of Kentucky, and Murray State College, added community departments under grants (from the General Education Board, and from TVA, respectively), secured in cooperation with the Committee for Kentucky on the basis of its community service program.

(12) On January 12, 1949, at a meeting of the Committee for the City and County of Henderson, the organization of the first Citizens' Health Committee in the state of Kentucky was completed when the membership voted for four citizen members of this health council. The program for establishing a Citizens Health Committee in every one of Kentucky's 120 counties was launched by the new Commissioner of Health, Dr. Bruce Underwood, on December 27. Henderson was the first county in the state to fulfill the requirements for this health group. A doctor, selected by the medical association, a dentist, selected by the dental association, a magistrate, selected by the Fiscal Court, and four citizens elected by organizational representation, one of whom must be a woman, constitute the committee of seven. Plans for the meeting were worked out by representatives of the Committee for Henderson, in cooperation with the local health director and Dr. Underwood, whereby the newly formed health committee now functions as the health arm of the

The Committee for the City and County of Henderson

Committee for Henderson. Dr. Underwood was present at the meeting at which the Citizens' Health Committee was formed.

(13) After a period of inactivity, the study groups of the Committee for City and County of Henderson were re-activated in December, 1948. Two new groups, one on youth problems, and one on governmental problems, were added to the original five. Each study group launched on a program which was designed to achieve action, while at the same time carrying on study in the specific field.

The first move of the council on government was to invite to Henderson the well-known authority on governmental finance, Dr. James W. Martin, of the University of Kentucky, for two meetings--one with the Rotary Club, and the other with the governmental council, Directors, city and county officials, and interested citizens, for the purpose of talking over the perplexing problems of governmental finance. School superintendents, members of the school boards, and representatives of the organizations interested in schools, were also present, since no program for school building can be undertaken until the financial problem is solved.

Dr. Martin's summary of the situation at the conclusion of a meeting which lasted from 12:00 until 4:30 p. m., included the following: 1. that Henderson should request, through the county assessor, a tax equalization study through the State Department of Revenue; 2. that some form of immediate taxation be attempted, such as a modified occupational tax which would fall equally on the shoulders of all citizens; 3. that the city adopt some means for better informing the citizenry of the problems of city finance. These were only several of many suggestions which came out of the meeting, and which will be investigated and followed up in the future.

The primary object of the governmental study council is to act as a citizen link between government and the public.

* * * * * *

The youth study council is mapping the recreational assets of the city and county preparatory to setting forth on a program of action in this field. In the case of all study groups, as reactivated late in 1948, the program includes action projects as well as study. The agriculture group is continuing on studies started under the first agriculture study committee.

Membership of the reactivated study councils will be found in the appendix. Each group has at least one young citizen member.

Articles have appeared in national publications on the work of the Henderson group. The health and education reports have been mailed to points in every state in the Union, and have served as models for similar studies within and outside the state's borders. The printed report on the Henderson Community Conference, carrying the messages of outstanding experts on community problems, are being used as course-study material in high schools and colleges. The history of the formation of the Henderson Committee has been widely distributed on a national basis from such meetings as the National Conference on Family Life (White House, May, 1948), the Georgia Conferences on Human Welfare (1946, 1947); the Yellow Springs, Ohio, Community conferences (1946, 1947); and through newspaper articles and radio programs.

The Committee for the City and County of Henderson

Speakers and groups of citizens have gone out from Henderson to assist other cities and communities in the formation of similar citizen groups. Dr. Bruce underwood, Kentucky's Commissioner of Health, has encouraged the formation of local committees in other Kentucky towns, following his original connection with the work as Henderson's health director and head of the study committee on health. (It was under his leadership that a meeting of citizens, from newly developed areas of the city, was held, in order to explain to them the city's plan for extending sewers to these areas under a sewer rental plan, to be financed by a bond issue which would be retired by a charge for sewer use. This had never been done in the city, and the meeting served to gain citizen cooperation for the project. The Mayor's comment was: "The Committee for Henderson has made government easier in Henderson.")

The story of Henderson has been given further widespread influence through materials circulated from the headquarters of the Committee for Kentucky in Louisville. This organization, with nothing to "sell" except service and assistance in progress, has furnished aid to other communities, through personnel and through services and materials, through speeches and community workshops, and through illustrated lectures (many of the slides were taken in Henderson).

Basic to the philosophy is the belief that the community is continuous, and that all influences are a part of it. The Committee's object is to stimulate leadership, to educate for leadership. There is no direct measure of such influence, but once an atmosphere for progress is created, once a set of attitudes which make for progress is set up, things begin to move. They go ricocheting from one side to another, like billiard balls struck by a cue ball. Though the cue ball may stop, spin, even be thrown for a loss, the impetus engendered sets other balls in motion.

In 1948, Henderson went over the top in a fund drive to purchase its splendid hospital from the Federal Government. The city and county bought back the equally fine health center, built with Federal funds during the war. Although Mr. Individual Citizen may not be conscious of it, may even deny it, the "chain reactions" in citizen activity continue, and one of Kentucky's leading communities maintains its forward march toward a better Kentucky.

APPENDIX

BY-LAWS OF THE COMMITTEE FOR

THE CITY AND COUNTY OF HENDERSON, KENTUCKY

We, the civic organizations and citizens of Henderson City and County, Kentucky, do hereby associate to form an educational, non-profit organization.

ARTICLE I

The group hereby organized shall be named and known as the "Committee for the City and County of Henderson, Kentucky," and shall be an affiliate organization of the "Committee for Kentucky, Incorporated."

ARTICLE II

The principal office and place of business of said Committee shall be in the City of Henderson, Kentucky.

ARTICLE III

(a) The object and purpose of said Committee shall be solely and exclusively educational, and shall be accomplished and realized by activities directed to increasing the fund of information and knowledge of citizens of the City and County of Henderson with reference to economic and social conditions existing in the City and County, all with the view to advancing the general welfare of the citizens of the City and County. To realize and attain mentioned object and purpose, the Committee shall conduct studies and research in economic and social fields, make fair, impartial and informative findings of fact, prepare reports based upon said studies, research and findings, and by appropriate media disseminate the information thus obtained to the largest practicable number of the citizens of the City and County of Henderson to the end that said citizens may be the better advised and informed of existing economic and social conditions and of opportunities and means existing for the improvement thereof and the promotion of the general welfare.

(b) The Committee is not organized and its affairs shall not be conducted for pecuniary profit; the Committee shall not be used or employed for gain by any person or corporation and its income shall be devoted solely to the cause of education as aforementioned. No private pecuniary profit shall be derived from the Committee by any member; no part of the Committee's net earnings shall inure to the benefit of any member or individual; and no substantial part of the activities of the Committee shall consist in carrying on propaganda or otherwise attempting to influence legislation.

ARTICLE IV

Sec. 1. There shall be elected annually by members of the Committee for the City and County of Henderson, a President, First Vice-President, Second Vice-President, Secretary*, Treasurer and Board of Directors.

*There are now two secretaries, an Executive Secretary and a Recording Secretary.

The Committee for the City and County of Henderson, Kentucky

Sec. II. The President shall preside at all meetings of the Committee; enforce a due observance of the provisions of the by-laws and parliamentary procedure. He shall appoint, subject to the approval of the Board of Directors, all committees and delegates not otherwise provided by the by-laws or ordered by members of the Committee for the City and County of Henderson. He shall be an ex-officio member of all committees. He shall be a member of the Board of Directors; he shall present at the annual meetings of the Committee a report upon the operations of the Committee during his term of office and an address upon such subjects as he may select; he shall make such suggestions as he may deem suitable to promote the objects and welfare of the Committee. He shall perform such duties and discharge such additional functions as ordinarily are performed by Presidents of similar groups.

Sec. III. Vice-Presidents - In the absence of the President, the First Vice-President shall perform the duties of that officer and in the absence of both the President and First Vice-President, the Second Vice-President shall perform these duties. They shall be members of the Board of Directors.

Sec. IV. Secretary - The Secretary of the Committee shall be charged with the responsibility of keeping the Committee's books, records, papers and minutes. He shall have the additional duties elsewhere herein provided. He shall be a member of the Board of Directors.

Sec. V. - Treasurer - The Treasurer shall have charge of all the funds of the Committee and pay all accounts due by the Committee when the same are properly certified to him by the Executive Director or the President. All funds coming into the Treasurer's hands shall be promptly deposited in a bank in the name and to the credit of the Committee for the City and County of Henderson. The Treasurer shall give sufficient bond in a good and solvent bonding company in an amount to be fixed by the Board of Directors which bond shall be approved by the Board of Directors and paid for by the Committee for the City and County of Henderson. The Treasurer shall present a detailed statement of his accounts at each annual meeting and such other times as the Board of Directors requests. He shall be a member of the Board of Directors.

Sec. VI. The books of the Committee shall be audited at least once each year by a responsible public accountant.

ARTICLE V

Sec. I. The President of the Committee for the City and County of Henderson shall preside as Chairman of the Board of Directors.

Sec. II. The Board of Directors shall consist of 15 members which shall include the five elected officers and 10 directors at large. Five directors at large shall be elected annually for a two-year term, except the first year 10 directors shall be elected--five for a one-year term and five for a two-year term

(Sec. II. of the By-Laws is hereby amended to read as follows:

Sec. II. The Board of Directors shall include: five elected officers, ten directors at large; the state representative of Henderson County and the State

Senator from this senatorial district, if a resident of Henderson County; the Mayor and County Judge; and, during their incumbency, the presidents of such civic clubs as may be selected by the Executive Committee. One third of the directors shall be elected each year for a two-year term, except those appointed by the Executive Committee, who shall serve only during the term of their incumbency as president of their respective organizations. The same provision applies to the elected public officials.)

Sec. III. The Board of Directors shall have authority in its discretion to appoint and designate such committees as it may deem needful to accomplish the purposes of the Committee including an executive committee consisting of certain of its own members to act for the board in the interim between regular meetings of the Board.

Sec. IV. The Board of Directors shall have authority to appoint or employ such agents or representatives, in addition to those herein described as it may consider necessary and to fix and authorize the compensation of such employees or representatives.

Sec. V. The Board of Directors shall have sole and exclusive authority to authorize expenditures and disbursements of the Committee's funds; which shall include allocation of funds to the "Committee for Kentucky."

Sec. VI. On the call of any two members, the yeas and nays shall be ordered when every member, including the presiding officer, shall vote, unless excused by a majority of those present and the result of the vote shall be entered on the minutes.

ARTICLE VI

Sec. I. Meetings - Annual meetings of the Committee for the City and County of Henderson shall be held at such place as shall have been fixed by the Board of Directors. There shall be as many meetings each year of the members of the Committee for the City and County of Henderson as the Board of Directors may decide to call. Fifteen per cent of the members shall constitute a quorum for the transaction of business. Members of the Committee for the City and County of Henderson shall be given at least 15 days notice of the time and place for the annual meeting and at least 5 days notice for all special meetings.

A majority of the Board of Directors shall constitute a quorum for the transaction of business at any meeting and a majority of directors actually in attendance at any meeting shall have authority to transact any business coming before the Board, except to amend the by-laws.

Not less than 30 days before the annual meeting, the president shall appoint a Nominating Committee of five members, subject to the approval of the Board of Directors, and shall designate the Chairman thereof and the time the committee is to report. After the report of the Nominating Committee has been made and nominations have been called for from the floor, the President shall order an election of the officers and directors for the ensuing year.

The President shall appoint 3 tellers to count and report the vote which report shall be made at the same session the election is held. After the tellers

shall have duly certified the result of the ballot to the President, the presiding officer shall then announce the results of the election.

The officers and directors shall serve for the terms to which they are respectively elected and until their successors are duly elected and qualified.

At the last session of the annual meeting the new officers shall be installed.

ARTICLE VII

Sec. I. Members of the Committee shall consist of two classes--(a) members having full voting privileges; (b) associate members without voting privileges.

Sec. II. Members - Individuals recommended for membership of the Committee by other groups, associations, corporations, or committees having purposes in harmony with the objectives and purposes of this Committee and such other groups, associations, corporations or committees, shall be eligible for election to membership and elected thereto in the discretion of this Committee's governing body.

Sec. III. Associate members - All persons interested in the objectives and purposes of this Committee shall be eligible to associate membership therein and shall be elected thereto, in the discretion of the Committee's governing body and an appropriate committee.

Sec. IV. Dues of members shall be $10.00 per year, or multiples thereof. Dues of associate members shall be $1.00 per year, or multiples thereof. Memberships may be paid in multiples of specified amounts, but only one vote shall be allotted to each organization's representative.

ARTICLE VIII

Sec. I. Special meetings of members or of the Board of Directors may be called by the President or by joint action of any five members of the Board of Directors pursuant to not less than 5 days written notice of the time, place and purpose of the meeting.

Sec. II. Meetings of members may be adjourned if no quorum is in attendance thereat, or from day to day, if a quorum is present.

ARTICLE IX

Sec. I. Filling Vacancies: Vacancies in any executive office or on the Board of Directors shall be filled until the next annual election by resolution duly adopted by the Board of Directors.

ARTICLE X

Sec. I. These By-Laws may be amended at any time by vote of a majority of the entire Board of Directors, subject to ratification by a majority vote of the members present at any meeting.

6-Committee for Kentucky

KENTUCKY PULLS ITSELF UP BY ITS OWN BOOTSTRAPS

by

HARRY W. SCHACTER
President - Committee for Kentucky

In the course of my business, I have occasion to travel frequently into other States, particularly to the North and to the East. When people ask me where I am from, and I say I am from Kentucky, a kind of dreamy look comes into their eyes, and I know exactly what they are thinking about. They are thinking about our lush fields of Bluegrass waving in the breeze; about our beautiful women, of whom we have many; about our fast horses that are a thrilling sight to see; about the frost coming out on the mint julep glasses - good to the sight and, to many, good to the taste. We have all this and more. We have people of courage and character - as good people as can be found anywhere in America.

But, underneath it all, for the last fifty years, there has been going on a dry rot and a decay that has brought Kentucky to a point where, by 1940, it was at, or near, the bottom of every worthwhile thing in life.

Fifty years ago Kentucky was first in industrial payrolls in the South. Its educational system ranked high in comparison with other states. Kentucky was a world trade center.

By 1940, Kentucky had come upon sorry days indeed. We were:

Next to lowest in industrial payrolls of the southern states.

Our per capita income was 59% of the United States average in 1943.

Our population decreased 10% between 1940 and 1943. We lost 250,000 people during these three years.

One person in every four born in Kentucky had left the state in search of opportunity elsewhere.

In Education, our condition was even more deplorable. Everyone will agree that if there is one thing which every American child is entitled to, it is

an elementary school education during the age of 7 to 15. In the nation, 95 out of every 100 children were getting an elementary school education in 1940; in Kentucky, only 63 out of every 100. More than one child out of every three never had even an elementary school education in Kentucky in 1940.

As a result, only one state of the 48 had a higher percent of illiteracy in 1940, and that was Arkansas. That is why we in Kentucky sometimes say, "Thank God for Arkansas!".

We in Louisville were quite set up with ourselves, and thought that we had a good school system. Actually we were second best in literacy in our State. 8% of the people in Louisville and Jefferson County were illiterate. In Kenton County, right across the Ohio from Cincinnati, only 4% of the people were illiterate.

The scale of literacy goes steadily down until it hits Martin County. In 1943, 44% of the people of Martin County were illiterate.

In the school term 1942-43, we were 47th in the United States in length of school term.

In 1943, 4,000 teachers out of a total of 17,000 earned less than $12 a week on a 52 week basis.

In 1932, 114,000 children started in elementary school in Kentucky. In 1944, at the end of 12 years, how many of the 114,000 do you suppose ended by finishing high school? Approximately 14,000! 7 out of every 8 children who started school in 1932, never made high school graduation!

In health, our conditions were equally bad. In 1942, only two states in America had a higher death rate from tuberculosis than Kentucky. One of these was Arizona, where many people go to die of that dread disease. In one area, 11,500 Kentuckians depended upon one doctor. Two-thirds of our schools had unsafe drinking water for our children. Up to three or four years ago, we had 14,000 active cases of tuberculosis and only 800 hospital beds to care for them.

Kentucky is predominantly a rural state. 70% of our economy is agri-

cultural. Conditions on our farms were just as bad as they were in education, in health and in economic opportunity. In 1942, 42% of our farms were not reached by improved roads of any sort. Any wonder that the children couldn't get to the schools and that illiteracy was rampant? Any wonder that the doctors couldn't get back to the farms and that disease was so prevalent?

In 1940, 34% of our farms were valued at $300 or less - and that included the house and the land. What kind of life can such a farm produce for an American family? That year, the average farm income per farm family was only $12 a week - and it was the rich Bluegrass section of Kentucky that brought the average up to that figure!

75% of our farms did not have central station electric service in 1943.

84% of them did not have telephone service in 1940.

In 1943, 13,000 farmers had to haul water an average of 4 miles. Think of it! Water, the basic, vital element without which life cannot go on had to be hauled such a distance!

40% of our farm homes needed major repairs in 1940.

97% of them had no toilet facilities within the house. 42,000 farms had neither toilets nor even a privy!

Not a very pretty picture, is it? But before you get too smug and complacent about conditions in your own state, I suggest that you try to find out what those are. You may be due for a shocking surprise.

How did we get that way? How could it come to pass that a state as healthy economically and socially as we were, could, in the short space of 50 years, reach such a low ebb? I think that the answer is to be found in the comparison with the life of a human being. If you don't feel as good today as you did yesterday, you don't do much about it. If tomorrow you won't feel quite as good as you do today, you still won't do anything about it. And so, gradually and imperceptibly you go down, until one day you find that you are really in bad shape. Then, if you are

wise, you see a doctor, get a diagnosis of your ills, and try to seek a cure. As it is with an individual, so it is with a State.

Sometimes when our health has been slowly and imperceptibly failing, we are brought up sharply by some accidental happening. The discovery and the recognition of the conditions that have led to the resurgence of our state, came about quite accidentally, and in a rather interesting way.

In 1943, we elected a Republican governor and a Democratic Legislature. At that time, one of the most important groups in the state was the Kentucky Merchants Association - a powerful organization that had some 3,800 members in practically every city and town. Right after the election, some of the merchants thought back to 1927. Then, too, we had elected a Republican governor and a Democratic Legislature. The four years from 1927 to 1931 marked a running feud between the two. The Legislature began passing a series of what were called "ripper" bills that gradually stripped the governor of his every power and prerogative. At the end of his term, the only sovereign gubernatorial power that he had left was the power to appoint notaries public! In the meantime, the affairs of our state remained stagnant. Kentucky suffered.

When a similar situation developed in 1943, we were in the midst of World War II, with the prospect that peace would come during Governor Willis' incumbency, and with peace, the many serious post-war problems. It was urgent that a stalemate between the executive and legislative branches of government be avoided. Accordingly, we merchants decided to put both sides on notice that we would not stand idly by and suffer a repitition of the disasterous 1927-31 period.

Then it occurred to us it would have far greater effect if we invited other important statewide organizations to do likewise. Accordingly, we called a meeting of the heads of about 25 of the most important groups in the State - farm groups, labor groups, education groups and many others. We outlined to them what we had done and asked them to do likewise. They enthusiastically agreed. The meeting

was just about to adjourn, when a representative of the Farm Bureau rose and said, "Gentlemen, we have in this room enough power to accomplish almost any worthwhile objective for our state. If it was a good thing for us to get together for this one worthwhile purpose, why wouldn't it be a good thing for us to stay together permanently for other equally worthwhile purposes?"

The most important labor leader in the state immediately arose and seconded the idea. It was unanimously approved. The name, Committee for Kentucky, was suggested and promptly adopted. And there we were with a name, a general idea that we wanted to do something for our state, without any clear notion of what it was -- or how to go about it.

Just about this time, in a conversation with Mark Ethridge, publisher of the famous Louisville Courier-Journal, and recently chairman of the United Nations Commission to the Balkans, I asked him what he thought we could accomplish. His answer was prophetic. He said, "If the Committee can develop the moral climate in which Kentucky can make progress, it will have made a great contribution to our times."

We pondered on that long and deeply. We knew that a moral climate could not be manufactured synthetically, but must come deep from the souls of the people. And so we came to the conclusion that to develop a moral climate, we had first to have an objective, second, a carefully thought out plan, and third, a driving force to carry out the plan and so reach the objective.

Accordingly we set for ourselves this threefold objective - first, to raise the level of education, of health, of welfare and of economic opportunity for the people of Kentucky so that all of our people could achieve a fuller and richer life; second, to give a stronger helping hand to those of our unfortunates who, in the words of Shakespeare, were suffering from "the slings and arrows of outrageous fortune" and could not help themselves -- to recognize that we were, indeed, our brother's keeper; third, to do what we could to make democracy a vital

and living force.

We developed this five-fold plan:- First, we proposed to get the facts. Second, we planned to disseminate these facts exactly as we found them, without any sugar coating and with utter frankness. Third, we determined to help our local communities to organize themselves for effective community action. Fourth, we aimed to make our people realize that if they wanted progress, they had to pay for it. Last, though by no means least, we determined to make our people realize the consequences of failure.

As for the force behind the plan, we knew that we had to drive forward with unswerving determination. We had to recognize and to be willing not only to be misunderstood in what we were trying to do, but to be prepared to catch all the brickbats that were thrown at us. Last, and very importantly, we had to be ready to meet the active opposition that we knew would come. And so, with the above objectives clearly in mind, we went to our task.

The first part of the plan was to get the facts. We agreed that there were ten major problems facing Kentucky -- the problems of Agriculture, Education, Health, the Constitution, Welfare, Housing, Industry, Labor, Natural Resources and Taxation. We enlisted the sympathetic and enthusiastic support and counsel of some of our most distinguished scholars and administrators in Kentucky. We persuaded the foremost experts in their field to make these studies. For example, our report on Agriculture was made by Dean Thomas P. Cooper, Head of the Agricultural Experiment Station of the University of Kentucky - the man foremost in Agriculture in our state. In Education, the report was made by Maurice F. Seay, Head of the Bureau of School Service of the University of Kentucky and now Dean of the University. Dr. Seay has a national reputation in his field. Just prior to making this study, he had at the request of the Legislature of that State, completed a study of the educational system of Alabama.

In health our study was made by Dr. Philip E. Blackerby, State Health Com-

missioner. And so it went.

We developed our own technique in launching these studies. We began by inviting to a meeting with the Expert in question, all members of the Directorate of the Committee. These represented a pretty complete cross-section of the many interests in Kentucky. We also invited all of the other Experts, and in addition, that group which had the greatest interest and stake in the study. The Directors were present to represent their various interests. The other Experts were there in recognition of the fact that no one problem in Kentucky - or anywhere else - can stand by itself. The problem of Labor impinges on the problem of Industry; the problem of Industry overlaps the problem of Education; the problem of Education is involved with the problem of Health. In short, the social and economic health of a state is indivisable!

We felt, therefore, that if we could get a meeting of minds of the experts in all of the problems, we could get a better balanced report. We took this idea, very frankly, from the T.V.A. approach to their problems. It is working splendidly.

To implement each study, we selected a qualified person to develop a program of action based on the study. This was published with the report, and, while broad in its implications, showed the path we would have to pursue to correct the conditions that the studies revealed.

When a study was finished, we again had a meeting of the same groups. The expert making the report presented it in full, and it was followed by a presentation of the program of action. Then began a most intensive discussion period. Everyone present was called upon for his opinion. No holds were barred. The criticism was usually keen and sharp, though constructive. In the end, every report to date has emerged the better for running this gauntlet.

The final step was the presentation of the report at a public meeting to the representatives of all the member organizations of the Committee for Kentucky, for final discussion and correction. Then the report was published and disseminated widely throughout the state.

In the preparation of these reports for publication, we kept in mind our audience - the average Kentucky farmer. We felt that the reports should be attractive, readable and simple in language. We reminded our Publicity Director of the following story: A graduate of a prominent school of Divinity was invited to preach a sermon for a simple farming community. Forgetting the character of his audience, he tried to impress them with every four, five, and six syllable word he knew, and was quite set up with himself when he had finished. As the congregation filed by to shake his hand, he made the mistake of asking a rather frank spoken farmer what he thought of his sermon. The farmer replied, "Preacher, I guess it was all right for them as understood it, but if I was you, I'd put the fodder on the ground where the cattle can come and git it."

Those who have seen our reports will attest to their readability and their simplicity. They have made a deep impression on the people of Kentucky.

A very fortunate accident contributed immeasurably to making of our reports readable and attractive. When our first report -- on AGRICULTURE -- was finished and ready for publication, we had no staff to do the job, and were desperate for someone to help. At that time we were still in the war, and the Personnel Distribution Command of the Army Air Forces was stationed in Louisville. One day the local head of the U.S. Employment Service called to say that a soldier in that outfit was looking for some work to do after hours. He had been an artist before the war and wanted to know if our store could use him. I told him that since he would have to work with other people, and since our store closed at 5:30 every day, we could not possibly use him. It occurred to me, however, that he might be able to do the job for the Committee for Kentucky. So it was that Sgt. Arthur Ulbrand came into the picture. He readily undertook to prepare the reports, to do the layout work, the art work, and everything else that was necessary. It entailed working with the printer at night, but, since the printer had a son of his own in the Army, he readily consented.

Sgt. Ulbrand's work was so outstanding, that our reports attracted widespread attention just for their appearance alone, and helped immeasurably to get the reports read. By the time that he was discharged from the Army and got ready to leave for his home in New Rochelle, Ulbrand had become so interested and so enthusiastic about the work of the Committee that he asked if he might continue preparing the reports, coming to Louisville when necessary. We gladly consented. This has worked out admirably and every one of our reports is his handiwork. And so a resident of New York has made a significant contribution to Kentucky!

The second plank in our plan was to disseminate the facts extensively. We went to this with a will! First, we recognized that we had to have a sympathetic audience to consider these facts. The best audience we could get would be member organizations who paid dues to the Committee and were willing actively to support it. We began with about 20 statewide organizations. Today, after some four years of activity, we have 88 organizations - most of them statewide. The membership of these organizations exceeds 450,000 people. When it is realized that in the last senatorial election in Kentucky, a total of 606,000 votes were cast for all candidates, it can be readily seen what a great power is behind the Committee for Kentucky.

I do not mean to imply that all the 450,000 people who belong to these organizations support the Committee, or that a majority of them even knows what the Committee is about. It is a fact, however, that the leadership of these 88 organizations not only thoroughly understands the purposes of the Committee, but is giving it active financial and moral support. These 88 organizations represent practically a complete cross-section of Kentucky life.

The farm groups are represented, as are all the labor groups including the A.F. of L., the C.I.O., the United Mine Workers and the Railroad Brotherhoods; education groups, service clubs, professional groups and many, many others. The only ones missing are the conservative business groups, notably the manufacturing and banking interests. They think we are left wing radicals because Labor and

Negroes are represented on the Committee. How they could expect a statewide movement to make progress without the support of the 200,000 members of organized labor in Kentucky or the 215,000 Negroes is beyond me.

Through these 88 organizations, and through many other channels, we have been able to disseminate our reports widely throughout Kentucky.

The newspaper support from the Louisville Courier-Journal, as well as from the state press has been magnificent. The Kentucky Press Association is one of the member organizations of the Committee for Kentucky. Through its influence, over 100 newspapers out of a total of 200 in the state, regularly carry our weekly column called "Kentucky on the March". This is written as a service to the Committee by an intensely interested Kentuckian, Ewing Galloway, who runs a farm in Henderson, Ky. half the year, and the other half, directs his important Photograph Service in New York.

Support from radio is equally, if not even more heartening. For the last year and a half, radio station WHAS, a 50,000 watt clear channel station owned by the Courier-Journal, has been giving us each week, without charge, a fifteen minute dramatized program called "Kentucky on the March". They have one person who does full time research for the program, and writes the script. They pay the actors for rehearsals, as well as for the program itself. In addition, they make transcriptions for all of the other Kentucky stations which carry the program.

There are a total of 19 radio stations in the state. 17 of the 19 regularly re-broadcast the weekly program which originates with station WHAS. Last year station WHAS won one of the Peabody awards for this program. It was a tribute thoroughly merited, not only by the excellence of the job, but by the unselfishness of its great public service.

We haven't been content to get our story over solely by means of the reports, of the newspapers, and of the radio. Last year we conducted an essay contest on the aims and purposes of the Committee in all the elementary, high schools

and colleges of the State. We had a tremendous response. It is interesting to note that the first prize in the college group was won by a Negro boy from the Kentucky State College for Negroes.

The Kentucky Education Association every year conducts a discussion contest among all high school students in the State. Two years ago the subject of the contest was the work of the Committee for Kentucky. Last year, it was the need for a new Constitution - a collateral subject.

Last year we conducted an editorial contest among the state's 200 newspapers for the best series of editorials on the work of the Committee. This year we renewed that contest.

Perhaps most important of all - in May, 1946, the Curriculum Board for the colleges and secondary schools of the State voted unanimously to include the "Wake Up, Kentucky" program in the curriculum of every high school and college in the State. That, perhaps, was the most significant thing that has happened to date, because that, to us, seems to insure the future of Kentucky.

In addition, members of our staff have made literally hundreds of speeches throughout the state. The demand for the Kentucky story is increasing all the time. We have indeed carried out the second plank in our plan -- to disseminate the facts.

For the third part of our plan -- community organization - we have already made important strides. Yet we have hardly scratched the surface of what I think we are going to do. It seemed to us that in the local community, we could achieve a two-fold objective. First, the community was the ideal place to lay the groundwork for a progressive Kentucky for, after all, a progressive state is nothing but a composite of the progressive communities in that state. Second, it was in the local community that we had the best chance of giving real meaning to democracy.

In a recent review of an important book in Time magazine, the reviewer said that it was the author's simple thesis if the people of any community could get together to discuss their local problems and try to do something about them,

democracy would be reborn. We set out to do that very thing in an experiment in Henderson, a typical Kentucky community of some 20,000 people, located in the western part of the state on the banks of the Ohio. We were eager to stimulate progress in Henderson as an example to the rest of the State. We were motivated by one other important consideration:

For many years before the war, America had been suffering from a split personality. We had entrusted the control of our affairs to the hands of men in political life, not as one places a sacred trust in the hands of another, but rather as a mother who abandons her child on some doorstep. The politicians, sensing this abandonment, took our affairs into their own hands for private gain and for the enhancement of their power. This, in turn, had a curious effect on the people. They became apathetic, cynical, defeatist. You often heard people say disgustedly, "This matter is in the hands of the politicians - we can't do anything about it."

When the war came on, we closed ranks with our political leaders and showed the world the stuff of which democracy is made. Today, we in America are on the threshold of a grave decision. Are we again going to abandon our affairs, or are we going to place them in the hands of our politicians as a sacred trust, and concern ourselves daily to see that that trust is fulfilled? If we do that, our democracy will be stronger than any totalitarian system yet devised. If we don't, the outlook for democracy is dark indeed. This was an important consideration with us as we embarked on the Henderson experiment.

In February of 1946, we met with about fifteen of Henderson's civic leaders and outlined our idea to them -- the total mobilization of every organization in Henderson for the purpose of studying their own local problems, and of developing programs of action to solve them. These leaders were so enthusiastic about the idea that they called a meeting of the heads of all the organizations actively functioning in Henderson. When they told me there were almost 100 such organiza-

tions, including every important business, labor, agricultural, professional and church group, it seemed hard to believe. But Americans are that way. They like to join!

We met in the Health Center in a room that could seat only 85 people. We thought that if we could get 85% attendance it would be fine. When the meeting night rolled around, 117 people came. They stood in the aisles and in the halls, throughout the meeting. They voted unanimously to form a Committee for the City and County of Henderson. They planned for one month later, a Town Hall Meeting to sell the idea to their fellow citizens.

The largest Town Meeting previously held in Henderson attracted about 800 people. This group voted to hold their meeting in the Barret High School gymnasium, seating about 2,500 people. 2,500 people in Henderson is comparable to a mass meeting of 900,000 people in New York! When the night of the meeting rolled around, every one of the 2,500 seats in the auditorium were filled and they estimated that they turned away about 500 more.

Before the meeting, James W. Armstrong, one of the leaders in the organization of the Committee for Henderson was moved to write a Credo which was so inspiring that we had it printed and distributed to everyone at the meeting. It is herewith reproduced:-

CREDO OF THE COMMITTEE FOR THE CITY AND COUNTY OF HENDERSON

The Committee for the City and County of Henderson is more than an organization. It is a faith. It is a faith in the ideology of democracy. It is a physical embodiment of the belief that men and women -- citizens of the same community -- can assemble from different interests and occupations, from different racial stocks and religions, from different political affiliations, from different social and economic positions, and, by subordinating special interests to general interests, can thereby achieve a richer, fuller community life than is separately obtainable. It is a belief that the areas of agreement and unity in community life are more im-

portant than the areas of disagreement and disunity. It is the belief that our biggest problems are held in common -- that we hold the problem of disease and health in common, that we hold the problem of ignorance and enlightenment in common; that the problems of poverty and prosperity, of bad government and good government, of bad citizenship and good, all of these are problems and projects in which all citizens hold a common responsibility and for which solutions can come only through community wide cooperation. We believe that in the hands of its citizens rests the future development of our community ..... and that community development is possible only through an interested, informed citizenry, organized to work together..... This is the statement of our faith, resting in the ancient ideals which gave birth to the United States of America. It is the credo of our democracy."

The meeting was an inspiring success. Nothing like it had ever happened in the entire history of Henderson. The people shared a vision and decided to go forward. They agreed on five major studies of their local problems - Agriculture, Education, Health, Housing and Welfare. They set to work with a will,

One of the first problems which they considered was in the realm of public health. Henderson had been supplying water to some of the outlying districts which had no sewerage system. This water was coming back to Henderson in the form of sewage and creating a public health menace. For years, the public health officer tried to get something done about it. But he was alone - and got nowhere.

When the health report of the Committee for the City and County of Henderson was published and this health menace was brought forcibly to the attention of all of the citizens, the public health officer was no longer alone. He had the support of all of the organizations of Henderson! Within a week after the report was made, the city fathers, sensing the will of the people, and seeing where the votes lay, promptly voted a bond issue for the sewers. Today the sewers are a reality. A small problem, you say? Compared to the problems of the state or of the nation - certainly! But to Henderson, a very important problem, indeed -- a problem solved

through community citizen action.

Today the Committee for the City and County of Henderson is actively functioning. People who never spoke to one another before, are now sitting around the council table discussing their common problems. People who hated each other all their lives, are now seated near each other at meetings and are discovering that you can't hate the other fellow nearly as much when you are face to face with him and working on a common problem, as you could when you never saw him.

The Henderson idea has already spread to six other Kentucky communities -- Carrollton, Murray, Bardstown, Danville, Springfield and Fort Thomas and is now under serious consideration in the larger communities of Ashland, Lexington, Frankfort and Paducah. The Henderson idea is on the march in Kentucky. Since ideas, like radar, are no respecters of boundaries, it may well keep marching across the borders of Kentucky throughout the length and breadth of our land.

The fourth part of our plan was to get people to realize that if they wanted progress they had to pay for it. In January of 1946, an unprecedented thing took place in Kentucky. A joint session of the Senate and House of Representatives of the Kentucky Legislature was called for the sole purpose of hearing the story of the Committee for Kentucky. We had no legislation to propose, no ax to grind. There was nothing we wanted to lobby for. Our Committee was completely non-partisan, nom-political. We simply wanted to place before the Legislators a great moral and spiritual idea -- the truth about Kentucky.

It was an inspiring meeting, and from it flowed a result that none of us ever dreamed of -- a result that we couldn't possibly have hoped to accomplish were we the strongest pressure or lobby group in the state. From that meeting there came a series of some thirty pieces of legislation that improved the social and economic conditions of our state and which made for more social progress than had been accomplished in a long, long, time.

The annual budget was raised from $32,000,000 to $45,000,000 at this session. That could never have happened if the Legislators had not felt that the

people were behind them. We had done much to create that public opinion.

One of the State Senators had this to say at the end of the session of that Legislature. "The increase in overall allotments to the state in general, the Senator attributed largely to the Committee for Kentucky.

"I think most of the men in the Legislature were under the influence of the Committee even though they may not have been conscious of the fact", he said.

"The Committee broke party lines, and showed the men how to work for the good of Kentucky rather than for their respective parties alone." This is a great step forward for Kentucky, a state where "Politics is the damndest!"

The people were ready to pay for progress, and the Legislators knew it. One example will help make my point:- For many years Kentucky has permitted a tax of only 75¢ per $100 to be levied for Education in rural school districts as against $1.50 per $100 in the city districts. As a result of this we placed a very definite handicap on our rural children. If I had it to do, it would have been done the other way, for city children have many more advantages than rural children. In addition, the rural children usually have bus transportation as an item to come out of the 75¢ levy and the city children, by and large, do not.

For fifteen years the Kentucky Education Association had been fighting to equalize this fund and put the rural children on a par with the city children. And yet this organization, considered by many to have the most powerful lobby in the state, was unable to accomplish this.

Within ten days after our appearance before the Legislature, the bill to equalize this tax was once more introduced. In the debate on the bill, more than 30 of the Legislators got up to read excerpts from the Committee for Kentucky's report on EDUCATION. When the bill was put to a vote, it was overwhelmingly passed. Today, for the first time, our rural children are on their way to having an equal chance with our city children insofar as getting an education is concerned.

The passage of this law made us feel that the spiritual idea of the truth has infinitely more power than any lobby or any pressure group could possibly have,

no matter how strong it was or how worthy its objectives.

Another incident will further emphasize this point. In the November 1946 election, there was presented to the voters of Louisville for approval an $8,000,000 bond issue to improve school facilities. In the past, practically every bond issue either in Louisville or in Kentucky had had hard sledding. A few desirable ones were voted only by collusion of both political parties. It was therefore a considerable surprise to everyone that this bond issue passed legitimately by a vote of about six to one.

About a week after the election, the Superintendent of Louisville's schools told me that a keen observer of the educational system had said that he gave a great part of the credit for success of this vote to the Committee for Kentucky. "The thing that was particularly remarkable", said he, "was the fact that the Committee took no sides in the matter, made no public statement on it and in no way associated itself with the campaign". "But," he added, "the Committee had created in the minds of the people of Louisville such an awareness of the condition of their schools that the passage of the bond issue was a foregone conclusion."

During the question period that followed our presentation to the Joint Session of the Legislature, one Legislator asked, "Where is the money coming from to do all the things that have to be done? The people back home want us to reduce taxes, not to raise them."

I answered, "We have a distorted idea about taxation in America. It reminds me of the association of ideas test. Somebody says 'black', and you say 'white'. When they say 'up', you say, 'down'. When they say 'tax', you say 'cut'. I know you gentlement of the Legislature would like to do something of lasting value for your constituents. If you are instrumental in having a new school, a hospital or bridge built, it is something that will permanently improve the life of the people in your community. You come here thinking that the great majority of the people are interested only in cutting taxes. I believe that the people are ahead

of you in their thinking.

"I predict that when the people of our state know the true conditions existing within our borders, they will not only demand that these conditions be corrected, but they will be willing to pay for it. I predict that the time is coming when any one of you who runs for the Legislature on a platform of cutting taxes just to be cutting taxes, will be overwhelmingly defeated."

This struck such a responsive chord in the minds of the Legislators that they literally brought the house down in their approval.

Recently this point was given even greater validity in Henderson. The Committee for the City and County of Henderson realized that if they were to have orderly growth in their city, they had to have a zoning law. They called upon the Mayor with the request that such a law be passed. The Mayor interrupted to say, "If this law is passed, it will add 3¢ per hundred to your tax bill."

They said, "We will be glad to pay it."

A week later another group from the Committee called on the Mayor to say that if juvenile delinquency were to be curbed, Henderson had to have a child welfare worker. Again, the Mayor interrupted to say, "If you want a child welfare worker, it will add 2¢ additional per hundred to your tax bill."

The Committee said, "We will be glad to pay it."

Within a week's time both ordinances were passed, implemented by an ordinance to increase the tax rate by 5¢ to cover these two programs. The people knew the need. They were willing to pay for progress.

The fifth part of our plan was to make the people realize the consequences of failure. There were two major considerations in our thinking in this matter: First, it was our feeling that America in the next ten years was going to be in the keenest competition with communist Russia and with all the countries of Europe and Asia that were going steadily to the left. The first thing that these countries were doing, or proposing to do, was to improve the conditions of their people, by giving them a better opportunity for education, for health, for welfare and for

economic security and opportunity.

It was our profound conviction that unless we in America did as good a job for our people as the totalitarian states did for their's in affording them a chance for a better life, our American way of life would be in serious danger. Sooner or later some Huey Long or some other political traducer would come along with a program that could easily destroy our Democracy.

It was our conviction that the most important problem of the 20th Century - more important even than the problem of the atomic bomb, was the reconciliation of political liberty with economic security. The totalitarians were convinced that they could achieve economic security only at the expense of political liberty. We deeply believed that we could retain our political liberty and achieve a great measure of economic security. Where we failed to achieve economic security completely, we felt it was a small price to pay for retaining our political liberty.

I am deeply convinced that we can win this battle, but we can win it only if our people understand that the American way of life must include the fullest opportunity for ourselves and for our children for better education, for better health, and for economic justice. The only way we can achieve it is by working together, determined to achieve it. What the people of Kentucky -- what the people of America -- want, they will get.

The other idea that moved us to make our people aware of the consequences of failure was this: During the past two thousand years of our so-called Christian civilization there has been going on the this world an intense struggle between two great ideas -- the idea of pulling together and the idea of pulling apart. This struggle is being carried on in every local community, in every state throughout the nation, and in every nation throughout the world. On the world level, the idea of pulling apart is symbolized by the atomic bomb. The idea of pulling together, by the United Nations.

To me, the profoundest tragedy of our Christian civilization is that throughout these 2,000 years, we have spent the greater part of our effort, our

thought, and our care to the idea of pulling apart. We have made of it an art and a science. We have become expert at it. We have become professional at it. Tragically, our approach to the idea of pulling together throughout this time has been weak, inept, bungling, and amatourish.

I think you will agree that self-preservation is the strongest instinct in man. It must be perfectly obvious that the idea of pulling apart is detrimental to self-preservation, whereas the idea of pulling together is conducive to it.

Isn't this, then, the most important question that we should ask of our Christian civilization: Why is it that in these 2,000 years, we have devoted most of our time, our thought and our care to the idea of pulling apart, when that idea is so inimical to self-preservation? Why we have done so little for the idea of pulling together, which alone can save our civilization?

I don't profess to have the answer, but I do have my answer. It is that in all these years, because of fear and of a sense of insecurity, we have enthroned mistrust, misunderstanding, and hate in our minds and in our hearts. Had we followed the ethical precepts of Jesus and enthroned mutual trust, human sympathy, and understanding, the history of our Christian civilization would have been profoundly different.

For the first 1945½ years we were able to survive the struggle between these two ideas. We could pull apart all over the world and then, when exhausted, try to pull together again. Somehow, we always had another chance. But on the morning of August 6, 1945, with the dropping of the atomic bomb on Hiroshima, a new world began. Never again will we have another chance to pull together after we have pulled apart. If once again we pull apart in this world, it will be the end of our civilization. That is the most important fact of these 1,947 years.

What can be done to insure our chances for survival in this atomic age? If my thesis is correct, we must reverse the historic process of the past 2,000 years. We must have the will to replace fear with courage in our dealings with our fellow men. If we do that, there will naturally develop mutual trust, understanding and

sympathy. We will have made supreme, once and for all time, the most powerful idea in the world -- the idea of pulling together.

The job cannot be started on the international or even on the national level. It must start in the local community. That's where the Brotherhood of Man must begin.

These were some of the thoughts on which the Committee for Henderson and the Committee for Kentucky were built. It was our feeling as we started this great experiment, that if the people of Henderson could learn to work together in mutual confidence and trust, the idea would spread to Carrollton, to Murray, to Springfield, to Paducah, Fort Thomas, Frankfort -- in fact, all over Kentucky. It might spread from Kentucky to other states. It might well spread from America to other nations. People everywhere must learn to pull together. The consequences of failure is annihilation.

Here then, was our objective and the five fold plan to achieve it. One thing more was necessary -- a determination to achieve the goal, that would permit of no obstacles. For a beautiful plan without the spiritual force to drive it, is like a beautiful motor of shiny copper and bright blue steel without the electric current to set it in motion. We realized that we had to go forward with the greatest determination. We had to face the fact that there would be plenty of brickbats coming our way and that we must be prepared for them. For myself, I was prepared. In the department store business we budget a certain percent for markdowns. I budgeted a certain percent for brickbats. I am glad to report I am still within that budget.

What we had particularly to prepare for was active opposition. For fifty years, Kentucky was a sleeping giant. So long as the giant continued to sleep, he didn't bother people very much. But when we began to wake the giant by going throughout the length and breadth of our state crying, "Wake up, Kentucky! Wake up, Kentucky! Wake up, Kentucky!" the giant began to stir and then to march. A marching giant will tread on people's toes. This giant was no exception.

Some of the opposition came from well meaning people who lived in a sheltered world -- who were escapists and couldn't bear to hear unpalatable truths. I remember a humorous incident to illustrate this. A few months after an article appeared in a national magazine, telling the Kentucky story in all its unpleasantness, I was invited to address the annual conference of the Kentucky Federation of Women's Clubs. The president of the Federation was a Director of the Committee for Kentucky and an ardent supporter of it. Unfortunately she fell ill, and appointed a well-meaning escapist to preside over the meeting. The introduction she afforded me is one that I shall never forget. This was it, in toto:- "The next speaker will have much to do to restore himself in my estimation - Mr. Schacter!" But, in all fairness to her, be it said that after I had finished speaking, she admitted I had partly restored myself in her estimation.

Some people, especially those who had left the state for better opportunity elsewhere, opposed us because we had deprived them of the opportunity to brag about the glamorous Kentucky from which they had come -- the Kentucky of Bluegrass, of mint juleps, of fast horses and of beautiful women. That opposition we could take in our stride.

But the most powerful opposition came from the well-to-do, particularly from the Manufacturers, and the Bankers. There were three reasons for this opposition:- first, they were beneficiaries of the status quo, and didn't want any change. Second, they thought that progress in Kentucky would mean more taxes and that, since they had the money, they would be called upon to pay the greater part of the bill.

Third, they honestly thought we were giving Kentucky a bad name by publicizing the truth, and that that would prevent industry from coming into our state.

We thought that their objections were not valid on all three counts. First, we thought that they failed to realize that the best way of maintaining the status quo was to make constant compromise with and even be willing to make an investment

in progress. About 80 years ago the eminent French historian de Tocqueville, pointed out that the French aristocracy had sat around crying over their lost privileges and immunities and were ultimately eliminated from the scene. The British aristocracy constantly made compromise with progress and were permitted to continue to govern for almost a century and a half after the French aristocrats had lost their heads.

There is an important lesson in this for conservative American business men. They must be prepared to take a position of leadership for progress, or be relegated to a secondary position in our national life. Unfortunately, many of them fail to see it. I once defined a business statesman as a man who had the courage and the vision to take an immediate temporary loss for the sake of a future permanent gain. It is my deep conviction that if our conservative business men would be willing to take some temporary losses in the form of contributions, taxwise and otherwise, to our progress, they would secure permanent future gains from their own enlightened selfish standpoint. Unfortunately, there are not too many business statesmen in our communities.

The second evidence of the mistakenness of the conservative groups who opposed us, particularly those in and around Louisville, can be stated in purely economic terms. Louisville and Jefferson County pay about 33% of the state's taxes and receive from the state about 11% of the total tax money. In other words, we in Louisville subsidize the rest of the state to the tune of about 22% which, in terms of a $45,000,000 annual budget amounts to some $10,000,000 a year. While conditions in our state remain as they are, that $10,000,000 subsidy, the bulk of which our business community in Louisville has to pay, will continue to grow. Wouldn't it be far better if the people of our state could be made more self-reliant and self-supporting and so diminish the drain on the Louisville taxpayer?

On the third issue of the opposition -- that we were giving Kentucky a bad name -- it was our conviction that it was far better for us to tell the truth about Kentucky and let the outside world know that we were trying to correct our faults. We felt that it would be a great mistake to invite new industry into our

state and have the new industrial leaders find themselves handicapped by working people and by communities, a considerable portion of whom lacked education, had poor health, and were backward in many other respects. Our conservative friends violently disagreed with us -- and do now on this point.

Only recently we had a striking proof of the correctness of our position. A Louisville dealer who handles specialties in building supplies was constantly being taken to task because he did not produce enough sales by the various manufacturers whose lines he handles exclusively in Kentucky. He finally hit upon the idea of sending them the reports of the Committee for Kentucky to show the conditions in our state as the reason why he could not produce the volume of sales that they had expected. The reaction he received from these manufacturers was most interesting and from our point of view, very heartening. I should like to quote from a letter he received from the Vice-President in Charge of Sales of a metal window manufacturer in Waukesha, Wisconsin.

> "I have in the past received many well prepared brochures from Chambers of Commerce and state associations outlining in fabulous figures and glowing phrases the accomplishments of their cities or states, but this is the first time to my memory that I have ever received material such as this outlining in all of its terrible detail everything that is wrong with the state. After the first shock, I realized that this is a good, healthy way for the State of Kentucky to approach its problem, that is, to get the bad facts right out on the table and look at them. This should bring results and I certainly hope so."

That is the reaction we feel that most intelligent business men will have who want to come into Kentucky. That is the reaction that we think will ultimately improve the economic conditions of our State.

The Associated Industries of Kentucky - our statewide version of N.A.M. and our Bankers' Association do not support us. However, we are not going to rest

in our efforts to find an area of agreement with them. It seems to me there must be one thing on which the most conservative Kentuckian can agree with the most liberal - namely, that Kentucky can, ought, should and must be made a progressive state.

There is this comforting thought about it. Those who oppose us, while very powerful from the standpoint of financial interest and influence are small in numbers and therefore weak politically. The people behind the Committee for Kentucky have the numbers and the power. If they but knew it, our conservative opposition would realize that they have far more to gain by joining forces with us than by opposing us. Without us, they can accomplish little. We, without them, can accomplish much. All of us working together could accomplish even more. It is this thought that keeps us earnestly seeking an area of agreement with them. I hope and pray that in time we may find it.

Waking up the people of a state was not an easy task. At times the obstacles seemed back-breaking. Yet we persisted with everything we had until we really got under the skins of the people of Kentucky. While the going was tough on occasion, we did get some fun out of it.

About a year ago, a reporter from a Louisville newspaper telephoned me to say that an Associated Press dispatch had just come over the wires to the effect that the Commissioner of Agriculture of the state of Tennessee had announced that Tennessee had four times as much Bluegrass as Kentucky. The statement was published in a booklet called "The Horse and Its Heritage". Tennessee had become well-known for its famous "Walking Horse" -- a specially gaited animal that has come into great favor in this part of the country. It was in the course of the story of the Walking Horse that the Bluegrass comparison was mentioned.

The reporter wanted to know what we were going to do about it. I asked why he had contacted me in the matter. He said, "Aren't you President of the Committee for Kentucky?" I answered, "Yes, but our job is to find out what is wrong with Kentucky and try to correct it, not to uphold the fair name of Kentucky's Blue-

grass." He said, "Well, we've got to tell them something -- we can't let them get away with it."

I thought for a moment and said, "Tell them we cannot question their statistics - that Tennessee has four times as much Bluegrass as Kentucky - because I don't think they would have dared publish it if it weren't true. I don't think, however, that it is a matter of quantity. It is a matter of quality. There is something in the Bluegrass of Kentucky that makes horses want to run, whereas the Bluegrass in Tennessee makes horses only want to walk." That duly went back to Tennessee over the AP wires. For the next several weeks there developed over the AP wires a "feud" between Kentucky and Tennessee that afforded both states considerable merriment. After it was over, the Commissioner of Agriculture of Tennessee wrote me that he hoped I had enjoyed the "feud" as much as he had -- that they had printed 5,000 copies of the booklet, and that the demand from all over the country was so great that they would have to print 10,000 more. And so the Committee for Kentucky made a real contribution -- to Tennessee!

For the first three years of the life of the Committee our watchword was "Wake Up, Kentucky." That watchword became known in every community of our state for it was dinned into the minds of the people by the newspapers, through our reports, through the radio and by our speakers. By last summer we had made so much progress that we felt it necessary to change our approach to "Kentucky on the March". Kentucky is indeed on the march today. It is on the march because we have developed the moral climate for progress, through a great spiritual objective, a well considered plan to reach that objective, and an intense determination to see it through. The people have indeed begun to share a vision. When the people do that, they are bound to go forward.

We have accomplished much in these last four years, and we look forward with eagerness to the years ahead. We have made great progress because we are learning more and more to pull together.

As a result, the people of Kentucky today are beginning to know what is

wrong with our State. They are beginning to demand solutions. I am confident that in time, what the people of Kentucky want, they will get.

One of the finest dividends from our work in these past four years has been the better understanding among the leaders of the different groups. When we started, Labor looked with suspicion upon Agriculture. Agriculture mistrusted Labor. After a year and a half of working together, the most important Labor leader in the state turned to the Director of Information of the Farm Bureau Federation at a meeting and said, "Joe, for the first time in my career as a leader of Labor, I am beginning to understand the problems of the farmer." Joe Betts responded, "For the first time in my career as a leader of the Farm group, I am beginning to understand the problems of Labor."

Another interesting happening will further illustrate this point. The State Health Department was carrying on a health program in the schools. The Department of Education was also carrying its health program, with the result there was constant overlapping, friction and misunderstanding. After the Health and Education leaders had been working together in the Committee for some time, they developed a coordinated health program for the schools that was really effective -- another dividend of cooperation.

There have been a good many other things that have developed as a result of this ferment. After we got going, the Governor appointed an official Post War Advisory Commission under the chairmanship of H. Fred Willkie, head of Seagram's distillery of Louisville, and brother of Wendell Willkie. Mr. Willkie did a grand job with this commission. Since he was also first vice-president of the Committee for Kentucky, the two organizations worked side by side.

There were these other important developments:

1. In this past year, there has been formed for the first time, a Kentucky Chamber of Commerce, which we hope will bring industry into the state to enable it to get the economic wherewithal to pay for its progress. We choose to believe that the stir created by the

Committee for Kentucky was, in a considerable measure responsible for the formation of the Kentucky Chamber of Commerce.

2. In the fall of 1947, there was considerable discussion throughout the state as to whether we should call a Convention to rewrite our 57 year old Constitution. While the vote in the November election was adverse, there were some heartening signs. 40% of those who went to the polls voted on this issue as against only 12% in 1931, the last time this question was put to the people. Out of those who voted on the Convention, 42% voted "yes" in 1947, against 22% in 1931. I believe that we will, in time, get a new Constitution geared to the spirit of our times. I believe that the moral climate which we have engendered will help us to get it.

3. In May, 1945, there was held in Lexington, Ky., under the auspices of our Committee, the first Farm Housing Conference of its kind ever to be held in America. The findings were published by the National Committee on Housing and broadcast throughout the country. In the past, seemingly every worthwhile thing has started in some other fellow's state. We were very happy that for once something worthwhile started in our own.

4. In the course of its work, the Committee made a real contribution to a better understanding between the races. It began when we were about to launch our study on EDUCATION. Fortunately, Dr. Seay, our Expert, just finished his report on the educational system of the state of Alabama. He told us that before he started this study, he was approached by the leaders of Negro education in the state with the request that Negro education should not be treated as a separate problem. We agreed with that approach, and to solve the problem we elected to our Directorate two distinguished Negroes - Dr. R. B. Atwood, President of the Kentucky State College for Negroes and Mr. Frank Stanley, publisher of the Louisville Defender, the most important Negro newspaper in the South.

Since every report had to be approved twice by the Directorate, the Negro point of view would thus be well represented. Because each report had finally to be presented for approval to all member organizations of the Committee, we decided to admit to membership every organization regardless of race. Of the 88 member organizations of the Committee for Kentucky, 14 are Negro. They represent every important Negro group functioning in the State.

Most of the time, the Directors met at dinner. This provided an interesting and valuable experience for some of our Directors who had never before sat at table with a Negro.

An interesting situation regarding the Negro problem developed during out appearance before the joint session of the Legislature. Out of a total of 100 Representatives and 38 Senators in the State Legislature, there was one Negro. After the presentation had been made and the question period began, the first question was asked by this Negro. It was, "How does the Committee for Kentucky feel about the Negro problem?" It was a tense moment. Here was the entire Legislature in session -- many with their prejudices. There was a packed gallery -- many with their prejudices. I answered, "You gentlemen of the Legislature are here because you have sworn to uphold the Constitution of the Commonwealth of Kentucky. Had you not taken that oath, you would not have been permitted to sit in this Chamber.

"This Constitution that you have sworn to uphold recognizes only first class citizens. It makes no provision for second class citizenship. Therefore, we of the Committee for Kentucky, recognizing only first class citizenship, have invited Dr. Atwood and Mr. Stanley who are here before you, to be Directors of the Committee. We deal with them and with all other Negroes as we deal with every citizen of Kentucky."

The first year and a half of the life of the Committee posed no serious financial problem. The President of the organization ran it from his business office with his own secretary. During this entire period the total sum spent was $783 -

practically all of it for printing. But as the Committee grew in its activities, it became necessary to staff it adequately. As the reports began to come off the press -- each report cost approximately $2,000 -- it became clear that a substantial sum of money had to be raised for the furtherance of the work.

Being a merchant and, fortunately, having the confidence of my fellow merchants in Louisville, I invited a group of 14 of them to lunch. I outlined the prospective program, which was still in a nebulous state, and then submitted to them a bill for $6,000 for the luncheon. After 30 minutes of discussion the bill was paid in full. In the first campaign we raised some $17,000.

In December of 1945, I met with the Speaker of the House of Representatives of the 1946 Legislature to arrange for the joint session which was held the following month. When I told him the entire story of the Committee, he became so enthusiastic that he offerred to get us an appropriation of $50,000 from the Legislature. I knew that his prestige and power were so great that he could easily have done it. At that time we had less than $300 in the bank. I swallowed hard, thanked him and turned down the offer. I told him I felt that if the people of Kentucky wanted to do this job, they would have to pay for it. I further felt that if we were tied to any arm of Government through the means of an appropriation, we could never express ourselves as freely as we could were we on our own.

In the four years of our existence, we have raised by private subscription, close to $100,000. Of this sum, $16,000 was raised by member organizations and represents memberships from over 14,000 people -- a heartening vote of confidence from the people, and the beginning of the development of a broad mass base. For the next two years, we propose to raise $75,000 additional in furtherance of our work.

The old expression "A prophet is not without honor save in his own country" isn't always true. In the case of the Committee for Kentucky, the reaction of a great many significant people in our state has been most favorable. Immediately after our appearance before the joint session of the Legislature, two of the legislators

had the following to say:-

Henry Arrowwood, State Representative, Paintsville, Ky. - "This is my third session in the Assembly, and this is the most important session I sat through yet."

Kenneth Tuggle, Lieutenant-Governor, Barbourville, Ky. - "This report presents Kentucky's problems in such a manner that those who are trying to advance Kentucky will respond to the leadership the Committee gives."

Other distinguished Kentuckians had this to say:

Jesse Stuart - Kentucky's foremost novelist, author of "Taps for Private Tussie" - "The work of the Committee for Kentucky is one of the most promising, if not the most promising thing, that has happened in Kentucky.."

Leigh Harris - publisher of the Henderson Gleaner and Journal - "Rotarians Thursday were let in on the ground floor of the greatest movement in the history of Kentucky -- the work of the Committee for Kentucky."

P. E. Blackerby, State Health Commissioner - "The Committee for Kentucky is a splendid example of democracy in action as it encourages the people to diagnose and to treat intelligently the State's social and economic illnesses."

W. P. King, Exec. Sec'y - Kentucky Education Association - "The Committee for Kentucky has undertaken its task with prophetic vision. If the leaders and the led in Kentucky will follow the trail which has been blazed for them, the entire State may arise Phoenix-like from its apathy and assume a commanding place among the states."

John Sherman Cooper, Junior U. S. Senator from Kentucky - "All of us can have confidence in the men who are getting the facts. Public inertia is the greatest obstacle to progress. The Committee for Kentucky has made notable progress in overcoming that indifference."

Alben W. Barkley, Senior U.S. Senator from Kentucky - "As people learn to work together in communities and states they pave the way toward the eventual clim-

ination of war from the world. It is not enough to boast about Kentucky unless its citizens attack the problems of illiteracy, unhealthful conditions and other conditions that hold the state back from its rightful place in the Nation. The Committee for Kentucky is to be congratulated for the splendid work it is doing in Kentucky."

We have been greatly heartened by the recognition from these distinguished Kentuckians. Equally heartening has been the recognition we received outside of the State. David E. Lilienthal, when he was chairman of T.V.A., after reading one of our reports of progress, wrote:-

"The 'report of progress of the Committee for Kentucky' is well-named. It really is a story to lift one's heart and bolster confidence - in the midst of news from other places that does neither. You and your fellow workers are doing a historic job. You are building the foundation of a better community - that's really progress."

Marquis Childs, the famed columnist made a special trip to Kentucky to study the work of the Committee at first hand and wrote two articles on it.

Collier's magazine had an article called, "Weep No More, Kentucky", which caused a tremendous furor in the state and resulted in a lawsuit against Collier's and against the President of the Committee.

There have been feature articles about the Committee in AP and UP, in the Christian Science Monitor, in Kiplinger's magazine, in the New York Times, in the Nation, and in Magazine Digest.

The National Planning Association sent an evaluating Committee to Kentucky to study the work of the Committee at first hand. The following is the last paragraph in their report:

"Your Committee closes its report with a deep and sincere acknowledgement of the stimulation and inspiration it received from the evangelistic and dynamic fervor evidenced in all relationships. Officers, staff members, and committee

members believe beyond any doubt in the civic worth of what they are doing. Your committee in three days found themselves agreeing that Kentucky was on the march, and the Committee for Kentucky was in the lead."

Perhaps one of the most significant undertakings yet launched by the Committee for Kentucky has been a "People's Legislative Program". It was our observation that the legislative process in Kentucky, as probably everywhere else, has been placed on a highly competitive basis. Every important group prepares a program of its own, tries to get it presented to the Legislature, and then asserts all the pressure it can bring to bear to have it enacted into law. Since the various groups differ in strength, it often happens that the group with the greatest strength gets the most favorable legislation. This often leads to an unbalanced legislative program. Practically every important group in the state has a lobby -- except the most important group of all -- the people. Since a great deal of legislation has to do with appropriations, the legislative process has become an intensive competition for the taxpayer's dollar.

It occurred to us that there might be a better way -- that we might possibly substitute cooperation for competition. Therefore, in January, 1947, we called a meeting of the leadership of every important group in the State, excepting the usual manufacturing and banking groups. We suggested they go back to their membership to develop a complete legislative program for their group, and come back to a meeting two months later for a discussion of that program.

At the next meeting in March, each group presented all the planks in its own program. Every plank was thoroughly discussed and voted on. Only such planks as had the unanimous approval of <u>all</u> of the groups were included in the "People's Legislative Program". The reason for the rule of unanimous agreement was simple: Here was an unprecedented departure from the usual way of approaching Legislation. We felt that in the preparation of the first "People's Legislative Program", the new method of cooperation was more important than even the program itself. We also felt that as the group learned to work together, even on a skeleton program, mutual

confidence and trust would be developed as the basis of future broader programs, which could then be planned without the necessity of unanimous agreement. 38 planks were unanimously agreed upon. These planks were published as a regular report of the Committee, and were disseminated widely throughout the State to all candidates of every political party, for all offices. They include, among other things:-

1. A broadly expanded program for Agriculture
2. Improve schools in the rural areas
3. An expanded program for medical care for rural people
4. An expanded program for rural highways and farm-to-market roads
5. An expanded program for rural electrification
6. A number of important measures pertaining to Conservation
7. A number of important measures to improve health standards
8. A Mine Safety and Hygiene Law with teeth in it
9. A number of measures to improve the conditions of Labor
10. A Fair Employment Practices Act
11. A number of measures to improve the Public Welfare program, including an improved Child Labor Law
12. Several measures to promote business in the State
13. A number of important measures to improve Education, including greatly increased appropriations for teachers' salaries and the extension of the school term to a minimum of 9 months instead of 8 months as at present.

In the Primary Campaign for Governor in 1947, there were two candidates in the Democratic and two in the Republican Primary. In the opening campaign speeches of each of these four candidates, they endorsed about three-fourths of our program, and subsequently added endorsement to the majority of the remaining planks. Since the Primary, both Republican and Democratic nominees for Governor have not only expressed wholehearted approval of the program, but have agreed to use their good offices to help us get a joint session of the 1948 Legislature for the presentation

of this "Peoples' Legislative Program."

At that joint session, it is our plan to bring the Legislators up-to-date on the progress the Committee has made since we appeared before them in 1946, and to outline the purpose and philosophy behind the "Peoples' Legislative Program". We then propose to call the roll. The most important labor leaders in the State will present the planks on Labor. The most important farm leaders in the State will present the planks on Agriculture, and so on until the entire legislative program has been placed before the Legislature. We are going to ask for nothing. We are going to rely entirely on the moral effect of our presentation to produce the necessary legislative results. If the results of this forthcoming joint session are as good as the results of the previous session, we should make even greater progress in these next two years than we have done in the last two. Above all, we will have substituted the method of cooperation for the method of competition in developing a legislative program.

Early in 1947 a Planning Committee was appointed to chart our course for the years 1948-49. That Committee worked intensively throughout the summer and its report was unanimously approved by the Directors in September. The program included four new studies - COMMUNITY LIFE, GOVERNMENT, TRANSPORTATION and BLUEPRINT FOR A GREAT KENTUCKY.

Our study on GOVERNMENT is going to be made by Professor J. E. Reeves, Head of the Department of Political Science of the University of Kentucky and one of the foremost experts in his field. Professor Reeves will have the help of all of the faculty members of the University who are interested in this subject.

Since the call for the Convention was defeated at the November, 1947 election, it is our feeling that this report on GOVERNMENT will be especially needed. When it is made, the people will have a clear idea of the kind of government they might have had, had they voted for a Constitutional Convention. It is our hope that this will continue the educational process which made the interest in the new Constitution more than three times as great among the voters in 1947

than it was in 1931, the last time the question was voted on.

BLUEPRINT FOR A GREAT KENTUCKY is intended for the time being, at least, to end the reports, and, in effect, to be a summation of all of them. In that report it is determined to explore what it would take in the way of dollars for both capital expenditure and annual budget to bring Kentucky up to the level of the United States average in Education, Health, Welfare and other social services. We rather imagine that the sum will be staggering. We propose to place this report before the people of Kentucky with the following letter of transmittal:

"People of Kentucky, here is a Blueprint for a Great Kentucky. It is non-partisan. This program will insure a better life for every Kentucky citizen. It will enable Kentucky to take its rightful place among the progressive states of this Nation.

"You, the people of Kentucky, can have as much or as little of this program as you are willing to work for and as you are willing and able to pay for. You must make the decision. The future of Kentucky lies in your hands, for only the people of Kentucky can correct the ills of Kentucky, and only the people of Kentucky can restore Kentucky to its inherent greatness."

To meet the huge increase in the annual budget that the "Blueprint for a Great Kentucky" will probably reveal as necessary, we hope to recommend a long range tax program based on a study of the industrial growth of Kentucky which we hope the Kentucky Chamber of Commerce will help bring about.

We estimate the capital expenditures necessary may well reach $500,000,000. For this purpose, it is our present thinking to recommend a 50 or a 75 year bond issue in the sum of perhaps 250 million dollars. It is our feeling that while the next two generations in Kentucky will probably have to pay for it, they will be the greatest beneficiaries of this bond issue.

In addition to these four new studies, we are planning in the next two years to bring our past reports up-to-date, and to publicize the findings widely. Kentucky has made great progress in these past four years. We will be much prouder

to report this progress than we were to report the backwardness that existed previously.

Already signs of progress in these last four years are beginning to show up clearly. I would not for a moment have anyone think that the Committee for Kentucky is solely responsible for this progress. War-time conditions and the general spirit of the times were on the side of progress. However, no thinking Kentuckian today will deny that the Committee had an important part in it.

It is evident from the following figures that the progress that has been made is comparatively little. However, in practically every category there are definite signs that progress is sure. That is the important thing. Kentucky has at last turned the corner. Here are some of the things that have happened in these four years:

In Education:

1. Enrollment increased 5%
2. School attendance increased 2%
3. The school term was lengthened by 5 days
4. The average school attendance increased by 10 days
5. The average salary paid to teachers rose from $1,014 to $1,325
6. The number of independent school districts that discriminated in salary against Negroes dropped from 26 to 17.
7. The percentage of Kentuckians who had library service made available to them rose from 33% to 38%

In Agriculture:

1. Tenant farming decreased from 33% to 27%
2. 10,194 more farmers owned all the land they operated
3. The percentage of Kentucky farms on hard-surface roads increased from 19 to 20%
4. The farms not reached by improved roads of any sort dropped from 42% to 40%

5. The number of Kentucky farms served by telephone increased from 16% to 18%.

6. The number of farms which now have central electric service increased from 25% to 30% -- 25,800 more farmers are using electricity than in 1940.

7. 11,121 more farmers are now using tractors than in 1940.

8. Last, and most heartening, the average income per farm family has increased spectacularly from $640 per year in 1940 to $1,860 per year in 1946.

In Welfare:

1. In the percentage of aged persons receiving assistance, Kentucky dropped from 21st to 27th place in rank among the states.

2. Kentucky rose from last place to fourth from bottom in amount of Old Age Assistance -- from $11.59 to $17.37 per person per month.

3. Aid to dependent children rose from $7.98 a month to $13.65 a month - an increase much larger than the national average.

4. Aid to the needy blind rose from $13.09 per month to $18.32 per month.

5. The physical condition of a number of institutions have been improved and appropriations for Public Welfare have generally been increased.

In Health:

1. Within the past two years, plans have been drawn and approved for sewage plants for 30 communities.

2. A significant new plan for insect control has been established in the western part of the State.

3. Facilities for the diagnosis and treatment of cancer have been substantially enlarged.

4. A traveling cancer diagnostic unit, the first of its kind in the United States, has been established.

5. Substantial progress has been made in providing industrial hygiene and medical services to Kentucky industries.

6. Under the sponsorship of the Kentucky Medical Association, a medical scholarship fund for training doctors to serve rural areas has been established.

7. A survey of hospital facilities in the State has been completed, and plans made for the building and equipment of hospitals in strategic areas of the State.

We are planning also in these next two years, to intensify our community activities and set up a special service to help those communities which need help. To this cause we have enlisted the aid of a great many people throughout the State, notably many of the important members of the faculty of the University of Kentucky, and of other Kentucky institutions of higher learning.

Finally, we propose in these next two years to embark on a program of leadership education. It is our hope to have every organized group in every community in Kentucky - whether it be a service club, a labor organization or a farm bureau, intensively study all of our reports. Those groups who meet regularly are always looking for good programs. We are going to suggest to them that they ask for volunteers from their own organizations to study each of our reports, and to devote one program to each. One member -- say, of the Rotary Club of Paducah, might be interested in Agriculture. He would present the Committee for Kentucky report on AGRICULTURE as a full program. Another one might be interested in Education. He would present the EDUCATION report as a program. It is perfectly obvious that if we can prevail upon most of the organized groups in every Kentucky community to study our reports in this way, we will have an informed and enlightened leadership in Kentucky that will be the backbone of the public opinion so necessary if we are to make progress.

We also felt that it was highly important to educate another type of leadership which, while not yet ready to take the helm, would in time to come be in

control of the destiny of Kentucky -- the young men and women in our colleges. These youngsters, because of their superior education, will be in a position to carry the torch, particularly when they have returned to their own communities after graduation.

To this end we have set up an experiment in the education for student leadership in three of our important higher institutions of learning: Kentucky State College for Negroes, Transylvania College, which is a privately endowed institution, and the University of Kentucky. We met with the student leaders in each of these three colleges to discuss the project. Characteristically enough, each institution approached the problem in a different way. At Kentucky State College for Negroes there are some fifteen to twenty organized student groups on the campus. The leaders of these groups decided to form an organization of all their organizations, for the purpose of having the entire student body study and discuss our reports. The plan is to devote a separate discussion meeting for each of the reports, with a particular student designated to make a thorough study of the report and to act as discussion leader. After all of the reports have thus been covered, there will be a series of meetings for the discussion of what the students can do, now and in the future, to put the findings of these reports into practical action in their own communities. From the caliber of thinking evidenced at those meetings, I am confident that the students will come up with some important answers.

At Transylvania the objective was the same, but the approach was different. It was determined there that each student organization should be assigned the responsibility of sponsoring the study and discussion of a specific report, the presentation to be made at a Chapel meeting of the entire student body. This, too, will be launched shortly.

At the University of Kentucky there is already existing, under the auspices of the Y.M.C.A., a weekly discussion group in which some twenty or more student campus organizations participate. This group has undertaken to launch a six to eight week program, each week to be devoted to a discussion of a specific

report of the Committee for Kentucky. At the end of these discussions, they, too, will then devote one or two meetings to a determination of how these reports can be implemented.

It was tremendously heartening to us to see the interest and enthusiasm shown by the college students. Their earnestness of purpose, their deep concern about conditions in Kentucky, and their eagerness to do something about them was a heartening affirmation to us of the conviction that if the people know the facts, they would want to do something about them.

Perhaps as encouraging as anything that has happened in this experiment in leadership education was the story of Robert N. Hubbard, disabled veteran with three years experience in the Pacific, a student in the oldest college west of the Alleghanies, Transylvania. He became very dissatisfied with conditions in our State after he read some of the reports of the Committee for Kentucky, and voiced his dissatisfaction in his political science class.

In fact, he griped so much, according to his own account, that his professor asked him why he didn't do something instead of talking so much. Hubbard took up the challenge and entered the race for Democratic state representative in his district. He not only got the nomination, but was elected by a good majority.

Dr. Dodd agreed to give Hubbard a leave of absence for campaigning and full credit toward his course as "practical application of political science". When Hubbard gets to the Legislature in January, 1948, he will again get a leave of absence from his class and full credit, for where can one get a better "practical application of political science"?

Hubbard made it clear to the voters in his district that he was not in the race for educational credit, but had gotten into it because he wanted to "get something started."

The fascinating thing about ideas is the unpredictable and unexpected places in which they land. None of us dreamed that the discontent created by our reports would cause a young veteran to run for and get elected to the Legislature.

It is such things as this that will keep Kentucky on the march.

This is the story of how Kentucky is pulling itself up by its own bootstraps. It is a story, as David Lilienthal said, "to lift one's heart and to bolster confidence" - in the strength of democracy. It is a story of democracy in meaningful, vital action. It is a story of people sharing a vision and working together for a common objective. It is a story of people making progress by giving each other a helping hand.

The following story is perhaps symbolic of the spirit of the Committee for Kentucky.

An American investigator died and went to Heaven. In the first days of his sojourn there, the spirit of investigation was still strong in him, and he asked St. Peter if he might look around. Given permission, he went down to hell and walked into the dining room there. A strange sight met his eyes. In the center of the dining room was a huge table laden with the finest of food and drink. Around that table sat a group of people who were lean, cadaverous, hungry. A quick glance showed him the reason. Each person had strapped to the full length of his arm, a metal spoon that was tied so tight that he couldn't bend his arm and feed himself, and so was doomed to eternal starvation.

The investigator went back to Heaven and walked into a dining room there. He saw a similar table laden with the finest of food and drink. There was a similar group sitting around the table. Each one had a metal spoon strapped tight to his arm so that he couldn't bend it and feed himself. Yet, each of these people was well fed, contented and happy.

The difference between the people in the dining room in Heaven and the dining room in hell, was that in the Heavenly dining room each person was feeding the person opposite him.

STATEMENT ON CONDITION OF RAMMED EARTH HOUSES

- May 1940 -

Seven houses of rammed earth were built in 1936 on the Mt. Olive Homestead project of the Farm Security Administration located near Birmingham, Alabama. Six of these houses were occupied in 1937 and the seventh in 1938, The following is a brief report of their physical condition in May 1940.

In general, the rammed earth houses have provided very satisfactory living quarters. They have proved to be several degrees cooler in summer than brick or frame houses located in the same community. The rammed earth houses are also warmer in winter and require less fuel to heat. The families now living in the rammed earth homes state that they are well pleased with the houses and would not exchange them for either brick or frame construction. There has been, however, some minor maintenance expense.

1. Exterior Walls: The walls of one of the rammed earth houses were stuccoed and show no signs of weathering. The walls of the other six units have received no treatment other than paint but show very slight effects from the weather. In three places where the earth walls had been erected without a concrete footing, moisture penetrated for about one foot up the wall, causing the interior paint to peel off. This condition was remedied by replacing about one foot of bottom of wall with concrete.

2. Roofs: Several minor cracks appeared in the roofs which were easily repaired with tar.

3. Floors: Most floors are in good condition. Some tile floors are slightly damaged due to tile breaking or cracking.

4. French Doors: The French doors have proved unsatisfactory, especially where they are not protected by a porch. These doors tend to swell or expand during wet weather. They also warp. In some cases the putty has given way, permitting rain to work in around the glass. Rain also drives in at the top and bottom of some of the doors. The doors have been adjusted, and old putty has been removed and replaced with a mixture of putty, white lead, and whiting. Ventilators have also been added to the doors in order to obtain and control ventilation.

THE IMPROVEMENT OF RURAL HOUSING

An address by Raymond C. Smith, Chief Program Analyst at the Thirty Fourth Annual Meeting of the American Home Economics Association, Chicago, Illinois, June 24, 1941.

New bombing planes, battle ships, tanks and guns are now rolling from the production lines of American industry. At the same time, in our military camps the youth of America is learning to man these machines and guard the ramparts of freedom.

That is military defense. We cannot and will not neglect to bring our defenses on the military front to the highest state of preparedness. However, there is another front we must consider in developing a total national defense. This is the home front. The defense emergency demands that we bend every effort toward making the nation internally strong, peopled with strong and vigorous men, women, and children, as well as strong in the military sense. We cannot safely neglect preparedness on the home front. The health, the security, and the vigor of our people must be fortified by all practical means. This is as vital to national security as are products of defense industries which are being turned out in rapidly increasing volume.

Measures to insure adequate and healthful housing for inadequately housed people, I would say, are definitely a part of home front defense. In improving rural housing, and urban housing as well, as a contribution to total defense, we should go just as far as we can go without jeopardizing the program of strengthening our land, sea, and air defenses and our aid to those nations who are resisting aggression. This is to say that while at this time the military aspects of a total defense program should receive first priority, the improvement of housing should be placed high on a priority list for the home front phase of defense. And to go still further, within the housing phase of home front defense itself, the improvement of housing for the ill-housed should be at the top of the priority list. In fact, in order to meet the requirements for total defense in terms of skilled building labor, certain building materials and transportation, it may even become necessary to defer regular housing activities until the post-defense period. This deferment of regular housing activities may be necessary in order to assure the improvement of the housing of the disadvantaged citizens in our democracy now as a means of strengthening the nation internally to place it in better position to meet external threats.

Let us examine the need for improved rural housing. In all areas within the nation some farm families are inadequately housed. In many areas the need for better housing is acute among large percentages of the farm population. While the existence of rural slums is

recognized, many do not realize that more than one fourth of the farm people are housed under what might well be called slum conditions; conditions which are breeding serious weaknesses which we must guard against - ill health, epidemics, delinquincy, discontent, and hopelessness. These are conditions which can be corrected in part by improvements in rural housing. A realistic approach to the solution of the rural housing problem requires action to provide for at least the minimum requirements essential for healthful and respectable living, and for attaining standards consistent with American ideals.

Most workers in agriculture, and especially the home economists, are deeply concerned over the need for these improvements. Home economists have a peculiar interest in rural housing, for their daily work is with home problems. Home economists have a responsibility also for furnishing guidance and leadership to farm people in meeting the housing problem, for farm people everywhere have come to depend upon them for leadership in the field of home improvements.

The facts and figures on rural housing tell a story of human misery and underprivilege on our farms. The Farm Housing Survey taken in 1934 disclosed many distressing conditions and needs. This survey covered more than 600,000 farm homes, in all States except New York and Pennsylvania. Only fifteen percent of the houses covered were less than 10 years old, while 20% were more than 50 years old. By today more than one million farm houses are beyond repair while a majority of farm houses are in need of major repairs. The survey made in 1934 found that 83.6% of the houses had no running water, 27% had no screens, in 42% screens were broken or otherwise unserviceable, 40% were unpainted, and in 43% more, paint was in poor condition. Five million three hundred thousand homes were without kitchen sinks. Only 9% of the farms had indoor toilets; while more than 13% did not even have outdoor toilets. These conditions have improved somewhat since that time through the work of public agencies, notably by the installation of 3,000,000 sanitary privies, and by the provision of screens on many farm homes.

overcrowd

In many rural areas, the survey found, homes were severely crowded. In the South nearly one half of the farm people were found to be living under crowded conditions. Overcrowding was also found to be serious in many parts of the Great Plains and in the mountain areas. Poor housing and pronounced overcrowding were found to go hand in hand.

In ill-housed communities, open wells, unprotected springs, filth, waste, rodents, and other dangers to life and health are commonly found. A survey made recently by one of the agencies in the Department of Agriculture, throws some light upon housing conditions among 344 low-income farm families in 9 counties in Georgia, Kentucky, Virginia, Missouri, New Mexico, Washington, and Minnesota. The most usual farm source of water was a spring or an open well. Only 6% of the families had a well or spring properly covered. Only 2% had kitchen sinks, and less than 1% had pumps in the kitchen. Four of the counties reported that from 25 to 68% of the farms had no toilets at all, either indoors or outdoors. In all counties, a large percent of the families

reported that the roofs, floors, walls and foundations of their houses needed repair. Many houses had no glass in the windows and in 6 counties, 46 to 90% of the houses had no screens.

Home economists and other people who work with farmers know what these conditions mean to farm families. Yet these figures leave out of account a very large group of farm people whose housing conditions are much worse than those already discussed. These figures do not cover the situation of migratory agricultural workers, a group of about 500,000 families who are drifting from place to place in search of agricultural work. These migratory workers move back and forth continually between the truck and fruit areas of the Pacific, Gulf, and Atlantic Coasts. They are refugees from the Dust Bowl and people "tractored off" the land in many farming areas. They must often eat and sleep in any shelter that chance offers. They occupy abandoned huts and shelters. They put up tarpaper shacks for temporary shelter, and exist under bleak and unsanitary conditions. When their temporary jobs are finished in one area, they move on. They leave their unsightly quarters to be used by others, and carry away with them the germs of disease and the seeds of poverty and dejection. The problem of the migratory workers has not been solved. It will require many types of action, and the provision of adequate housing for them is one of the steps necessary. New approaches and new methods must be developed not only to provide them with steadier employment, but also to provide decent housing to them and their families.

The figures that have been cited show there is already a serious shortage of proper housing and housing facilities in rural areas. But what of the future? Are we making needed repairs and building enough new houses to supply good housing for our farm people? Unfortunately, our situation is far different from that. Not enough new homes have been built either through public action or private initiative, and in rural areas as a whole, housing appears to be going backward, not forward.

Preliminary data from the 1940 Census show that the value of all farm buildings, including dwellings, decreased nearly 20% between 1930 and 1940. This decline is no doubt a result of the depression of the early thirties, reflected in a failure to erect new buildings, and a failure to maintain old buildings properly.

The majority of rural houses are in a poor state of repair. Depreciation is proceeding rapidly, and repairs are falling steadily behind. The Farm Housing Survey of 1934 found that there were 15,200,000 major repair jobs needed on the 7,360,212 occupied farm houses of the Nation, including repairs to foundations, walls, roofs, chimneys, doors and windows, screens, and other parts of the dwellings.

In the last six years there has been a decided lag in the building and repairing of rural homes. In this period, construction of new farm homes has probably fallen short of replacement needs by more than 50,000 houses per year. The housing deficiency of about 300,000 houses, then,

has accumulated in rural areas during the immediate past. If this number is added to the 697,000 farm houses which the 1934 survey found were beyond repair, the farming areas now are in need of at least 1,000,000 new farm houses. This is by no means an adequate picture of the full new housing need, however. By any reasonable minimum standard for farm housing, the Nation probably requires construction of at least 2 or 3 million new houses in rural areas.

Housing in rural areas for use of workers in defense industries is presenting a new feature in the farm housing problem. Where defense plants are situated in comparatively rural areas, these industries have caused a concentration of several thousand workers, for many of whom new housing is required. Housing surveys made in connection with defense requirements not only show a need for new housing for defense workers, but emphasize anew the drastic lack of good houses for farm people.

The defense project area near Radford, Virginia, is a case in point. A defense housing survey in this area revealed clearly the inadequacy of rural housing on the surrounding farms. This survey, typical of those conducted in several other areas, was made in four counties by farm men and women members of county land use planning committees, assisted by workers of Department of Agriculture agencies and the State Colleges of Agriculture. Of the 6,928 farm families covered in the survey, 2,636 families were believed by their neighbors to be inadequately housed.

A housing survey made in a similar manner by 1,800 farm men and women in the Coosa Valley defense area of northeastern Alabama showed the inadequacy of farm houses in that area. Of the 24,723 farm families covered in this survey, 16,429 were found to be inadequately housed.

In so far as new homes for workers in defense industrial plants in rural areas can be located on farms with sub-standard houses, within reasonable commuting distances from the plants, better homes can be made available to poorly housed farm people when the houses are no longer needed for defense workers.

All surveys of rural housing show there is a close relation between poor housing and low farm income. It is true that many farm owner-operators are poorly housed, but the poorest houses in their communities are usually occupied by tenants, sharecroppers, and farm laborers, the people who usually have the lowest incomes. Farm laborers, particularly, are often the worst housed of all farm people.

A large number of our farms are operated by tenants and croppers, a fact which complicates the housing problem. The existing tenancy system on most farms is not favorable to the construction or maintenance of good farm housing. In some areas, a third of the tenants move every year. In part, this reflects the discomfort of the dwellings provided by landlords. On the other hand, frequent moving of the tenants is itself partly responsible for the poor condition of tenant housing. The farm leases customarily fail to provide compensation to the tenant for

repairs and improvements made to farm buildings. Other features of the system also contribute to the poor condition of the houses of tenants and croppers. Because of their instability on the land and their small incomes many tenants, croppers, and farm laborers are neither able nor anxious to keep their dwellings in good repair. The importance of the place of tenants and croppers in the housing picture is stressed by the 1940 Census, which shows that more than two and one-third million farms--nearly 40% of all our farms--are operated by tenants or croppers. In the South particularly, the housing problem is acute, largely because of the high rates of tenancy and the low farm income of the cotton tenants and croppers. The same Census shows an increase in the number of landless farm people, that is farm people who neither own nor lease the land which they till. The provision of better housing for the landless laborers in agriculture is one of the most difficult aspects of the rural housing problem.

To show the meaning of these conditions in terms of individual and public welfare, let us consider for a moment the functions which adequate housing on farms must perform. A house, first of all, provides a place to eat and sleep and gives shelter from wind, rain, and cold. A good farm house does all of these things and much more. A good farm house is partly a work shop for canning and preserving garden and livestock products. It is a center for family life. It safeguards the health of the family by screening out flies and mosquitoes, by providing a moderate number of conveniences. It has enough space to permit a normal and healthy family life, and it stimulates hope and ambition, and contributes to the development of character and good citizenship among the members of the family.

The housing found in many of our rural areas, however, is very different from this. Rural slum housing frequently does not provide even the basic element of shelter. The slum house is cold in winter, hot in summer, and wet in rainy weather. It is usually too small to permit any activities in the home other than those of eating and sleeping. Crowded living contributes to disease, and fosters delinquency. Good citizenship cannot grow in such an environment. Children reared in slum houses are, in fact, subject to all sorts of disadvantaged living, which leads them to hopelessness and despair.

The public as a whole has a vital stake in our housing conditions, because these conditions have profound effects upon national welfare. In a democratic society there is a level of housing beneath which it is not sound public policy for a government to permit families to be housed. This conclusion is inescapable when we look at the full facts on housing. I do not know exactly where this minimum level is, but I am sure there is such a level and that we can define it if we will.

Home economists are concerned with the housing problem and are in position to make valuable contributions toward solving it. One great contribution the home economists can make, for example, is to help the Nation to determine the minimum level of housing, beneath which we should

not permit human beings to be housed. Help is also needed in finding out the causes that force rural people to live in houses that are below desirable levels, so that those causes can be removed or modified. The home economist also can assist in solving the housing problem by helping to crystallize public opinion into a conviction that housing must be lifted above its present level. This means that the home economist must help actively in endeavoring to raise the present standards of rural housing, and create a higher minimum standard of housing, beneath which farm people will not be forced to live.

Should minimum adequate standards for farm housing be lower than for urban housing? Some people seem to believe that for urban housing the minimum adequate standard should call for "four or five rooms and a bath," but that for farm housing we should be satisfied with "four or five rooms and a path." I happen to believe that it would not be inconsistent with our democratic ideals if all farmers as well as all city people had the opportunity to enjoy bathrooms, electric lights, and other elements usually considered to be a part of the American standard of living."

The home economist can help to find out more about the effects which different levels in housing have upon the lives of farm people. We need to know a great deal more about the effects of sub-standard housing upon health and morale. We need to know more about the minimum standards that are desirable for acceptable farm housing.

The Department of Agriculture in a few days will have available for distribution a publication entitled "Recommended Minimum Requirements for a Farm House." This leaflet makes numerous suggestions as to sites for housing, types of construction, availability of water supply, space requirements, light and ventilation, heating and sanitation.

Most farm houses, according to this report, should have at least three bedrooms. This permits segregating the children by sex and a separate sleeping room for the parents. While the size and composition of farm families vary considerably, farm houses usually should be built to provide for families with children of both sexes. This is particularly necessary where the families on a farm change frequently as is often the case with tenants, croppers, and farm laborers.

The minimum requirements also call for the provision of a bathroom, or at least for space for a future bathroom.

While it is pointed out that space for living, dining, and kitchen may be provided in one room where economy is of the utmost importance, it is suggested that it is much more desirable to provide for a separate living room and kitchen with dining space provided in one or the other.

The Department of Agriculture in its recommendations of minimum requirements for a farm house, feels that it has included the essentials for good social and healthful living, and expresses the hope that eventually such a house will be within the reach of all farm families. I

How nearly do the farm h use approximate these

should like to urge Home Economists and others to test these minimum requirements in different situations. After modifications which experience in their use may indicate and after further refining, I hope that minimum standards can be developed which will be generally accepted.

The housing problem is a social problem of the first rank, and its solution will unquestionably require a high type of social engineering. The clarification of the housing problem as a social problem should be helpful in finding the means to solve it.

But the housing problem is also an economic problem. It is economic in the sense that it affects the family's ability to make a living and also in the sense that the economic situation of the family has placed definite limitations upon the type of housing it has had.

The close association between low farm income and poor housing has already been pointed out. In this country we have long assumed that the kind of housing a family should have ought to be fixed automatically by the amount of the family's income. This assumption was probably unavoidable in the pioneer days, but we are not now living in a pioneer society. Ours is a highly complex society in which the well-being of all of the people is becoming increasingly dependent upon the well-being of each individual and group in the society.

We cannot safely permit the level of family income to force slum housing upon any great number of our people, in this modern day. If we do, we will virtually assure that people in the lowest income groups will raise their children under conditions that promote disease, ill health, physical defects, mental inferiority, and despair. This applies to low-income people in cities and on famrs alike, but is particularly important in relation to low-income farm people whose birth rates are comparatively high. Proportionately, low-income farm people contribute a larger share to the total national population than does any other group. Thus, if we condemn the children from low-income farm families to grow up in blighted housing areas, we will at the same time be condemning the Nation to a blighted future citizenship.

Under present conditions, family income exerts almost an iron control upon the kind of housing our people can enjoy, both in rural areas and in cities.

The level of housing that low-income farm people can pay for is, of course, lower than the level for urban workers, because low-income farmers obtain smaller incomes than do the low-income people in cities. It is estimated that some 80% of the farm families of America obtain less than $1,000 a year net income, that 55% of them get less than $500 per year, and that 29% earn less than $250. It is easy to see what these figures mean in terms of farm housing. Obviously we cannot afford to permit large numbers of farmers to continue living in sub-standard housing, that is fixed by such low incomes.

If family incomes will not support housing that is decent, permitting the rearing of citizens that will be mentally and physically healthy, we must frankly admit that public subsidies are needed in the low-cost housing field. To face the need frankly is the first step. After that, of course, we would have to study this problem to the bottom, to find out what particular kinds of subsidies would be best, both from the viewpoint of the Nation and of the welfare of the families assisted.

Of course, if the Nation finds it possible in some way to assure to every able-bodied citizen an opportunity to earn income sufficient to provide satisfactory housing for himself, no subsidy would be necessary.

Probably one of the most important tasks which faces our democracy today is to find the means whereby every able-bodied citizen does have an opportunity to earn an income which will provide at least a minimum adequate level of living. However, pending the time when this can be accomplished some subsidy may be necessary in housing as well as in some other elements which enter into decent living if national welfare is to be served.

If we use subsidies to assure adequate minimum housing, it is essential that we establish satisfactory minimum standards for the housing in question. A subsidy payment or payments could be used to fill the gap between the kind of housing low-income families can afford, and the kind of housing required to meet the minimum standard.

Pulbic subsidies of low-cost housing, both local and national, are by no means new and untried. Many countires have found it necessary to employ subsidies of various kinds to insure adequate housing for low-income families. In England, in fact, it is generally recognized that private enterprise cannot on commercial lines provide houses within the means of the majority of workers.

Housing subsidies in various forms have been the most common type of aid provided in England to meet the housing shortage since World War I. Legislation was passed there in 1919 providing for loans and lump sum grants to builders of houses. The government also undertook to cover 30%, later as much as 50%, of the interest and principal payments on approved houses built by limited profits corporations. In return, the rents to be collected on these houses were subject to the approval of the Government.

Virtually every European government has found it necessary to engage in public housing on a large scale. Between World War I and 1935 more than 4,500,000 dwellings were built in Europe with public aid. During this same period 31,000 houses were built in the United States with public aid of one kind or another. In Holland 10 times as many, in Great Britain 40 times as many, and in Germany 80 times as many houses were built with public aid during this period than were built in the United States. Since 1935 public housing has been accelerated considerably in our own country but still is far from meeting the need. Also improvement

of rural housing has lagged behind the improvement of urban housing.

The approach to rural housing has to be different from that to urban housing. This is true because of the relatively greater importance of land in connection with rural housing. In farming the house is directly a part of the farm business and is used in connection with the land. The house and the job are not separate. Unlike urban housing, therefore, rural housing must be considered in relation to land use, soil, topography, size of farm, types of farming, farm and home management practices, and numerous other factors.

For many years now farming in this country has not yielded enough income to most farmers to permit them to pay the carrying charges on both land and good housing out of the income received from the land. During most of the 19th centure land was free or cheap and a large portion of the income from land could go to support good housing. A farmer working good cheap land was in a better position to pay for good housing than a farmer now who works expensive land. We are living in a period of relatively high land prices. As a result, the part of the farmer's income required to pay for his land is so large that he usually has great difficulty in providing either himself or his tenants and laborers with good housing. There is, in fact, some ground for believing that many of the good houses seen on our farms today were not built out of farm income, but out of increases in the value of land during former times.

An important factor in the rural housing situation, I believe, is the necessity for stabilizing land values at proper levels. Land prices should be stabilized at levels that will not require the purchaser to make drastic sacrifices in living standards, including housing standards. Measures for control of land speculation would assist materially in making better rural housing possible in the future. Land prices are often too high in relation to the productive capacity of the land. Of great importance, too, is the fact that these prices do not adequately reflect differences in the housing facilities available. Today a farm with good land but with a poor house often sells or rents for almost as much as a farm with good land and a good house.

Even when farm incomes go up considerably, the increased income often becomes capitalized into higher land values, thus increasing the carrying cost of the land, and the remaining income is still not sufficient to provide good housing. All of this suggests that land is an important factor to be considered in approaching the rural housing problem.

As has already been mentioned, tenants, sharecroppers, and wage laborers are the agricultural groups with the poorest housing. Intelligent public action is needed to assist in raising the income and in improving the living conditions of these people in many ways other than housing. At the same time, improvement of housing conditions for this group, where improvement is most drastically needed, seems to be a first order of business.

I used to be a county agricultural extension agent a good many years ago and at that time 4-H clubs had a motto, "To make the best better." No doubt this was a good motto for 4-H clubs, but I wish to make the plea that it never be adopted as a slogan in any rural housing program. Instead, a better aim would be, "To make the worst better first". In a democracy our first concern should be to improve the worst houses and get them up to a decent level. Once that is done, we should then work to improve general housing conditions for all our people by efforts to raise the minimum standard

To some extent, obtaining adequate housing in rural areas is just a matter of using the ample resources of local labor and materials that are available. In many areas, particularly in the heavily forested parts of the South, much of the building lumber needed is available locally either in farm woodlots or in nearby forests. A realistic approach to solving the housing problem will be based on the extensive use of the resources close at hand.

Also, the areas where improved housing is needed the most are the very ones that have the largest amount of rural unemployment and under-employment. A vast supply of unused or partly used labor is available, with which to carry forward a large-scale housing program. This great human resource should be utilized, both for the sake of the individuals and for the welfare of the Nation. Through proper use, this potential labor force could be transformed into a tremendous tool for human betterment.

However, local labor and local materials alone cannot do the whole job. Money is a third ingredient of great importance. Methods of financing an adequate housing program will have to be found. New types of credit for rural home building seem called for. In addition, outright subsidies to cover part of the costs of new houses will probably be necessary. The amount of credit available for housing on farms at present is woefully insufficient to meet the need. Except for the limited amount of housing that can be accomplished under the Farm Security Administration program, most farm people under present conditions cannot borrow any considerable amount of money to finance the construction of homes. City families usually are able to borrow 80% or 90% of the value of a house when they get ready to build, if they comply with FHA regulations. Farmers, on the other hand, usually cannot borrow much more than 20% of this cost, unless they already have substantial equities in their farms or possess other valuable property which can serve as security for the loan.

Thought needs to be given to the best combination of resources that can be developed for accomplishing improved rural housing. The use of available labor, the training of labor, the use of available materials, the development of new materials, the use of present types of credit and development of new types, are all resources that can be drawn upon in obtaining better homes for farm people. The proper use of subsidies is another. The best use of present construction techniques,

and the development of new mass production construction methods, are others. Already new construction methods are being developed in connection with the Farm Security Administration program which involve precutting and pre-fabrication of houses, and to some extent, the use of new materials.

The place of the improvement of rural housing in our program of total defense has already been pointed out. It should be recognized, also, that the present "all-out" defense program, now furnishing industrial and military employment to many thousands of people, will sometime reach an end. At that time, great adjustments will have to be made.

We, as a people, have demonstrated to ourselves that for purposes of defending the nation we already have been able to put nearly all of our resources of man power and facilities to work. The major problem that will confront the nation at the conclusion of World War II is that of keeping all of our resources employed for purposes of peace. In addition to finding as many peace-time uses for defense plants as possible we should plan now for all sorts of activities that will furnish useful employment and help to prevent a disastrous depression at that time. A large scale program for the improvement of housing in both urban and rural areas would be one of the most meritorious undertakings that could be launched. Such a program not only would take up a large part of the slack in industrial employment that may be caused by the curtailment or stoppage of defense production but also would meet a real need in strengthening one of the important items in our standard of living. It would be an important step in building the kind of agriculture and rural life that we want after World War II.

Both private initiative and public action should have a place in this program. Experience both in this country and abroad indicates that decent housing for the lower income groups is not likely to be provided through private initiative alone. Vigorous public action will be required if all farm people are to be adequately housed.

In summary, the Home Economist can have an important part in promoting public knowledge of the present deplorable conditions of rural housing and can point out the adverse effects of sub-standard housing upon national welfare. She can also help the Nation to make up its mind as to the kind of housing it will accept on a minimum basis. In other words, she can help to decide upon the level of housing beneath which our democracy cannot afford for people to be housed. And finally after these two steps are accomplished she can make a real contribution in the actual program of getting the needed housing.

If the public becomes fully aware of the consequences of inadequate housing, and makes up its mind as to just what minimum standards for housing are safe for the nation, the third step, that of actually getting the improved housing, will not be difficult to accomplish.

16-Housing

United States Department of Agriculture
Miscellaneous Publication No. 475
Issued October 1941

Minimum Requirements for Farmhouses

Recommended by the United States Department of Agriculture

Introduction

These minimum requirements for farm dwellings represent the judgment of Department of Agriculture agencies which have had first-hand experience with rural housing problems and have gained considerable knowledge of the kind of homes farm people want. They are based on conclusions reached after extensive study by technicians representing these agencies.

Although at the present time all regular construction, urban and rural, must take second place to the needs of national defense, the Department has two purposes in issuing this publication. The minimum requirements herein set forth may be of assistance to those already building or planning to build farm homes. Also, it is hoped a statement of minimum standards for rural housing may assist those in the Government and in private groups who are studying and planning for a post-war world in which the Nation will be able to make full use of its manpower and resources for the benefit of the American people. The Department of Agriculture offers these minimum standards as part of its contribution towards formulating plans for post-war programs of rural welfare.

It should be noted that these minimum requirements are not intended as a complete guide for planning or building a house, and neither will they meet the needs of many who desire a far more comfortable home than is suggested here. Other Department publications, already available, suggest plans and offer technical information on the building of farm homes to suit a wide variety of tastes and circumstances.

In recommending minimum requirements for farmhouses, the United States Department of Agriculture has considered the essentials for good social and healthful living.

With the constantly improving building practices and the development of new building materials, it is hoped that eventually all rural families will find within their means a house meeting these minimum requirements, and it is recommended that every possible effort be made in present farmhouse construction to meet them.

Some of the requirements mentioned in this publication, such as a watertight roof and a site well drained, will seem obvious to many readers. Those who have a first-hand knowledge of rural housing in America, however, can testify to the large number of farm homes in which the most obvious requirements have not been met.

Choosing a Site

The site should be well drained. Where it is part of the farm to be operated by the occupant of the house, the site should be suitably located in relation to farm buildings. Where the housing is provided for families of farm laborers with year-round tenure, sufficient land should be available to raise food for the family. The site should permit the safe disposal of all refuse. The space required will vary with the region and soil conditions.

A supply of good water must be available, preferably from wells or springs providing water at all times. Wells, springs, or cisterns should be covered and so located as to preclude any possibility of pollution. For privacy and to avoid dust and noise, the house should not be closer than 50 feet to the road, and where roads are not surfaced, should be located

beyond the dust line (usually 100 to 150 feet). Where practicable, consideration should be given to locating the house with reference to shade trees.

Construction Features Contributing to Comfort and Livability

In general, the house should be substantial enough to be usable for 30 years or more without excessive maintenance. For livability and ease of care, the following details of construction should be specified:

Floors should be tight and so finished as to permit easy cleaning.

Walls should be tight and constructed for comfortable temperature, winter and summer. The required construction will vary with the climate. The inner wall surfaces should be durable and easily cleaned or renewed. Inner walls and ceiling, of whatever materials or finish, should be of colors that will reflect a reasonably high percentage of light.

The ceiling should be insulated with a minimum of $^1/_2$-inch insulation board or the equivalent. In warm climates there should be adequate provision for ventilation of any air space between ceiling and roof. Ceiling height should be not less than approximately 7 feet 4 inches. This is based on the use of 7-foot studding.

Except in the mildest climate a continuous foundation or curtain walls between piers should be provided where the first floor is raised above the ground. There should be screened openings which may be closed in winter in such foundation or walls, so located as to permit cross draft for summer ventilation.

The roof should be tight to water at all seasons. Windows should be glazed and all openings to the exterior, except to screened porches, should be screened.

Space Requirements

Space requirements cannot and need not be stated for all circumstances. The following seem to be the minimum requirements for families with both boys and girls. The

provision for a family with children of both sexes should be generally adhered to in farm housing, because the make-up of the farm family changes, and there may be changes in tenancy.

The arrangement for living, dining, and kitchen space usually should accord with the custom of the region. Where economy is of the utmost importance, all may be provided in one room, although a separate living room and kitchen with dining space provided in one or the other is much more desirable. A separate dining room is not recommended for the minimum house because of the additional cost involved.

Where dining space is provided in the living room the total space in this room should be not less than 210 square feet. Where the living room is not used for dining purposes its size may be reduced if necessary to 150 square feet.

Where dining space is provided in the kitchen, the total space in this room should be not less than 144 square feet. Where the kitchen is not used for dining, its size may be reduced to not less than 84 square feet. The kitchen work space should be rectangular, and approximately 9 feet in width. Equipment opposite a coal- or wood-burning range should not be closer than 4 feet.

Where living, dining, and kitchen space are all provided in one room, the space should be not less than 300 square feet. If two rooms are provided, and the dining space therefore becomes a part of either the living room or the kitchen, the usefulness of the dining space will be increased if there is a wide opening between the two rooms.

There should be three bedrooms for reasons stated above. Two should accommodate two double beds each, if necessary. This means a minimum of 125 square feet and proper proportion and placement of openings. One bedroom may be smaller but should be large enough to accommodate a double bed. A bathroom or at least space for a future bathroom should be provided.

A work porch or workroom, according to the climate, should be provided, with a minimum area of 48 square feet. In warm climates there should be a living porch of not less than 80 square feet area, either separate from or combined

with the work porch. Where a living porch is provided, the living room can be used as a sleeping room.

Storage Space

Every bedroom should have a minimum clothes-closet area of 3 feet by 22 inches.

One closet, at least 3 feet by 24 inches, for outside wraps and general storage, should be near the most-used entrance to the house.

A linen and bedding closet, at least 2 feet by 22 inches, should be provided.

A closet 3 feet by 18 inches should be provided in the workroom or work porch for cleaning equipment and supplies, and some provision should be made for the storage of laundry equipment.

Kitchen Storage

There should be provided in the kitchen an enameled-iron sink 16 inches by 30 inches with work surface to the right of this sink at least 2 feet by 3 feet and to the left at least 2 feet by 30 inches. The drain should be built into a cabinet.

Below each work surface there should be a 6-inch drawer and a shelf dividing the remainder of the space, this shelf being 12 inches deep. Doors should be provided to this space below, and toe space is desirable. To provide the minimum storage space for utensils and supplies, three shelves should be built above the two work surfaces and sink except as these would interfere with windows. The bottom shelf should be at least 10 inches above the work surface. For reachability the third shelf should not be more than 70 inches above the floor. These shelves should be 12 inches deep except the lowest shelf above the sink, which should be only 4 inches deep.

Food Storage

Not less than 24 square feet of food-storage floor space should be provided in or near the house. This space should be ventilated and protected from freezing or excessive heat.

The floor should be braced sufficiently to support the load, and the ventilator screened. The size required will vary with the food-storage requirements of the area and the availability of satisfactory storage space in outbuildings. When fruit and root vegetables must be stored in this space, a minimum of 35 square feet of floor area is desirable. The storage area should have shelves spaced to hold the usual containers.

Arrangement for Privacy and Convenience

For privacy, doors should be provided to all bedrooms, bath, or toilet rooms. Doors to closets are desirable. Sole access to any room or bath should not be through a bedroom.

Outside doors and porches should give convenient entrance from the farm driveway and the path to the barn, and wherever possible should be on the sheltered side of the house. There should be a shelter over the most-used door.

The only way from the back door to the main part of the house preferably should not lead through the kitchen work area. If the kitchen must be used as a passageway, the doors should be so arranged that persons passing through will cross the work area as little as possible.

Light and Ventilation

The glazed-window area of each room should be not less than 10 percent of the floor area. Window area that can be opened must be a minimum of 5 percent of the floor area. More openings are desirable in warm climates. Full-length openings and additional screened openings below the windows are useful in some climates. Living room, kitchen, and bedrooms should have cross ventilation either through outside windows or doors or through another room. Cross ventilation of a bedroom should not be through another bedroom.

Electric Wiring

Where electric service is available or will probably be extended within a reasonable time, houses should be wired

when built. If the house is wired, the following outlets and switches are specified as the minimum desirable:

Ceiling lights in kitchen, work porch, and over dining area and in living room if separate, with wall switches at front and rear doors to control the nearest ceiling light.

Two double convenience outlets in living room, a double convenience outlet in the kitchen, and on the work porch.

A bracket light in the bathroom and a bracket light with a convenience outlet in each of the bedrooms.

Heating

In addition to the kitchen stove, provision should be made for a heater of adequate capacity, so that even when the outside temperature is 10° above the minimum for the preceding 10 years, the heater will maintain a minimum temperature of 65° F. at a level 3 feet 6 inches above the floor of the living room (and bathroom, if there is one). The heater should be so situated as to provide overflow heat to bedrooms and dressing areas. No range, ordinary stove, or furnace should be permitted within 3 feet of unprotected woodwork or wood-lath-and-plaster partitions. If such woodwork or partitions are covered with a sheet of metal or other fireproof material, a distance of not less than 18 inches is sufficient. Metal shields should be so attached as to preserve an air space behind them.

Flue area (inside the chimneys) should be not less than that of a standard $8^1/_2$ by $8^1/_2$ inch flue lining for flues serving a wood or coal range or a single heater. If range and heater are both to be connected to the same flue the minimum area should be not less than that of a standard 8½ by 13 inch flue lining. Fireplace flue area should be not less than that of a standard $8^1/_2$ by 13 inch flue lining.

Fuel Storage

Space should be provided convenient to the house for storing not less than 1 month's supply of fuel.

Water Supply and Sanitation

A potable water supply should be either piped to a kitchen sink or available from a pump adjacent to the work porch.

A bathroom equipped with an indoor flush toilet, wash basin, and shower or tub should be provided if at all possible, or, at least, space should be provided for a future installation (except in areas where an inadequate water supply makes such facilities impractical). When the bathroom is equipped, a septic tank for sanitary waste disposal is necessary. When only a kitchen sink is provided, the drain should be connected with a dry-well disposal system or with underground tile at a safe distance from the water supply. A sanitary outdoor toilet should always meet the specifications set up by the Public Health Service and State or local health authorities.

Health and Safety

Wells, plumbing, septic tanks, outdoor toilets, electric wiring and fixtures, chimneys, heating installations, and construction in general should comply with recognized standards of health and safety. Plans for installation should be checked against State and local regulations if any are in effect for the area. Information obtained from the Rural Electrification Administration may be helpful in connection with electrical installations.

MINIMUM ADEQUATE STANDARDS FOR FARM DWELLING AND HOUSEHOLD EQUIPMENT

The following are suggested as "minimum" standards for farm housing. That is, they represent a level below which no farm dwelling that is part of an economic farm unit should be allowed to fall. They also represent what is believed by home economists to be "adequate" in the sense that they cause no undue inconvenience or privation. They are on the very edge of being "comfortable," some farm homemakers would find them uncomfortable and they are by no means "luxurious."

In itemizing these particular aspects of farm housing the home economists who were consulted have considered the various functions that must be performed in most farm homes. They have endeavored to provide for such functions in ways that will allow the greatest saving in labor, time, and cost to the farm family and that will bring the largest reward in happy, healthy, family living.

In considering the questions of construction, arrangement, and equipment of the house it was assumed that certain conditions would be fulfilled prior to a decision to locate a house on a particular farm. These assumptions are as follows:

1. The house should be located on a farm providing an effective employment opportunity or upon a part-time tract which combined with off farm work constitutes an effective employment opportunity. In both cases an effective employment opportunity is one which in terms of normal wages and prices is capable of supporting at least a satisfactory standard of living including adequate housing.

2. The site will be well drained and suitably located in relation to the farm buildings. Where roads are not surfaced, the site will be beyond the dustline (100-150 feet).

3. There will be available a supply of good water at all times. Wells, springs, cisterns, plumbing, septic tanks, chimneys, heating installations and construction in general will comply with modern sanitary and safety standards.

It was also assumed that regional differences in needs and customs would be considered in the application of any basic standard, that modifications would be made for climate and for varying preferences in arrange-

ment, but that the net result of such modifications should not result in less comfort for the family.

A reconsideration of "Minimum Requirements for Farmhouses" (U. S. Department of Agriculture Miscellaneous Publication 475) in the light of recent experience and technical developments results in the following suggestions:

THE STRUCTURE

Construction of the house with materials now ordinarily used should be substantial enough so that the house may be lived in for 40 years or more without excessive maintenance. Standards for construction should include the following features:

1. Roof tight to water at all seasons.
2. Floors tight and so finished as to permit easy cleaning.
3. Walls tight and constructed for comfortable year-round temperature, insulated if necessary.
4. Inner walls and ceilings of materials and colors that are durable and easily cleaned or renewed, that will reflect a reasonably high percentage of light, and that will deaden some noise to insure privacy and quiet.

5. Ceiling height not less than 7 ft. 4 in.
6. Windows glazed and all windows and doors screened except in areas where screens are not needed.
7. Continuous foundation or curtain walls between piers where first floor is raised above ground--screened openings in such foundation or walls to permit cross ventilation in summer that may be closed in winter.

SPACE, ARRANGEMENT, STORAGE

The total space should be adequate for a growing family with children of both sexes. A farmhouse that is to last a generation cannot be constructed to meet merely the demands of the young couple beginning to work the land. Nor can the farm family be expected to move from one house to another as the family grows as might be possible for the urban dweller. The farmhouse is part of the efficient farm unit; it must meet maximum demands of a lifetime.

The following rooms are considered necessary to provide the space essential for preparation, serving and preservation of food; family companionship, recreation, and sleeping; maintenance of equipment and clothing, such as laundry and cleaning, sewing, canning, and the family share of other productive tasks on the farm such as preparation of meals for harvesters, etc.

Living room.--The living room should not be less than 160 square feet. If there is no separate dining room, the living room should have an additional 70 square feet. A large living room with space for dining is usually preferable to a small separate dining room which affords neither the space necessary for large family gatherings nor a restful admosphere for ordinary meals.

Kitchen.--The kitchen should not be less than 150 square feet if planned for a wood or coal burning range and a kerosene stove. It should be not less than 100 square feet if planned for a gas or electric range. If dining space is to be provided in the kitchen, an additional 95 square feet is necessary to permit free passage behind all chairs. The kitchen should contain the following as minimum equipment:

(a) A sink of porcelain enamel on formed steel or cast iron at least 24 by 18 by 6 inches.

(b) Work surface at left of sink at least 30 by 24 inches; work surface at right of sink at least 48 by 24 inches.

(c) Base cupboards enclosed by doors, with at least one section of the cupboards with a shelf adjustable for height. Minimum of four drawers at least 6 inches deep, below table tops.

(d) Toe space beneath base cupboards at least 3 inches high by 3 inches deep.

(e) Above sink and work surfaces a minimum of 3 shelves except as those would interfere with windows. Bottom shelf at least 15 inches above work surface; shelves not less than 11 inches deep except lowest above sink, that one not more than 6 inches deep unless 24 inches above rim level of sink.

(f) Provision made for sitting at sink; if sink is built into cabinet, sliding doors are desirable.

Work room.--A work room in addition to the kitchen is essential for farm families so that certain farm tasks often requiring the labor of several members of the family and causing confusion and disorder need not be performed in the kitchen where the family food is being prepared. This room will be used for laundry, canning, cleaning poultry, and preparation of large quantities of food, etc. For this purpose, depending upon the climate, either a porch or an additional room will be required. If a porch, it should be equipped with protection against stormy weather. The room should be equipped with a sink, a small stove, adequate provision for washing clothes and facilities for water disposal. A closet in or near the work room

should be provided for cleaning equipment and supplies with inside measurement at least 29 inches wide and 21 inches deep. The bottom shelf should be not lower than 67 inches from the base.

Bedrooms and closets.--There should be three bedrooms. Two should be large enough and have window and door openings so placed to accommodate two double beds each, if necessary. The floor area of each should be a minimum of 145 square feet. The third should be large enough to accommodate twin beds and should be at least 140 square feet. Each bedroom should have a minimum clothes closet area of 8 feet by 24 inches, preferably divided into two closets.

Bathroom.--The bathroom should be equipped with indoor flush toilet, wash basin, shower or tub. The floor area should be at least 40 square feet.

Porch.--A living porch not less than 80 square feet in addition to the work porch is desirable in most climates.

Additional storage space.--Because of the planning of minimum room space shown above, the farm family needs additional storage space of not less than the following:

(a) One closet at least 3 feet by 24 inches near the most used entrance to the house for coats and wraps.

(b) A linen and bedding closet at least 3 feet by 22 inches near bedrooms and bath.

(c) Not less than 48 square feet of food storage floor space in or near the house, ventilated and protected from freezing or excessive heat. Floor should be braced to support the load and ventilator screened. Shelves should be spaced to hold the usual containers. When fruit and root vegetables are stored here, the minimum floor area is 83 square feet.

(d) A closet for general storage is desirable.

PRIVACY AND CONVENIENCE

For the sake of privacy and convenience for the farm family, the following items are essential:

1. Doors to all bedrooms, bath, or toilet rooms.
2. Doors to all closets.
3. Sole access to any room or bath must not be through a bedroom.
4. Outside doors and porches convenient to farm driveway and path to barn and where possible on sheltered side of house.
5. A shelter over all outside doors.
6. Doors in kitchen should be so arranged that passage will not be directly through the work area.

LIGHT AND VENTILATION

For adequate light and ventilation, the glazed window area of each room should be the following:

(a) North (from Atlantic to Rocky Mountain States) at least 15 percent of floor space.

(b) South (from Atlantic to Rocky Mountain States) and Northern West Coast and Rocky Mountain States at least 12½ percent of floor area.

(c) Southwest - at least 10 percent of floor area.

Window area that can be opened must be a minimum of 5 percent of the floor area. More openings are desirable in warm climates. Full length openings are useful in some.

Living room, kitchen, and bedrooms should have cross ventilation; cross ventilation of a bedroom should not be through another bedroom.

ELECTRIC WIRING

Houses should be wired when built according to the electrical code of the National Board of Fire Underwriters. The house should have the following lighting outlets as a minimum: Ceiling lights in kitchen, work rooms, porches, halls, stairways, over dining area, living room, basement, and laundry; one lighting outlet in bathroom and each bedroom.

HEATING

The heating system should be designed to provide healthful and comfortable living.

No coal or wood burning range, stove, furnace, or stove pipe should be within 3 feet of unprotected woodwork or wood-lath and plaster partitions. When closer than 3 feet adequate fire-proofing must be provided. Fireproof construction of partitions and woodwork near range, stove, furnace, or stove pipe is desirable to free space for more effective use.

FUEL STORAGE

Adequate space in or attached to the house for storage of fuel must be provided.

WATER SUPPLY

Hot and cold water must be supplied at kitchen sink, in the work room and bath.

OTHER MINIMUM EQUIPMENT

Kitchen range
Refrigerator (8 cubic feet)
Washing machine, motor driven

Preliminary
6/30/44

U. S. Department of Agriculture
Interbureau Committee on Post-War Programs

COMMENTS ON RURAL HOUSING PROBLEMS

Prepared at the Request of Senator Robert A. Taft,
Chairman, Sub-Committee on Housing and Urban Redevelopment
of the Senate Special Committee on Post-War Economic Policy and Planning

In spite of similarities between rural and urban housing problems there are certain differences that make the problems associated with rural housing distinct. Among these are:

(1) The functional relationship between the farm house and the farm. This relationship tends to have several results. It is impossible to dissociate the value of the house from the value of the farm. (For example, a house costing $5,000 on a farm too poor to yield a family a living is of little or no value unless it serves as a residence for a family working full or part time off of the farm). The farmer whether owner or landlord often tends to expend available capital on urgently needed improvement of his farm rather than on improvement of housing conditions. And finally, because of the relationship of the house to the farm, the actual standards for the farm house, which is the center of many of the farm activities as well as a dwelling, should in some respects be even higher than those for the non-farm house.

(2) Availability of credit for construction. Credit for construction of farm houses as a rule is based on a notably smaller percentage of the value than for construction of other houses. The security is less liquid and the appraisal is more costly and more uncertain because it involves an appraisal of farm income.

(3) A higher proportion of farm families are employed at low income levels. The income levels of a large proportion of farm families do not enable them to provide minimum adequate housing for themselves by repairing or replacing their present homes. The question thus becomes one of public policy as to whether such families should be permitted to continue to live under substandard conditions dangerous to their own health and the health of others in the community, or whether they should receive public assistance to better their housing conditions. There are two principal types of public assistance for this purpose which might be granted to low-income farm families who have inadequate resources for effective employment on their farms and who have little access to off-farm employment.

(a) A subsidized housing program to provide minimum adequate housing. This is the approach that has been used in urban areas.

(b) Bringing about fundamental readjustments which would enable some families to receive higher incomes in their present locations and which would enable others, with public assistance, to find employment elsewhere which would supply them with incomes necessary to support minimum adequate housing for themselves. Since the carrying out of such a program would require a considerable amount of time, housing subsidies might be required on a temporary basis until the adjustments could be made, should it be decided that as

a matter of public policy there is a minimum level beneath which no families in our democracy should be housed.

It is in this general setting that the rural farm housing situation should be examined in determining the appropriate program. The Farm Housing Survey of 1934 and the 1940 Census give every indication that poorer housing conditions prevail upon the nation's farms than in its cities. Because the houses are more scattered, rural slum conditions are not as apparent; an isolated run-down house in a rural setting is less of an eyesore than a street of dilapidated buildings. The comparative figures for farm houses and non-farm houses are shown below:

Table 1. Comparative Data on Farm and Non-Farm Houses in 1940

	Median Value of Owner-occupied Units	Average Number of Persons in Dwelling Unit	Percent	
			With Running Water	Needing Major Repairs
U. S.	$2,377	3.78	69.9	18.3
Rural Farms	1,028	4.25	17.8	33.1
All other	2,938	3.66	83.3	14.2

The evils associated with poor housing, however, are much the same on farms as in cities. Furthermore, the basic cause is much the same, namely, that a considerable proportion of our population has not had available sufficient employment opportunities to yield enough income to support what is generally considered an adequate dwelling unit. (Inadequate employment opportunities of the farm family are here taken to mean: (1) that farm resources are so inadequate that the labor of the farm operator on his farm will not yield an income sufficient to cover operating expenses, family living expenses and necessary capital expenditures or debt payments; and (2) that off-farm work is not locally available in an amount sufficient to supplement farm income to the extent necessary to cover the expenses mentioned above.)

The 1940 Census provides a great wealth of information on agriculture, population and housing. Very useful cross tabulations have been published on the characteristics of families, farm and non-farm, with various items from the Census of Housing. Unfortunately, no such cross tabulations are generally available for agriculture, population and housing. In the absence of such data much of the information contained in the tables to follow are estimates based upon information that is available.

Figures on over-all housing needs, unrelated to the adequacy of the farm in providing effective and profitable employment, do not indicate in themselves the actual needs for replacement or repair which must be considered in a rural housing program. A large proportion of farm families are not receiving from their farms an income adequate to maintain a house in good repair, let alone meeting any amortization schedule.

A large proportion of the farm operators shown in Table 2 as reporting a gross farm income of less than $1500 in 1939 may be considered as lacking adequate employment opportunities.

Table 2. Farms Classified by Total Value of Products Sold, Traded, or Used - 1940 Census

Total Value of Product	U. S.	North	South	West
Total*	6,096,799	2,579,959	3,007,170	509,670
Under $400	2,055,123	636,933	1,257,387	160,803
$400 to $999	1,924,204	655,207	1,154,596	114,401
$1,000 to $1,499	708,917	378,594	274,865	55,458
$1,500 and Over	1,369,013	885,163	308,261	175,589

*Includes 39,542 unclassified farms.

Since it is obvious that a large proportion of families living on farms do not have the employment opportunities which will enable them to maintain adequate housing conditions, it is necessary to consider the adequacy of housing on farms classified according to the effective use of the families labor on those farms.

It is possible to make some estimates on the housing needs of farm families classified according to four major groups:

1. Farm units with adequate resources capable of providing the operator with effective full-time employment on the farm (full-time farms).

2. Farm units not in themselves adequate but so situated that farm employment combined with off-farm employment is adequate (part-time farms).

3. Inadequate farm units occupied by retired farm families.

4. Other inadequate units.

The problem of adequately housing the first two groups of farm families can be handled by developing a broad credit program. The third group (retired farmers) requires some type of subsidy, unless, of course, their income is already adequate. The fourth group (families on other inadequate farms), constituting the largest proportion of farm families, primarily requires readjustments which will develop employment opportunities through expansion or consolidation of presently uneconomic units and by employment in off-farm work. Until such adjustments do take place, or to the extent that they fail to take place, any housing program for this group must be on a subsidized basis.

Until further tabulations of census data are available, it is only possible to estimate the housing needs for each of these groups of farm families. Preliminary estimates are presented below:

Table 3. Preliminary Estimates of Housing Requirements of Farm Families, According to Adequacy of Employment Opportunities in 1940.

Class of Farms By Employment Opportunities	Number of Farms	Houses on Farms Classified by Condition of Houses: Houses Not Requiring Repairs: With minimum facilities	Houses Not Requiring Repairs: Without minimum facilities	Houses needing repair and/or additions	Houses beyond repair
	(000)	(000)	(000)	(000)	(000)
Total All Classes	6,000	900	1,100	1,900	2,100
1. Full-time adequate farms	1,800	400	500	600	300
2. Part-time farms with adequate employment	700	300	150	150	100
3. Retired family farms	400	75	75	150	100
4. Other inadequate farms	3,100	125	375	1,000	1,600 1/

1/ The number of these houses on inadequate farms to be replaced should be determined by the extent to which the adjustments referred to above will take place.

The fourth group (other inadequate farms) is the largest, comprising 50 percent of all units in our national farm plant. On these units resources are so limited that family labor cannot be effectively utilized with the result that families cannot produce enough income to support a satisfactory living including adequate housing. The desirable remedy for inadequate housing on such units lies in adjustments needed to convert these units into adequate farms which will give effective and productive employment for their operators. Providing adequate housing on under-sized and under-equipped tracts would tend to perpetuate such tracts. However, pending such adjustments on the one hand, and on the other hand looking to the health of so large a portion of our farm population,

provision for partially subsidized housing and repairs (on these inadequate farms) consistent with well recognized requirements of health and sanitation would appear desirable and justifiable. In cities partially subsidized housing is recognized as essential for families who have inadequate employment opportunities. For the same reasons this principle should apply to agriculture.

Some attention has been given to the development of minimum farm housing standards by the Department of Agriculture, particularly by the Agricultural Research Administration and by the Farm Security Administration which has had valuable experience in the construction of homes for low income farm families. Recommended minimums have been set up for several regions both inclusive and exclusive of bath and sewage disposal. This allows for some variation according to climatic conditions and requirements of sanitation.

It becomes possible, on the basis of these estimates plus certain other estimates on the cost of repairs, additions, and installation of facilities, to arrive at some general figures on the amount of direct employment in terms of number of workers employed for a year's time which would arise from a program designed to bring farm houses up to a minimum standards. These are presented below:

Table 4. Preliminary Estimates Based on Census of 1940 of Number of Man-Years Required in Direct Employment to Bring About Minimum Standards of Farm Houses. (Buildings other than dwellings are not included)

Type of Farm	Facilities Needed	Repairs and Additions	New	Total
	Man-years employment	Man-years employment	Man-years employment	Man-years employment
Adequate full-time	50,000	150,000	150,000	350,000
Adequate part-time	15,000	40,000	50,000	105,000
Retired	7,500	40,000	50,000	97,500
Other inadequate	37,500	250,000	400,000 1/	687,500
Total	110,000	480,000	650,000	1240,000

1/ Assuming half of the houses beyond repair on inadequate units are to be replaced.

While a number of changes in agriculture have taken place since 1940 which would affect these estimates the general situation has not been radically altered and certain conclusions regarding a program for rural housing emerge.

I. Farms divide themselves, for program purposes, into three major groups, each requiring a different approach:

A. Farms with adequate employment opportunities. (Groups 1 and 2 of tables 3 and 4). A much enlarged credit program is required to adequately house these farm families. It is suggested that:

1. Private institutions be encouraged to offer credit upon favorable terms, the loans possibly to be guaranteed by the government in a manner somewhat similar to FHA insurance of urban housing loans.

2. More credit be made available for housing repair and construction and addition of needed facilities through direct government loans with valuation determined by careful income appraisals.

3. That refinancing along with new construction and repair be encouraged on similar terms.

B. Retired farm families. Credit upon similar terms should be made available to these families wherever they have sufficient regular income. Where such income is not available, a portion of the cost of repair, additions, or new facilities should be borne by the public with some safeguarding provisions. This program would become one phase of a security program for farmers.

C. Families on inadequate units. As already stated, every effort should be made to provide employment opportunities to such families. In many cases such a transformation of inadequate units in terms of employment may be accomplished by a supervised credit program such as administered by Farm Security Administration. Where there is a definite basis for believing that an inadequate unit can be so transformed, farm improvement loans should accompany the operating goods loans and the supervision. Where no expectation exists of transforming an inadequate unit into an adequate unit, the families should be assisted to obtain other employment. When substandard houses are occupied pending such adjustments, repairs to these should be undertaken by the government on a subsidy basis.

II. Appropriate programs will have to be developed for tenant housing as distinct from operator owned housing. Here the problem is largely one of loans to landlords. Similarly, housing for hired workers will require a special approach.

III. The relationship between farm houses and the farm business, and also the relationship between housing standards and employment and income opportunities on particular farms, will have to be taken into account in the administration of a farm housing program.

IV. If all farm families are to be adequately housed they will either have to have incomes large enough to enable them to provide adequate housing for themselves, or, through subsidies, the public will have to assist a part of them to obtain it. This poses the important issue of standards. First, it will have to be determined as a matter of public policy whether or not all farm families should be adequately housed. Should the public decide this issue in favor of assuring minimum adequate housing for all farm families (and urban families too), then an important next step will be to determine just what minimum levels the public will undertake to support. Just how these issues are settled will have a great influence on the magnitude of future rural housing programs, which in turn will largely determine the amount of employment, both direct and indirect, which will be provided after the war through such programs.

Draft for discussion

Bureau of Human Nutrition and Home Economics

Proposed Minimum Adequate Standards for the Farm Dwelling to be Located on an Adequate Farm 1/

It has been suggested that in order for a farm to be considered "adequate" farm resources must be such that the labor of the farm operator on his farm will yield an income sufficient to cover operating expenses, an adequate family living and necessary capital expenditures or debt payments. To make this definition clear, it is necessary to establish some level of adequacy for family living, including satisfactory housing. It is also to be assumed that covering operating expenses, capital expenditures and debt payments includes covering the cost of providing adequate housing if the original cost is spread over a reasonable period of time and if reasonable maintenance is to be given during the lifetime of the house.

The question of an adequate level of living has been dealt with elsewhere. The question to be considered now is: What constitutes adequacy in the dwelling unit on this adequate farm? The most objective approach to the question of adequacy appears to lie in considering the functions that a farmhouse is required to fulfill for the farm family and in describing the physical characteristics of a house that will meet these requirements. 2/ The cost of building such a house and maintaining it in adequate condition during its useful existence will be a factor in determining the cost of minimum adequate living that the farm must yield. Cost should not determine the minimum adequate standard to be established, however, except insofar as it can be shown that the same requirements can be met by a relatively lower expenditure by substituting cheaper materials or methods that do not detract from the capacity of the house to meet the fundamental requirements of farm family living.

The basic demand that any family makes of a house is that it provide for physical needs. This means that the house must give shelter from the weather at all seasons and provide suitably for the processes its occupants carry on in satisfying their hunger, dispelling fatigue, and keeping clean. These functions demand sound construction, adequate space, and a certain minimum of equipment. In addition, a farmhouse must meet several specific requirements that originate in the nature of farm family living and the close economic relationship among the family, the house, and the farm.

The house on the farm is an integral part of the farm plant, and the homemaker is an important worker. Besides the usual household tasks, her's may include the processing, preserving, and storing of large amounts of

1/ This proposal has been prepared by home economists in the USDA at the suggestions of the Working Group on Housing of the Interbureau Committee on Post War Programs.

2/ Two previous publications of the USDA (Misc. Pub. 322, Housing Requirements of Farm Families in the U.S., February 1939 and Misc. Pub 475, Minimum Requirements for Farmhouses, October 1941) have considered the question of requirements; neither of these has considered the question of an adequate house on an adequate farm unit.

home-produced foods, perhaps the preparation of some of these for market; the preparation and serving of meals for crews of men at certain seasons of the year; the making of a large proportion of the family's clothing. The effectiveness of the homemaker's work in terms of income is measured by the amount of cash it saves the family, and by the satisfactions the group enjoys as the result of her efforts. As in the case of the man of the family, the size of her contribution is restricted by the limits of her time and energy, and the use of these is made more efficient by the presence in the home of structural features and equipment planned for her convenience.

The large amount of food produced on the farm for home use makes another demand on the farmhouse. To make these foods available for use by the farm family the year around, it is necessary to provide storage space that is ample in size, constructed so as to keep the foods in good condition, and convenient to use. Marketing in the business community may occur at infrequent intervals, too, so there must be enough space for storing a larger quantity of purchased foods than is usual in urban dwellings. Adequate storage facilities of these and other types make a considerable contribution to the attractiveness, order, livability and efficiency of the dwelling.

Because of its isolation the farmhouse is often the center of the family's social world, and as such must meet the needs of each member for play and recreation, for the pursuit of hobbies, for entertaining friends, and for contact with the family as a group. It should also offer opportunity for privacy and for aesthetic satisfaction. In other words, the house on an adequate farm should provide for normal, happy family life and for individual development.

In planning a farmhouse, it is not enough to consider the particular family's needs at any one time. Such a house is part of an economic unit that can be expected to furnish any family operating the farm with an adequate abode throughout its entire existence. It is located on the land so the farmer can be near his business, which requires almost constant supervision. It is impractical for him to live away from his land, so it is seldom possible for him to move to a different house as the needs of his family change. If the farmer reaches the age of retirement or sells the farm to move elsewhere, the same house must accomodate another farm family. It is necessary, therefore, to anticipate the probable lifetime needs of an average farm family as well as the immediate needs of a particular family at a particular stage in its life cycle. The farmhouse is built for the future as well as the present.

With these facts as a background it is proposed that the following suggestions be considered as minimum adequate standards for the type of house that an adequate farm should provide. These are the suggestions of a group of home economists as a result of their study and experience in planning for the most efficient use of the homemaker's time and energy and for satisfactory family relationships. It is believed that the proposals represent a level below which no farm dwelling that is part of an adequate farm unit should be allowed to fall. They represent what is believed to be "adequate" housing in the sense that they cause no undue inconvenience or

privation for the family. The standards are on the very edge of being "comfortable," but some farm homemakers would find them uncomfortable and they are by no means "luxurious."

These suggestions have been developed as the basis for discussion by regional and State groups interested in the problems of farm housing. It is expected that they will be modified superficially to meet varying preferences in arrangement and to meet local needs as affected by climate. Such modifications should not be aimed, however, at a reduction in cost that will result in a house less adequate to meet farm family needs for efficient housing.

In itemizing these particular aspects of farm housing consideration has been given to the various functions that must be performed in most farm homes. These suggested standards attempt to provide for such functions in ways that will allow the greatest saving in labor, time, and cost to the farm family and that will bring the largest reward in happy, healthy, family living that can be attained by the farm family whose farm is one of those which is merely adequate in the sense of the previous definition.

GENERAL CONSIDERATIONS

In considering questions of construction, arrangement, and equipment of the house it is assumed that certain conditions will be fulfilled prior to a decision to locate a house on a particular farm. These assumptions are as follows:

1. The house will be located on a farm providing an effective employment opportunity or upon a part-time tract that combined with off-farm work constitutes an effective employment opportunity. In both cases an effective employment opportunity is one that in terms of wages and prices is capable of supporting at least a satisfactory level of living including adequate housing.

2. The site will be well drained and suitably located in relation to the farm buildings. Where roads are not surfaced, the site will be beyond the dustline (100-150 feet).

3. There will be available a supply of good water at all times. Wells, springs, cisterns, plumbing, septic tanks, chimneys, heating installations and construction in general will comply with modern sanitary and safety standards.

It is also assumed that regional differences in needs and customs will be considered in the application of any basic standard, that modifications will be made for climate and for varying preferences in arrangement, but that such modifications will not be made for the purpose of providing a less adequate dwelling for the farm family.

THE STRUCTURE

Construction of the house with materials now ordinarily used should be substantial enough so that the house may be lived in for 40 years or more without excessive maintenance. Standards for construction should include the following features:

1. Roof tight to water at all seasons.
2. Floors tight and so finished as to permit easy cleaning.
3. Walls tight and constructed for comfortable year-round temperature, insulated if necessary.
4. Inner walls and ceilings of materials and colors that are durable and easily cleaned or renewed, that will reflect a reasonably high percentage of light, and that will deaden some noise to insure privacy and quiet.
5. Ceiling height not less than 7 ft. 4 in.
6. Windows glazed and all windows and doors screened except in areas where screens are not needed.
7. Continuous foundation or curtain walls between piers where first floor is raised above ground--screened openings in such foundation or walls to permit cross ventilation in summer that may be closed in winter.

SPACE, ARRANGEMENT, STORAGE

The total space should be adequate for a growing family with children of both sexes. A farmhouse that is to last a generation cannot be constructed to meet merely the demands of the young couple beginning to work the land. Nor can the farm family be expected to move from one house to another as the family grows as might be possible for the urban dweller. The farmhouse is part of the efficient farm unit; it must meet maximum demands of a lifetime for any family that operates the farm.

The following rooms are considered necessary to provide the space essential for preparation, serving and preservation of food; family companionship, recreation, and sleeping; maintenance of equipment and clothing, such as laundry and cleaning, sewing, canning, and the family share of other productive tasks on the farm such as preparation of meals for harvesters, etc.

Living room.--The living room should not be less than 160 square feet. If there is no separate dining room, the living room should have an additional 70 square feet. A large living room with space for dining is usually preferable to a small separate dining room which affords neither the space necessary for large family gatherings nor a restful atmosphere for ordinary meals.

Kitchen.--The kitchen should be not less than 150 square feet if planned for a wood or coal burning range and a kerosene stove. It should be not less than 100 square feet if planned for a gas or electric range.

If dining space is to be provided in the kitchen, an additional 95 square feet is necessary to permit free passage behind all chairs. The kitchen should contain the following as minimum equipment:

(a) A sink of porcelain enamel on formed steel or cast iron at least 24 by 18 by 6 inches.

(b) Work surface at left of sink at least 30 by 24 inches; work surface at right of sink at least 48 by 24 inches.

(c) Base cupboards enclosed by doors, with at least one section of the cupboards with a shelf adjustable for height. Minimum of four drawers at least 6 inches deep, below table tops.

(d) Toe space beneath base cupboards at least 3 inches high by 3 inches deep.

(e) Above sink and work surfaces a minimum of 3 shelves except as those would interfere with windows. Bottom shelf at least 15 inches above work surface; shelves not less than 11 inches deep except lowest above sink, that one not more than 6 inches deep unless 24 inches above rim level of sink.

(f) Provision made for sitting at sink; if sink is built into cabinet, sliding doors are desirable.

(g) A kitchen range in good working order.

(h) A refrigerator with a capacity of at least 8 cubic feet.

Workroom and workroom closet.--A workroom in addition to the kitchen is essential for farm families so that certain farm tasks often requiring the labor of several members of the family and causing confusion and disorder need not be performed in the kitchen where the family food is being prepared. This room will be used for laundry, canning, cleaning poultry, and preparation of large quantities of food, etc. For this purpose, depending upon the climate, either a porch or an additional room will be required. If a porch, it should be equipped with protection against stormy weather. The room should be equipped with a sink, a small stove, adequate provision for washing clothes including a motor driven washing machine, and facilities for water disposal. A closet in or near the workroom should be provided for cleaning equipment and supplies with inside measurement at least 29 inches wide and 21 inches deep. The bottom shelf should be not lower than 67 inches from the base.

Bedrooms and bedroom closets.--There should be at least three bedrooms, one for the parents and one for children of each sex. Two of these rooms should be large enough and have window and door openings so placed to accommodate two double beds each, if necessary. The floor area of each should be a minimum of 145 square feet. The third room should be large enough to accommodate twin beds and should be at least 140 square feet. Each bedroom should have a minimum clothes closet area of 8 feet by 24 inches, preferably divided into two closets.

Bathroom.--The bathroom should be equipped with indoor flush toilet, wash basin, shower or tub. The floor area should be at least 40 square feet.

Porch.--A living porch not less than 80 square feet in addition to the work porch is desirable in most climates.

Additional storage space.--Because of the planning of minimum room space shown above, the farm family needs storage space in addition to bedroom and workroom closets of not less than the following:

(a) One closet at least 3 feet long by 24 inches deep near the most used entrance to the house for coats and wraps.

(b) A linen and bedding closet at least 3 feet long by 22 inches deep near bedrooms and bath.

(c) Not less than 48 square feet of food storage floor space in or near the house, ventilated and protected from freezing or excessive heat. Floor should be braced to support the load and ventilator screened. Shelves should be spaced to hold the usual containers. When fruit and root vegetables are stored here, the minimum floor area is 83 square feet.

(d) An additional closet for general storage if possible.

PRIVACY AND CONVENIENCE

For the sake of privacy and convenience for the farm family, the following items are essential:

1. Doors to all bedrooms, bath, or toilet rooms.
2. Doors to all closets.
3. Sole access to any room or bath must not be through a bedroom.
4. Outside doors and porches should be convenient to the farm driveway and the path to barn and where possible should be on the sheltered side of the house.
5. Shelter over all outside doors.
6. Doors in the kitchen should be so arranged that the only passage will not be directly through the work area.

LIGHT AND VENTILATION

For adequate natural light each room should have at least the following glazed window area:

(a) North (from Atlantic to Rocky Mountain States) at least 15 percent of floor area.

(b) South (from Atlantic to Rocky Mountain States) and Northern West Coast and Rocky Mountain States at least 12½ percent of floor area.

(c) Southwest - at least 10 percent of floor area.

For satisfactory ventilation the window area that can be opened should be a minimum of 5 percent of the floor area. More openings are desirable in warm climates and full length openings are useful in some areas.

Living room, kitchen, and bedrooms should have cross ventilation; cross ventilation of a bedroom should not be through another bedroom.

ELECTRIC WIRING

Houses should be wired when built according to the electrical code of the National Board of Fire Underwriters. The house should have the following lighting outlets as a minimum: Ceiling lights in kitchen, workrooms, porches, halls, stairways, over dining area, living room, basement, and laundry; one lighting outlet in bathroom and each bedroom.

HEATING

The heating system should be designed to provide healthful and comfortable living.

No coal or wood burning range, stove, furnace, or stovepipe should be within 3 feet of unprotected woodwork or wood-lath and plaster partitions. When closer than 3 feet adequate fire-proofing must be provided. Fireproof construction of partitions and woodwork near range, stove, furnace, or stovepipe is desirable to free space for more effective use.

FUEL STORAGE

Adequate space in or attached to the house for storage of fuel must be provided.

WATER SUPPLY

Hot and cold water must be supplied at kitchen sink, in the workroom and bath.

ESTIMATED COST

It has been estimated by Farm Security Administration engineers that a house very similar to the proposed minimum adequate house will cost from $2,325 to $4,350 at 1940 prices, including bath and sewage disposal, depending upon the area in which it is constructed.

More detailed estimates have been made region by region, by comparing the proposed minimum standards with the characteristics of houses actually constructed for which estimates have been available. In Region V, for example, a house slightly larger, with larger bedrooms, but a slightly smaller kitchen lacking some of the closet and food storage space but, on the other hand, provided with two fireplaces, cost $2,325 at 1940 prices, including bath and sewage disposal. This figure may be compared with the cost of a Farm Security Administration minimum standard house in that region which was approximately 300 square feet smaller, lacked still more in closet and food storage space, and cost $1,800 including bath and sewage disposal.

Estimated cost at 1940 prices of proposed minimum adequate farmhouse for adequate farm and of Farm Security Administration minimum house, including bath and sewage disposal

Region	Cost of farmhouse approximating the proposed minimum adequate standard	Cost of Farm Security Administration minimum house	Principal difference between the proposed minimum adequate standard and the Farm Security Administration minimum standard
II & III	1/ $4,350	$3,230	Floor area, closet space, porch
V	2/ 2,325	1,800	Floor area, closet space, food storage space; FSA provides a small dining room
VI	(3)	2,457	Room sizes, closet space, food storage space; FSA provides a small dining room
VII & X	3,772	3,200	Floor area, closet space
VIII	(3)	2,420	Floor area, closet space, food storage space
IX	4/ 3,580	2,158	Floor area, closet space, food storage space
XI	5/ 3,100	2,700	Floor area, closet space, food storage space, porch

1/ In some respects this is a slightly better house than the proposed minimum adequate: larger floor area, longer work surface in kitchen, provisions for hot air heating; in other respects it meets the proposed minimum standard; estimated cost excluding bath and sewage disposal is $3,750.

2/ In some respects this also is a slightly better house than the proposed minimum adequate: large floor area, longer work surface in kitchen, larger porch, two fireplaces; in other respects it is not so good, e.g. smaller closets; estimated cost excluding bath and sewage disposal is $1,923.

3/ No estimate made.

4/ Larger living room but smaller kitchen and dining space.

5/ Details not given; closet space uncertain.

Tabular Summary of Minimum Adequate Standards for Farm Dwelling to be Loacted on an Adequate Farm

Area	Size	Plan details
Living room	160 sq. ft. (min.)	1 coat closet 3 ft. long, 2 ft. deep (6 sq. ft.) near front door if not at back door. Wired for ceiling light (at least).
Kitchen	100 sq. ft. (min.) 150 sq. ft. (min.)	If to contain gas or electric range. If to contain wood or coal burning range and kerosene stove. Doors so arranged that passage will not be through work area Wired for ceiling light (at least).
Dining space	70 sq. ft. 95 sq. ft.	If in living room (additional to living room space shown above). If in kitchen (additional to kitchen space shown above). Wired for ceiling light.
Workroom		If a porch, to be equipped with protection against stormy weather. Supply closet, 29 in. wide, 21 in. deep, (4½ sq. ft.) bottom shelf not lower than 67 inches from base. Doors so arranged that passage will not be through work area. Wired for ceiling light (at least).
Bedroom (2)	145 sq. ft.	Windows and doors placed so as to accommodate 2 double beds each. Door; one electric outlet (at least). Closet 8 x 2 ft. (16 sq. ft.) divided into two sections; doors access to rooms not through another bedroom.
Bedroom (1)	140 sq. ft.	Windows and doors placed so as to accommodate twin beds. Door. Closet 8 x 2ft. (16 sq. ft.) divided into two sections; doors access to room not through another bedroom.
Bath	40 sq. ft.	Linen and bedding closet 3 ft. wide x 22 inches deep (6 sq.ft.) in or near bath and bedrooms. Door; access not through a bedroom. One electric outlet (at least).
Living porch	80 sq. ft.	Wired for ceiling light
Coat closet	3 x 2 ft.	Near most used entrance
Food storage closet	48 sq. ft. (min.) 83 sq. ft.	In or near house, ventilated and protected from freezing or excessive heat; floor braced to support load; ventilator screened If to contain root vegetables and fruit.

Additional desirable:

General storage closet (for trunks, etc.)

Outside doors and porches convenient to farm driveway and path to barn; if possible on sheltered side of house.

Shelter over all outside doors.

Space in or near house for storage of fuel.

Tabular Summary of Equipment to be Installed in Farm Dwelling for Adequate Farm

Area	Equipment
Kitchen	Sink of porcelain enamel on formed steel or cast iron, 24 x 18 x 6 in.; hot and cold water Work surface left of sink, 30 x 24 in. Work surface right of sink, 48 x 24 in. Base cupboards under work surfaces enclosed by doors; at least one section with shelf adjustable for height; minimum of 4 drawers, 6 in. deep; toe space beneath base cupboards at least 3 x 3 in. Above sink and work surfaces, minimum of 3 shelves (except where windows); bottom shelf at least 15 inches above work surface; shelves not less than 11 inches deep, except lowest above sink, not more than 6 inches deep when 24 inches above rim level of sink. Provision for sitting at sink; if sink is built into cabinet, sliding doors are desirable. Refrigerator, minimum of 8 cubic feet contents. Kitchen range; if coal or wood burning not closer than 3 ft. to unprotected woodwork, wood-lath and plaster, unless adequate fire-proofing provided.
Workroom	Sink; hot and cold water. Small stove. Adequate provision for working clothes (including motor driven washing machine) and facilities for water disposal
Bath	Flush toilet; wash basin; shower or tub.
Food storage closet	Shelves for usual containers

Construction notes for Adequate Dwelling on Adequate Farm

Floor area 1350 square feet (approximately)
Foundation - brick ~~pieces~~ PIERS and curtain wall, screened vents. Double floor. Construction to meet modern safety requirements. Plumbing and heating to comply with modern sanitary and health standards. All phases of structure constructed to require minimum maintenance
Natural light - glazed window area 15 percent of floor area in North, 12½ percent of floor area in South, 10 percent in Southwest
Ventilation - window area to be opened, 5 percent of floor area

Suggested Arrangements

Floor Plan I - Two stories and partial basement

THE FARM HOUSING PROBLEM

(This analysis of the farm housing problem was prepared by a working group of the Interbureau Committee on Post-War Programs of the Department of Agriculture for submission to the Senate Special Committee on Post-War Economic Policy and Planning, January 17, 1945)

For decades there has been a growing realization of the importance of adequate housing to the health and the social and material well-being of people and a recognition that the public interest requires special ways and means of enabling large population groups to gain access to better living quarters. For the most part, however, inadequate housing has been associated in the public mind with cities. Little thought has been given to the rural situation. Yet the fact is that rural-farm dwellings in general are inferior to those of urban families, and the homes of hired farm workers are even less adequate than those of farm operators.

Table 1. Percent of Rural-Farm and Urban Dwellings Having Selected Characteristics, 1940 1/

Item	Rural-Farm	Urban
Overcrowding (more than 1.5 persons per room)	16	6
Electric lighting	32	96
Running water	18	94
Mechanical refrigerator	15	56
Private flush toilet	11	83
Private bath	12	78

1/ U. S. Dept. of Commerce, Bureau of Census, 16th Census of United States, (1940) Housing, Vol. II, Part I, General Characteristics, Table 8, p. 23; table 7, p. 20; table 9B, p. 36; table 7A, p. 21; table 7B, p. 22. Vol. I, Data for Small Areas, Part I, table 5, p. 9.

Classification of Rural-Farm Dwellings

For the country as a whole, the houses of operator and non-operator families living on farms may be grouped according to their size and value as reported by the Census in 1940. In like manner, farms on which operator families resided in 1940 may be classified in terms of their capacity to finance and support acceptable housing. When this is done the condition of houses for each class of farms may be described. Also, account can be taken of off-farm work as it affects the ability of farm families to finance and support acceptable dwellings. This view of housing in relation to the capacity of farm families to support acceptable dwellings from the proceeds of farm employment or a combination of farm and off-farm employment brings

into clearer focus some of the practical problems which different income groups of farmers must overcome in order to secure and maintain acceptable housing.

While such a general overall view is now possible, available information is not yet sufficient to yield a full description of the farm housing problem. The approach is helpful but much remains lacking in detail. For example, proper account of regional variations is not yet possible nor is an analysis of the effect of tenure status on the opportunity to enjoy acceptable housing. Also it is unfortunate that the information does not permit a better description of the housing of farm laborers, particularly of migratory workers. However, the information does provide a basis for partial analysis of the housing problems of non-operator families living on farms, including among others a portion of the farm laborer families, and a somewhat more complete analysis with respect to the farm-operator group.

Using 1940 Census data, farm dwellings have been classified into three groups on the basis of their size and value. 1/ The first group consists of units which had at least 5 rooms and were worth at least $1,000. It is assumed that these dwellings are acceptable although many of them lack modern conveniences and comforts. The second group consists of units which had 3 or 4 rooms and were worth $500 or more, and all larger units if worth from $500 to $1,000. In most cases, these units need extensive repairs or remodeling. In general, 3 or 4 room structures are too small, particularly on farms where on the average families are larger than in cities. The third group consists of all dwellings which had only 1 or 2 rooms, and larger units worth less than $500. Usually it would be more economical to replace such structures than to enlarge or remodel them. For convenience, the first group has been designated as "Acceptable," the second as "Repairable," and the third as "Non-Repairable." 2/

There is a marked relationship between these classes of houses and the facilities which we usually expect to go with a dwelling. That is, the proportion of "Acceptable" dwellings having given facilities is generally much greater than for "Repairable" or "Non-Repairable" dwellings and the proportion of "Repairable" dwellings having these facilities is much greater as a rule than for "Non-Repairable" dwellings, as indicated in Table 2.

1/ Values for tenant-occupied dwellings were calculated by assuming the rent per month to be one percent of the value.

2/ While for any particular group the term may not be appropriate for every house included, it probably is suitable for the vast majority in the group. Since there may be as many houses outside a particular group which might appropriately bear the label of the group, as houses within the group which in this way are mislabeled, the number in each group probably represents the number among the total houses included in all groups which would be properly characterized by the term.

Table 2. Classes of Rural-Farm Dwellings Related to Specified Facilities 1/

Class	Percent Having						
		Water Supply			Refrigeration Equipment		
	Electric Lights	Running Water	Inside Hand Pump	Flush Toilet	Mechanical	Ice	Radio
All	32	18	11	12	15	18	59
Acceptable	67	43	18	31	34	21	88
Repairable	26	11	12	4	8	22	63
Non-Repairable	7	2	6	1	2	11	30
Unclassified 2/	35	21	12	15	20	17	60

1/ Adapted from U. S. Department of Commerce, Bureau of the Census, 16th Census of the United States (1940), Housing, Volume III, Part I, Tables A-6 and A-7. In this adaptation it was assumed (1) that for 1 and 2 room dwellings valued at $500 or more (rental $5 or more) the same proportion of the above facilities would be reported as for all dwellings valued at under $500; and (2) that for 3 and 4 room dwellings valued at $1000 or more the same proportion of the above facilities would be reported as for dwellings of 3 or more rooms valued at $500 to $999 ($5 to $9 rental.)

2/ Dwellings with value or number of rooms not reported. In view of the fact that the percentages of facilities reported for unclassified dwellings are so close to the percentages for all dwellings, these unclassified dwellings may be distributed proportionately among the three classes indicated. This has been done in succeeding tables.

It may be observed that rural-farm tenant dwellings were in worse condition than those of owners. For example, half of tenant-occupied dwellings as against about one-fourth of owner-occupied dwellings were classified as "Non-Repairable," while only about one-sixth of tenant dwellings were classified as "Acceptable" as compared with nearly half of owner houses. The same relationship holds for facilities, as indicated in Table 3.

Table 3. Comparison of Rural Farm Owner-Occupied and Tenant-Occupied Dwellings, 1940 1/

	Percent	
	Owner-Occupied 2/	Tenant-Occupied 2/
Class of Dwellings:		
Acceptable	45	17
Repairable	28	32
Non-repairable	27	51
Facilities:		
Running water	25	11
Inside hand pump	13	10
Flush toilet	17	6
Mechanical refrigerator	21	7
Ice refrigerator	19	16
Electric lights	43	20
Radio	70	46

1/ Same source as Table 2. Unclassified dwellings were distributed proportionately among the three classes of dwellings.

2/ "... A dwelling unit is classified as owner occupied if it was owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent was actually paid for the living quarters. Rent-free quarters and living accommodations which were received in payment for services performed are thus included with the tenant-occupied units." 1940 Census of Housing, Volume III, Part I, page 4. It should also be noted that in most cases tenant farm operators and hired farm workers do not actually pay cash for living quarters, as these are usually included in the arrangements for renting the farm or in the terms of employment.

Why Poor Farm-Operator Dwellings

An important reason for inadequate farm housing has been the lack of sufficiently remunerative employment to pay for better structures. For the country as a whole, it appears reasonable to assume that unless a family was able to produce at least $1,500 gross farm income per year under 1939 conditions, it was not able to finance an acceptable dwelling from farm income. With less than this amount, there would not be much left for housing after farm operating and family living expenses were met and necessary farm capital purchases were made. This does not mean that every farm with a smaller gross income capacity under 1939 conditions could not finance and maintain an acceptable dwelling, nor that every higher income farm could do so. The situation would vary for different parts of the country, but for the country

as a whole this appears to be a reasonable figure to use. 1/ After the value of home used products and farm operating expenses are deducted from this $1,500 gross, there remains on the average about $750 net cash farm income. In many cases farm mortgage principal payments would have to be deducted from this $750 as well as any cash advances for expanding farm operations. The remainder would be available for family living expenditures, including housing, savings, or retirement of non-real estate debts. It is thus difficult to see how the average farm family could provide itself with an American standard of living, including an acceptable house, with much less than $750 net cash or $1,500 gross farm income.

Sufficiently remunerative employment to support adequate housing may be provided by the farm alone or by the combination of farm with off-farm employment of the operator and members of his family. Estimates have been prepared for the 5,760,000 farm-operator households living on farms in 1940. Information available is not sufficient to estimate the housing and employment of the operators of the other 337,000 farms reported by the Census in 1940.

For this purpose farms have been grouped into three broad classes. Class I farms are all units which in 1939 had a gross farm income of at least $1,500 and other units that had at least $8,000 worth of land and buildings and at least a team of horses or equivalent power. In like manner, Class II farms are remaining units with a gross farm income of $750 to $1,499, and other units that had $4,000 to $7,999 worth of land and buildings and at least a team of horses or equivalent power. Class III farms are all remaining units. This class contains all farms with gross farm income under $750, except those that had land and buildings worth $4,000 or more and at least a team of horses or equivalent power.

All Class I farms were considered to be sufficiently productive to finance acceptable dwellings without off-farm employment. Class II and III farms were not. Class I farms comprised about one-fourth of all 5,760,000 units, Class II about one-fifth, and Class III slightly more than one-half. (See Table 4.) To be able to support an acceptable dwelling from the proceeds of their employment, it is estimated that in 1939 farm-operator families of Class II farms needed on the average at least 100 days of off-farm employment in addition to employment on their farms, while families on Class III farms needed about 200 days.

About one-fourth of the 1,200,000 operator families on Class II farms had at least 100 days of off-farm employment and nearly one-fourth of the 3 million operator families on Class III farms had 200 days. (See Table 4.) In other words, as of 1940, of the 5,760,000 farm operator families on farms, less than half, about 2,560,000, could finance acceptable dwellings. About one-fourth, 1,560,000, could do so from farm employment alone, while about one-sixth, 1,000,000, could do so from a combination of farm and off-farm employment. This leaves more than half, 3,200,000, who could not finance acceptable dwellings either from farm or a combination of farm and off-farm work, as indicated in Table 4.

1/ Were one to prefer to use $1,200 as the breaking point between the two upper farm classes, it would shift only about 7 percent more farm operator families into the top group.

Department of Agriculture, Bureau of Agricultural Economics, a cooperative study, Technical Monograph, "Analysis of Specified Farm Characteristics for Farms Classified by Total Value of Products," Table 3, p. 21 and Table 1, p. 31. Based in part on unpublished data obtained through a joint study made by the Bureau of the Census and the BAE.

2/ U. S. Department of Commerce, Bureau of the Census, and U. S. Department of Agriculture, Bureau of Agricultural Economics; Series Census-BAE No. 1 "Estimates of Farm Population and Farm Households, April, 1944 and April, 1940," January 14, 1945.

Housing on Different Classes of Farms

In general the quality of farm housing corresponds with the capacity of the farm or combination of farm and off-farm employment to support the dwelling. Of 5,760,000 farm-operator dwellings on farms in 1940, approximately one-third were classified as "Acceptable," one-third as "Repairable," and one-third as "Non-Repairable." (See Table 5.) In the case of 2,560,000 of these farms, where either farm or farm and off-farm employment was sufficient to support acceptable housing, about two-fifths of these dwellings needed either replacement or major overhauling. In more detail, about 3 of every 5 were classified as "Acceptable," 1 of every 4 as "Repairable" and only 1 out of every 6 as "Non-Repairable."

On the remaining 3,200,000 farms, approximately 5 of every 6 dwellings needed either replacing or major overhauling. In more detail, approximately half the dwellings were classified as "Non-Repairable," 1 of 3 was "Repairable," while only 1 of 6 was "Acceptable."

In case of the 3,200,000 farms where neither farm income nor a combination of income from farm and off-farm employment would finance acceptable housing, the problem of improving or replacing dwellings under 1939 conditions, whether the occupants were owners or tenants, was a difficult problem indeed. Fortunately, 560,000 of these farms already had "Acceptable" housing. On the remaining 2,640,000 farms, houses of about a million operators were classified as "Repairable" and those of more than 1-1/2 million as "Non-Repairable."

Table 5. Estimated Number and Condition of Occupied Farm-Operator Dwellings on Farms, Related to Adequacy of Farm and Off-Farm Employment to Finance an Acceptable Dwelling, for the United States, April 1940 1/

Farm and Off-Farm Employment Income is:	Class of Farms	Class and Number of Farm-Operator Dwellings on Farms			
		Total	Acceptable	Repairable	Non-Repairable
		(All numbers in thousands)			
	Total	5,760	2,060	1,700	2,000

	II	900	260	340	300
	III	2,300	300	700	1,300

1/ Estimated by the Bureau of Agricultural Economics on the basis of class of farms and class of dwellings shown in preceding tables and relationships shown by unpublished data obtained through a joint study made by the Bureau of the Census and the BAE.

Dwellings of Rural Farm Non-Operators

In addition to the 5,760,000 farm operators living on farms it has been estimated that in 1940 there were 1,400,000 households on farms which did not include a farm operator. In about 600,000 the head was employed in agriculture, in about 300,000 the head was employed in non-farm occupations, while in the remaining families the head was either unemployed or not in the labor force. Nearly three-fourths of the families where the head was employed in agriculture reported less than $500 in family wages and salaries in 1939, a sum too small to support acceptable housing.

Dwellings on farms occupied by non-operators were substantially inferior to those occupied by farm operators. About 1 in 7 was classed as "Acceptable" as indicated in Table 6. Over half of these non-operator dwellings were classed as "Non-Repairable" as compared with about one-third in the case of farm operators.

Table 6. Class and Estimated Numbers of Occupied Rural-Farm, Non-Operator Dwellings, for the United States, 1940 1/

Class	Number of Dwellings
	(000 omitted)
All	1,400
Acceptable	200
Repairable	400
Non-Repairable	800

1/ Estimated by the Bureau of Agricultural Economics. Based in part on U. S. Department of Commerce, Bureau of the Census, Population and Housing, "Characteristics of Rural-Farm Families," Tables 2 and 12. Based in part on unpublished data obtained through a joint study made by the Bureau of the Census and the BAE.

The Situation in 1944

Since 1940 probably no net improvement has been made in the quality of farm dwellings, owing to the difficulty of obtaining materials during the war emergency. However, several forces have reduced the number of houses needed on farms and have enhanced the ability of farm families to afford better dwellings. There has been a reduction in farm population, a reduction in the number of farm operators living on farms, an increase in both full-time and part-time off-farm employment opportunities for farm people, and an increase in farm income due both to higher production and higher prices.

It has been estimated that there was a reduction of about 4-2/3 millions (15 percent) in rural-farm population from April 1940 to April 1944 and a reduction of about 3/4 million in the number of farm operator households on farms. 1/ By 1944 the total volume of farm production had increased about one-third from the average production in 1935-39 and farm prices had nearly doubled. Many more part-time and full-time off-farm jobs had become available to farm families. The opportunity for more regular and productive employment, either on or off the farm, and to earn higher incomes obviously has increased the number of farm families that can afford acceptable housing under present conditions.

Also the number of houses needed on farms under present conditions is smaller than the number needed in 1940. As compared with about 2,640,000 operator families who were living in "Repairable" or "Non-repairable" houses in 1940, and were unable to finance "Acceptable" dwellings at that time, either from farm or a combination of farm with off-farm employment, only around 2 million such families were living in the same type of houses in 1944, if we

1/ Series Census-BAE No. 1, "Estimates of Farm Population and Farm Households, April 1944, and April 1940," January 14, 1945.

take into account the reduction in the number of farm-operator households and assume that not many operator families living in "Acceptable" houses were involved in this reduction. A rough estimate indicates that about half of these families, or around 1 million, were able to finance acceptable dwellings under 1944 conditions, while one million still were unable to do so.

In summary, under 1944 conditions of practically full employment, about 5 million operator families were in need of housing on farms. Approximately 2 million now occupy "Acceptable" houses, and about 3 million are in "Repairable" and "Non-Repairable" houses, approximately half in each class. Of this 3 million about 2 million are in position to finance acceptable housing, if appropriate housing credit can be made available to serve their needs, while about one million, even under 1944 conditions, had insufficient incomes to finance acceptable housing. About half of these 2 million who can finance acceptable housing need to replace their dwellings and about half of the million who cannot finance acceptable housing also need new houses.

Available information did not permit an estimate of the number of non-operator families, including many farm laborer families, living on farms in "Repairable" and "Non-Repairable" houses who still are unable, under present conditions, to finance the replacement or improvement of their homes. Neither did it permit an analysis of the special housing problems of farm laborers and tenants. It may be pointed out, however, that while an owner-operator with sufficient income is free to go ahead and improve or replace his dwelling if he desires to do so, unless he needs and is unable to obtain a type of credit which is suitable to his situation, a tenant-operator usually is not. His problem of getting acceptable housing is often very difficult because even though he may have an ample income his ability to obtain acceptable housing may be dependent in part upon the willingness of the landlord to invest in acceptable tenant housing, and in part upon availability to the landlord of suitable housing credit.

Measures to bring about needed adjustments and improvements in farming practices to increase efficiency and thus to make the farm operator's labor more productive should be generally helpful, as should measures to reduce the cost and to expedite the construction of acceptable housing. Modifications of the credit mechanism and other devices may prove to be helpful in remedying housing conditions on the farms of operator families who have adequate incomes. However, if a substantial portion of the million farm-operator families who even under 1944 conditions could not afford acceptable housing are to be adequately housed, it appears that such additional steps as the following may be required:

1. Increase the income of some of these families from farming by enlargement of small farms or by some other means.

2. Increase the income of other families in this group from supplementary sources or by full-time off-farm employment.

3. Use temporary subsidies, in accordance with some agreed upon minimum standards, particularly with reference to health, until the more basic measures take sufficient effect and in cases in which such measures are not fully applicable.

(Release on Delivery)

Toward Better Farm Housing

- - -

Statement by Secretary of Agriculture, Claude R. Wickard, before the Subcommittee on Housing and Urban Redevelopment of the Senate Special Committee on Post-War Economic Policy and Planning. January 17, 1945 at 2:30 p. m.

About two-thirds of the nation's farm families are ill-housed. Nearly half the inadequate houses are beyond repair.

Slums usually are associated with cities, yet the average level of farm housing is far below that of the city dwellings. This is true of what might be termed the settled farm families. Housing conditions for most migrant farm workers are on an even lower level.

Adequate steps to improve farm housing would advance the health, happiness, and general effectiveness of millions of farm people. Also, the resulting volume of new construction and repairs would contribute greatly to national employment and general business activity in the years after the war.

If periods of depression ever should delay progress toward permanent full employment, farm housing offers a tremendous field for concentrated efforts to maintain employment. We should keep this possibility in mind, even though we must plan for farm housing in terms of full national employment and primarily from the standpoint of the housing needs of farm families.

Today I should like to discuss, first, the essential nature of farm housing that sets it off so sharply from urban housing; second, the present situation; and third, some of the basic principles that should be considered in building a comprehensive farm housing policy for the years after the war.

Farm housing has been a major problem for many years. Varied attempts to correct the situation have been made. Farm housing remains a major problem.

Farm

The loans and limited subsidy programs of recent years have affected probably less than 4 percent of the nation's farm homes, and a large percentage of the improvements consists of repairs and additions to houses that already were in fairly good condition. Even making allowance for the unmeasurable results of research and educational programs, the record is not impressive.

Farm

Why have gains in farm housing fallen short of urban gains? One reason, undoubtedly, has been the high visibility of urban slums. Even the casual passer-by can't help noticing them. But most substandard farm houses stand alone, many of them far from main-traveled roads. Those that can be seen as often as not strike the passing traveler as more picturesque than pitiable.

A more compelling reason has been imperfect public understanding of the true nature of the farm housing problem.

(more)

Farm housing is just not like city or suburban housing. The average farm house is a headquarters for many farming operations as well as a family dwelling; it is a center for more of the family's social life; home preparation of food and its preservation for future use is vastly more important here. The farm dwelling is very much a part of the whole farm plant, and must be closely integrated with other buildings and the entire nature of farming operations.

Even in the matter of design, there is a great difference between farm and city housing. Although many technical lessons learned in one field may be adapted for use in the other, it seldom is satisfactory to borrow city or suburban house plans for rural use.

The difference is even wider in the field of finance. In the vast majority of cases, the amount of money available for building or maintaining a farm house is tied to the income from the particular farm on which it stands. In this the farm house is unique. The average city house has a value of its own, distinct from the particular source of income of the people who live in it.

The implications are clear. A loan to build or improve a farm house of necessity involves the value of the whole farm, not just that of the dwelling. Subsidies to help put better houses on farms would of necessity have to continue indefinitely on farms that did not have the income base to support adequate housing. Thus efforts to improve farm housing, unless integrated closely with other farm programs, might often run counter to efforts to help farmers make adjustments needed to enable them to earn adequate incomes, either wholly from farming or with the aid of off-farm employment.

Next, what of the present farm housing situation?

Let us start with the fact that there are roughly 6-1/2 million dwellings on farms in this country, most of them occupied by farm operators, and the rest - about a million and a half - occupied mainly by farm laborers, urban workers who live in the country, and retired farmers.

We can roughly measure the part of the farm housing problem represented by those 6-1/2 million homes. There is another part that is almost impossible to measure - the needs of the migrant farm workers, some of whom travel singly, some in family groups. We simply do not have enough information about these people and the way they live; but we know their needs are great and must be taken into account in any broad effort to improve farm housing.

To get back to the 6-1/2 million fairly permanent farm houses, a recent analysis of census data, made by the Bureau of Agricultural Economics with the assistance of the Census Bureau, has divided them into three main groups -- those that are acceptable as they stand, those that need extensive repairs or improvements to make them really fit to live in; and those in such bad shape or so small that they ought to be replaced.

The standards used in making the three groupings cannot be called too high by any stretch of the imagination. For instance, many of the houses classed as acceptable lack facilities that the average city family would insist on as necessary to good housing - things like electric lighting and running water. I shall not attempt to go into the detailed figures here. They are included in an analysis of the farm housing situation prepared by the Agriculture Department's Interbureau Committee on Post War Programs. It is a most interesting and useful paper and with your permission I should like to submit it as part of the record of this hearing.

(more)

It is enough to say here that on the basis of 1944 estimates it appears that about 2 million farm houses need major improvements and about the same number should be entirely replaced.

Five million of the 6-1/2 million total were houses occupied by farm operators. Two million of these were fairly satisfactory. The other 3 million houses were inadequate; about half probably could be fixed up, and half were beyond repair. Even in 1944 -- a year of record high farm income -- about a million of the operator families with inadequate dwellings did not have enough money--including returns from jobs off the farm--to improve their houses or build new ones. Among the other families living on farms, housing conditions and levels of income probably were less favorable. A million and a half all told does not seem too high a guess as to the total number of families who needed better housing and could not finance it.

Standards used in estimating what levels of income could support satisfactory farm housing were not set overly high. Some well-to-do farmers, of course, are able to build or repair houses on almost any terms; but for the most part even the families classified as able to finance housing need credit programs designed especially to meet their requirements.

Now, with at least something of a yardstick for measuring the job, what general approaches can we use to improve farm housing?

Before everything else, it seems to me, it is necessary to recognize that hosuing programs, in themselves, never will be enough to solve the farm housing problem. Generally speaking, the farm families with the lowest incomes and the poorest prospects of increasing their incomes live in the worst houses.

We are dealing with a long-neglected problem whose roots run back far into the nation's past. The only broad and permanent solution can come through a combination of stable and adequate farm income and full and continuing industrial employment. Better housing for farm people depends largely on better opportunities in agriculture or outside of it. We must have no more industrial depressions that drive people back to the land in tarpaper shacks.

But it does not follow that we should fold our hands and wait for the happy day when full employment solves the farm housing problem. We can do a lot to speed its solution.

Many of the nation's basic farm programs already aim at achieving and maintaining fair farm incomes. Those programs must be continued and improved, and new ones should be considered. The present tenant purchase program is an object lesson in what can be done to help farm families get a start on farms large enough and good enough to yield an adequate income. That program could be modified to cover adding sufficient acreage to farms too small for profitable operation. Above all, there is room for greatly increasing the size of the tenant purchase program. Its operations on their present scale are just a drop in the bucket.

But no large-scale effort to help some farm families enlarge their holdings can get anywhere unless large numbers of other farm families have wide opportunities to get good jobs off the farm. Consequently, we should condider steps to train farm people for off-farm work; and to help them get off-farm employment, either on a part-time or full time basis. In other words, better housing for some of the families now on farms will be urban housing.

(more)

Such efforts take time. Meanwhile, millions of the lowest-income farm people would continue to live in wretched houses. So we also should consider the possibilities of providing some kind of emergency aid toward correcting some of the worst existing deficiencies. In my opinion, any subsidies used toward this end should be temporary and as constructive as possible.

So much for the indirect approach to the problem of farm housing. There are a number of more direct possibilities. First there are the activities basic to all efforts to improve housing. Research and education should be continued and expanded so that more farm families will become aware of the need for good housing, and so that they will have somewhere to turn for advice on design and materials. Cooperative buying of building materials should be encouraged; also use of timber, stone and gravel production on the farm. So should pooling of labor. More attention should be given to training architects in the specialized field of rural housing; and insofar as possible, training builders and skilled workers. Such training also could be useful to farmers themselves; often they can supply much of the labor needed for improving their homes. Every effort should be made to reduce the basic costs of farm housing. Housing programs should include encouragement in construction and repair of other farm buildings; as I have said the dwelling is an integral part of the whole farm plant.

Such activities would provide just a foundation. Finance has always been a great stumbling block in the path of better farm housing.

Credit--specialized credit designed specifically to meet their requirements--is the general need of the families who own their farms and have the financial base to support adequate housing.

To this end we should consider modifying some of the present limitations on loans of agencies of the Farm Credit Administration so as to make the loans more readily available for construction and repair of farm buildings. The principle of a flexible repayment schedule in accordance with the annual size of farm income should be explored by both public and private lending agencies. The possibilities of Government insurance of mortgage loans for farm housing on the large scale on which it has been applied to city housing should be thoroughly explored. The Rural Electrification Program, brings lighting, water systems and other elements of good housing within reach of many farmers who could not obtain them otherwise; it should be continued and expanded.

An expansion of the present tenant purchase loan program along with some modification to authorize similar loans for houses and farm buildings to owner-operators of family-sized farms should be helpful. I have already mentioned this program in connection with the basic task of improving farm incomes. It also offers a direct way toward better housing.

Then, there are the farm tenant families, and those of the farm laborers who live on farms. Most of the time their desire for better housing, and even the size of their incomes, have little to do with whether their dwellings are adequate. It is the landlord or employer who decides. Education can help some; I do not believe that as yet enough landlords or employers realize that ability to attract and hold efficient farm operators and capable workers depends partly upon the condition of the farm house offered them, and that the adequacy of a house, in fact, may have a direct effect on the efficiency of the people who live in it. Credit, however, is probably the most important factor. The types of action I have suggested for owner-operators could and should be adapted for landlords and for operators employing farm workers. Better farm tenure practices also can help bring an improvement in tenant housing.

(more)

Finally, there are the migrant farm workers. On farms employing large numbers of seasonal workers, special credit for improving living quarters for the transients would be helpful. The present sugar program, which makes minimum housing standards for workers a condition of government payments to growers is an example of a specialized approach already used in the case of at least one commodity.

In areas where no one farm requires many seasonal workers, the possibilities of community operated farm labor camps should be explored. Although special credit might be necessary to finance construction of such camps, their operation need not, and should not, be subsidized by local or federal government. Adequate minimum wage scales for farm workers would enable the workers to pay enough rent to allow the camps to pay their own way.

In connection with general methods of procedure, I can say that there is substantial agreement between the National Housing Agency and the Department of Agriculture on the principle that rural and urban people are equally entitled to help from the national government in improving housing standards, and on the close relationship between farm housing and farm programs in general. Our two organizations also agree that as much as possible of the improvement of rural housing should be done by private enterprise; but that the Government has an ultimate responsibility for helping all families achieve adequate housing levels. There is agreement, too, that all types of possible programs will require a large degree of local initiative and responsibility. And finally, I believe both agencies agree that long-range housing projects ultimately must be able to stand on their own financial feet--that the use of subsidies, when necessary, should be temporary, and should be used constructively so as to remove the need of further subsidies as soon as possible.

In general, I should say that the many phases of the rural housing problem can be met only by a variety of separate programs. I believe the unifying direction needed to make them all fully effective can be supplied through the cooperation of the National Housing Agency and the Department of Agriculture.

This has been a long statement, yet I have touched only the surface of the countless problems and possibilities of rural housing. No matter how great an effort we may undertake, the task of enabling all rural families who desire them to have adequate homes will take years to accomplish. Such basic factors as national farm income and full industrial employment are involved.

For many reasons I consider the work of this subcommittee of vital importance to the national welfare. I hope the facts I have presented have been helpful; and I am glad to offer the wholehearted cooperation of the Department of Agriculture in supplying any other information you may need as well as in administering whatever housing programs Congress may assign it.

THE FARMHOUSE

A List of References

Compiled by Vajen H. Fischer

This list was compiled particularly for the use of extension specialists in home economics and agricultural engineering. It contains selected references to publications which give information on planning, construction, remodeling, landscaping and new materials, and on policy and factual background for housing programs.

Although references were chosen with the low-cost farmhouse in mind, the bibliography contains general references on new techniques, materials and equipment which are applicable to all home building. A few foreign references have been included.

The period covered is mainly the years 1938 through 1944, although some references to publications issued in 1945 and prior to 1938 have been included. No attempt has been made to duplicate in the present bibliography all of the references contained in the bibliographies listed.

The publications listed may, for the most part, be consulted in libraries. United States Department of Agriculture publications are available free of charge as long as the Department's supply lasts. State Agricultural experiment station and extension publications are ordinarily available free of charge to residents of the respective States. Photoprint copies of material not available elsewhere may be obtained from the United States Department of Agriculture Library.

Items marked with an asterisk (*) have not been examined. Call numbers following the citations are those of the United States Department of Agriculture Library, unless otherwise stated.

Acknowledgment is made of the advice and help received from the following members of the Department's staff: Mary A. Rokahr, Samuel P. Lyle, Adam T. Holman, and Royal J. Haskell, Extension Service; Wallace Ashby and Harry L. Garver, Bureau of Plant Industry, Soils and Agricultural Engineering; and Frank J. Hallauer, Forest Service.

THE FARMHOUSE

A List of References

Compiled by Vajen H. Fischer

SOCIAL AND ECONOMIC ASPECTS

General

1. ASHBY, W. What's happening in farm buildings? Types, values, and relationship to farm economy. Agr. Engin. 26: 101-103. Mar. 1945. 58.8 Ag83

   Lists agencies interested in the farm building problem. Map shows regional variations in farm housing requirements. Charts show value of farm buildings in relation to land values and to dollar values 1910-1940; estimated expenditures for, and depreciation of, farm buildings, fences, windmills, and wells from 1910 to 1943; estimated percentages of man hours worked in and around buildings to produce various crops and livestock; and percentages of gross farm income spent on buildings.

2. BANKHEAD JONES FARM TENANT ACT. Approved July 22, 1937, and amended. 7 U. S. C. 1000-1029 (1940)

   Sec. 1003 provides for farm acquirement loans "in such amount (not in excess of the amount certified by the County Committee to be the value of the farm) as may be necessary to enable the borrower to acquire the farm and for necessary repairs and improvements thereon."

   Sec. 1007 provides for rehabilitation loans, including loans for "minor improvements and minor repairs to real property."

3. BRITISH INFORMATION SERVICES. A bibliography of housing and town and country planning in Britain; being a handlist of books, pamphlets, documents and periodicals in the libraries of British Information Services, New York, and its branches at Chicago, San Francisco and Washington. 20 p., processed. New York, 1944. (ID584) 280.9 B772

   References on land use, town and country planning, and housing, including a few on rural housing.

4. BUILDINGS ON the farm. As much as $2 billion worth of them may be needed annually after the war. How good should they be and how long should they last? Fortune 29: 159-163, 170, 172, 175, 176, illus. May 1944. 110 F772

5. CANADA LOOKS to its housing. Fed. Home Loan Bank Rev. 11: 77-78, 93. Dec. 1944. 173.2 H75Ho

   Summarizes and comments upon the recently passed Canadian National Housing Act of 1944 which provides adequate credit and assistance for home building in the post-war period. Rural housing included.

6. CAREY, E. L., Comp. A selected list of references on housing for the use of teachers and students. 8 p., processed. Washington, D. C., U. S. Natl. Housing Agency. Fed. Pub. Housing Authority. Property and Admin. Serv. Div., Library, 1945. 177.3 Se42

Contains a section entitled: "Housing study guides (useful study material, for elementary and high schools)." References are predominately from the city point of view.

7. COLEAN, M. L. The role of the housebuilding industry. 29 p. Washington, D. C., U. S. National Resources Planning Board, 1942. 173.2 N214Ro

Special problems of rural housing finance, p. 21-22.

8. CURTIS, H. Efficient farm buildings a wartime need. Agr. Engin. 24: 46-47, 50. Feb. 1943. 58.8 Ag83

Replies to 472 questionnaires in Successful Farming building contest listing things farmers were planning to do in the way of building and remodeling homes and service buildings, just before we entered the "defense" stage in our war effort.

9. CURTIS PUBLISHING COMPANY. RESEARCH DEPARTMENT. Looking ahead in the farm building market. Prepared for Country Gentleman. 67 p. Philadelphia, 1945. 280.32 C94L

Considers the farmer's plans for new houses, for repair, improvement or modernization of farm dwellings, purchase of household appliances, furnishings and equipment and interest in prefabrication and new developments in dwelling construction methods and building materials which appeal to farmers. Charts illustrate the results of the survey.

10. FARM CREDIT ACT OF 1933. Approved June 16, 1933, as amended. 12 U. S. C. 1131, et seq. (1940).

Under sec. 1131 g. Production Credit Associations, administered by the Farm Credit Administration, are authorized "to make loans to farmers for the purpose of enabling them to make home alterations, repairs and improvements."

11. FEDERAL FARM LOAN ACT. Approved July 17, 1916, as amended. 12 U. S. C. 641, et seq. (1940).

Administered since 1933 by the Farm Credit Administration.

Sec. 771 provides that Federal land bank loans may be made for the purpose of providing "buildings and for the improvement of farm lands; the term 'improvement' to be defined by the Farm Credit Administration."

Further "No such loan shall exceed 50 per centum of the value of the land mortgaged and 20 per centum of the value of the permanent, insured improvements thereon," etc.

Sec. 1016 (b) provides that in Land Bank Commissioner loans the "amount of the mortgage given by any farmer, together with all prior mortgages or other evidences of indebtedness secured by such farm property of the farmer, shall not exceed 75 per centum of the normal value thereof..." nor "shall it be in excess of $7500 to any one farmer." Land bank commissioner loans may be made "for any of the purposes for which Federal land banks are authorized by law to make loans."

12. FINDLAY, A. C. Probable volume of post-war construction. Monthly Labor Rev. 60: 261-275. Feb. 1945. 158.6 B87M

Table includes farm construction estimates of Bureau of Agricultural Economics.

13. FOLSOM, J. C. Farm and village home building and ownership; a selected bibliography. 21 p., processed. Washington, D. C., President's Conf. on Home Bldg. and Home Ownership, Com. on Farm and Village Housing, 1931. 241.4 P92

14. FORTUNE SURVEY. People name their first choices on the postwar shopping list and show a preference for the solid satisfactions-at present they find the going much harder than it was a year ago. Fortune 28(6): 10, 16, 20, 32. Dec. 1943. 110 F772
Research for survey conducted by the firm of Elmo Roper. Farm houses and property are included in a table showing what people plan to buy, giving percentage, by economic levels.

15. HANNAY, A. H., Comp. Land settlement; a list of references. U. S. Dept. Agr. Libr. Libr. List 9, 167 p., processed. Washington, D. C., 1944. 1.916 L612
Consult index under subject "Houses and housing."

16. HOUSING FOR G.I.'s; an analysis of the home-buying provisions in the "G.I. Bill of Rights," suggesting some changes that should be made. Consumer Rpts. 9: 274-276. Oct. 1944. 321.8 C762

17. HUNTER, K. H. Classification and rating of farm fire risks. U. S. Dept. Agr. Farm Credit Admin. Bul. 46, 44 p. Washington, D. C., 1941. 166.2 B87

18. INDUSTRIAL PUBLICATIONS, INC. Farming, the Nation's biggest industry now and after the war; prepared especially for the building industry. 8 p., processed. Chicago, 1943. 296 In2
This survey of the farm-building market concentrates on farm service buildings, but devotes several paragraphs to the farm home.

19. KEENEY, L. G. Appraisal of insured farm building risks. Agr. Engin. 21: 13-14, 16. Jan. 1940. 58.8 Ag83

20. KEIM, W. G. Geographical differentials in prices of building materials. U. S. Temporary Natl. Econ. Com. Invest. of Concentration of Econ. Power. Monog. 33, 459 p. Washington, D. C., U. S. Govt. Print. Off., 1940. 280.12 Un3986M
A study made under the auspices of the Bureau of Labor Statistics by Walter G. Keim, assisted by Grace C. Grosvenor, Joseph W. Lethco, and Philip H. Blaisdell, under general supervision of Aryness Joy.

21. MCNALL, P. E. Farm buildings as evidence of productivity of crop land. Jour. Land & Pub. Util. Econ. 17: 165-170. 1941. 282.8 J82
Study to determine if farm-building classification as an index for land classification can be applied to a small area (23,000 acres, including 165 farms) in Wisconsin. Author concludes this technique of land classification is not now applicable, but may be due to relative newness of the area.

22. MCNEILL, J. M., Comp. Farm tenancy in the United States, 1937-1939; a selected list of references. U. S. Bur. Agr. Econ. Agr. Econ. Bib. 85, 160 p., processed. Washington, D. C., 1940. 1.9 Ec73A
Consult index under subject "Houses and housing."

23. MARGOLD, S. K. Housing abroad up to World War II, supplemented by comparisons with conditions in the United States. 314 p., processed. Cambridge, Mass. Inst. of Technol. Dept. of Architecture, 1942. 296.2 M33
Ch. I, Acquisition of Land, includes a discussion of suburban land and garden cities (p. 9-16) and rural development (p. 16-17).
Ch. II, Standards, considers standards of occupancy and standards of construction.

Ch. III, Reduction in Basic Costs of Construction, considers methods to reduce costs of material and labor building codes to encourage standardization and use of new materials, standardization of design and plans, and prefabricated houses.

24. MOATS, R. W., and MCNEILL, J. M., Comp. Agricultural labor in the United States, July 1941-February 1943; a list of references. U. S. Dept. Agr. Libr. Libr. List 4, 59 p., processed. Washington, D. C., 1943. 1.916 L612

This bibliography was compiled in cooperation with Josiah C. Folsom of the Bureau of Agricultural Economics. It brings to date the references listed in Agricultural Economics Bibliography Nos. 64, 72, and 95, Agricultural Labor in the United States, which cover the periods 1915-1935, 1936-1937, and 1938-June 1941, respectively.

Consult index under subject "Housing, and "Labor Camps."

25. MURRAY, W. G. Farm appraisal; classification and valuation of farm land and buildings. 254 p. Ames, Iowa State Col. Press, 1941. 282 M96

House included in chapter on building inventory.

26. NATIONAL HOUSING ACT. Approved June 27, 1934, as amended. 12 U. S. C. 1701, et seq. (1940)

Sec. 1703a provides for insurance of loans made by banks, trust companies, etc. up to July 1, 1947 "for purpose of financing alterations, repairs and improvements upon or in connection with existing structures, and the building of new structures" upon rural real property.

Sec. 1709a provides for insuring mortgages on farms, upon which a house or other farm buildings are to be constructed or repaired, on condition that not less than 15 per cent of the total principal obligation of the mortgage be expended for materials and labor.

The Act is administered by the Federal Housing Administration which was consolidated into the National Housing Agency by Executive Order 9070 dated Feb. 24, 1942.

27. PRODUCERS' COUNCIL, INC. How to plan now for tomorrow. A guide for building product manufacturers setting sights on postwar markets and production. 9 p. Washington, D. C., 1944? 1.913 C3Ex82

Included in Materials Dealing with Post-war Plans and Policies of Various Organizations Represented at Extension Institute, January 4 to 6, 1945.

A table shows volume of construction activity in the United States in millions of dollars, 1928-1949, including new farm construction.

28. RICHIE, E. L. An annotated bibliography of housing for use in home economics education; references selected chiefly from the housing literature of 1938, 1939, and the first quarter of 1940, exclusive of state and local housing literature. 41 p., processed. U. S., Off. Ed. Vocat. Div. Misc.2230-7, 41 p., processed. Washington, D. C., 1940. 173 V85Mi

29. STONE, J. T. Farm buildings and the land. Mich. Agr. Sta. Quart. Bul. 25: 32-40. Aug. 1942. 100 M58S

All farm buildings in Charlevoix, Otsego, Presque Isle, Dickinson and Marquette Counties were classified and the soil of the individual farms rated. The general appearance of structures, their size and adequacy for the specific type of farming, their conveniences and equipment, their condition and the appearance of their surroundings were all considered in establishing seven farmstead types.

30. STONE, P. A., and DENTON, R. H. Toward more housing. U. S. Temporary Natl. Econ. Com. Monog. 8, 223 p. Washington, D. C., U. S. Govt. Print. Off., 1940. 280.12 Un3986M

Bibliographies at end of chapters.

An analysis of the factors impending home building. Pt. I, Some Economic Aspects of Housing, "pays particular attention to the factors that cause monthly carrying costs of a house to be high, relating these not only to original costs but to financial and service charges and interest rates." Pt. II, The Relation of Productivity to Low-cost Housing, "analyzes the factors which make the capital outlays of housing high."

31. TERESHTENKO, V. J., and others. Bibliographical review of literature on cooperative housing. U. S. Works Prog. Admin., New York City. Coop. Proj. Study Ser. E., v. 1, 267 p. Boston, Edward A. Filene Good Will Fund, 1942. 280.2 Un382

A few references to cooperative rural housing.

32. TRUMP, C. A. Estimated construction activity in continental United States, 1939-1942. Monthly Labor Rev. 55: 601-605. Sept. 1942. 158.6 B87M

Farm construction is included.

33. TWENTIETH CENTURY FUND. HOUSING COMMITTEE. American housing, problems and prospects. The factual findings, by M. L. Colean; The program, by The Housing Committee. 466 p. New York, 1944. Ref., p. 441-455. 296.2 T91A

A survey of the housing situation in the United States, begun in 1940, which reveals the "obstructions to a greater volume of building and more adequate housing," and suggests ways in which these obstacles might be removed.

The basic questions that occur throughout the book are "those of cost and price: production, financing and operating costs, land prices and market values."

A constructive program of policies is presented in chapter 12. Pages 336-339 of this chapter relate to rural and farm housing.

34. U. S. BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING. Farm building charts. 9 p., processed. Washington, D. C., 1944. 1.965 E2F222

Types, regional requirements, values, expenditures for and depreciation of, labor, and income spent on buildings.

35. U. S. DEPT. OF AGRICULTURE. INTERBUREAU COMMITTEE ON POST-WAR PROGRAMS. Agriculture when the war ends. 57 p., processed. Washington, D. C., 1943. 1.90 C2In8Pag

Statement of the general rural housing conditions that are expected to prevail when the war ends, p. 44-46.

36. U. S. FEDERAL HOUSING ADMINISTRATION. Modern design. U. S. Fed. Housing Admin. Tech. Bul. 2, 10 p., rev. Washington, D. C., 1941. 173.2 H811 No. 2

Rating a house of modern design by Insuring Offices.

37. U. S. FEDERAL HOUSING ADMINISTRATION. Property improvement loans under title I of the National Housing Act as amended. Regulations effective July 1, 1944. 32 p. Washington, D. C., 1944. 173.2 H81Pro

38. U. S. HOUSING ACT. Approved Sept. 1, 1937, as amended. 42 U. S. C. 1401-1430 (1940)

Created the U. S. Housing Authority and declared it to be the policy of the United States to promote the general welfare of the nation by employing its funds and credit, as provided in this Act, to assist the several states and their political subdivisions to alleviate present and recurring unemployment and to remedy the unsafe and unsanitary housing conditions and the acute shortage of decent, safe, and sanitary dwellings for families of low income in rural or urban communities, etc.

Under Executive Order 9070, dated Feb. 24, 1942, the U. S. Housing Authority was consolidated into the National Housing Agency, and its functions, powers and duties administered by the Federal Public Housing Authority.

39. U. S. NATIONAL HOUSING AGENCY. Housing costs: where the housing dollar goes. The problem and its importance; housing costs and family incomes; have housing costs been reduced; approaches to cost reduction. U. S. Natl. Housing Agency, Bul. 2, 48 p. Washington, D. C., 1944. 177.3 N21

Discusses restrictive provisions of building codes and states that, "Special attention should be given to the rapid modernization of building codes to permit the use of new materials and methods as they are developed."

40. U. S. NATIONAL RESOURCES COMMITTEE. INDUSTRIAL COMMITTEE. Land, materials, and labor costs. U. S. Natl. Resources Com. Housing Monog. 3, 101 p. Washington, D. C., 1939. 173.2 N214H

Contents: Part I, Location factors in housing programs, by Jacob Crane, p. 1-14; Part II, Site planning, by Frederick Bigger, p. 15-39; ~~Part~~ III, The significance of small-house design, by Pierre Blouke, p. 40-51; Part IV, Building materials and the cost of housing, by M. G. Evans, p. 78-92; and Part VI, Building regulations and the housing problem, by G. N. Thompson, p. 93-101.

41. U. S. NATIONAL RESOURCES COMMITTEE. INDUSTRIAL COMMITTEE. Legal problems in the housing field. Part 1. Private housing legal problems, by Horace Russell. Part 2. Legal aspects of public housing, by Leon H. Keyserling. A technical monograph on one phase of housing. U. S. Natl. Resources Com. Housing Monog. 2, 76 p. Washington, D. C., 1939. 173.2 N214H

A chart shows citations to State public housing legislation: housing authorities; housing cooperation; tax-exemption; eminent domain; validating, etc.

42. U. S. NATIONAL RESOURCES PLANNING BOARD. Housing: the continuing problem. 60 p. Washington, D. C., 1940. 173.2 N214Ho

Publications, p. 50-60.

Economics of housing, cost of construction, governmental activities, and findings and conclusions.

43. VERMILYA, H. P. Building codes and postwar mortgage lending. Insured Mortgage Portfolio 8(3) 1st quart.: 20-23, 30-31, illus. 1944. 173.2 H81In

Explains that outmoded building codes which have monopolistic intent of requirements that greatly increase the cost of construction will be a danger to the realization of the much-needed extensive, post-war construction program and must be revised at once, and then kept up to date.

44. WEAVER, H. S. Farm land appraising, with essentials of farm management and agricultural engineering. 374 p., illus. Kansas City, Mo., Weaver Real Estate Appraisal Training Service, 1941. 282.12 W372
The farm home is included in the chapter on Appraisal of Farm Improvements, p. 59-66.

45. WOOLEY, J. C., and BEASLEY, R. P. The appraisal of farm buildings. Mo. Agr. Expt. Sta. Cir. 213, 10 p. Columbia, 1941. 100 M693

46. YALE-LIFE CONFERENCE ON HOUSE BUILDING TECHNICS, YALE UNIVERSITY, 1939. Digest of papers. 68 p., illus. New York? 1939. 296.9 Y1
Partial contents: Lower costs through mass production, by R. H. Shreve; Housing and the economic scene, by Beardsley Ruml; Large scale housing and standardization, by M. L. Colean; Contemporary design: New directions, by Ralph Walker; The promise of prefabrication by G. W. Trayer; Materials and techniques for housing, by R. V. Parsons; Research programs for shelter, by J. E. Burchard; Heating and ventilation of the home, by C.-E. A. Winslow; The bearing of acoustical research on house building, by L. J. Sivian and R. L. Hanson; New developments in steel for low-cost houses, by L. A. Estes; Shelter and mobility, by Corwin Willson; The research approach, by R. L. Davison.

Income and Expenditures in Relation to Rural Housing

47. BONSER, H. J., TONTZ, R. L., and ALLRED, C. E. Family living costs on upland farms near Douglas reservoir. Tenn. Agr. Expt. Sta. Rural Res. Ser. Monog. 155, 34 p., processed. Knoxville, 1943. 173.2 W89Co
Tables show value of home furnishings acquired and repairs to home furnishings, and cost of household operation, 81 farm families, 1942, Cost of housing is discussed briefly.

48. BRITTON, V. Housing of 538 Vermont farm families. Vt. Agr. Expt. Sta. Bul. 470, 39 p. Burlington, 1941. 100 V59
"Studies the relation of housing facilities, equipment, tenure, and housing, household operation, equipment and total home expenses to the important variables of income, family type, education, age and tenure" of 538 families in Chittenden and Franklin counties, Vermont.

49. BRITTON, V. Housing of 299 Vermont village families. Vt. Agr. Expt. Sta. Bul. 469, 52 p. Burlington, 1940. 100 V59
"A study of the housing of 299 families located in six Vermont villages, made with special reference to the relation of type of living quarters, facilities, equipment, tenure, and housing, household operation, equipment and total home expenses to the important variables of income, family type, occupation, education, age and tenure."

50. CARTER, D. G. What can you spend for post-war housing? Consumers' Res. Bul. 15(1): 5-9. Jan. 1945. 321.8 C76
How to determine the amount that can be paid, and how to plan for repayment of the housing loan, in the light of the family's income and other circumstances; and what are the basic precautions to be taken in arranging for the purchase and choosing the type and quality of house to be built.

51. COWLES, M. L., and SIEK, M. M. Expenditures for farm housing improvement in a southern Wisconsin county. Jour. Home Econ. 35: 563-566. Nov. 1943. 321.8 J82

Survey in a southern Wisconsin county to find out if any of increased farm income is going for improvement of the house. Of 506 families 61.1 per cent had made some improvement in housing by remodeling, modernizing, or repairing or by adding new home equipment or furniture.

52. DICKINS, D. Improving levels of living of tenant families. Miss. Agr. Expt. Sta. Bul. 365, 18 p., illus. State College, 1942. 100 M69

This study included 100 owner, 117 share-renter, and 93 sharecropper families.

Housing, p. 10; Cash spent on the house, its operation and equipment, p. 14.

53. EDWARDS, A. D. Farm family income and patterns of living; an analysis of original census schedules and land classification of Henry County, Virginia, 1940. Va. State Planning Bd. Population Study Rpt. 3, 83 p. Richmond, 1944. 280.7 Ed9

Housing and facilities and conveniences, p. 40-45. Charts show housing facilities and conveniences by value of farm land, p. 46-47.

54. FREEMAN, R. C., and BANE, L. Saving and spending patterns of the same rural families over a 10-year period, 1933-1942. Amer. Econ. Rev. 34: 344-350. June 1944. 280.8 An32

Research project, Dept. of Home Economics of University of Illinois analying family account records of 49 families over 10-year period. Expenditures for housing, equipment and furnishings are included.

55. FURNAS, J. C., and STAFF OF LADIES' HOME JOURNAL. How America lives. 372 p., illus. New York, H. Holt and Co., 1941. 280.12 F98

Included in the picture are a family of sharecroppers in Mississippi and a typical farm family, the Nels Handevidts in Minnesota. How the Handevidts spend their annual cash income of $1,000 is given.

56. GIBBARD, H. A. Agricultural land ratings and the farmers' levels of living. Mich. Agr. Expt. Sta. Quart. Bul. 20: 144-150, maps. Feb. 1938. 100 M58S

Average value of farm dwelling is given in a table showing land ratings and level of living indices, 29 Michigan counties. Relation of value of farm dwellings to soil conditions is discussed briefly.

57. HAGOOD, M. J. Rural level of living indexes for counties of the United States, 1940. 43 p., processed. Washington, D. C., U. S. Bur. Agr. Econ., 1943. 1.941 R5R884

Housing is one of the elements in the index scale.

Another account of this index is presented by Mr. Hagood in an article in Rural Sociology for June 1943, p. 171-180.

58. HUNTER, S. M., and others. Home situations on different classes of land and effectiveness of the home demonstration program; a study of 234 rural homes in Parke County, Indiana, 1940. Purdue Univ. Agr. Ext. Ext. Studies Cir. 3, 86 p., processed. Lafayette, 1941. 275.29 In2Ext

L. M. Busche, Gladys Gallup and M. C. Wilson, joint authors.

In cooperation with U. S. Dept. of Agriculture.

Gives information on home situations of owners, tenants, and nonfarm families, on farms of different sizes, by income levels and in relation to education and age. Tables show land use classification as

related to electricity, telephone, water supply, washing machines, refrigerators, central heating and fuel used for cooking.

59. JEHLIK, P. J. Level of living on the Ropesville Project, Hockley County, Texas. 31 p., processed. Washington, D. C., U. S. Bur. of Agr. Econ., 1941. 1.941 R4L57

Household operation and housing, furnishings and equipment are included in tables showing cash expenditures for family living for 47 families 1939.

60. KIRKPATRICK, E. L. Analysis of 70,000 rural rehabilitation families. U. S. Farm Security Admin. Soc. Res. Rpt. 1, 93 p., processed. Washington, D. C., 1939. 1.95 Sol

U. S. Bureau of Agricultural Economics cooperating.

Family living, including size of dwelling, household facilities and estimated living costs in Colorado, Montana and Wyoming is discussed, p. 56-58.

61. MANGUS, A. R., and COTTAM, H. R. Level of living, social participation and adjustment of Ohio farm people. Ohio Agr. Expt. Sta. Bul. 624, 57 p. Wooster, 1941. 100 Oh3S

An analysis of standards of living of 299 Ohio farm families. A table shows percent of families possessing specified items, by counties and by level-of-living class, including such items as separate bathroom, separate dining room, insurable value of dwelling more than $1,275, living room walls, solid plaster or wallboard, etc.

Methodological Supplement, by H. R. Cottam, issued as Ohio. State Univ. Dept. Rural Econ. and Rural Sociol. Mim. Bul. 139, 27 p., processed. Columbus, 1941.

62. MONROE, D., and others. Family spending and saving as related to age of wife and age and number of children. U. S. Dept. Agr. Misc. Pub. 489, 126 p., processed. Washington, 1942. 1 Ag84M

M. Y. Pennell, M. R. Pratt, and G. S. DePuy, joint authors.

Published by the U. S. Bureau of Home Economics, as a report on a project conducted under the auspices of the Works Project Administration.

Housing and household operation are included in tables showing ways of spending, by income class. Sixteen family-composition groups were studied in small cities, villages, and on farms in the Middle Atlantic and North Central region. Facts about the income and consumption of the families were obtained from schedules collected for the Consumer Purchases Study in 1935-36.

63. MONROE, D. Patterns of living of farm families. U. S. Dept. Agr. Ybk. (Farmers in a changing world) 1940: 848-869. Washington, D. C., 1940. Ref., p. 868-869. 1 Ag84Y

Housing, p. 853-856, 862, 864.

64. MONROE, D., STIEBELING, H. K., and PENNELL, M. Y. Rural family living: the situation, early 1942. 65 p., processed. Washington, D. C., U. S. Bur. of Home Econ., 1942. 1.982 E2R88

Brings "together economic facts from Government and other reports that are of special interest to workers concerned with the rural family's home-management problems."

Figures give distribution of income by family-income classes, 1935-36, 1939, 1941 and 1942, (p. 4) and how farm families whose net money incomes were about $600 in 1935-36 used their funds (p. 17).

The house, operating supplies, and household furnishings and equipment are considered from the point of view of what markets will offer, prices and adjustments in 1942.

65. MUSE, M. Farm families of two Vermont counties, their incomes and expenditures. Vt. Agr. Expt. Sta. Bul. 490, 48 p. Burlington, 1942. 100 V59

The "makeup of 1,012 farm families located in Chittenden and Franklin counties, the incomes of 960 and the living expenses of 538 of them. Some facts given concerning their homes, equipment and farms."

66. PROGRESSIVE FARMER AND SOUTHERN RURALIST. How southern farm families spend their money; a consumer purchase survey projection. 35 p. [New York? 1939?] 284.4 P94

Study based on U. S. Bureau of Home Economics' "Study of consumer purchases" and National Resources Committee's "Consumer incomes in the United States" to arrive at total amounts spent by Southern farm families for living, including housing, household operation and furnishings, and percentage of total for whole U. S.

67. ROSSOFF, M. The John Doe family and how they lived; reporting study of 38 tenant-purchase clients in 1939. 11 p., processed. Washington, D. C., U. S. Bur. of Agr. Econ., 1941. 1.941 T4J61

This report deals with 38 tenant-purchase families in Farm Security Administration Region XII, located in Texas, New Mexico, Colorado, Kansas and Oklahoma. Housing, furnishings, and equipment and household operation are included in figures for cash expenditures. Housing facilities before and after coming into the program are shown for 35 families.

76. U. S. BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS. Rural family spending and saving in wartime. U. S. Dept. Agr. Misc. Pub. 520, 163 p. Washington, D. C., 1943. 1 Ag84M

Published as a part of the study of family spending and saving in wartime, conducted in cooperation with the U. S. Bureau of Labor Statistics.

Tables 14-18 show value of housing of rural farm and rural nonfarm families and value in 1941, by tenure; and expenditures for family homes of owners and renters in 1941, rural nonfarm families.

77. U. S. BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS. Suggestions for a family spending plan. 14 p., processed. Washington, D. C. 1944. 1.982 E2Su3

Tables give figures for average amounts spent for various items of family living, including housing, household operation and furnishings and equipment, by urban and rural families in 1941.

References that will help you make your spending plan, p. 11-14.

78. U. S. NATIONAL RESOURCES PLANNING BOARD. Family expenditures in the United States; statistical tables and appendixes. 209 p. Washington, D. C., 1941. 173.2 N214Fam

A detailed analysis of family expenditures in the United States based on data from the 1935-36 Study of Consumer Purchases and "includes a breakdown of these expenditures into over 90 categories of outlay, together with comparative estimates indicating farm, rural nonfarm, and urban differences, regional variations, and differences with respect to size of family, as between white and Negro families, and in relation to expenditures for durable goods."

79. WITT, L. Incoming and outgoing payments of Iowa farm families. Iowa Agr. Expt. Sta. Res. Bul. 293, p. 412-472. Ames, 1941. Ref., p. 461-463. 100 Io9

Period covered is 1929-1939. Outgoing payments include rent, farm building and repairs, taxes, interest on loans, electricity, consumption, etc.

Problems, Requirements, and Programs

80. ALM, U. Cooperative housing in Sweden. 75 p., illus. New York World's Fair, Royal Swedish Com., 1939. 296.2 A16

Through Tenants Savings and Building Society (HSB) the members themselves build their homes and subsequently own and manage them cooperatively. Includes description of some of the houses built.

81. AMERICAN PUBLIC HEALTH ASSOCIATION. COMMITTEE ON THE HYGIENE OF HOUSING. Basic principles of healthful housing. Ed. 2, 32 p. New Haven, Conn., 1939. 296.2 Am3

Discusses fundamental physiological and psychological needs, and protection against contagion and accident.

82. AMERICAN PUBLIC HEALTH ASSOCIATION. COMMITTEE ON THE HYGIENE OF HOUSING. Housing for health. 211 p. Lancaster, Pa., Science Press Print. Co., 1941. 296.2 Am3H
Partial contents:
Heating and ventilation of the home by C. E. A. Winslow, p. 90-102; New possibilities in low-cost construction, by R. L. Davison, p. 103-108; Basic principles of healthful housing, Appendix A, p. 184-216.

83. BAUER, C. A citizen's guide to public housing. 90 p. Poughkeepsie, N. Y., Vassar College, 1940. 296.2 B32C
Brief discussion of rural housing.

84. BAUER, C. Modern housing. 330 p., illus. Boston, Houghton Mifflin Co., 1934. 296.2 B32
History of public housing movement. While chapters on housing in the United States are largely obsolete, the bulk of the book deals with public housing of the last century in Europe. Touches on garden cities, subsistence homesteads and the country house "ideals."

85. BLUM, J. C. Land utilization in New Hampshire: II. Summer homes and the rural economy. N. H. Agr. Expt. Sta. Bul. 344, 54 p., illus. Durham, 1942. 100 N45
The author concludes that continued "development of summer homes in New Hampshire is probable and desirable." A number of rural summer homes in New Hampshire are illustrated.

86. BONDURANT, C. A. A study of one hundred Farm Security Administration grant families in Ellis County, Kansas, 1939. Fort Hays, Kans. State Col. Studies, Gen. Ser. 3, Sociol. Ser. 1, 48 p. Hays, Kan., 1941. 280.9 K134
In chapter four, p. 28-33. the living conditions of the families are discussed under the headings: The House, Special Furnishing, Other Buildings.

87. BOYD, M. E. Preparing to serve in your rural community. Fla. Univ. Col. Ed. Proj. in Appl. Econ., Book S9-10, 80 p., illus. Ref. p. 41-42. Gainesville, 1943. 281.2 B692
Made possible by a grant from the Alfred P. Sloan Foundation, Inc.
Prepared for use of teachers and pupils in rural communities.
Living in Rural Homes, p. 14-42, gives Census statistics for housing conditions in several counties and cities in north, central and south Florida.
Suggested guide for using this publication is also available.

U. S. Bureau of Agricultural Economics cooperating.

Summary in Wash. Agr. Col. Ext. Serv. Bul. 277, 8 p. 1941.

Includes a section on living conditions, including housing, and resources and development.

134. HENDERSON, L. N. Improving our community's homes. Fla. Univ. Col. Ed. Proj. in Appl. Econ., Book S-12-1, 45 p., processed. Gainesville, 1940. Ref. p. 40-45.

Teaching material preferably for grade twelve.

Compiled and written by Leon N. Henderson, University of Florida, and members of the faculties of the assisting schools.

Made possible by grant from the Alfred P. Sloan Foundation.

Similiar teaching material for grades 10 and 11 issued under the following titles: Housing through the Ages (S-10-1, 82 p.) and Housing Standards for our Homes (S-11-1, 82 p.)

135. HOBBS, S. H., JR. Rural housing problem in the South. Rural Sociol. 3: 279-295. Sept. 1938. 281.28 R88

Offers some constructive suggestions for solution of rural housing problem including adoption, in modified form, of the Irish plan under which 60,000 cottages have been erected for farm laborers from 1883 to 1935.

Three tables give data by states for comfort and conveniences, average value of farm dwellings, etc., 1930, and tabulated results of Farm Housing Survey, 1934.

136. HOLMES, E. G., and ANGLE, G. M. The need for rural housing. 10 p., processed. Washington, D. C., Bur. Human Nutrition and Home Econ. 1944. 1.982 E2N28

Discusses what our farm homes are like as regards value, size, sanitary facilities ane equipment and state of repair, and causes of poor rural housing.

137. HUDSON, A. C. Architectured homes for American farms. Agr. Engin. 22: 344, 349. Oct. 1941. 58.8 Ag83

"There is a great need for educating farm people to a better appreciation of good design and a higher standard of housing as well as providing them with the services which will make these higher standards available. Most farm people realize that they need better facilities, but they should have guidance as to the best way to meet these needs."

200. SPIKER, L. Rural housing conditions in an Illinois township. Social Serv. Rev. 15(1): 81-103. Mar. 1941. 280.8 Sol

Condensed from author's Master of Arts field study, School of Social Service Administration, University of Chicago, 1940.

"This study of Central (fictitious name) Township was undertaken to determine conditions as to crowding and housing facilities in a rural and somewhat deteriorated township populated principally by native whites (located in west-central Illinois.) Because of the limitations in scope it perhaps does not show a picture that may be considered typical of rural Illinois, but it does reveal conditions that may be fairly general in certain economically poor agricultural regions in this and probably in many other states."

206. A SUMMARY of unified agricultural programs to meet the impacts of war and defense. Summarized from preliminary reports prepared by eight State agricultural planning committees (Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin. 111 p., processed. n. p., 1941. 281.12 St2S

Housing, sanitation, and water supply, p. 8-11.

207. SVENSSON, W. Home ownership in Sweden. Amer. Acad. Polit. and Social Sci. Ann. 197: 154-159. May 1938. 280.9 Am34

One of the purposes of the Swedish home ownership movement of the near future must be to make farms more self-sufficient.

208. SWIGER, R. R., and TAEUBER, C. Ill fed, ill clothed, ill housed--five hundred families in need of help. 59 p., processed. Washington, D. C., U. S. Bur. of Agr. Econ. and U. S. Farm Security Admin., 1942. 1.941 R4I16

Information collected as a part of case records from low-income families in 11 counties scattered over the country in connection with a rehabilitation program is tabulated. Includes information on age and condition of houses, number of rooms, and number of rooms per person, heating systems, water supply and facilities, sanitation, food storage, household equipment and furnishings.

209. SWIRE, F. M. Housing in rural America. Rural Sociol. 4: 449-457. Dec. 1939. 281.28 R88

A digest of the author's Masters' thesis "Rural Housing in the U. S.," Columbia University.

Analyzes Farm Housing Survey of 1934 presenting a depressing picture of rural housing. States what can be done "to patch some of the bad spots." Solution of the rural housing problem is "linked with the economic problem of agricultural prices and modes of production."

210. TENNESSEE. STATE PLANNING COMMISSION. Rural housing. Tenn. Planner 1(2): 41-45. Mar.-Apr. 1940. 280.7 T25T

Describes the plan of the U. S. Housing Authority for aiding rural areas in making improvements in their housing conditions. The plan necessitates the creation and establishment of a county housing authority similar in power and authority to the municipal housing authorities which have been established.

211. THOMPSON, H. M., and THOMAS, A. B. Home furnishings in the rural South. Jour. Home Econ. 35: 24-26. Jan. 1943. 321.8 J82

Reports a study of homes of 397 white families, clients of Farm Security Administration in Louisiana, Mississippi and Arkansas. Some figures are given on number of rooms, heat, light, fuel for cooking, and wall finishes.

212. U. S. BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS. After the war--full consumption. 8 p., processed. Washington, D. C., 1943. 1.982 E2Af8

Prepared by the Family Economics Division for discussion in Department of Agriculture Committees on Post-War Planning.

Lists standards as to site, construction, arrangement for family living and furnishings and equipment which farm home should meet for long-time planning.

213. U. S. BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS. Housing improvement. 2 p., processed. Washington, D. C., 1944? 1.982 A2H81

An outline covering: A. Aims in housing programs; B. What is meant by quality in a dwelling; and C. Types of research dealing with problems of quality in housing.

214. U. S. BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS. Proposed minimum adequate standards for the farm dwelling to be located on an adequate farm. 11 p., plan, processed. Washington, D. C., 1944. 1.982 E2P94

Draft for discussion prepared by home economists in the U. S. D. A. at the suggestions of the Working Group on Housing of the Interbureau Committee on Post War Programs.

198. SMITH, R. C. A statement on two suggested solutions for the problem of farm unemployment and under-employment...presented before the Senate Committee on Education and Labor, Washington, D. C., May 24, 1940. 20 p., processed. Washington, D. C., U. S. Bur. of Agr. Econ., 1940. 1.941 R3St2

The two solutions are: (1) a rural conservation works program, and (2) a rural housing program.

Also in U. S. Congress. Senate. Com. on Ed. and Labor. Violations of free speech and rights of labor. Hearings. 76th Cong., 3d sess., pursuant to S. Res. 266 (74th Cong.) Supplementary hearings, pt. 3, p. 728-746. Washington, D. C., U. S. Govt. Print. Off., 1941. 283 Un31V Sup.

Housing, p. 42-45.

200. SPIKER, L. Rural housing conditions in an Illinois township. Social Serv. Rev. 15(1): 81-103. Mar. 1941. 280.8 Sol

Condensed from author's Master of Arts field study, School of Social Service Administration, University of Chicago, 1940.

"This study of Central (fictitious name) Township was undertaken to determine conditions as to crowding and housing facilities in a rural and somewhat deteriorated township populated principally by native whites (located in west-central Illinois.) Because of the limitations in scope it perhaps does not show a picture that may be considered typical of rural Illinois, but it does reveal conditions that may be fairly general in certain economically poor agricultural regions in this and probably in many other states."

225. U. S. DEPT. OF AGRICULTURE. The farm-housing survey. U. S. Dept. Agr. Misc. Pub. 323, 42 p. Washington, D. C., 1939. 1 Ag84M

This study was a project of the Civil Works Administration and was directed by the Bureau of Home Economics, with the advice of Mordecai Ezekiel of the Office of the Secretary of Agriculture, and the active cooperation of the Bureau of Agricultural Engineering and the Extension Service.

Detailed information concerning the house, its equipment and needs for improvement, was obtained by a house-to-house canvass of farm homes in selected rural counties in January and February 1934, and tabulated. Includes data on 595, 855 occupied farmhouses in 308 counties of 46 States, or 8.6 percent of the occupied farmhouses reported for the surveyed States in the Census of Agriculture for 1935.

226. U. S. DEPT. OF AGRICULTURE. Minimum requirements for farmhouses recommended by the United States Department of Agriculture. U. S. Dept. Agr. Misc. Pub. 475, 8 p. Washington, D. C., 1941. 1 Ag84M

Choosing the site, construction features, space requirements and arrangement, kitchen, food, fuel and other storage, light and ventilation, electric wiring, heating, water supply and sanitation and health and safety are discussed.

Layout, walks and drives, lawn, trees, shrub, annuals.

276. HOPFEN, H. J. Rural construction as regards the practical organization of the working of a farm. Internatl. Rev. Agr. 32: 57T-62T. Feb. 1941. Ref. 241 In82A

"The arrangement of farm buildings with a view to reducing intercommunication to a minimum considerably facilitates the economic organization and working of a farm. Elevators allow the arrangement of buildings making for easier working. Farm working is facilitated by combining power and heat production."

277. HOTTES, A. C. See how to plant your home grounds. 48 p., illus. Des Moines, Iowa, Meredith Pub. Co., 1938. 98 H79

Pub. by Better Homes and Gardens.

Includes fences, gates, garden houses, and pools as well as general suggestions for planning.

278. HOWE, O. W. Planning the physical layout of farms. Minn. Agr. Expt. Sta. Bul. 350, 20 p., plans. University Farm, St. Paul, 1940. 100 M66

279. HULL, R. B. Planning and planting the Indiana farmsteads. Purdue Univ. Agr. Ext. Bul. 178, 2d reprint rev., 31 p., illus. Lafayette, Ind., 1944. 275.29 In2E

Location of dwelling, walks and drives, trees, shrubs, vines, construction work, grading, tile drainage.

280. ISAAC, E. E. Beautifying the farm home. Mont. State Col. Ext. Bul. 165, 24 p., illus, plan. [Bozeman] 1938. 275.29 M76C

281. LAROCK, M. J. Planning our future farmsteads. 12 p., processed. Wis. Agr. Col. Ext. Spec. Cir. Madison, 1945. 275.29 W75S

Two plans shown.

282. LONGENECKER, G. W. Some pointers in planning & planting the home grounds. Wis. Agr. Col. Ext. Stencil Cir. 241, 11 p., processed. Madison, 1945. 275.29 W75B

283. LOPER, R. M. Principles involved in planning Nebraska farmsteads. Neb. Agr. Col. Ext. Serv. Cir. 713, 5 p., plan, processed. Lincoln, 1941. 275.29 N272Ex

Gives 24 general rules for planning a new farmstead or rearranging an old one.

284. MARSDEN, T. A., JR. Walks and drives. N. H. Agr. Col. Ext. Cir. 184, 16 p., illus. Durham, 1938. 275.29 N45C

285. MONOSMITH, R. O., and BATSON, F. S. Illustrated guide to landscaping Mississippi homes. Miss. Agr. Expt. Sta. Bul. 340, 71 p., illus. State College, 1939. 100 M

Also issued as Miss. State Col. Ext. Bul. 110, 71 p., illus. State College, 1939. 275.29 M68.

Steps in landscaping; farmstead arrangement; grading; drives; area of home grounds; model plans; pools; foundation planting; fences; gates; walks; retaining walls; garden accessories; games for the home; lawns; planting lists; etc.

286. MULFORD, F. L. Beautifying the farmstead. U. S. Dept. Agr. Farmers' Bul. 1087, 38 p. Washington, D. C., 1929. 1 Ag84F

Location of the buildings, walks and drives, lawns, arrangement of plantings, etc., are considered.

287. OLSON, C. M. Our beautiful yard. Fla. Univ. Col. Ed. Proj. in Appl. Econ., Book S-3-2, 64 p., illus. Gainesville, 1943. Ref. 97 O18

Teaching material preferably for grade three. Centers around game played by a rural family planning a yard for their new home.

288. PLAN FOR ranch grounds. Pacific Rural Press 139: 399. May 18, 1940. 6 P112

Plot 100 x 218 feet designed by Norman T. Maxon.

Beautifying the home grounds, p. 635-661.

295. U. S. FARM SECUTIRY ADMINISTRATION. Region 8. Typical farmstead layouts, Tenant purchase program. 5 p., processed. Dallas, Tex., n. d.

Layouts for north, south, east and west fronts, prepared by the Office of the District Engineer, District No. 5.

296. VAN DE BOE, L. Planning and planting your own place. 290 p., illus. New York, Macmillan, 1938. 98 V28
"This book will serve particularly that territory in the United States north of the Mason and Dixon line and westward to the Rockies. The text lists many plants which are useful in home landscaping and stresses the selection and spacing of plant materials with necessary consideration to their habits of growth and adaptation. It considers the most suitable locations for the house and other landscape constructions... Its range is from the small urban property to the large suburban unit and finally to the even larger country place or small estate of a few acres."

297. WOOLEY, J. C., and HUFF, D. B. Planning the farmstead. Mo. Agr. Col. Ext. Cir. 439, 11 p., illus. Columbia, 1942. 275.29 M69C
Layouts.

Planting Materials

298. BARR, C. W. Evergreens. Mich. State Col. Agr. Ext. Bul. 178, rev., 48 p., illus. East Lansing, 1940. 275.29 M58B
Use in the landscape design and in foundation planting.

PLANS AND PLANNING

General

342. AGAN, T. The house; a text for a college course on the house. Ed. by Benjamin R. Andrews. 622 p., illus., plans. Chicago, Lippincott, 1939. Ref. 321 Ag1
What are the characteristics of a good rural home? p. 230-242.
Considers the housing needs as related to the family and to the family income, how to chose exterior design, consideration as to site, chosing wall, floor and surface finishes, lights, plumbing, heating, air conditioning, ranges, refrigerators and other household equipment and furnishings.

343. *ALLEN, M. H. What is a farm house? Miss. Val. Lumberman 75(17): 12-14. Apr. 28, 1944. 99.81 M69

344. AMERICAN LUMBERMAN. Farm engineers discuss dealer's place in improving home standards. Amer. Lumberman No. 3155, p. 22-23, 27. July 1, 1939. 99.81 Am3
Includes two plans for farmhouses and a letter addressed to the American Society of Agricultural Engineers, by the American Lumberman containing 34 suggestions to be incorporated in the design of farm houses.

345. AMERICAN LUMBERMAN. Purpose of the ideal farm home plan. Amer. Lumberman No. 3205, p. 24-26. May 31, 1941. 99.81 Am3
Blueprint plans included. Designed to include all of the requirements and practically all of the desirable features recommended by leading agricultural engineering authorities. Bill of materials presented.

346. ASHBY, W. Cooperative relations and organized effort for farm building service. 9 p., processed. Washington, D. C., U. S. Bur. of Agr. Chem. & Engin., 1940. (ACE-65) 1.932 A2Ag8
Keeping the Farm Building Plan Service up-to-date.

347. ATKINSON, W. Designed for country living. Country Gent. 111(2): 68-69. Feb. 1941. 6 C833
House of four seasons--a modern farm house.

348. B., J. W. Your post-war farm home. Proper planning will greatly improve it. New Zeal. Dairy Exporter 20 (1): 4-6. Sept. 1, 1944. 44.8 N484
Plan of "sensibly arranged farm home" included in disscussion of planning.

349. BALL, E. M. Country homes. Farmer and Stock-Breeder 58: 514. Mar. 28, 1944. 10 F228
Prize winning plans in Northamptonshire Women's Institutes, competition for designs for pair of rural cottages for the rural worker briefly described.

350. BERESFORD, H., and RODGERS, J. B. Farm buildings and equipment plans. Idaho Agr. Col. Ext. Cir. 65, 14 p. Moscow, 1939. 275.29 Id13C
Supplements U. S. Dept. Agr. Misc. Pub. 319 with a list of plans developed especially for Idaho conditions.

351. BUNNING, W. House for inland area. Country Life (Sydney) 14(33): 14. Mar. 2, 1945. 286.85 Sy2
Includes plans.

352. BUNNING, W. Small country houses. Country Life (Sydney) 14(33): 56. Mar. 2, 1945. 286.85 Ay2
Includes plans.

353. BURBANK, N. L. House construction details. Ed. 2, 313 p., lithographed. New York, Simmons-Boardman Pub. Corp., 1942. 296 B89
Construction details, photographic views of finished work, short-cut tables and brief explanatory text. Includes kitchen plans, broom closet and other closets, breakfast alcove, ironing board and other built-in equipment and shelves, fireplaces and chimneys, gates, fences, a septic tank, flooring, insulation, wiring, heating and air conditioning, windows, doors, hardware, cabins, garages, prefabrication, modern building materials, etc.

354. CARTER, D. G., and FOSTER, W. A. Farm buildings. Ed. 3, 404 p. N. Y., J. Wiley & Sons, inc., 1941. Ref., p. 393-396. 296 F81
Bibliographies at end of each chapter.
Designed as a text book for students in colleges of agriculture. Considers economics and costs of farm buildings, building materials, structural requirements and features, cost and quantity calculation, arrangement and location of buildings, environmental conditions such as heat, moisture, etc., farm housing conditions and needs, farmhouse planning, kitchen and storage equipment, problems of house construction, specifications, and house remodeling.

355. CLAYTOR, B. Bedrooms of comfort. Tex. Agr. Col. Ext. Bul. 75, rev., 16 p., illus. College Station, 1941. 275.29 T312
Essentals of a good bedroom, color, wall and floor finishes, furniture, storage.

356. A CONNECTICUT farmhouse; modern version. Architect. Rec. 94(2): 58-61, illus., plan. Aug. 1943. 296.8 Ar23

"Designed with a fresh point of view, yet to fit into group of typical Connecticut farm buildings." Basement has combination laundry-canning-milk room and a "cold room" for root crops.

357. COTTINGTON TAYLOR, D. D. The new rural cottages. Homes and Gardens 25(5): 38-39, 64. Oct. 1943. 318.8 Ou7
Critical survey of approved plans for cottages now being built for British rural workers.

358. DAVIES, J. E. Looking to its housing. La. Agr. Col. Ext. Serv., Family Forties, v. 1, No. 6, 4 p. University Station, Baton Rouge, 1941. 275.29 L93Fa
Five steps in planning a house: amount to invest; shopping for credit; specifications; list standards desired; select plan.

359. ELECTRICAL ASSOCIATION FOR WOMEN. E. A. W. point of view on post-war reconstruction. Interim report, collated by E. E. Edwards. 54 p. London [1942?] 296.2 E12
Replies and suggestions of individuals and groups to study sheets analyzed and reported here, including opinions on kitchen planning and electrical equipment, in the ideal home. Planning the ideal home and its equipment-The farmhouse, p. 30-31.

360. ERVINE, MRS. ST. J. What the country woman wants. Homes and Gardens 25(12): 38-39, 74., illus, plans, May 1944. 318.8 Ou7
Criticizes Ministry of Works plan for war-time cottages for British country labourers.

361. FIELD, D. J. The human house. 125 p., illus., plans. Boston, Houghton Mifflin Co., 1939. 296 F45
"Zoning the home is providing for all the active needs of the family around one center, for the quiet needs of the family around another, and insulating these zones against disturbance with walls, stairs, halls, storage spaces, etc., according to the necessities of the case." p. 16.
Plates show zoned houses in the $4,000-$10,000 group and in the $10,000 to $20,000 group, and four examples of planned kitchens, including a combination laundry and sewing room.

362. FINNEY, C. J. A low cost house for Texas. Tex. Engin. Expt. Sta. Bul. 76, 36 p., illus., plan. College Station, 1943. 290.9 T31
House designed and built on campus at Denton by the students in architecture of the A. & M. College of Texas and the students in fine arts of the Texas State College for Women. Considers how much the low income group can afford to spend for a house, their needs in terms of space areas, orientation, Texas weather, materials, finishes, and costs.

363. FLEXIBILITY FITS the farmer. Amer. Builder and Bldg. Age 67(1): 94-95. Jan. 1945. 296.8 Am3
Prize winner in National Association of Home Builders contest. Blue prints.

364. FREEDOM AND space in small house planning. Architect. Rec. 92(5): 57-62, illus., plans. Nov. 1942. 296.8 Ar23
Concrete suggestions for planning living rooms, combined living and dining areas, kitchens, and bedrooms in postwar houses.

365. GLASER, S. Designs for 60 small homes from $2,000 to $10,000...showing how to buy, build, and finance a small home. Unpaged. New York Coward-McCann Inc., 1939. 296 G46

Architect's drawing of exterior and plans are included for four types-American Colonial, English Cotswold, French Provincial, and Modern. Approximate costs given.

A section, entitled Planning Data for Living Activities, gives sizes, clearances and arrangements for storage, kitchen, etc.

366. GLAZE, R. A. Trends in farm building design; new developments in agricultural practices are reflected in modified farm structures to better serve the up-to-date farmer. Miss. Val. Lumberman 76(2): 17-20., illus. Jan. 12, 1945. 99.81 M69

Considers briefly influence of new materials on architectural appearance of buildings. The layout of a typical 5-acre farmstead with one all-purpose building is illustrated.

367. GREAT BRITAIN. MINISTRY OF HEALTH AND MINISTRY OF WORKS. Housing manual 1944. 104 p., illus. London, H. M. Stationery Off., 1944. 296.2 G79Ho

Contents: Housing and site planning; The house in its surroundings; The three-bedroom house; Some special occupants [including the rural worker]; Flats; Efficiency in building; New materials and methods; The heat installation; Services and equipment; Space standards; Structural standards.

Technical Appendices are contained in a separate (92 p.) volume.

368. GRIFFITH, J. R. Use of models for structural design. Agr. Engin. 19: 355-358., illus. Aug. 1938. 58.8 Ag83

369. HART, P. P. Low-cost homes for Florida. Prepared by the School of Architecture and Allied Arts of the University of Florida, Gainesville, Florida for the Sloan Project in Applied Economics. 43 p., illus., plans. Gainesville, Univ. of Fla. Press, 1941. Ref. p. 42-43. 296.2 H25

"This bulletin has been prepared with idea that the houses shown in the designs herein could be built with the prospective owner's own hands and, in as far as possible, with material which could be obtained either on his land or in the local market."

Suggestions for alterations are given, and many interior views with details of construction and explanatory notes are included. Built-in storage and drainboard and cabinet for kitchen sink are included.

370. HEIMPEL, L. G. Planning the small farm home. Macdonald Col. Jour. 5(5): 8-9. Jan. 1945. 101 M144

371. "HERE IS the way we want to live." Successful Farming 42(6): 24-25; (9): 52-53; (10): 74, 84; (11): 54-55, illus. June, Sept., Oct., Nov., 1944. 6 Su12

Ideas for kitchen, workroom, closets, basement, dining room and living room based on post-war plans of entries in Successful Homes Contest. Plans for the first prizes for remodeling and for new building are given in the June issue.

372. HOME BUILDERS convention stresses plans for postwar. Architect. Rec. 97(2): 60-63, illus., plans. Feb. 1945. 296.8 Ar23

Prize winning homes are illustrated including a farm home with separate wing for the "hired men."

373. HOWARD, E., and JOHNSON, E. Building a house. Fla. Univ. Col. Ed. Proj. in Appl. Econ., Book S-6-2. 51 p., illus. Gainesville, 1942. Ref.

Made possible by a grant from the Alfred P. Sloan Foundation, Inc.

The growing house, constructing a house, home equipment, beautifying the grounds, owning a home. Teaching materials preferably for grade six.

374. HUDSON, A. C. Architectured homes for American farms. Agr. Engin. 22: 344, 349. Oct. 1941. 58.8 Ag83

375. HUNT, W. J. Housing your farm help. Successful Farming 42(2): 101., illus. Feb. 1944. 6 Su12

A house "which fundamentally bears some similarity to round-top service buildings which have been constructed on other farms" and can be converted at a later date, if not required as dwelling.

376. IDEAL FARM houses as planned by farm people. Farmer's Mag. 42(5): 11. May 1945. 7 C165

Two plans received in Farmer's Magazine House Planning Competition.

377. JOHN B. PIERCE FOUNDATION. Family living as the basis for dwelling design. v. 1, 4, 5, illus. New York, 1943-1944. 324.9 J61

Bibliography, v. 1, p. 20-22.

Contents: v. 1. Introduction to studies of family living, by J. H. Callender; v. 4. Family behavior, attitudes and possessions, by Milton Blum and Beatrice Candee; v. 5. Measuring space and motion [in sleeping, dressing, washing], by Jane Callaghan and Catherine Palmer.

378. KELLEY, J. B. Plans for dwellings and farm buildings in Kentucky. 70 p., illus., plans. Lexington, Ky. Agr. Col. Ext. Serv., 1940.

379. LET THE House be worthy of its people. Farmers Advocate and Home Mag. 79: 716-717, illus. Oct. 26, 1944. 7 F22

Includes questionnaire entitled "Do farm houses need improvement?" which readers are asked to fill out in order to get facts for post war planning in Canada.

Comments of farm women on the questionnaire are given in Farmers Advocate and Home Mag. 79: 759, 793, 794. Nov. 9, 23, 1944.

380. LOPER, R. M. Farm house planning. Nebr. Agr. Col. Ext. Cir. 714, 2 p., processed. Lincoln, 1941. 275.29 N272Ex

381. MCCALL'S MAGAZINE. What women want in their bedrooms of tomorrow. 118 p., illus. New York, McCall Corp., 1944. 318 M12

Charts and tables tabulate the results of the "Bedrooms of Tomorrow" contest held in Dec. 1943 showing preferences for furnishings, floors, wallpaper, lighting, etc., postwar market for these, and data about contestants' present dwellings.

382. MCCALL'S MAGAZINE. What women want in their dining rooms of tomorrow; a report of the Dining Room of Tomorrow contest. 139 p., illus. New York, McCall Corp., 1944. 318 M12Wh

Charts tabulate the data supplied by the contestants "to discover who the Modern and Traditional voters are, according to ages, locale and living standards." Gives post-war market for dining room furnishings, lighting, windows, floors, wallpaper, etc.

383. MCCALL'S MAGAZINE. What women want in their living rooms of tomorrow. 141 p., illus. New York, McCall Corp., 1944. 318 M12W

Data of the "Living Rooms of Tomorrow" contest, held Sept. 1943, are tabulated "to discover who the modern and traditional voters are, according to ages, locale and living standards." Preferences and post-war market for furniture, storage units, architectural details, lighting, air conditioning, and other equipment are shown.

384. MARSDEN, E. M. Here's a home that brings contentment. Successful Farming 38(11): 14-15, 52, 53, illus., plan. Nov. 1940. 6 Su12

Description of a Wisconsin farmhouse.

385. MATTHEWS, M. L. The house and its care. Rev. ed., 371 p., illus., plans. Boston, Little, Brown and Co., 1940. 318 M43

Includes material on house planning, decoration and furnishing and management. Designed for class use. Unit-problem organization is used with references at ends of chapters. Units on such subjects as the bedroom, the kitchen, living room, laundry, etc. Consult index under subject "Farmhouse."

386. MILLER, T. A. H. Errors, corrections, and revision of the Northeast plan service. 5 p., processed. Washington, D. C., U. S. Bur. Agr. Chem. and Engin., 1940. (ACE-66) 1.932 A2Ag8

Object of this paper is to "point out errors in the present plans used by the Northeastern States and to suggest corrections which might be considered if a revision of Miscellaneous Publication 278 is made."

387. *MODERN FARM and suburban buildings; farm home and roadside buildings, 54 designs, some with floor plans. 36 p. Milwaukee, Wis., Caspar, Krueger, Dory, Co., 1939.

388. MONSON, O. W. Housing farm laborers. Mont. State Col. Ext. Bul. 219, 16 p. Bozeman, 1943. 275.29 M76C

Plans for a bunk house and bath house.

Also contains Recommended Minimum Requirements for a Farm House, p. 9-16.

389. NATIONAL HOMES FOUNDATION. Engineered low-cost farm and village homes. 23 p., illus, plans. Washington, D. C., 1941. 296 N216

Quarter-inch scale working drawings, complete with specifications and material lists are said to be available. Four floor plans for farm homes and four for village homes, with various exterior finishes are shown.

Gives information regarding credit agencies which can help. Also lists trade associations in the home building industry which are sources of information on plans, building materials, and equipment.

390. NICKELL, P. What are you doing about your farm home? Iowa Farm Econ. 11(3): 6-7. Mar. 1945. 275.28 Io92

Philosophy of planning.

391. NICKELL, P. What do you need in your farm home. Iowa Farm Econ. 11 (4): 6-7, illus. Apr. 1945. 275.28 Io92

Chart shows what work is done and where.

392. OLSON, C. M. Your house and mine. Fla. Univ. Col. Ed. Proj. in Appl. Econ. Book S-4-2, 112 p., processed, illus. Gainesville, 1944.

Teaching material preferably for grade four.

A Guide for Using Your House and Mine is also available.

Location on the plot; construction-durability, with use of native materials, where possible, outside appearance-design; arrangement of rooms for efficient use and comfort; protection from fire, insects, and weather; ventilation; insulation; heating facilities; furnishings; adequate and appropriate yard; and sanitary systems.

393. OVERBY, F. M. Farm house and the architect. Agr. Engin. 21: 103-104. Mar. 1940. 58.8 Ag83

Architectural considerations of stock plans. One-story farm houses. Time-saving lumber. Factors delaying home improvements.

Abstract in Hoard's Dairyman 85: 490. Oct. 10, 1940. 44.8 H65

394. PEARSON, L. C. The house I want. Farmer-Stockman 57(12): 1, 19, 21. Dec. 1944. 6 Ok45

Meeting of 12 farm women with Oklahoma Extension Service and ideas exchanged.

395. PICKERING, E. Shelter for living. 370 p., illus., plans. New York, J. Wiley and Sons, Inc., 1941. 296.2 P58

Emphasis is upon function and use, but appearance, cost, construction and equipment are included.

Ch. 17, The Rural Home, p. 136-146, includes a consideration of location of the house.

396. PIDGEON, R. E. Improvement drawings on file in the southern regional office. n. p., processed. Atlanta, Ga., U. S. Forest Serv., 1939. 1.9621 R8Im7

Also includes Supplementary List of Improvement Drawings on File in the Southern Regional Office, January 1, 1942. [4 p.], processed.

Main list includes a numerical index corrected to Nov. 1, 1939, an alphabetical index corrected to May 15, 1940 and description of drawings listed numerically.

397. RODGERS, I. O. Wake up and do! Fla. Univ. Col. Ed. Proj. in Appl. Econ., Book S 8-8, 50 p. Gainesville, 1943. Ref.

Provides teaching material helpful in planning, designing, and choosing material for building and remodeling the home. Preferably for grade seven.

398. ROGERS, T. S. Plan your house to suit yourself. 282 p., illus. New York, Scribner, 1938.

Pt. 1. Approach to planning; Pt. 2. Developing the plan; Pt. 3. Equipment and construction materials; Pt. 4. Adjusting desires to dollars.

Gives information on basement, laundry, dining room, living room, kitchen, insulation, heating, lighting, air conditioning.

A chapter is devoted to closets, p. 130-149.

399. ROSS, D. Farm families say... "Here's what we want in new homes." Miss. Val., Lumberman 76(19): 9, 29-30, illus. May 11, 1945. 99.81 M69

New home plans of farm families as revealed by "Successful Farming" survey and reported in "What a thousand farm families are going to do about building."

400. ROYAL SOCIETY OF ARTS, LONDON. The post-war home; a series of lectures on its interior and equipment. 120 p. London, The Studio Ltd., 1942. 296.2 R81

Partial contents: Using space to advantage, by Elizabeth Denby; Materials, old and new, by E. F. Armstrong; Adaptation of design to standardization and mass production, by F. R. Yerbury; Pottery, glass, and plastics, by James Hogan; "The occupier," by George Hicks; Lighting, heating and ventilation, by R. Fitzmaurice.

401. SCHAFFHAUSEN, J. F. Tomorrow's home today. Country Gent. 114(6): 14, 26. June 1944. 6 C833

Advocates new building in preference to remodeling for hired help, using farm labor to help build. Suggests starting with a basic unit with later expansion.

402. SMITH, C. B. The new home owners handbook. 204 p. New York, Modern Age Books, Inc. [1938]

What goes into the well-built house; insulation and its values; heating the home; air conditioning; electricity; modern kitchen; bathroom; living and dining rooms; basement; prefabricated house; adequate garage; landscaping; rural water supply and sanitation; how to make home repairs; tools for odd jobs; painting, varnishing and finishing.

403. SMITH, J. F. C. Plans for post war farm homes. Farmer's Mag. 42(1): 11, 41, 47, illus. Jan. 1945. 7 C165

404. SMITH, J. F. C. Put your [house] plans on paper. Farmer's Mag. 42(2): 11, 55. Feb. 1945. 7 C165

Suggested plan for farmhouse included. Platform in garage permits loading and unloading under cover, and convenient stairs lead to basement storage. Workbench in garage, office, washroom and utility room are other features.

405. SOOY, L. P., and WOODBRIDGE, V. Plan your own home. 228 p., illus., plans. Stanford Univ., Calif., Stanford Univ. Press, 1940. 518 So6

Philosophy presented by book is that home must be "first, an expression of the family individuality or personality; second, a functional plant; third, a thing of beauty."

Includes chapters on analysis of sites, types of architecture, landscape plan, lighting, the outdoor living room, the kitchen, etc.

406. SUCCESSFUL FARMING. Successful Farming's building guide for farm and home. 78 p., illus., plans. Des Moines, Ia., Meredith Pub. Co., 1940. 296 Su1

Includes 5 Bildcost houses for which working plans are available. Discusses basic principles of home design and gives examples of remodeling. Pt. IV. is a building manual which considers water-supply and sewage-disposal systems, electricity, financing, heating, foundations, insulation, paint, walls, floors, roofing, and stormproofing.

407. SWANK, A. H. Well-how big is a room? Pencil Points 23(3): 151-152. Mar. 1942. 296.8 P37

Chart showing requirements of various regulatory agencies concerned with housing giving comparison of size regulations and count values for rooms in dwellings.

408. TOWNSEND, G., and DALZELL, J. R. How to plan a house. 525 p., illus., plans. American Tech. Soc., 1942. Lib. Cong.

Set of full-sized blueprints in pocket at back of book.

409. U. S. BUREAU OF AGRICULTURAL CHEMISTRY AND ENGINEERING. DIVISION OF FARM STRUCTURES. List of farm building plans used in the regional plan services at the State agricultural colleges. 42 p., processed. Washington, D. C., 1940. 1.923 F2L69

Drawings were selected by the Bureau of Agricultural Chemistry and Engineering and the Extension Service in cooperation with the State agricultural colleges and their cooperative extension services in agriculture and home economics, and the Midwest Plan Service.

Among the plans listed are those for a number of farmhouses, 3 tourist cabins and a summer camp, refrigeration and cooling equipment, and sanitation and water supply systems.

410. U. S. DEPT. OF AGRICULTURE. Plans of farm buildings for northeastern States. U. S. Dept. Agr. Misc. Pub. 278, illus. 128 p. Washington, D. C., 1937. 1 Ag84M

Compiled by the Bureau of Agricultural Engineering and the Extension Service in cooperation with 12 colleges and universities and their cooperative extension services in agriculture and home economics.

Plans included for 13 farmhouses, 3 garages, 3 tourist cabins, summer camp, outdoor fireplace and picnic table, 2 refrigerators, trash burner, and incinerator

411. U. S. DEPT. OF AGRICULTURE. Plans of farm buildings for southern States. U. S. Dept. Agr. Misc. Pub. 360, 123 p., illus. Washington, D. C., 1940. 1 Ag84M

Compiled by the Bureau of Agricultural Chemistry and Engineering and the Extension Service in cooperation with the agricultural engineering departments and the cooperative extension services in agriculture and home economics of 12 colleges and universities.

Plans for 15 farmhouses, 2 garages, 2 cabins, an incinerator, outdoor fireplace, and trash burner are included.

412. U. S. DEPT. OF AGRICULTURE. Plans of farm buildings for western States. U. S. Dept. Agr. Misc. Pub. 319, 120 p., illus. Washington, D. C., 1939. 1 Ag84M

Compiled by the Bureau of Agricultural Engineering and the Extension Service in cooperation with 11 colleges and universities and their cooperative extension services in agriculture and home economics.

Includes plans for 14 types of farmhouses, and screening and foundation details; 2 garages; 3 log cabins; and structural equipment, such as walk-in refrigerators, both a side-icer and a mechanical one, icebox, meat-curing box, evaporator cooler, and simple farm water systems.

413. U. S. FARM SECURITY ADMINISTRATION. Small houses. 16 p., illus., plans. Washington, D. C., 1939. 1.5 Sml

Experience gained by the Farm Security Administration in building low-cost homes for farm families. Prefabricated, and small tenant houses, frame houses in southern States, stone houses in Cumberland Homesteads, Tennessee and houses in Mt. Olive, Ala., Palmerdale Homesteads, Ala., Greenwood, Ala., and Newport News, Va. are shown.

414. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 1. REGION 4. Farm building plans. n. p., processed. Raleigh, N. C., 1940.

Plans for 20 houses and other farm buildings are illustrated.

415. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 3 and 8. Standard building plans. n. p., processed. Indianapolis, Ind., and Milwaukee, Wis., 1941.

Issued by the Office of the Chief Engineer.

Plans for 13 houses and other farm buildings shown.

416. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 5. Farm building plans. n. p., processed. Dallas, Tex., 1939.

Plans for 18 dwellings and other farm buildings.

417. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 5. The farm home. 21 p., processed. Dallas, Tex., 1941.

"Contains miniature sketches of working drawings covering house plans developed by the District Engineer, in cooperation with the Regional Chief of Home Management, of the U. S. Department of Agriculture, Farm Security Administration, Dallas, Texas. "It has been prepared primarily for the use of County Committees, Rural Supervisors, and Home Management Supervisors to aid prospective Tenant Purchase Borrowers."

418. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 6. Farm building plans. 6 p., processed. San Francisco, Calif., 1941.

Plans for 6 houses illustrated.

419. U. S. FARM SECURITY ADMINISTRATION. DISTRICT 7. Farm building plans. Ed. 2., n. p., processed. Denver, Colo., n. d.

Plans for 6 houses (3 of adobe and 3 frame), 2 garages, windmill and water tank towers, pump houses, and other farm buildings, issued by Office of Chief Engineer.

420. U. S. FARM SECURITY ADMINISTRATION. REGION 5. Farm building plans. Loose leaf in folder, processed. Montgomery, Ala., 1940.

Twelve house plans and other farm building plans developed by the District Engineer's Office. Reverse plans for the houses also shown.

421. U. S. FARM SECURITY ADMINISTRATION. REGION 6. Small homes for the rural South. Ed. 2, n. p., illus, processed. Little Rock, Ark., 1940. 1.9506 Sml

Twenty-two house plans designed by architects and engineers of the Farm Security Administration to assist borrowers under the Bankhead-Jones Farm Tenant Purchase Law. Working drawings are available. Includes also a kitchen, a ventilation system, sanitation and water supply system plans, barns and other service buildings, 3 typical farmstead layouts, fences and bridges.

422. *U. S. FARM SECURITY ADMINISTRATION. REGION 7. General construction. Plans, processed. Lincoln, Nebr., [1945]

Plans prepared by the Engineering Division for homes and farm structures in Nebraska, Kansas, North and South Dakota. Minimum cost sheets.

423. U. S. FEDERAL HOUSING ADMINISTRATION. Principles of planning small houses. U. S. Fed. Housing Admin. Tech. Bul. 4, rev., 44 p., illus. Washington, D. C., U. S. Govt. Print. Off., 1940. 173.2 H81T

424. UNITED STATES GYPSUM CO. Planning your farm home. 123 p., illus., plans. Chicago, 1941. 296.2 Un36

Twelve house plans and 6 remodeling plans included are available.

Includes information on farmstead arrangement, landscaping, planning the different rooms, wiring, heating system, water system, septic tank, fire protection, financing, insulation, selecting floors, doors and windows, wall finish, etc.

425. U. S. NATIONAL BUREAU OF STANDARDS. House plan services. U. S. Natl. Bur. Standards, Letter Cir. 787, 1 p., processed. Washington, 1945. 157.88 L56

Supersedes LC428.

Lists organizations which issue house plans, floor plans, or suggestions for small house design.

426. *VIVIENDAS rurales, tipo "A" zona templada. Aberdeen Angus. No. 18, p. 67-88. Autumn 1943. 43.8 Ab33

First of a series of rural house types prepared by the Office of Architecture of the Argentine Bank of the Nation under credit offered by the Bank. Numerous building diagrams are included.

427. WARD, W. G., and WARNER, E. D. A house is what we make. Kans. State Col. Agr. Ext. M Cir. 19., n. p., illus., processed. Manhattan, 1938. 275.29 K13ExM

Make the approach inviting; essentials in the farm house plan; know your house, structural elements and materials; insulation; termites; air conditioning; sewage disposal; modern heating for the farm home; water systems for the farm home; farm plumbing; farm lighting; and painting.

428. WAUGH, A. Planning the little house. New York, McGraw-Hill Book Co., 1939. 267 p., illus., plans. 296 W35

References at end of most chapters.

Planning a farmhouse, p. 129-133.

Partial list of chapter headings: Planning the kitchen; Planning the stairway; Buying and remodeling a house; Constructing a scale model; Old world houses; American houses; The modern house; Materials and construction; Finishing materials; Heating; Plumbing; Lighting.

429. WEYERHAUSER SALES COMPANY. 4-square farm building service. Modern designs; engineered construction. Variously paged, illus. St. Paul, Minn., [1942] 296 W542F
Includes plans for a garage and workshop and 8 room farmhouse. Full size plans drawn to scale are available with material lists for ready-to-use 4-square lumber.

430. WICHERS, H. E. Better homes for Kansas farms. Kans. Engin. Expt. Sta. Bul. 43, 80 p., illus. Manhattan, 1942. Ref. 290.9 K132
Consideration is given to the farmstead layout, including plans, solving the farmhouse problems, which includes water supply, sewage disposal, lighting, heating and air conditioning, room analysis, including closets, recreation room, fruit room, etc., and construction. Illustrations and floor plans for 33 designs are given. Some consideration is given to the growing house.

431. WICHERS, H. E. Here's a home for postwar farming. Successful Farming. 41(11): 22-23, 87., illus, plan. Nov. 1943. 6 Su12
Bildcost house 1311.

432. WICHERS, H. E. Home designed for lifetimes! Successful Farming 38 (10): 14, 61, illus., plan. Oct. 1940. 6 Su12
Bildcost plans for this house available. How a Kansas farmer built it of native stone is described.

433. WICHERS, H. E. House with a past and a future. Successful Farming 41(3): 23, 56, 57., illus., plan. Mar. 1943. 6 Su12
Bildcost House S1303.

434. WICHERS, H. E. Low cost homes. Kans. Engin Expt. Sta. Bul. 38, 50 p. Manhattan, 1939. Ref. p. 48-49. 290.9 K132
Designs for 28 low-cost homes and floor plans, are illustrated. Many of these are farmhouses. The problem, room analysis and the budget are considered.

435. WICHERS, H. E. One step ahead of the future. Successful Farming 40(7): 13, 44., illus, plan. July 1942. 6 Su12
Bildcost House S1207 designed by H. E. Wichers.

436. WICHERS, H. E. 1,018 farmers planned this house. Successful Farming 43(6): 24-25, illus., plan. June 1945. 6 Su12
Bildcost house S1506. Folder containing plans and list of needed materials available. Ideas selected from Successful Home Planning Contest.

437. WICHERS, H. E. They build a bargain in comfort. Successful Farming 39(4): 18, 38, 39, illus., plan. Apr. 1941. 6 Su12
A Bildcost farmhouse built in Kansas.

438. WICHERS, H. E. To builders on a shoestring. Successful Farming 39: 18-19, 52, 53. Nov. 1941. 6 Su12
Bildcost home S1111 illustrated and floor plan shown.

439. WILLS, R. B. Houses for good living. 104 p. New York, Architectural Book Pub. Co., Inc., c1940. 296 W68
"This book attempts to break the continuity of mediocre house design, by giving you essential facts concerning the true possibilities of the small house, through photographic illustrations."
Five short introductory chapters discuss analyzing your needs, styles, budgeting, ways of saving money in building, and value of architect's services. Floor plans for houses illustrated are included.

440. WILLS, R. B. Space flexibility for the small house. Architect. Rec. 97(4): 76-84, illus. May 1945. 295.8 Ar23

441. WILSON, M., and WELLS, L. House planning ideas of Oregon rural women. Oreg. Agr. Expt. Sta. Bul. 369., 28 p. Corvallis, 1940. 100 Or3
In 1939, 450 Oregon homemakers, 60 per cent of them living on farms, participated in a study by recording their opinions concerning the desirability of various features of a dwelling.

442. WINNERS OF Productive Home competition announced. Architect. Rec. 85 (5): 53-58, illus., plans. May 1939. 296.8 Ar23
Designs of five winners in the Productive Home Architectural Competition, sponsored by organizations interested in decentralization, domestic production, land conservation, and related objectives. These show layout of land and outbuildings and are designed for the man with an income of $2,500 a year, but contemplates that some of the construction and finishing will be done by the family. Designed for subsistence homestead, or semi-agricultural situation. Comments of judges given.

443. WOOLEY, J. C. Farm buildings. 345 p., illus., plans. New York, McGraw-Hill Book Co., Inc., 1941. 296 W88
Several chapters relate to the farm home and deal with planning the farm home, design and construction, heating, plumbing, water system and sewage disposal. Other chapters consider building materials, structural design, and management of existing buildings, including a chapter on locating and planning the farmstead, and one on appraisal. There is also a chapter on drafting and interpreting plans.

444. WOOLEY, J. C., and RICKETTS, R. L. Plans for farm houses. Mo. Agr. Col. Ext. Cir. 475, p. 49-52. Columbia, 1942. 275.29 M69C
Three farmhouses are illustrated and floor plans given.

Details and Storage

532. WESTINGHOUSE ELECTRIC & MANUFACTURING CO. HOME PLANNING DEPT. Westinghouse kitchen planning manual. 35 p., illus., plans. Mansfield, Ohio, 1939. 321 W52
Fundamentals of planning, including storage requirements, lighting, color, etc.; individual centers and standard plans; installation data, including cabinets, work and wall surfaces and floor coverings.

533. WEYERHAUSER SALES COMPANY. 4-square lumberbuilt farm equipment. 57 p., illus. St. Paul, Minn., [1943.] 296 W542
Includes plans for building kitchen cabinets, utility cabinet for canning and butchering, a tool cabinet to be hung on the wall, a lid rack to fasten inside kitchen cabinet, a folding bench and a combination stool and stepladder. A material list for Weyerhaeuser 4-square lumber is given.

534. WICHERS, H. E. Scooter cabinet for handy storage. Successful Farming 43(3): 62, illus. Mar. 1945. 6 Su12
Easy to make for the kitchen.

535. WICHERS, H. E. You can make these for your kitchen. Successful Farming 36(4): 42-43. Apr. 1938. 6 Su12

BUILDING MATERIALS, TECHNIQUES, AND EQUIPMENT

General

536. AMERICAN ARCHITECTURE: 1891-1941. Architect. Rec. 89(1): 42-136; (2): 33-112, illus., plans. Jan., Feb. 1941. 296.8 Ar23
Part 1 reviews contributions of science and technology to architecture in the way of designs, materials, and biological requirements such as atmosphere, light, sound, and sanitation. Examples of modern two-family and single-family houses are given, p. 79-112.
Part 2 discusses the architects' altered concept of the function of building in society.

537. BOGNER, W. F. The postwar house. Architect. Rec. 96(6): 89-102, illus. Dec. 1944. 296.8 Ar23

Direction of progress for postwar house building, in the house building techniques, and for design.

538. CARTER, D. G. Get ready for your postwar farm home., Capper's Farmer 55(3): 11, 56-57, illus, plans. Mar. 1944. 6 M693

Discusses improvements in building materials and techniques.

539. CARTER, D. G. New and improved building materials. Prog. Farmer, Car.-Va. Ed. 60(3): 20-21. Mar. 1945. 6 P945

540. CASE, H. C. M. Some economic aspects of the use of industrial minerals in farm-improvement construction. Ill. Geol. Survey Bul. 68, p. 299-305. Urbana, 1944. 406 I16B

Tables show the following for 100 farms surveyed in Champaign County: number and cost of improvements in past 10 years and those anticipated in next 5 years; numbers, average age, and per cent of materials in buildings; and materials preferred, for foundations, walls, floors, and roofs, and reasons for preferences.

541. CENTRAL HOUSING COMMITTEE ON RESEARCH, DESIGN, AND CONSTRUCTION. SUBCOMMITTE ON DEFINITIONS. A glossary of housing terms. U. S. Natl. Bur. Standards. Bldg. Materials and Structures Rpt. BMS 91, 32 p. Washington, D. C., 1942. 157.88 B862

542. COLEAN, M. L. The impact of the war on housing. 22 p. New York, Amer. Bankers Assoc., 1942.

Series of articles on new procedures in the home building field. Contents: Housing faces big changes, p. 3-5; New homebuilding techniques, p. 6-8; Materials behind mortgages, p. 9-11; Businesslike housebuilding, p. 12-14; The "where" factor in mortgages, p. 15-17; Good house upkeeping, p. 18-19; Housing a nation at war, p. 20-22.

543. DRYDEN, H. L. Performance for building materials and structures. Central Housing Com. on Res., Design and Construct. Tech. Bul. 1, p. D1-D3, processed. Washington, D. C., Aug. 1941. 296.29 C332

From an address by Mr. Dryden on the Bureau of Standards Program.

544. EKBLAW, K. J. T. Low cost building construction in practice. Agr. Engin 19: 9-10, illus., plan. Jan. 1938. 58.8 Ag83

Construction of small home described. Chief departure from the usual type of construction is the sealing of dead end spaces in the wall between the interior and exterior wall coverings. The coverings may be galvanized iron or may be sided by plaster board.

545. FREY, A. In search of a living architecture. 95 p. New York, Architectural Book Pub. Co., Inc. [1939] 296 F89

The author shows by means of photographs how modern forms of architecture have evolved from scientific knowledge in the form of new materials and new construction methods.

546. GRAF, D. W., Comp. Agricultural engineering; a selected bibliography. 373 p., processed. Washington, D. C., U. S. Bur. Agr. Engin., 1937. 1.9 En32Ag

Available only in libraries. Sections on buildings: General and dwellings (p. 185-199) and Structural Equipment (p. 285-320) have references of interest. This bibliography "lists principally publications of the United States Department of Agriculture, the State agricultural experiment stations, and the State extension services from their beginning through 1935."

547. HAMLIN, T. F. The architecture of the future. Pencil Points 24(3): 64-69, (4): 65-69, illus. Mar., Apr. 1943. 296.8 P37
Pt. 2. Techniques, materials and design.

548. HOUSE AND GARDEN HOMEBUILDERS' GUIDE. House and Gard. Greenwich, Conn. 77(3, sec. 2): 5-36, 40, 48, 50, illus. Mar. 1940. 80 H81
New building materials and equipment. Foundations for house with or without basement; wood selection; exterior walls; roofs; insulation; windows; walls and floors; paint; light control; temperature control; bathdressing rooms; kitchens; hardware; accessories; additional equipment.

549. HOPFEN, H. J. The evolution, through the war, of building methods and its effect on agriculture. Internatl. Rev. Agr. 34: 77T-83T. Mar. 1943. 241 In82A
Regional planning, spacing of buildings, simplification of building methods and effect on agriculture.

550. HOPFEN, H. J. Improvements in rural building. Internatl. Rev. Agr. 33(3): 110T-122T. Mar. 1942. 241 In82A
Publications consulted: p. 121T-122T.
Possibilities of developing rural construction are examined in relation to the following; Disposal of the different rooms, arrangement of the buildings, their height, roof structure, structure of walls and ceilings, choice of building material and interior installations.

551. HOW TO continue home building. Amer. Builder and Bldg. Age. 67(2): 88. Feb. 1945. 296.8 Am3
Tells of appointment of committee by National Homes Foundation to conduct research "into newer developments and applications of techniques for use of tried materials," namely concrete, clay tile and brick, gypsum, steel or lumber.

552. LOPEZ, F. G., JR. Taking stock for the future. Pencil Points 26(1): 69-84, illus. Jan. 1945. 296.8 P37
A resumé of what is available in building materials and equipment. Manufacturers and their products are listed and research under way indicated.

553. MATTHEWS, M. L., Comp. Notes on housing. Jour. Home Econ. 36: 334-336. June 1944. 321.8 J82
Statements and beliefs of those engaged in housing research for the Purdue Research Foundation regarding labor costs, equipment, air conditioning, etc., in houses. The weaknesses of the prefabricated kitchen-bathroom unit and built-in appliances are pointed out.

554. MODULAR DESIGNS in new products counted on to permit economies. Miss. Val. Lumberman 76(13): 15. Mar. 30, 1945. 99.81 M69
Will permit important economies in cost of postwar building.

555. MODULAR PLANNING. Amer. Builder and Bldg. Age 66(9): 84-85, 100; (10): 116-117, diagrs. Sept., Oct. 1944. 296.8 Am3
An explanation for the builder and architect of the application to building plans and details of modular co-ordination.

556. POSTWAR BUILDING techniques. Architect. Forum 82(1): 129-136, 138, 140, 142; (2): 139-144, 146, 150, 154, 158; (3): 143-148, 150, 154, 158, 162, 166. Jan., Feb., Mar. 1945. 296.8 B76
Pt. 1. Building techniques; pt. 2. New materials; pt. 3. Equipment.

557. POULTON, R. W. $20,000,000,000.00. Breeder's Gaz. 110(2): 7, 32, 33, 34, 35. Feb. 1945. 49 B74

The author summarizes replies to 80 letters received from concerns in the building materials field telling what they have done in the way of research, booklets, etc., which may offer help to farmers in their postwar farm buildings plans.

558. PRODUCERS' COUNCIL, INC. TECHNICAL COMMITTEE. A statement on postwar building materials and design. Architect. Rec. 96(5): 62-63. Nov. 1944. 296.8 Ar23

Cost of construction included.

559. PRODUCTS FOR postwar plans. Architect. Rec. 96(6): 59-67. Dec. 1944. 296.8 Ar23

Structural materials and systems; finish materials; heating and air conditioning; plumbing and sanitation; electrical and lighting equipment; other building products.

560. U. S. BUREAU OF PLANT INDUSTRY, SOILS AND AGRICULTURAL ENGINEERING. Publications helpful in building and remodeling farm structures. U. S. Bur. Plant. Indus., Soils and Agr. Engin. Inform. Ser. 68, rev., 2 p., processed. Washington, D. C., 1945. 1.9 R531I

561. U. S. NATIONAL BUREAU OF STANDARDS. List of published material relating to home building and maintenance. U. S. Natl. Bur. Standards, Letter Cir. 771, 34 p., processed. Washington, 1944. 157.88 L56

Supersedes LC737. This list "includes publications issued by the Federal Government and by national trade associations and other organizations in which materials, equipment, and recommended methods of applying or installing them are described."

Subjects covered are brick; chimneys and fireplaces; clay products; concrete; electrical financing; fire prevention and fire protection; floors and walks; garage construction; gas; heating, ventilating, and air conditioning; hollow building tile; house construction; house maintenance and modernization; household helps; insulation and soundproofing; kitchens; landscaping; mortar; painting and decorating; planning; plaster and stucco; plumbing; porcelain enamel products; refrigeration; roofing; sewage disposal; stone; water; wood and lumber; miscellaneous.

The publications of the U. S. Dept. of Agriculture are the only items in list which are repeated in this bibliography.

562. VALLIN, A. H., and PALMER, J. J. W. Materials for our post-war homes. Dom. Com. 32: 11, 28, illus. Mar. 1944.

"A resumé intended to call attention to some of the more unusual of the new products and [their] uses, and to indicate something of the place they may come to take in post-war residential construction."

Adobe and Rammed Earth

563. BETTS, M. C., and MILLER, T. A. H. Rammed earth walls for buildings. U. S. Dept. Agr. Farmers' Bul. 1500, slightly rev., 23 p., illus. Washington, D. C., 1937. 1 Ag84F

564. CHANG, C. W. An experimental study on the development of adobe structures in soils. Soil Sci. 52(3): 213-227. Ref., p. 222-223. Sept. 1941. 56.8 So3

Soils from which abode bricks are made.

565. DUMOULIN, R. K. Rammed earth construction. Consumers' Digest 6(3): 41-46. Sept. 1939. 280.8 C766

566. EVANS, L. T. Structural abode. Engin. News-Rec. 122: 498-499. Apr. 13, 1939. 290.9 En34
Tests made on machine-made structural adobes as a result of which writer feels it can be designed to withstand seismic loads.

567. FENTON, F. C. Use of earth as a building material. Kans. Eng. Expt. Sta. Bul. 41, 34 p., illus. Manhattan, 1941. 290.9 K132
Soil stabilization selection and, methods of building earth walls, including rammed earth construction, stone surface walls with stabilized soil backing and wall construction using earth blocks.

568. GLENN, H. E. Rammed earth building construction. S. C. Engin. Expt. Sta. Bul. 3, 18 p., illus. Clemson, 1943. 290.9 C592

569. GROBEN, W. E. Adobe architecture; its design and construction. 24 p., processed, illus., plans. Washington, D. C. U. S. Forest Serv., 1941. 1.962 E2Ad7
An appendix contains photographs of adobe dwellings and buildings, and drawings of construction details.

570. HANSEN, E. L. Suitability of stabilized soil for building construction. Ill. Engin. Expt. Sta. Bul. 333, 40 p., illus. Ref., p. 35-37. Urbana, 1941. 290.9 I162B

571. HOPFEN, H. J. Recent methods of clay construction. Internatl. Rev. Agr. 32: 338T-343T. Oct. 1941. 241 In82A
Description of the Dünne (Westphalia) method in which undried clay blocks are put into place without mortar. The possibilities of the use of sheetings or casings for pisé construction.

572. LEGAULT, A. R. Waterproofing of adobe tested to extend its use into the rainy areas of the State. Colo. Agr. Expt. Sta. Farm Bul. 5 (3): 13-15. July/Sept. 1943. 100 C71S
Investigations carried on by the Civil Engineering Section of the Experiment Station on the use of Colorado soils for making building blocks.

573. LONG, J. D. Adobe construction. Calif. Agr. Expt. Sta. Bul. 472, rev., 76 p., illus., plans. Berkeley, 1941. 100 C12S
Methods of construction, selection and treatment of soil materials, structural design, wall finishes, advantages and disadvantages, and plans and specifications.

574. MACDONALD, F. Terracrete; building with rammed earth-cement. 46 p., illus. Chestertown, Md., The Author, 1939. Lib. Cong.

575. MILLER, T. A. H. Adobe or sun-dried brick for farm buildings. U. S. Dept. Agr. Farmers' Bul. 1720, 18 p. Washington, D. C., 1934. 1 Ag84F
Principles and methods of construction developed in the Southwest.

576. OUT OF the good earth will come our dream house. Amer. Home 30(4): 24-26, illus., plan. Sept. 1943. 80 Am313

577. PATTY, R. L. Paints and plasters for rammed earth walls. S. Dak. Agr. Expt. Sta. Bul. 336, 39 p., illus. Brookings, 1940. 100 So82

578. PATTY, R. L. Puddled-earth and rammed-earth walls. Agr. Engin. 20: 311-312, 319. Aug. 1939. 58.8 Ag83

579. PATTY, R. L., and MINIUM, L. W. Rammed earth walls for farm buildings. S. Dak. Agr. Expt. Sta. Bul. 277, rev., 67 p., illus. Brookings, 1938. Ref. 100 So82
Experimental study of "pisé" construction to secure information concerning its use in South Dakota.

580. PATTY, R. L. Soil admixtures for earth walls. Agr. Engin. 23: 291-294. Sept. 1942. 58.8 Ag83
Admixtures of sand, cinders, Portland cement, Tannic acid, common salt, fiber, asphalt emulsion.

581. U. S. LIBRARY OF CONGRESS. DIVISION OF BIBLIOGRAPHY. List of references on pisé de terre and adobe construction. 8 p., photoprint. Washington, D. C., 1940. 241.4 Un3L

582. U. S. FARM SECURITY ADMINISTRATION. Experiments in rammed earth construction. 13 p., processed. [Washington, D. C., 1938.] 1.95 Ex7
Experiments conducted in Alabama.

583. U. S. FARM SECURITY ADMINISTRATION. Statement on condition of rammed earth houses. 1 p., processed. [Washington, D. C., 1940.] 1.95 St24
Condition in May 1940 of seven houses built in 1936 on the Mt. Olive Homestead project.

Estimates and Specifications

584. *DINGMAN, C. F. Estimating building costs. Ed. 3, 401 p., illus. N. Y., McGraw-Hill, 1944.

585. MALM, A. Estimating charts for farm buildings. 72 p. Minneapolis, Minn., The Author, 1939. 296 M292
Charts for estimating masonry work, painting, windows, nails, labor hours, material for privy, and several kinds of garages.

586. PEASLEE, H. W. Streamlined specifications. Pencil Points 20: 533-538. Aug. 1939. 296.8 P37

587. RAMSEY, C. G., and SLEEPER, H. R. Architectural graphic standards for architects, engineers, decorators, builders and draftsmen. Ed. 2, 344 p. New York, Wiley, 1936. 296 R14

588. SLEEPER, H. R. Architectural specifications. 822 p. New York, J. Wiley & Sons, Inc. [1940.] 296 S12
Designed as aid to the specification writer.

589. U. S. HOME OWNERS' LOAN CORPORATION, APPRAISAL AND RECONDITIONING DIVISION. Master specifications for reconditioning (including repairing, rehabilitation, rebuilding, enlargement, and demolition) Ed. 3, 226 p. Washington, D. C., 1940. 173.2 H752M

Floors and Floor Coverings

590. ALLEN, M. H. Clay tile engineer gives tips on low-cost, fire-resistant floors. Miss. Val. Lumberman 76(8): 13-15, 25. Feb. 23, 1945. 99.81 M69

591. ALLEN, M. H. Construction methods used in building precast tile floor joists are described. Miss. Val. Lumberman 76(17): 11-13, 30, illus. Apr. 27, 1945. 99.81 M69
"T" beam type described.

592. BENNETT, E. K. Linoleum and felt-base floor coverings; selection and care. N. Y. Agr. Col. Cornell Ext. Bul. 610, 29 p., illus. Ithaca, 1943. 275.29 N48E
Selection, installation, care, and refinishing.

593. BROOKS, C. P. Finishing and refinishing floors. Vt. Agr. Col. Ext. Brieflet 713, 5 p., processed. Burlington, 1945. 275.29 V59E

594. CLAYTOR, B. Finishing floors, walls and woodwork. Tex. Agr. Col. Ext. Cir. 112, 8 p., illus. College Station, 1944. 275.29 T312C
Finishing plywood included.

595. FITZPATRICK, J. H. New, lightweight plywood floor has many uses. Wood Prod. 49(2): 24, 26, 41. Feb. 1944. 99.82 W856

596. GIESE, H., and BRIDGMAN, C. T. Precast tile beam floor. Iowa Agr. Expt. Sta. Res. Bul. 286, p. 201-282. Ames, 1941. 100 Io9

597. GRIFFIN, M. Your floors, give them color, good design, and wearbility and they'll reflect the beauty of each room. Successful Farming 37(4): 65, 86. Apr. 1939. 6 Su12

598. HELPHENSTINE, R. K., JR. Selection, installation, finish and maintenance of wood floors for dwellings. U. S. Dept. Agr. Cir. 489, 26 p. Washington, D. C., 1938. 1 Ag84C

600. KUSCHKE, B. M. Care and maintenance of wood floor finishes in the home. R. I. Agr. Expt. Sta. Bul. 276, 20 p., illus. Kingston, 1940. Ref. 100 R34S

601. NORTH CAROLINA. UNIVERSITY. STATE COLLEGE OF AGRICULTURE AND ENGINEERING EXTENSION SERVICE. Durable floor finishes. N. C. Agr. Col. Ext. Misc. Pam. 14, 4 p. Raleigh, 1939. 275.29 N811M

602. *SLAB FLOORS for basementless house. Amer. Builder and Bldg. Age 65 (1): 70, 84-85. Jan. 1943. 296.8 Am3
How to insulate and moistureproof concrete floors laid directly on the ground.

603. TEESDALE, L. V. Preventing cracks in new wood floors. U. S. Dept. Agr. Leaflet 56, 5 p., illus. Washington, D. C., 1930. 1 Ag84L

604. TIMBER DEVELOPMENT ASSOCIATION, LIMITED. Wood flooring; the preparation, laying, finishing and properties of the various types of wood flooring. 37 p., illus. London, 1944. 99.77 T48W

605. *U. S. NATIONAL BUREAU OF STANDARDS. Care of floors [with list of references] U. S. Natl. Bur. Standards, Letter Cir. LC764, 23 p., processed. Washington, D. C., 1944.
Supersedes LC388 and LC627.

606. WHITTEMORE, H. L., STANG, A. H., and PARSONS, D. E. Structural properties of a precast joist concrete floor construction sponsored by the Portland Cement Association. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 62, 11 p., illus. Washington, D. C., 1940. Ref. 157.88 B862

607. WHITTEMORE, H. L., STANG, A. H., and FISHBURN, C. C. Structural properties of a "Tilecrete" floor construction sponsored by Tilecrete Floors, Inc. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rept. BMS 16, 6 p., illus. Washington, D. C., 1939. Ref. 157.88 B862
Construction consists of expanded steel joists, tile fillers, concrete fill, and wood-block finish.

608. WHITTEMORE, H. L., STANG., A. H., and FISHBURN, C. C. Structural properties of one of the "Keystone Beam Steel Floor" constructions sponsored by the H. H. Robertson Company. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 10, 8 p., illus. Washington, D. C., 1939. Ref. 157.88 B862

"The floor consisted of cellular sheetsteel panels, which were the principal structural members. The upper face was covered by a concrete fill and a finish floor of magnesium oxychloride-cement composition. The lower face was covered with oil paint."

609. WHITTEMORE, H. L., STANG, A. H., and PARSONS, D. E. Structural properties of "Tilecrete Type A" floor construction sponsored by the Tilecrete Co. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 51, 11 p., illus. Washington, D. C., 1940. 157.88 B862

610. WHITTEMORE, H. L., STANG, A. H., and PHELAN, V. B. Structural properties of "Wheeling Long-Span Steel Floor" construction sponsored by the Wheeling Corrugating Company. U. S. Natl. Bur. Standards. Bldg. Materials and Struc. Rept. BMS 15, 7 p., illus. Washington, D. C., 1939. Ref. 157.88 B862

Sheet steel channel-shaped joists assembled by welding the wide overlapping upper flanges to form a continuous sheet-steel sub-floor to which the finished floor and ceilings were attached.

Insulation, Wall Boards, and Siding

611. ASBESTOS CEMENT PRODUCTS INDUSTRY. How to build it with asbestos. Helpful hints for busy farmers. 24 p. N. Y., 194-? 296 As1

For exterior sidings, shingles, interior finish for bathrooms and kitchens, lining furnace and work rooms, attic rooms, clothes chutes, closets and storerooms, etc.

612. BARRE, H. J. Between you and the weatherman. Successful Farming 42(11): 27, 96-97. Nov. 1944. 6 Su12

Insulation of buildings and farm house.

613. BLACKBURN, J. B. Insulation board an important factor in retail lumber dealer's volume. Mis. Val. Lumberman 76(2): 70, 72, illus. Jan. 12, 1945. 99.81 M69

Expect good farm market, wide use in home construction, and use for attic and basement jobs.

614. CELLULATED GLASS blocks for insulation. Heating and Ventilating 42 (2): 63-65. Feb. 1945. 291.8 H35

615. CELOTEX CORPORATION. Housing for farm profits. 43 p., illus. Chicago, Ill., 1939.

Roofing, insulation and interior finishes for the farm home.

616. CLOSE, P. D. Building insulation; a treatise on the principles and application of heat and sound insulation for buildings. Ed. 2, 328 p., illus. Chicago, Ill., Amer. Tech. Soc., 1945.

617. DART, C. Storm windows and doors are zero chasers. Successful Farming 41(11): 22-23, 42, 43. Nov. 1943. 6 Su12

618. EASTON, A. H., and PECK, M. F. Structural properties of "Precision-Built, Jr." prefabricated wood-frame wall construction sponsored by the Homasote Co. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 72, 14 p., illus. Ref. p. 14. Washington, D.C., 1941. 157.88 B862

With the collaboration of R. F. Luxford, Forest Products Laboratory, U. S. Dept. of Agriculture.

Light weight wood frame with "Homasote" insulating fiber-board fastened to each face by glue and nails.

619. GLASS FIBERS for insulation. Heating and Ventilating. 42(3): 59-61. Mar. 1945. 291.8 H35

620. HOUSES FOR defense. 7 p., illus., plan. [New York, John B. Pierce Foundation, 1941.
Also in Architect. Forum, Nov. 1941. 296.8 B76
Prefabricated houses using Celotex Cemesto Board walls.

621. INSULATION BOARD for home building. Amer. Builder and Bldg. Age 61 (12): 43-71, illus. Dec. 1939. 296.8 Am3
Uses: beautiful interiors with insulation board products, base for paint and wall coverings, sheathing, as plaster base, roof and ceiling insulation, heat insulation, sound condition.

622. JESSUP, D. A., BOGATY, H., and WEISSBERG, S. G. Properties and performance of fiber tile boards. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 77, 6 p., illus. Washington, D. C., 1941. 157.88 B862
Compressed wood fiber boards coated on one side with a synthetic plastic.

623. JESSUP, D. A., WEBER, C. G., and WEISSBERG, S. G. Stability of fiber building boards as determined by accelerated aging. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 50, 6 p. Washington, D. C., 1940. 157.88 B862

624. JESSUP, D. A., WEBER, C. G., and WEISSBERG, S. G. Stability of fiber sheathing boards as determined by accelerated aging. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rpt. BMS 69, 4 p. Washington, D. C., 1941. 157.88 B862

625. KRATZ, A. P., and KONZO, S. Fuel savings resulting from use of insulation and storm windows; a report of an investigation conducted by the Engineering Experiment Station, University of Illinois, in cooperation with the National Warm-air Heating and Air Conditioning Association. Ill. Engin. Expt. Sta. Bul. 355, 40 p., plans. Urbana, 1944. 290.9 I162B

626. MILLER, W. T. What thickness insulation? Amer. Builder and Bldg. Age 62(10): 86, 88. Oct. 1940.
Heating costs analyzed for test home with and without ample insulation.

627. PROMERSBERGER, W. J. Insulating farm buildings. N. Dak. Agr. Expt. Sta. Bul. 325, 11 p., illus. Fargo, 1943. 100 N813

628. SCHWEIN, H. J. Gypsum board in farm building construction. Agr. Engin. 25: 477-478. Dec. 1944. 58.8 Ag83

629. SOUND CONDITIONING may be as important as air conditioning in the postwar home. Architect. Forum 81(3): 12-14, 198, illus. Sept. 1944. 296.8 B76

630. SWEENEY, O. R., and ARNOLD, L. K. Studies on the manufacture of insulating board. Iowa. Engin.Expt. Sta. Bul. 136, 75 p., illus. Ames, 1937. 290.9 Io9
Insulating board from cornstalks and other agricultural by-products.

631. U. S. FOREST SERVICE. FOREST PRODUCTS LABORATORY. Weatherproof solid fibreboard; an evaluation of the quality of commercial boards and the development of an improved weatherproof board. U. S. Forest Serv. Forest Prod. Lab. Mimeog. R1444, 9 p. Madison, Wis., 1944. 1.9 F761R

632. WALLACE, R. H. The use of cellulose film for insulation. 12 p., rev., processed. Storrs, Univ. of Conn., Div. of Botany, 1940. 291 W153

633. WEBER, C. G., and WEISSBERG, S. G. Properties of some fiber building boards of current manufacture. U. S. Natl. Bur. Standards. Bldg. Materials and Struct. Rept. BMS 13, 5 p. Washington, D. C., 1939. 157.88 B862

634. WILLIS, R. B. Sound advice. Better Homes & Gardens 19(4): 22-23, 60, illus. Dec. 1940.
Soundproofing.

635. WITZEL, S. A. Stormproofing. Successful Farming 38(9): 34-36. Sept. 1940. 6 Su12
Insulation, storm windows, caulking and weatherstripping.

Maintenance and Modernization

636. ASHBY, W., and NASH, W. H. Modernizing farmhouses. U. S. Dept. Agr. Farmers' Bul. 1749., 62 p., slightly rev., illus. Washington, D. C., 1944. 1 Ag84F
Presents 18 examples of remodeling, some actual and some typical conditions, with alternate plans in several cases.

637. BATHROOM SPREES for a holiday house. Amer. Home 24(1): 40-41, illus. June 1940. 80 Am313
A few built-in ideas for old bathrooms.

638. BETTER HOMES & GARDENS. Better homes & gardens' New ideas for remodeling your home, edited by John Normile...with chapter introductions by Royal Barry Wills. 198 p., illus., plans. Des Moines, 1945. 296 B463

639. BROWN, M. A. Gjedrums remodel their home. Successful Farming 40 (3): 58-59, 82, 83, illus., plan. Mar. 1942. 6 Su12
Remodeled farmhouse in Minnesota.

640. BROWN, M. A. One-room schoolhouse is now a four-room home. Successful Farming 40(10): 73, 84, 85, illus. Oct. 1942. 6 Su12

641. BRUNKOW, O. E., and LA ROCK, M. J. Their home kept step for 60 years. Successful Farming 39(2): 18-19, 72, 73, illus., plan. Feb. 1941. 6 Su12
A remodeled farmhouse in Wisconsin.

642. BRUNKOW, O. E. "Up to the minute." Successful Farming 39(9): 14-15, 24, illus., plan. Sept. 1941. 6 Su12
Remodeled farmhouse in Illinois.

643. BURBANK, N. L. Practical job pointers. 129 p., illus. New York, Simmons-Boardman Pub. Corp. [1940] 296 B89P
Short cuts and new methods of doing old jobs of interest to builders. Contains chapters on closets-shelves-built in equipment; painting-finishing; sanitary equipment; electrical wiring; windows; doors; etc.

644. CARTER, D. G. How to add a bathroom. Farm Jour. 68(5): 56. May 1944. 6 F2212

645. COLLINS, A. F. Keeping your house in repair. 314 p. New York, D. Appleton-Century Co., 1941. 323 C69
Roof, masonry, plastering, stucco, concrete, painting, papering, plumbing, heating plant, electric installation, and builder's hardware repairing.

646. COSTAIN, M. Room the Truitts built. Country Gent. 114: 83, 101, illus. Oct. 1944. 6 C833
Room remodeled into playroom with built-in.

647. DOWDY, W. V. 4-H home improvement handbook. Ga. Agr. Col. Ext. Bul. 509, 34 p., illus. Athens, 1944. 275.29 G29B
Units of work outlined include: A victory home for Georgia farm families; home safety; lamps and lighting for the farm home; selecting interior finishes for the farm home; homemade furniture for the farm home, etc. Minimum housing standards for farm homes are listed and clothes closets are considered.

648. FARM HOUSE. Architect. Forum 81(5): 96-99, illus., plan. Nov. 1944. 296.8 B76
New York State College of Home Economics at Cornell remodels farmhouse at Watkins Glen, N. Y. Built-in fittings shown. Features dual purpose rooms.

649. FITZGERALD, M., and WOODRUFF, L. Small repairs around the house. Mo. Agr. Col. Ext. Manual 31, 16 p., illus. Columbia, 1943. 275.29 M69Ma

650. GORDON, O. V. How to share a house with the hired man. Successful Farming 39(8): 28. Aug. 1941. 6 Su12
Second-story remodeled into apartment.

651. HAWKINS, J. H. Your house, its upkeep and rejuvenation. 224 p., illus. N. Y., Barrows, 1943. 323 H31

652. HOLLOWAY, M. S. Short-changed on closets? Better Homes and Gardens 21(7): 20-21. Mar. 1943. 80 F9424
Remodeled closets in U. S. Gypsum Research House, in Park Ridge, Illinois, are illustrated and plans included.

653. HOUSE AND GARDEN. House & Garden's wartime manual for the home. 128 p., illus. Greenwich, Conn., Conde Nast Press, 1943. 321 H813
House care, home repairs, how to keep warm on less fuel, making the most of wartime quarters, how to convert waste space into storage space, how to make closets, etc.

654. HOUSE MODERNIZATION. Architect. Rec. 87(5): 89-108, illus., plans. May 1944. 296.8 Ar23
Partial contents: For better remodeling practice...a discussion and check list applicable to all types of jobs, by Burton A. Bugbee, p. 94-97; Illinois barn becomes house, p. 98-101; New England farmhouse brought up to date, p. 102-103; Abandoned winery transformed [on 25-acre plot about 60 miles from San Francisco], p. 106-108.

655. HUNT, W. J. Making room for wartime help. Successful Farming 41 (9): 42, 44, illus, plan. Sept. 1943. 6 Su12
Remodeling farm houses.

656. MOBLEY, D. C. More livable homes; a portfolio of practical ways to improve home surroundings at moderate cost. 125 p., processed, illus. New York, The Author [1940] Ref. p. 123-125. 318 M71

657. REED, K. E. Let's work magic. Fla. Univ. Col. Ed. Proj. in Appl. Econ. Book S-12-5, 20 p., processed. Gainesville, 1942.
Teaching materials for grade 12 on refinishing old furniture.
Similar material for grades 7-11 issued under same title by same author. Grade 7 covers making fire screen, repairing screens and window shade, planting grass, finishing walls, applying paint and finishing and caring for floors. Grade 8: Building conveniences for storage in the bedroom and furnishings for bedroom. Grade 9: Making a simple shower, how to have a kitchen sink and running water, adding built-in conveniences for dishes, cleaning equipment, making double decker beds, improving rural yard, finishing interiors of unsealed houses. Grade 10: Rearranging rooms. Grade 11: Making furniture.

658. RESURRECTION OF an old bathroom. Better Homes & Gardens 23(7): 18-19, illus., plan. Mar. 1945. 80 F9424

659. SHULTZ, O. M. Improving our homes ourselves. Fla. Univ. Col. Ed. Proj. in Appl. Econ. Book S-7-8, 110 p., processed., illus. Gainesville, 1943.
Teaching material preferably for grade seven.

660. TINDALL, C. What a comfortable home. Mo. Ruralist 86(3): 5, 20. Feb. 10, 1945. 6 R8891
A remodeled farm house in Missouri.

661. TUOMEY, D. The home mechanic. 182 p., illus. N. Y., Macmillan Co., 1943. 323 T83
Painting interior and exterior of the house, how to repair brickwork, roofs, plastering, heating, and plumbing, how to handle tools and make such things as stairs, bookcases, paneling, Colonial fence, trellis, arbor, etc.

662. U. S. OFFICE OF EDUCATION. The house: a rampart for home defense. U. S. Off. Ed. Misc. 2712-9, 79 p., and 4-p. Sup., processed. Washington, D. C., 1942. 173 V85Mi
For teaching ways of improvement for homes of limited means.
The Supplement is a bibliography of bulletins and booklets on home improvement.

663. VAN VLACK, C. H. Is your house worth remodeling? Successful Farming 43(1): 20-21, 33, 36, 37, illus. Jan. 1945. 6 Su12

664. WARREN, G. M. Simple plumbing repairs in the home. U. S. Dept. Agr. Farmers' Bul. 1460, rev. 13 p., illus. Washington, D. C., 1936. 1 Ag84F

665. WHITMAN, R. B. First aid for the ailing house. Ed. 3, rev., 359 p., illus. N. Y., McGraw-Hill, Inc. [c1942] 323 W59
Includes much information on substitutes for the building materials on the priority lists.

666. WICHERS, H. E. Remodeling possibilities for farm houses. Agr. Engin. 19: 72. Feb. 1938. 58.8 Ag83

667. WICHERS, H. E. There's always room for a bathroom. Successful Farming 38(10): 20, 48. Oct. 1940. 6 Su12
Four typical house plans are illustrated showing how a bathroom could be installed.

668. WILSON, W. E. A new room for new comfort. Business of Farming 3 (7): 8-9, illus. Winter issue, 1945. 6 B96
Remodeling farmhouses. Addition of living-dining room with non-critical materials.

669. WOOLEY, J. C. Farm building repair. Mo. Agr. Expt. Sta. Cir. 279, 20 p. Columbia, 1943. 100 M693

Masonry and Concrete

670. ALLEN, M. H. Tips for dealers on estimating clay tile construction for masonry farm buildings. Miss. Val. Lumberman 74(22): 7-9. May 28, 1943. 99.81 M69
Charts and tables.

671. CENTRAL HOUSING COMMITTEE ON RESEARCH, DESIGN AND CONSTRUCTION. Masonry cavity walls; a study by the USHA Technical Division. Cent. Housing Com. on Res., Design and Construct. Tech. Bul. No. 2 p. H-1-H-2, processed. Washington, D. C., 1941. 296.29 C332

Based on investigation made by A. M. Korsmo and B. M. Thorud, in cooperation with D. E. Parsons of the National Bureau of Standards, Masonry Section.

672. CONCRETE handbook; everything you need to know to make use of this universal building material. 96 p., illus. Chicago, Pop. Mech. Co., 1943. 299 C74

A chapter on Permanent Farm Construction considers concrete cisterns, well curbs and platforms and small storage cellar. Includes instruction for making a sentic tank, fences, walls, walks, steps, driveways, floors, etc., and directions for making and for coloring cement and for making miscellaneous garden accesories.

673. GARDNER, H. A. Comparative tests on finishes for Portland cement structures in cooperation with Portland Cement Association. Natl. Paint, Varnish and Lacquer Assoc. Sci. Sect. Cir.612, p. 43-48, illus. Washington, D. C., 1941. 306.9 P162C

Painting tests.

674. GIESE, H. A practical course in concrete; a textbook for classroom and laboratory, including demonstrations and problems. 63 p., illus. Chicago, Ill., Portland Cement Assoc., 1944.

675. *GLENN, H. E. Native cane reinforcement in concrete. Clemson College tests indicate a limited use of abundant material. Civil Engin. 13: 386-388. Aug. 1943. 290.8 C49

Utilization of bamboo for concrete reinforcement.

676. GREAT BRITAIN. DEPT. OF SCIENTIFIC AND INDUSTRIAL RESEARCH. BUILDING RESEARCH BOARD. Wartime building construction. 1st Amer. Ed., 151 p., illus. Brooklyn, N. Y., Chemical Pub. Co., Inc. 1942. 290 G81

Partial contents: The application of reinforced concrete to wartime building; House construction; Jointing mortars for brickwork.

677. HOPFEN, H. J. Adoption of new technical methods in wall construction for rural buildings. Internatl. Rev. Agr. 31: 273-276T. July/Aug. 1940. 241 In82A

Use of hollow blocks of brick concrete in Germany.

678. KAISER, W. G. Concrete with minimum of steel. Agr. Engin. 23: 347-348, 351. Nov. 1942. 58.8 Ag83

688. PORTLAND CEMENT ASSOCIATION. Concrete handbook of permanent farm construction. 71 p., illus. Chicago, Ill. [1943?]
Includes, floors, walks and pavements; footings, foundations and basement walls; masonry construction; water supply and farm sewage disposal; and improvements around the house.

689. PORTLAND CEMENT ASSOCIATION. Concrete improvements around the home. 38 p., illus. Chicago, Ill. [1943?]
Includes driveways, sidewalks, steps, walls, pools, porch floors, septic tanks, play court, posts, outdoor fireplace, etc.

690. PORTLAND CEMENT ASSOCIATION. Plans for concrete farm buildings. 55 p., illus. Chicago, Ill., 1944.
Includes water supply tank and footings, foundations, basement walls, floors, and masonry construction.

691. PORTLAND CEMENT ASSOCIATION. Soil-cement mixtures; laboratory handbook. 79 p., illus. Chicago, Ill. [1942?]

692. PORTLAND CEMENT ASSOCIATION. Suggested designs for small firesafe concrete homes. 15 p., illus. Chicago, Ill. [1944?]

693. PORTLAND CEMENT ASSOCIATION. Why people like concrete homes. [31 p.] illus., plans. Chicago, Ill. [1944?]

694. THORSON, A. W., and NELLES, J. S. Possibilities for utilization of pulverized coal ash. Mech. Engin. 60: 845-851, illus. Nov. 1938. Ref. 291.9 Am3J
Use in concrete and building blocks discussed. Mentions experimental work of Detroit Edison Co. in manufacture of Cottrell block. House made with Cottrell block illustrated.

695. SAWDUST cement. Wood 8: 248-250, 271-272. Nov., Dec. 1943. 99.82 W855

Self-built Homes and Native Materials

810. ANDERSON, J. This $1,020 home took "git up and get." Amer. Home 25 (6): 42-43. May 1941. 80 Am313
Built of earth by Mr. and Mrs. Anderson in Ocean Springs, Miss.

811. ARNOLD, E. L. Homemade homes. Ark. Agr. Col. Ext. Cir. 413, 14 p., illus., plans. Little Rock, 1938. 275.29 Ar4
Planning, types of houses and costs of homes which farmers can build themselves. Rock, log and rough-lumber houses are shown.

812. ASHBY, W., and HALLAUER, F. J. A program for rehabilitating farm buildings. U. S. Bur. Agr. Chem. and Engin., ACE 58, 5 p., processed. Washington, 1940. 1.932 A2Ag8

"Competent direction in the greater utilization of farm labor and native materials to supplement money resources offers a practical program."

813. CARTER, D. G. Investigations in low-cost housing. Ark. Agr. Expt. Sta. Bul. 422, 46 p., illus., plans. Fayetteville, 1942. 100 Ar42

Reports the study of 9 farm dwellings, which were constructed under the direction of the Arkansas Agricultural Experiment Station. The primary objective was to investigate cost factors and possible methods of reducing cost. Utilization of native materials and home labor were considered. Blueprint plans of houses are available.

814. CARTER, D. G. Study of rural housing. Ark. Agr. Expt. Sta. Bul. 364, 31 p. Fayetteville, 1938. Ref. 100 Ar42

Presents an analysis of the characteristics of plans and construction, the costs and values, and the relationships involved in the development of rural homes built with home contributions of labor and materials. Records were obtained in 1937 on 214 farm houses in Arkansas.

815. CHAPIN, H. R. How to sling mud-constructively. We build a 'dobe house with our own hands. Better Homes and Gardens 19(5): 14-15, 68, 69, illus., plan. Jan. 1941. 80 F9424

Adobe bricks made and house built by owner in California.

816. CLEGHORNE, J. W. Brickmaking on the farm. Union So. Africa. Dept. Agr. and Forestry. Bul. 231, 13 p., illus. Pretoria, 1941. 24 So84P

Study by Stanford University.

966. OGDEN, W. This TVA community boasts electric house heating. Elect. Merchandising 74(1): 42-43, 80, 82, 84, illus. July 1945.
Gives operating costs.

967. OTIS, C. K. Low-cost cooling for residences. Agr. Engin. 20: 279-282. July 1939. 58.8 Ag83
Cooling by night air. Depends on well insulated house.

968. PROBLEMS IN electric house heating. Elect. West 94(4): 72-73. Apr. 1945. 335.8 J82
Northwest house heating program would build 100,000 kw load in five years. Question confronting engineers is, shall application be by space heating, panel heating, heat storage or by the heat pump.

969. RABER, B. F., and HUTCHINSON, F. W. Optimum surface distribution in panel heating and cooling systems. Heating, Piping & Air Conditioning 15: 602-614. Nov. 1943. 291.8 H352
Second progress report of research sponsored by the American Society of Heating and Ventilating Engineers in cooperation with the University of California.
The first progress report was published in the Feb. 1942 issue (v. 14, p. 125-132).

970. RANDOLPH, H. F. Why panel heating? -- an experience report: Letter. Heating, Piping and Air Conditioning 13: 750-751. Dec. 1941. 291.8 H352
Report on three installations.

971. REALISM IN electric house heating. Elect. West 94(3): 61. Mar. 1945. 335.8 J82
Plan to sell 100,000 kw. for house heating in Northwest. Facing program as a whole.

972. REYNOLDS, T. W. Theory vs. practise. The sun as an aid to heating. Heating and Ventilating 37(11): 23. Nov. 1940. 291.8 H35

973. SEELEY, L. E., and KEATOR, F. W. Wood-burning space heaters. Yale Univ. School Engin. Serial 53, 7 p. New Haven, Conn., 1940. 290.9 Y1

Reprinted from Mech. Engin. 62: 864-870. Dec. 1940. 291.9 Am3J

A report on preliminary test of units designed especially for burning wood.

974. SENNER, A. H. Distillate burners. U. S. Dept. Agr. Cir. 335, 11 p. Washington, D. C., 1934. 1 Ag84C

Discusses "following principal uses: (1) For kitchen ranges; (2): for heating stoves and circulator heaters; (3): for domestic water heating; (4) for complete-house-heating and air-conditioning, to a limited extent."

975. SENNER, A. H. Heating the farm home. U. S. Dept. Agr. Farmers' Bul. 1698, 18 p., illus. Washington, D. C., 1933. 1 Ag84F

Supersedes Farmers' Bul. 1174, One-Register Furnaces, and 1194, Operating a Home Heating Plant.

976. SENNER, A. H. Oil burners for home heating. U. S. Dept. Agr. Cir. 406, 26 p. Washington, D. C., 1936. 1 Ag84C

Deals with power-operated types of oil burners.

This is a revision of and supersedes Dept. Cir. 405, The Domestic Oil Burner.

977. SENNER, A. H., and HOLBROOK, H. S. Liquified gas for the household. U. S. Dept. Agr. Leaflet 191, 8 p. Washington, D. C., 1939. 1 Ag84L
